Understanding brain structure and principles of operation is one of the major challenges of modern science. Since the experiments by Galvanion frog muscle contraction in 1792, it is known that electrical impulses lie at the core of the brain activity. The technology of neuro-electronic interfacing, besides its importance for neurophysiological research, has also clinical potential, so called neuropr- thetics. Sensory prostheses are intended to feed sensory data into patient's brain by means of neurostimulation. Cochlear prostheses [1] are one example of sensory prostheses that are already used in patients. Retinal prostheses are currently under research [2]. Recent neurophysiological experiments [3, 4] show that brain signals recorded from motor cortex carry information regarding the movement of subject's limbs (Fig. 1.1). These signals can be further used to control external machines [4] that will replace missing limbs, opening the field of motor prosthetics, devices that will restore lost limbs or limb control. Pitt 2 1 Introduction Another group of prostheses would provide treatment for brain diseases, such as prevention of epileptic seizure or the control of tremor associated with Parkinson disease [5]. Brain implants for treatment of Epilepsy and Parkinson symptoms (Fig. 1.2) are already available commercially [6, 7]. Fig. 1.2. Implantable device for Epilepsy seizures treatment [7]. process of civil litigation, this is the only major civil work to adopt a narrative approach based on the chronology of a claim. Written by a team of expert practitioners and academics, it provides authoritative analysis on the process of civil litigation from commencement of a claim to enforcement of judgments, addressing civil procedure in the county courts, the High Court, the Court of Appeal, and the Supreme Court. The book also considers more specialist matters such as insolvency proceedings, sale of goods, and human rights, providing expert analysis on a comprehensive level. Commentary is combined with the text of the Civil Procedure Rules (CPR), Practice Directions (PD), and Pre-Action Protocols and Procedural Checklists, all fully cross-referenced to the text to ensure ease of use for the busy practitioner. As well as a detailed and user-friendly index the quick-reference guide inside the front cover provides an alternative point of access for those more familiar with the CPR. Also available, Blackstone's Civil Practice: The Commentary 2013 is a concise new book providing the unique commentary independently from the CPR, PD and other appendix materials. Electronic versions of the Procedural Checklists in Blackstone's Civil Practice 2013 are available from IRIS Laserform. The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world. The book unravels the mysteries of the criminal justice system, explaining how and why we sentence offenders; the reasons behind the system's technicalities, which can benefit the guilty; and why the system is miserly on victims' rights. It points out where we err, particularly with the parole system. Each chapter starts with a murder docudrama. Based on the authors' combined experience of seventy years working on

projects around the globe, Construction Equipment Management for Engineers, Estimators, and Owners contains hands-on, how-to information that you can put to immediate use. Taking an approach that combines analytical and practical results, this is a valuable reference for a wide r Contains the physical papers of the Netherlands. In R v Jogee [2016] UKSC 8, the UK Supreme Court fundamentally changed the law of accessory liability when it decided that the principles of joint enterprise had been misinterpreted for over 30 years. The Court abolished the head of liability known as parasitic accessory liability and replaced it with (re-stated) principles of assisting and encouraging. The judgment, widely reported and hailed as a 'moment of genuine legal history', sent shock waves around England and Wales as well as other common law jurisdictions that still operate 'parasitic' or 'extended' joint enterprise principles, and raised the hopes of hundreds of prisoners here and elsewhere who had been convicted under joint enterprise. This collection examines Jogee, subsequent Court of Appeal decisions and case law from other jurisdictions that re-considered their own joint enterprise principles in the wake of Jogee. Its chapters are authored by scholars and practitioners, all experts in the area of complicity, but each with their own experiences and views on the issues under debate. The result is the first comprehensive analysis of the implications of Jogee. The present volume is not just a source of reference for academics and practitioners; its aim is more ambitious in that it seeks to chart the way forward and to suggest solutions to problems created by Jogee for criminal law theory and practice. These Reports cover cases decided in the Courts of Appeal and Supreme Courts of the various territories listed ... below [Barbados, Guyana, Jamaica, Trinidad and Tobago, West Indies Associated States] and the Privy Council on appeal from the aforementioned Courts.
