When One Wants Out And The Other Doesn't May 08 2022 For anyone who practices marriage and family therapy the author says they have one kind of client population that seems to be a modal or predominating type. For three decades he has experienced more marital situations where one of the couple wants "out" of the marriage and the other wants to "stay in" than any other type. The idea for this collection of first-person therapy methodologies developed after two successive national meetings of the American Association for Marriage and Family Therapy (AAMFT), in New York (1985) and Orlando (1986). The cases that were discussed were characterized by the presence of alcoholism, and drug and other addictions, rather than presentations that dealt with a polarized couple wherein the marriage had simply become a devitalized, ho-hum relationship. This volume seeks to address the balance.

The Divorced Child May 28 2021 Divorce is a reality of today's family life, but clinical research has shown that it is possible to mitigate its negative effects on children. Written in a warm and authoritative tone, Nowinski will teach parents to: · Focus on your child's new day-to-day reality · Identify early signs of trouble · Help your child through the separation process and help them develop coping skills that will remain with them through life

The Good Divorce Jul 18 2020 It's never too late to have a good divorce Based on two decades of groundbreaking research, *The Good Divorce* presents the surprising finding that in more than fifty percent of divorces couples end their marriages, yet preserve their families. Dr. Ahrons shows couples how they can move beyond the confusing, even terrifying early stages of breakup and learn to deal with the transition from a nuclear to a "binuclear" family--one that spans two households and continues to meet the needs of children. *The Good Divorce* makes an important contribution to the ongoing "family values" debate by dispelling the myth that divorce inevitability leaves emotionally troubles children in its wake. It is a powerful tonic for the millions of divorcing and long-divorces parents who are tired of hearing only the damage reports. It will make us change the way we think about divorce and the way we divorce, reconfirming our commitment to children and families.

F*ck Divorce Nov 02 2021 *A Divorcee's Empirical (and Slightly Irreverent) "What's Next" Guide to Life after Marriage* Just about everything about divorce sucks. It sucks away your time, your money, and occasionally your will to live. We know. We've been there. We've both been divorced and are now remarried . . . to each other. *F*ck Divorce* is not a book about divorcing (which stinks); it is a book about putting the pieces back together afterward (which doesn't have to). Using the latest scientific research, a bit of tough love, and a highly questionable sense of humor, psychologists and relationship scientists Erica Slotter, PhD, and Patrick Markey, PhD, will teach you how to navigate your post-divorce relationships with yourself, kids, and even your slug-breath ex-spouse. They'll hold your hand as

you navigate the complicated, exciting, and sometimes terrifying world of dating and sex as a born-again singleton and be by your side as you (hopefully) find your way to new love. Learn: Self-Care in the Post-Divorce Haze How to Rediscover the Newly Single You The Importance of Being Nice(ish) to Your Ex How to Help Your Kids Through the Sh*tstorm How to Survive the Awkwardness of First Dates . . . Again Navigating Your Newfound Sexy Time Divorce-Proofing: Keeping Marriage 2.0, or 3.0, Together So, welcome to the world of being newly unwed. It's good, bad, and ridiculous, and sometimes your blind date smells like soup. Pull up a chair, pour yourself a drink (or three), and let's do this sh*t.

Fundamentals of Marital Therapy Jun 28 2021 Fundamentals of Marital Therapy serves as an authoritative introduction to the field, making clear just how different it is to intervene within a marital context than it is to work with an individual. Designed to be practical, the presentation is divided into concise units, each building upon the last so that even the most complex of issues are exceptionally easy to follow. The author stresses methods of marital therapy that are proven to be effective. Common elements across different models are featured, permitting comparisons and contrasts - so that readers will be able to discern what works and what doesn't, and for whom. The key issues in couples therapy are highlighted, including couples' interactional patterns and how they impact on practice, common errors in treatment, solutions to familiar problems, and identification of couples for whom therapy is not practical.

Group Therapy for High-Conflict Divorce Apr 07 2022 The "No Kids in the Middle" (Kinderen uit de Knel) intervention programme addresses high-conflict divorce through a multi-family approach. This first English language edition contains descriptions of the therapeutic sessions, references to a homework book (van der Est et al.) for parents and their network, along with extra information about the theoretical foundations of the programme. The book starts with theoretical foundations and a summary of the scientific research behind the methodology before moving on to focus on the methodology of the intervention programme per session, with detailed descriptions of each therapeutic session. Through these session descriptions, the authors demonstrate how the theory of the methodology can be

put into practice within a group setting. The methodology is also conveyed in such a way that the key pillars and themes are clear, with a best-practice framework clearly demonstrated. Yet at the same time, the authors leave room for customization depending on the actual clients and therapists, and for this framework to be built upon further. With this programme now practiced and studied throughout Europe, *Group Therapy for High-Conflict Divorce* and its methodology will act as a living framework to help continuously improve practice and research among professional therapists, while also appealing to social workers and legal professionals.

Defusing the High-conflict Divorce Dec 03 2021 It has been estimated that nearly twenty percent of the one million divorces each year in the U.S. involve high-conflict relationships. Angry, emotional disputes related to custody, parenting time, child support payments, visitation and more may go on for years. Who suffers? The children, mostly. Post-divorce conflict may be the most significant factor in adjustment (or maladjustment) for children of divorce. Defusing the High-Conflict Divorce offers a

unique set of proven programs for quelling the hostility in high-conflict co-parenting couples, and "defusing" their prolonged, bitter and emotional struggles.

Family First Program Aug 31 2021 High-conflict divorce cases represent an economic problem for the families involved and the legal and health care systems and put children at elevated risk of multiple negative outcomes. Given the detrimental effects of high-conflict divorce cases, several states have regulations that require divorcing parents with children to attend an educational program in order to promote appropriate parenting strategies and child adjustment during the divorce. Although there is a lack of rigorous research evaluating the success of such mandated co-parenting education programs, it has been found that their effectiveness varies depending on participants' demographics. Considering that Hispanics represent a large minority group in the United States, that a significant portion of high conflict divorces occur in this population due to the increased stressors they experience, and the lack of existing post-divorce co-parenting training programs designed for Hispanics, the Family First Program is oriented to address the specifics of co-parenting for this population in the United States. The FFP program outlines a post-divorce co-parenting training program that caters to the unique service needs of Hispanic co-parents involved in high conflict divorce cases. The FFP's approach addresses their cultural, social, and language needs by incorporating cultural-sensitive elements within its content and evidenced-based interventions in order to reduce participation barriers.
