The Effect Dec 24 2020 The Effect: An Introduction to Research Design and Causality is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams. Concepts are demonstrated with a heavy emphasis on graphical intuition and the question of what we do to data. When we “add a control variable” what does that actually do? Key Features: • Extensive code examples in R, Stata, and Python • Chapters on overlooked topics in econometrics classes: heterogeneous treatment effects, simulation and power analysis, new cutting-edge methods, and uncomfortable ignored assumptions • An easy-to-read conversational tone • Up-to-date coverage of methods with fast-moving literatures like difference-in-differences

The Day the World Stops Shopping Mar 19 2023 Consuming less is our best strategy for saving the planet—but can we do it? In this thoughtful and surprisingly optimistic book, journalist J. B. MacKinnon investigates how we may achieve a world without shopping. We can't stop shopping. And yet we must. This is the consumer dilemma. The economy says we must always consume more: even the slightest drop in spending leads to widespread unemployment, bankruptcy, and home foreclosure. The planet says we consume too much: in America, we burn the earth's resources at a rate five times faster than it can regenerate. And despite efforts to “green” our consumption—by recycling, increasing energy efficiency, or using solar power—we have yet to see a decline in global carbon emissions. Addressing this paradox head-on, acclaimed journalist J. B. MacKinnon asks, What would really happen if we simply stopped shopping? Is there a way to reduce our consumption to earth-saving levels without triggering economic collapse? At first this question took him around the world, seeking answers from America's big-box stores to the hunter-gatherer cultures of Namibia to communities in Ecuador that consume at an exactly sustainable rate. Then the thought experiment came shockingly true: the coronavirus brought shopping to a halt, and MacKinnon's ideas were tested in real time. Drawing from experts in fields ranging from climate change to economics, MacKinnon investigates how living with less would change our planet, our society, and ourselves. Along the way, he reveals just how much we stand to gain: An investment in our physical and emotional wellness. The pleasure of caring for our possessions. Closer relationships with our natural world and one another. Imaginative and inspiring, *The Day the World Stops Shopping* will embolden you to envision another way.

The Day the World Stopped Turning Jun 22 2023 Michael Morpurgo's *The Day the World Stopped Turning* is a middle-grade novel about an extraordinary boy who sees the world differently. In the unique landscape of the Camargue (France) during World War II, Lorenzo lives among the salt flats and the flamingos. There are lots of things he doesn't understand—but he does know how to heal animals, how to talk to them; the flamingos especially. He loves routine, and music too: and every week he goes to market with his mother. It's there he meets Kezia, a Roma girl, who helps her parents run their carousel—and who shows him how to ride the wooden horse as the music plays. But then the German soldiers come, with their guns. Everything is threatened, everything is falling apart: the carousel, Kezia and her family, even Lorenzo's beloved flamingos. Yet there are kind people even among soldiers, and there is always hope. . .

Against the Day Jan 05 2022 A New York Times Notable Book of the Year, a Washington Post Best Book of the Year Spanning the era between the Chicago World's Fair of 1893 and the years just after World War I, and constantly moving between locations across the globe (and to a few places not strictly speaking on the map at all), *Against the Day* unfolds with a phantasmagoria of characters that includes anarchists, balloonists, gamblers, drug enthusiasts, mathematicians, mad scientists, shamans, spies, and hired guns. As an era of uncertainty comes crashing down around their ears and an unpredictable future commences, these folks are mostly just trying to pursue their lives. Sometimes they manage to catch up; sometimes it's their lives that pursue them.

The Day the World Ended Nov 03 2021 The true story of a horrifying natural disaster—and the corruption that made it worse—by the New York Times—bestselling authors of *Voyage of the Damned*. In late April 1902, Mount Pelée, a volcano on the Caribbean island Martinique, began to wake up. It emitted clouds of ash and smoke for two weeks until violently erupting on May 8. Over 30,000 residents of St. Pierre were killed; they burned to death under rivers of hot lava and suffocated under pounds of hot ash. Only three people managed to survive: a prisoner trapped in a dungeon-like jail cell, a man on the outskirts of town, and a young girl found floating unconscious in a boat days later. So how did a town of thousands not heed the warnings of nature and local scientists, instead staying behind to perish in the onslaught of volcanic ash? Why did the newspapers publish articles assuring readers that the volcano was harmless? And why did the authorities refuse to allow the American Consul to contact Washington about the conditions? The answer lies in politics: With an election on the horizon, the political leaders of Martinique ignored the welfare of their people in order to consolidate the votes they needed to win. A gripping and informative book on the disastrous effects of a natural disaster coupled with corruption, *The Day the World Ended* reveals the story of a city engulfed in flames and the political leaders that chose to kill their people rather than give up their political power.

The World of Raymond Chandler Sep 20 2020 Raymond Chandler never wrote a memoir or autobiography. The closest he came to writing either was in—and around—his novels, shorts stories, and letters. There have been books that describe and evaluate Chandler's life, but to find out what he himself felt about his life and work, Barry Day, editor of *The Letters of Noël Coward* (“There is much to dazzle here in just the way we expect . . . the book is meticulous, artfully structured—splendid” —Daniel Mendelsohn; *The New York Review of Books*), has cannily, deftly chosen from Chandler's writing, as well as the many interviews he gave over the years as he achieved cult status, to weave together an illuminating narrative that reveals the man, the work, the worlds he created. Using Chandler's own words as well as Day's text, here is the life of “the man with no home,” a man precariously balanced between his classical English education with its immutable values and that of a fast-evolving America during the years before the Great War, and the changing vernacular of the cultural psyche that resulted. Chandler makes clear what it is to be a writer, and in particular what it is to be a writer of “hardboiled” fiction in what was for him “another language.” Along the way, he discusses the work of his contemporaries: Dashiell Hammett, James M. Cain, Hemingway, Fitzgerald, Agatha Christie, W. Somerset Maugham, and others (“I wish,” said Chandler, “I had one of those facile plotting brains, like Erle Gardner”). Here is Chandler's Los Angeles (“There is a touch of the desert about everything in California,” he said, “and about the minds of the people who live here”), a city he adopted and that adopted him in the post-World War I period . . . Here is his Hollywood (“Anyone who doesn't like Hollywood,” he said, “is either crazy or sober”) . . . He recounts his own (rocky) experiences working in the town with Billy Wilder, Howard Hawks, Alfred Hitchcock, and others. . . We see Chandler's alter ego, Philip Marlowe, private eye, the incorruptible knight with little armor who walks the “mean streets” in a world not made for knights (“If I had ever an opportunity of selecting the movie actor who would best represent Marlowe to my mind, I think it would have been Cary Grant.”) . . . Here is Chandler on drinking (his life in the end was in a race with alcohol—and loneliness) . . . and here are Chandler's women—the Little Sisters, the “dames” in his fiction, and in his life (on writing *The Long Goodbye*, Chandler said, “I watched my wife die by half inches and I wrote the best book in my agony of that knowledge . . . I was as hollow as the places between the stars.” After her death Chandler led what he called a “posthumous life” writing fiction, but more often than not, his writing life was made up of letters written to women he barely knew.) Interwoven throughout the text are more than one hundred pictures that reveal the psyche and world of Raymond Chandler. “I have lived my whole life on the edge of nothing,” he wrote. In his own words, and with Barry Day's commentary, we see the shape this took and the way it informed the man and his extraordinary work.

The Gray Notebook Oct 22 2020 Josep Pla's masterpiece, *The Gray Notebook*, is one of the most colorful and unusual works in modern literature. In 1918, when Pla was in Barcelona studying law, the Spanish flu broke out, the university shut down, and he went home to his parents in coastal Palafrugell. Aspiring to be a writer, not a lawyer, he resolved to hone his style by keeping a journal. In it he wrote about his family, local characters, visits to cafés; the quips, quarrels, ambitions, and amours of his friends; writers he liked and writers he didn't; and the long contemplative walks he would take in the countryside under magnificent skies. Returning to Barcelona to complete his studies, Pla kept up his diary, scrutinizing life in the big city with the same unflagging zest and humor. Pla, one of the great Catalan writers, held on to this youthful journal for close to fifty years, reworking and adding to it, until he finally published *The Gray Notebook* as both the first volume and the capstone of his collected works. It is a beautiful, entrancing, delightful book—at once a distillation of the spirit of youth and the work of a lifetime.

The 4 Day Week Jul 19 2020 SHORTLISTED FOR THE BUSINESS BOOK AWARDS 2021 In *The 4 Day Week*, entrepreneur and business innovator Andrew Barnes makes the case for the four-day work week as the answer to many of the ills of the 21st-century global economy. Barnes conducted an experiment in his own business, the New Zealand trust company Perpetual Guardian, and asked his staff to design a four-day week that would permit them to meet their existing productivity requirements on the same salary but with a 20% cut in work hours. The outcomes of this trial, which no business leader had previously attempted on these terms, were stunning. People were happier and healthier, more engaged in their personal lives, and more focused and productive in the office. The world of work has seen a dramatic shift in recent times: the former security and benefits associated with permanent employment are being displaced by the less stable gig economy. Barnes explains the dangers of a focus on flexibility at the expense of hard-won worker protections, and argues that with the four-day week, we can have the best of all worlds: optimal productivity, work-life balance, worker benefits and, at long last, a solution to pervasive economic inequities such as the gender pay gap and lack of diversity in business and governance. *The 4 Day Week* is a practical, how-to guide for business leaders and employees alike that is applicable to nearly every industry. Using qualitative and quantitative data from research gathered through the Perpetual Guardian trial and other sources by the University of Auckland and Auckland University of Technology, the book presents a step-by-step approach to preparing businesses for productivity-focused

flexibility, from the necessary cultural conditions to the often complex legislative considerations. The story of Perpetual Guardian's unprecedented work experiment has made headlines around the world and stormed social media, reaching a global audience in more than seventy countries. A mix of trenchant analysis, personal observation and actionable advice, *The 4 Day Week* is an essential guide for leaders and workers seeking to make a change for the better in their work world.

The Day of the Triffids Nov 15 2022 The influential masterpiece of one of the twentieth century's most brilliant—and neglected—science fiction and horror writers, whom Stephen King called “the best writer of science fiction that England has ever produced.” “[Wyndham] avoids easy allegories and instead questions the relative values of the civilisation that has been lost, the literally blind terror of humanity in the face of dominant nature. . . . Frightening and powerful, Wyndham's vision remains an important allegory and a gripping story.”—The Guardian What if a meteor shower left most of the world blind—and humanity at the mercy of mysterious carnivorous plants? Bill Masen undergoes eye surgery and awakes the next morning in his hospital bed to find civilization collapsing. Wandering the city, he quickly realizes that surviving in this strange new world requires evading strangers and the seven-foot-tall plants known as triffids—plants that can walk and can kill a man with one quick lash of their poisonous stingers.

Dorothy Day: The World Will Be Saved by Beauty Oct 14 2022 “An intimate, revealing and sometimes wrenching family memoir of the journalist and social advocate who is now being considered for canonization” (The New York Times), told with illuminating detail by her granddaughter. Dorothy Day (1897-1980) was a prominent Catholic, writer, social activist, and co-founder of a movement dedicated to serving the poorest of the poor. Her life has been documented through her own writings as well as the work of historians, theologians, and academics. What has been missing until now is a more personal account from the point of view of someone who knew her well. *Dorothy Day: The World Will Be Saved by Beauty* is a frank and reflective, heartfelt and humorous portrayal written by her granddaughter, Kate Hennessy. Dorothy Day, writes Hennessy, is an unusual candidate for sainthood. Before her conversion, she lived what she called a “disorderly life,” during which she had an abortion and then gave birth to a child out of wedlock. After her conversion, she was both an obedient servant and a rigorous challenger of the Church. She was a prolific writer whose books are still in print and widely read. Although compassionate, Hennessy shows Day to be driven, dogmatic, loving, as well as judgmental, in particular with her only daughter, Tamar. She was also full of humor and laughter and could light up any room she entered. An undisputed radical heroine, called “a saint for the occupy era” by The New Yorker, Day's story unfolds against a backdrop of New York City from the 1910s to the 1980s and world events spanning from World War I to Vietnam. This thoroughly researched and intimate biography provides a valuable and nuanced portrait of an undersung and provocative American woman. “Frankly,” says actor and activist Martin Sheen, “it is a must-read.”

Earth vs. the Sci-Fi Filmmakers Mar 07 2022 Back in the era of black-and-white horror and sci-fi movies, “we didn't have special effects, or the money for 'em,” says Peter Graves, one of the genre's most popular stars. “But in those days, an unlimited amount of money wouldn't have gotten us much better special effects, because they didn't exist. We had to go with the stories and try to make them as believable as possible, and flash the outlandish things by quickly, so the audience never got a good, in-focus look at them!” Perhaps no films attracted more rabid fans and less critical acclaim than the genre movies of that era. The men and women who made the characters come to life are interviewed here, talking about their work, the behind-the-scenes action, and the impact the movies had on their careers. The interviewees are Gene Barry, Gary Clarke, Gary Conway, Merian C. Cooper, Robert Dix, Donnie Dunagan, Alex Gordon, Peter Graves, Gary Gray, Arch Hall, Jr., Stephen Kandel, Carolyn Kearney, Ken Kolb, Robert L. Lippert, Jr., Jan Merlin, Mary Mitchel, Elliott Reid, Stanley Rubin, Frankie Thomas and Burt Topper. Extensively illustrated.

Krakatoa Sep 01 2021 Simon Winchester's brilliant chronicle of the destruction of the Indonesian island of Krakatoa in 1883 charts the birth of our modern world. He tells the story of the unrecognized genius who beat Darwin to the discovery of evolution; of Samuel Morse, his code and how rubber allowed the world to talk; of Alfred Wegener, the crack-pot German explorer and father of geology. In breathtaking detail he describes how one island and its inhabitants were blasted out of existence and how colonial society was turned upside-down in a cataclysm whose echoes are still felt to this day.

Knowing the Day, Knowing the World Jul 11 2022 Based on more than a decade of research in Palikur lands known as Arukwa in the state of Amapá, Brazil, *Knowing the Day, Knowing the World* reconsiders the dialogue between formal scholarship and Amerindian ways of knowing. Beginning and ending with a public archaeology project in the region, the book engages head-on with Amerindian ways of thinking about space, time, and personhood. Demonstrating that Palikur knowledges are based on movement and a careful theorization of what it means to be present in a place, the book makes a sustained case for engaging with different ways of knowing. It shows how this kind of research can generate rich dialogues about nature, reality, and the ethical production of knowledge. The structure of the book reflects a gradual comprehension of Palikur ways of knowing during the course of field research. The text enters into the ethnographic material from the perspective of familiar disciplines—history, geography, astronomy, geometry, and philosophy—and explores the junctures in which conventional disciplinary frameworks cannot adequately convey Palikur understandings. Beginning with reflections on questions of personhood, ethics, and ethnicity, the authors rethink assumptions about history and geography. They learn and recount an alternative way of thinking about astronomy from the Palikur astronomical narratives, and they show how topological concepts embedded in everyday Palikur speech extend to different ways of conceptualizing landscape. In conclusion, they reflect on the challenges of comprehending alternative cosmologies and consider the insights that come from allowing ethnographic material to pose questions of modernist frameworks.

The Day the World Came to Town Aug 24 2023 The True Story Behind the Events on 9/11 that Inspired Broadway's Smash Hit Musical *Come From Away*, Featuring All New Material from the Author When 38 jetliners bound for the United States were forced to land at Gander International Airport in Canada by the closing of U.S. airspace on September 11, the population of this small town on Newfoundland Island swelled from 10,300 to nearly 17,000. The citizens of Gander met the stranded passengers with an overwhelming display of friendship and goodwill. As the passengers stepped from the airplanes, exhausted, hungry and distraught after being held on board for nearly 24 hours while security checked all of the baggage, they were greeted with a feast prepared by the townspeople. Local bus drivers who had been on strike came off the picket lines to transport the passengers to the various shelters set up in local schools and churches. Linens and toiletries were bought and donated. A middle school provided showers, as well as access to computers, email, and televisions, allowing the passengers to stay in touch with family and follow the news. Over the course of those four days, many of the passengers developed friendships with Gander residents that they expect to last a lifetime. As a show of thanks, scholarship funds for the children of Gander have been formed and donations have been made to provide new computers for the schools. This book recounts the inspiring story of the residents of Gander, Canada, whose acts of kindness have touched the lives of thousands of people and been an example of humanity and goodwill.

Channel of Peace Jun 17 2020 One of the inspirations for the smash hit Broadway musical *Come From Away*, *Channel of Peace* is an unforgettable memoir of the extraordinary kindness afforded to passengers whose flights were re-routed to Gander, Newfoundland, on September 11, 2001. When Kevin Tuerff and his partner boarded their flight from France to New York City on September 11, 2001, they had no idea that a few hours later the world — and their lives — would change forever. After U.S. airspace closed following the terrorist attacks, Kevin, who had been experiencing doubts about organized religion, found himself in the small town of Gander, Newfoundland, with thousands of other refugees or “come from aways.” *Channel of Peace* is a beautiful account of how the people of Gander rallied with boundless acts of generosity and compassion for the “plane people,” renewing Kevin's spirituality and inspiring him to organize an annual and growing “giving back” day. His unforgettable and uplifting story, along with others, has reached thousands of people when it was incorporated into the Broadway musical *Come From Away*.

Around The World In Eighty Days Apr 08 2022 The pace of this kind of travel has not much changed since Fogg set out in 1872. Trains may be a little faster, but there are certainly no high-speed rail links yet across India, China or the USA. Passenger services have practically disappeared from the world's shipping lanes ... Recourse to air travel, even as a convenient means of escape, was not allowed.' Following the route taken by Phileas Fogg 115 years earlier, Michael Palin set out from the Reform Club to circumnavigate the world. The rules were simple, but nothing else about the trip

was straightforward... From a tour of Venice on a rubbish barge to ship spotting at the Suez Canal and the bicycle rush hour and snake snacks in China, this is an unparalleled tribute to man's ability to make life difficult for himself.
