This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing. Placing economic considerations into a wider social sciences context, this is ideal reading not only for advanced undergraduate and masters students in economics, health economics and the economics of ageing, but also policy makers, students, professionals and practitioners in gerontology, sociology, health-related sciences and social care. This volume introduces the different conceptualisations of age and definitions of 'old age', as well as the main theories of individual ageing as developed in the disciplines of biology, psychology and sociology. It covers the economic theories of fertility, mortality and migration and describes the four main frameworks that can be used to study economics and ageing, namely the life cycle, the overlapping generations, the perpetual youth and the dynastic models. Whitlow worked for Jimmy Rae, a man who hides behind the facade of local businessman but whose empire has been built on fear and extortion. However, it appears that someone is trying to take over from Rae, someone who is willing to commit horrific killings to achieve their goal. Meanwhile, Tom Conway is looking for his oldest friend, John Hall, who is missing along with his young daughter, Rowan. As Conway starts to ask questions he finds himself in grave danger. Is there a link between the missing man and the spate of murders? Will Tom or Marnie discover the truth before it is too late? As the body count rises, Marnie realises that there is someone in the shadows, someone who will never rest until they have had their revenge. A compelling and haunting historical mystery An erudite and accessible survey of Jewish life and culture in the twentieth century, as reflected in seminal texts. Following The People and the Books, which "covers more than 2,500 years of highly variegated Jewish cultural expression" (Robert Alter, New York Times Book Review), poet and literary critic Adam Kirsch now turns to the story of modern Jewish literature. From the vast emigration of Jews out of Eastern Europe to the Holocaust to the creation of Israel, the twentieth century transformed Jewish life. The same was true of Jewish writing: the novels, plays, poems, and memoirs of Jewish writers provided intimate access to new worlds of experience. Kirsch surveys four themes that shaped the twentieth century in Jewish literature and culture: Europe, America, Israel, and the endeavor to reimagine Judaism as a modern faith. With discussions of major books by over thirty writers—ranging from Franz Kafka to Philip Roth, Elie Wiesel to Tony Kushner, Hannah Arendt to Judith Plaskow—he argues that literature offers a new way to think about what it means to be Jewish in the modern world. With a wide scope and diverse, original observations, Kirsch draws fascinating parallels between familiar writers and their less familiar counterparts. While everyone knows the diary of Anne Frank, for example, few outside of Israel have read the diary of Hannah Senesh. Kirsch sheds new light on the literature of the Holocaust through the work of Primo Levi, explores the emergence of America as a Jewish home through the stories of Bernard Malamud, and shows how Yehuda Amichai captured the paradoxes of Israeli identity. An insightful and engaging work from "one of America's finest literary critics" (Wall Street Journal), The Blessing and the Curse brings the Jewish experience vividly to life. Since the confirmation of Deng Xiaoping's policy of Opening and Reform in 1978, the People's Republic of China has undergone a liberalization of culture that has led to the production of numerous forms of avant-garde, experimental, and museum-based art. With a fast-growing international market and a thriving artistic community, contemporary Chinese art is riding a wave of prosperity, though issues of censorship still abound. Shedding light on the current art scene, Paul Gladston's Contemporary Chinese Art puts China's recent artistic output into the context of the wider cultural, economic, and political conditions that surround it. Providing a critical mapping of ideas and practices that have shaped the development of Chinese art, Gladston shows how these combine to bind it to the structure of power and state both within and outside of China. Focusing principally on art produced by artists from mainland China—including painting, film, video, photography, and performance—he also discusses art created in Taiwan, Hong Kong, Macau, and diasporic communities. Illustrated with 150 images, Contemporary Chinese Art unravels the complexities of politics, artistic practice, and culture in play in China's art scene.

James Hankins challenges the view that the Renaissance was the seedbed of modern republicanism, with Machiavelli as exemplary thinker. What most concerned Renaissance political theorists, Hankins contends, was not reforming laws but shaping citizens. To secure the social good, they fostered virtue through a new program of education: the humanities. One of our most provocative military historians, Victor Davis Hanson has given us painstakingly researched and pathbreaking accounts of wars ranging from classical antiquity to the twenty-first century. Now he juxtaposes an ancient conflict with our most urgent modern concerns to create his most engrossing work to date, A War Like No Other. Over the course of a generation, the Hellenic city-states of Athens and Sparta fought a bloody conflict that resulted in the collapse of Athens and the end of its golden age. Thucydides wrote the standard history of the Peloponnesian War, which has given readers throughout the ages a vivid and authoritative narrative. But Hanson offers readers something new: a complete chronological account that reflects the political background of the time, the strategic thinking of the combatants, the misery of battle in multifaceted theaters, and important insight into how these events echo in the present. Hanson compellingly portrays the ways Athens and Sparta fought on land and sea, in city and countryside, and details their employment of the full scope of conventional and nonconventional tactics, from sieges to targeted assassinations, torture, and terrorism. He also assesses the crucial roles played by warriors such as Pericles and Lysander, artists, among them Aristophanes, and thinkers including Sophocles and Plato. Hanson's perceptive analysis of events and personalities raises many thought-provoking questions: Were Athens and Sparta like America and Russia, two superpowers battling to the death? Is the Peloponnesian War echoed in the endless, frustrating conflicts of Vietnam, Northern Ireland, and the current Middle East? Or was it more like America's own Civil War, a brutal rift that rent the fabric of a glorious society, or even this century's "red state—blue state" schism between liberals and conservatives, a cultural war that manifestly controls military policies? Hanson daringly brings the facts to life and unearths the often surprising ways in which the past informs the present. Brilliantly researched, dynamically written, A War Like No Other is like no other history of this important war. This Revised Reprint of our 8th edition, the "gold standard" in community health nursing, Public Health Nursing: Population-Centered Health Care in the Community, has been updated with a new Quality and Safety Education in Nursing (QSEN) appendix that features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. Where can I find design inspiration? How will I know if my design is successful? If you approach these questions like an artist, with an artist's tools and ways of looking at the world, you will be able to design gardens that combine the unique character of a place with your innermost creative spirit. You'll make inspiring gardens that have real meaning, for yourself as well as others. In this luminous volume, landscape architect and artist W. Gary Smith explores the various means that artists use—including drawing, painting, sculpture, meditation, poetry, and dance—to create personal connections with the landscape that enrich and inform garden design. Part 1 focuses on simple techniques that anyone can use to nurture creativity, unleash the imagination, and get ideas down on paper. Part 2 shows how these techniques have shaped actual design projects—with spectacular results. Throughout, the author's friendly and encouraging voice removes the shroud of mystery surrounding the creative process and shows how even the least artistically inclined can tap into inner resources they never knew they had. Smith's own exuberant sketches and bold paintings illuminate the path from art to landscape. Infectiously engaging and unfailingly inspiring, this eye-opening book deserves to be read and reread by anyone who aspires to master the rich and demanding art of garden design. The change process is described in this text which examines the historical, social and economic influences on education policy reform. Chapters look at cross-cultural experiences of educational change and policy implementation as the authors lead us to an understanding of processes and forces involved. The three themes covered in this volume are: politics and reform; politics into policy and policy implementation; and educational reform phenomena. The authors argue that change takes a predictable format and, once understood, can be directed and managed.; This text is intended to be of interest to those involved in the planning and implementation of change and, along with Volume 2 "Case Studies in Educational Change", point the way to effective management of such change processes. This guide is designed for businesses seeking professional assistance in filling key positions.
