New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. Outlining the controversies that have surrounded the academic discipline of English Literature since its institutionalization in the late nineteenth century, this important book draws on a range of archival sources. It addresses issues that are central to the identity of academic English - how the subject came into existence, and what makes it a specialist discipline of knowledge - in a manner that illuminates many of the crises that have affected the development of modern English studies. Atherton also addresses contemporary arguments about the teaching of literary criticism, including an examination of the reforms to A-Level literature. Back in 1994 at the game company 'CORE Design' in Derby, Lara Croft was born. Through eighteen months of pure hard work from the team, Tomb Raider was released in 1996 and became the success that we see today; taking part in the mid-nineties celebrations of Brit-Pop and Girl Power. This is the story of the team who were involved in creating the first two games, then leaving the series to a new team in 1998. Lara Croft brought class, comedy, and a James Bondian role to the game, dreamt up by Toby Gard and helped to become a pitch with Paul Douglas. The game was a gamble, but because everyone at the company believed in it, it led to huge success for everyone, except for Toby and Paul. 'The Making of Tomb Raider' goes into detail of how Lara and the games were born, alongside why Toby Gard and Paul Douglas left before the sequel was released. Throughout eleven chapters of countless interviews, this book will tell you who was responsible for creating the first two games; from its levels, its music, the many voices of Lara Croft, and much more. The team also reveals all about the star of the second game; Winston the Butler, and how he came to be by Joss Charnet. Over twenty people were interviewed for this story; from the pitch for what would be Tomb Raider, alongside the challenges along the way, up until the release of Tomb Raider 2 in 1997... Introducing the practice and procedure of trade marks in Ireland and at the EU Intellectual Property Office (EUIPO), this book steers clear of confusing legal jargon, explaining the main trade mark principles clearly and concisely. Several new chapters have been added to the Second Edition, addressing topics such as trade mark searching, online infringement and trade mark protection post-Brexit. Recent Irish legislation is also covered: - European Union (Trade Marks) Regulations 2018 (SI 561/2018) - Trade Marks (Amendment) Rules 2018 (SI 562/2018) - Trade Marks Act 1996 (Community Trade Mark) (Amendment) Regulations 2018 (SI 563/2018) - Trade Marks (Amendment) Rules 2019 (SI 588/2019 and 628/2019) - Copyright and Other Intellectual Property Law Provisions Act 2019 - Public Health (Standardised Packaging of Tobacco) Act 2015 Notable authorities are also considered, such as: - Galway Free Range Eggs Ltd v O' Brien and Ors [2016] IEHC 249 - Nutraceutical BV & anor v Nualtra Ltd [2016] IEHC 261; [2017] IEHC 253 - Aldi v Dunnes Stores [2019] IESC 41 - Cartier International & Ors v British Sky Broadcasting Limited & Ors [2014] EWHC 3354 (Ch), [2016] EWCA Civ 658 and [2018] UKSC 28 - Sky Ltd & Ors v Skykick UK Ltd & Anor [2020] EWHC 990 (Ch) and [2021] EWCA Civ 1121 - Aviaretto Ltd v Global Closing Room Ltd [2021] IEHC 377 This is an indispensable guide for lawyers, those working in the area of IP, candidates intending to sit the Trade Mark Agent exam at the Intellectual Property Office of Ireland, sole traders, entrepreneurs and anyone wanting to protect their brand. The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. The F8 Audit and Assurance paper aims to develop your knowledge and understanding of the process of carrying out an assurance engagement, using the external audit as an example. As well as emphasising the practical aspects of carrying out assurance engagements, this paper also seeks to establish your understanding of the professional regulatory framework in place. It focuses on the following key themes: * Audit framework and regulation, including ethical and professional considerations * Internal audit and how this differs from the external audit * The external audit process, from planning through to audit fieldwork and final review * Reporting - the audit report and other reports. The F8 Practice & Revision Kit provides you with a range of exam-standard questions in the style of the F8 paper, as well as a suggested question plan to assist you in your revision phase. All answers include useful references back to the Study Text so that you can go back to the material if you need to. Questions contain excellent commentary in the form of 'top tips' and 'easy marks' guidance to aid in perfecting your exam technique. The kit also contains three mock exams, including the pilot paper. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams. On 31st December 2020, the Brexit transition period ended and the new EU-UK partnership began. The second edition discusses the new EU-UK partnership, and the related agreements, looking at the effect these will have on businesses trading with the EU. The book then looks at each area pertinent to running a business and looks at the related advantages and disadvantages that arise from Brexit, e.g. the Brexit Trade and Cooperation Agreement, a new points-based immigration system, and customs and VAT rules on imports and exports. Entity303, the cruel villain who has poisoned vanilla Minecraft with dangerous and bizarre mods, was able to escape the sky-islands of Mystcraft, leaving the surface of Minecraft in a giant rocket. Gameknight999 knows Weaver must be sent back into the past so the timeline can be repaired and the eventual destruction of all the Minecraft worlds can be stopped. But to send him back, they must find the time-traveling portal that brought Weaver to the future. And only Entity303 knows the location. They have no choice; Gameknight999 and his friends must follow behind, landing on a strange and barren lunar landscape, a world stranger and more alien (in more ways than one) than any other Minecraft mod. It's here that they must battle outer space mobs, combat monster bosses, and find Entity303. But as they close in on the terrible user, Gameknight999 will discover Entity303's real scheme, and the very thought of what the evil user plans will fill everyone with terror. Can the User-that-is-not-a-user catch Entity303 as he travels through the cold reaches of universe, before it's too late? Come along with Gameknight999 on his most thrilling adventure yet, to a biome unlike anything else in the Overworld: outer space! Why do international organizations (IOs) look so different, yet so similar? The possibilities are diverse. Some international organizations have just a few member states, while others span the globe. Some are targeted at a specific problem, while others have policy portfolios as broad as national states. Some are run almost entirely by their member states, while others have independent courts, secretariats, and parliaments. Variation among international organizations appears as wide as that among states. This book explains the design and development of international organization in the postwar period. It theorizes that the basic set up of an IO responds to two forces: the functional impetus to tackle problems that spill beyond national borders and a desire for self-rule that can dampen cooperation where transnational community is thin. The book reveals both the causal power of functionalist pressures and the extent to which nationalism constrains the willingness of member states to engage in incomplete contracting. The implications of postfunctionalist theory for an IO's membership, policy portfolio, contractual specificity, and authoritative competences are tested using annual data for 76 IOs for 1950-2010. Transformations in Governance is a major academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and the VU Amsterdam, and Walter Mattli of the University of Oxford. This volume - from the Soviet Domestic Politics workshop sponsored by the Social Science Research Council - marks an end and a new beginning, that is, it deals with the end of Sovietology, and the arrival (the beginning) of a new generation of scholars and their ideas in the social sciences. After 1949, the British Empire in Hong Kong was more vulnerable than the lack of Chinese demand for return and the success of Hong Kong's economic transformations might have suggested. Its vulnerability stemmed as much from Britain's imperial decline and America's Cold War requirements as from a Chinese threat. It culminated in the little known '1957 Question', a year when the British position in Hong Kong appeared more uncertain than any time since 1949. This is the first scholarly study that places Hong Kong at the heart of the Anglo-American relationship in the wider context of the Cold War in Asia. Unlike existing works, which tend to treat British and US policies in isolation, this book explores their dynamic interactions - how the two allies perceived, responded to, and attempted to influence each other's policies and actions. It also provides a major reinterpretation of Hong Kong's involvement in the containment of China. Dr Mark arguesthat, concerned about possible Chinese retaliation, the British insisted and the Americans accepted that Hong Kong's role should be as discreet and non-confrontational in nature as possible. Above all, top decision-makers in Washington evaluated Hong Kong's significance not in its own right, but in the context of the Anglo-American relationship: Hong Kong was seen primarily as a bargaining chip to obtain British support for US policy elsewhere in Asia. By using a variety of British and US archival material as well as Chinese sources, Dr Mark examines how the British and US government discussed, debated, and disagreed over Hong Kong's role in the Cold War, and reveals the dynamics of the Anglo-American alliance and the dilemmas of small allies in a global conflict. The years 1909-1918 can be regarded as formative for MI5, an era in which it developed from a small counterespionage bureau into an established security intelligence agency. MI5 had two main roles during this period; counterespionage, and advising the War Office on how to deal with the police and the civilian population, particularly foreign nationals in Britain. Using hitherto neglected documents from official archives, this study examines how MI5 foiled the spies of the Kaiser during the First World War, paying particular attention to the preventive measures the organization instituted to 'frustrate' espionage and how its investigations to 'cure' espionage were conducted. In so doing, intelligence specialist, Chris Northcott, also delivers an appreciation of how MI5 saw its work as being divided between preventive measures and investigative work, providing an informative and intriguing insight into MI5's development during its first ten years. MI5 began as a one-man affair in 1909, tasked with the limited remit of ascertaining the extent of German espionage in Britain amidst an uncertain future. By the armistice MI5's role had expanded considerably and it had begun to develop into an established security intelligence agency, with hundreds of personnel spread over six branches covering the investigation of espionage, records, ports and travelers and alien workers at home and overseas. This book offers an original and important contribution to our knowledge of the origins of Britain's security services. In using the example of MI5's contest against German spies during the First World War era, it forms a groundbreaking study of counterespionage strategy and tactics, and it poses the stimulating question of 'how to measure' the effectiveness of a counterespionage agency. It also sets out probably the most detailed description of MI5's organizational structure available. It covers constitutional changes, corruption, the civil service, the political cultu This book provides an introduction to the mathematical and algorithmic foundations of data science, including machine learning, high-dimensional geometry, and analysis of large networks. Topics include the counterintuitive nature of data in high dimensions, important linear algebraic techniques such as singular value decomposition, the theory of random walks and Markov chains, the fundamentals of and important algorithms for machine learning, algorithms and analysis for clustering, probabilistic models for large networks, representation learning including topic modelling and non-negative matrix factorization, wavelets and compressed sensing. Important probabilistic techniques are developed including the law of large numbers, tail inequalities, analysis of random projections, generalization guarantees in machine learning, and moment methods for analysis of phase transitions in large random graphs. Additionally, important structural and complexity measures are discussed such as matrix norms and VC-dimension. This book is suitable for both undergraduate and graduate courses in the design and analysis of algorithms for data. Reappraising the character of Britain's most successful Labour government, the author provides a study of the Great Alliance between the Labour Party and the trade unions during the post-war period. It reveals that the failure of Atlee's government to support the demands of the workers for increased wages and work security, in favour of the demands of the financial markets, undermined the popularity of the Labour Party that had swept them to power in 1945.
