Start series with the first book, *Date Night on Union Station*. A new species has jumped into the Sol system for a quick look, leading the Stryx to assign humans to the greeting mission. Dorothy and Kevin leave on a trading mission in his new ship, bringing the dog, and Samuel and Vivian start at the Open University. "Good SciFi comedy is as rare as hen's teeth. This was a fun read." Kelly Frank is EarthCent's top diplomat on Union Station, but her job description has always been a bit vague. The pay is horrible and she's in hock up to her ears for her furniture, which is likely to end up in a corridor because she's behind on rent for her room. Sometimes she has to wonder if the career she has put ahead of her personal life for fifteen years is worth it. When Kelly receives a gift subscription to the dating service that's rumored to be powered by the same benevolent artificial intelligence that runs the huge station, she decides to swallow her pride and give it a shot. But as her dates go from bad to worse, she can only hope that the supposedly omniscient AI is planning a happy ending. Start series with first book, *Date Night on Union Station*. The Stryx offer EarthCent help in reaching out to the widespread human communities, but as usual, it comes with a catch or two. Kelly see an opportunity to increase her book hoard, just as publishing on Union Station begins to take off and Donna's daughters enter a friendly competition. But who will publish the most expensive book of all? Start series with first book, *Date Night on Union Station*. Kelly plans her first ever sabbatical from the diplomatic service and learns to her dismay that it's not the same thing as a vacation. A role playing craze sweeps the tunnel network, drawing in the ambassador's children, and Dorothy finally completes her high-tech wedding dress. He left the West at the age of seventeen, leaving behind a rootless past and a bloody trail of violence. In the East he became one of the wealthiest financiers in America—and one of the most feared and hated. Now, suffering from incurable cancer, he has come back to New Mexico to die alone. But when an all-out range war erupts, Flint chooses to help Nancy Kerrigan, a local rancher. A cold-eyed speculator is setting up the land swindle of a lifetime, and Buckdun, a notorious assassin, is there to back his play. Flint alone can help Nancy save her ranch...with his cash, his connections—and his gun. He still has his legendary will to fight. All he needs is time, and that's fast running out.... A complete collection of Galloway Gallegher stories from "one of the major names in science fiction" (The New York Times). In this comprehensive collection, Henry Kuttner is back with Galloway Gallegher, his most beloved character in the stories that helped make him famous. Gallegher is a binge-drinking scientist who's a genius when drunk and totally clueless sober. Hounded by creditors and government officials, he wakes from each bender to discover a new invention designed to solve all his problems—if only he knew how it worked . . . Add a vain and uncooperative robot assistant, a heckling grandfather, and a host of uninvited guests—from rabbit-like aliens to time-traveling mafia lawyers to his own future corpse—and Gallegher has more on his hands than even he can handle. Time for another drink! "[A] pomegranate writer: popping with seeds—full of ideas." —Ray Bradbury, author of *Fahrenheit 421* There's likely no more

of a thankless job in the Federation than temporal investigation. While starship explorers get to live the human adventure of traveling to other times and realities, it's up to the dedicated agents of the Federation Department of Temporal Investigations to deal with the consequences to the timestream that the rest of the Galaxy has to live with day by day. But when history as we know it could be wiped out at any moment by time warriors from the future, misused relics of ancient races, or accident-prone starships, only the most disciplined, obsessive, and unimaginative government employees have what it takes to face the existential uncertainty of it all on a daily basis . . . and still stay sane enough to complete their assignments. That's where Agents Lucsly and Dulmur come in—stalwart and unflappable, these men are the Federation's unsung anchors in a chaotic universe. Together with their colleagues in the DTI—and with the help and sometimes hindrance of Starfleet's finest—they do what they can to keep the timestream, or at least the paperwork, as neat and orderly as they are. But when a series of escalating temporal incursions threatens to open a new front of the history-spanning Temporal Cold War in the twenty-fourth century, Agents Lucsly and Dulmur will need all their investigative skill and unbending determination to stop those who wish to rewrite the past for their own advantage, and to keep the present and the future from devolving into the kind of chaos they really, really hate. Start series with the first book, *Date Night on Union Station*. Over half of Earth's population has left the planet, mainly as contract workers for aliens, and the homeworld is losing relevance to the emigrants. The EarthCent president takes on the task of making sure that humanity isn't permanently stuck in a rut as low-skilled labor. Can the ambassador put aside her new-found obsession with the Galactic Free Press crossword puzzle and help save the day? Start series with the first book, *Date Night on Union Station*. The Wanderers have just moved on from Union Station and the ambassador is ready to take her first vacation in fifteen years. Unfortunately, the rules on paid vacation for EarthCent employees have changed for the worse, retroactively. Libby suggests spending some time exploring the station as an alternative, and Kelly cautiously goes along with it. Back at the embassy, while the cat's away, the mice will play. Start the EarthCent Ambassador series with the three book bundle, *Union Station 1, 2, 3*. Kelly returns from sabbatical and finally has the opportunity to expand her embassy with a conference room, providing she can find a contractor willing to take the job. Dorothy finds that her impending motherhood is an advice-magnet to her alien friends, while the SBJ Fashions workplace gets strange as Baa enchants fashion accessories for LARPing to repay her debt to Jeeves. Samuel and Vivian discover that their educational choices don't necessarily match with their aptitudes and abilities. Alien AI is here to save Earth (and make a few bucks on the side). Mark Ai goes to work every day as a PC repairman, but fixing computers is just a cover job. Along with his mission managing the observation team, he's attempting to fill in as a parent for a teenage neighbor, provide a good home for a dog, and pick up a little money on the side. It's a juggling act that understandably leads to breaking a few rules, but things really start spinning out of control when competing aliens arrive. In a shocking indictment of NHS standards, cover-ups and legal dirty tricks, Peter Duffy, consultant surgeon writes of his 35 years of experience on the front-line of the NHS. Charting his career pathway from auxiliary nurse and unskilled operating theatre orderly, he takes us through his progress to senior consultant surgeon and head of department. In 2015, and after blowing the whistle on a series of near misses, he reluctantly reported an avoidable death, cover-up and ongoing surgical risk-taking to the Care Quality Commission. Within months he was out of work and unemployed. Via avoidable deaths and errors, cover-ups, misuse of public funds, bullying, abuse and victimisation the author charts out in searing detail his demotion, punishments and exile from both family and NHS and the subsequent brutal legal process that followed his illegal dismissal. "Peter's love for his family and for what he does as a surgeon runs through the pages of this gripping book as he takes you on a journey to some of the darker areas of our NHS and legal system. As a society we need to face up to the appalling reality of what the NHS does to staff that speak up and how much public money it wastes fighting people that act in the public interest. Even a committed,

award winning surgeon who transformed cancer services was not immune from attempts by the NHS to destroy him when he decided to stand up for patients and services. This is everyone's problem." Dr Chris Day, junior doctor and whistle-blower. "As a fellow whistleblower in the same NHS Trust I recommend that everybody should read Peter's account. This is an incredibly important and unmissable portrayal of how toxic NHS management culture is harming patients and destroying the careers and lives of dedicated healthcare professionals. His bravery, dedication to his patients and commitment to exposing the truth is commendable. Read his book to learn the truth as to what is happening every day in NHS Trusts across the UK." Sue Allison, Morecambe Bay whistle-blower. "Peter's book has opened our eyes to a series of injustices that has not only destroyed his family life but revealed appalling wrong doings within the NHS. Our father was sadly a victim in a dysfunctional urological surgery department, where Peter was trying to make a difference against the odds. Our sincerest gratitude goes to a person who has tirelessly fought with passion, dignity and sheer determination against an organisation that wish to silence the honesty of a whistle-blower." Karen and Nicola Read, daughters of 'Patient A' Start series with the first book, *Date Night on Union Station*. Kelly has served as the ambassador on Union Station for over two decades, but humanity remains on probationary status. When the Stryx inform EarthCent that their membership status is under review, Kelly goes all out to prepare for the test of her lifetime. Start series with the first book, *Date Night on Union Station* The first carnival to take place on Union Station since humanity joined the galactic community is coming, and the ambassadors of the different species are all entered in the election to become Carnival King or Queen. It's not a job that Kelly wants, and fortunately for her, the humans get a late start at electioneering. An all-new Star Trek e-novella featuring the Department of Temporal Investigations! The dedicated agents of the Federation Department of Temporal Investigations have their work cut out for them protecting the course of history from the dangers of time travel. But the galaxy is littered with artifacts that, in the wrong hands, could threaten reality. One of the DTI's most crucial jobs is to track down these objects and lock them safely away in the Federation's most secret and secure facility. When Agents Lucsly and Dulmur bring home an alien obelisk of incredible power, they are challenged by a 31st-century temporal agent who insists they surrender the mysterious artifact to her. But before they know it, the three agents are pulled into a corrupted future torn apart by a violent temporal war. While their DTI colleagues attempt to track them down, Lucsly and Dulmur must restore temporal peace by setting off on an epic journey through the ages, with the future of the galaxy hanging in the balance...

Atmospheric Science, Second Edition, is the long-awaited update of the classic atmospheric science text, which helped define the field nearly 30 years ago and has served as the cornerstone for most university curricula. Now students and professionals alike can use this updated classic to understand atmospheric phenomena in the context of the latest discoveries, and prepare themselves for more advanced study and real-life problem solving. This latest edition of *Atmospheric Science*, has been revamped in terms of content and appearance. It contains new chapters on atmospheric chemistry, the Earth system, the atmospheric boundary layer, and climate, as well as enhanced treatment of atmospheric dynamics, radiative transfer, severe storms, and global warming. The authors illustrate concepts with full-color, state-of-the-art imagery and cover a vast amount of new information in the field. Extensive numerical and qualitative exercises help students apply basic physical principles to atmospheric problems. There are also biographical footnotes summarizing the work of key scientists, along with a student companion website that hosts climate data; answers to quantitative exercises; full solutions to selected exercises; skew-T log p chart; related links, appendices; and more. The instructor website features: instructor's guide; solutions to quantitative exercises; electronic figures from the book; plus supplementary images for use in classroom presentations. Meteorology students at both advanced undergraduate and graduate levels will find this book extremely useful. Full-color satellite imagery and cloud photographs illustrate principles throughout Extensive numerical and qualitative exercises emphasize the application of basic physical principles to problems in the atmospheric sciences Biographical footnotes summarize the lives and work of scientists mentioned in the text, and provide students with a sense of the long history of meteorology Companion website encourages more advanced exploration of text topics: supplementary information, images, and bonus exercises Start the series with the first book - *Date Night on Union Station*. Three years have passed, and the children are growing like weeds as Aisha grows into a

new career. A mob of alien party animals has settled near Union Station like a plague, but nobody seems willing to see them off. They bring word of a new wave of helpful artificial intelligence, but perhaps there's such a thing as too helpful? Richly illustrated with full-color images, this book is a comprehensive, up-to-date description of the planets, their moons, and recent exoplanet discoveries. This second edition of a now classic reference is brought up to date with fascinating new discoveries from 12 recent Solar System missions. Examples include water on the Moon, volcanism on Mercury's previously unseen half, vast buried glaciers on Mars, geysers on Saturn's moon Enceladus, lakes of hydrocarbons on Titan, encounter with asteroid Itokawa, and sample return from comet Wild 2. The book is further enhanced by hundreds of striking new images of the planets and moons. Written at an introductory level appropriate for undergraduate and high-school students, it provides fresh insights that appeal to anyone with an interest in planetary science. A website hosted by the author contains all the images in the book with an overview of their importance. A link to this can be found at www.cambridge.org/solarsystem. Introduces Captain Graf Ulrich von Bek, his relatives, and his family's quest: the protection of the Holy Grail. EarthCent bids to take over editorship of the All Species Cookbook, an exercise in galactic togetherness that has somehow gone off mission over the last couple million years. Samuel and Vivian struggle to find a balance between their co-op jobs for aliens and their personal lives. Dorothy seeks to revive the fortunes of her ballroom dancing fashions. Start series with the first book, *Date Night on Union Station* Spy Night on Union Station is is Book 4 of the EarthCent Ambassador series. The story picks up less than a year after the events of *High Priest on Union Station*, with Kelly coming to the conclusion that EarthCent needs an intelligence service. Of course, EarthCent has no institutional knowledge of what spies do, or how they work, so the new agency gets off to a slow start. Then Kelly and the Union Station crew come up with a brilliant idea. Seventeen-year old Meghan doesn't remember her childhood and practices magic in secret. Her sole ambition is to bring a warrior's soul from Dark Earth to become her dragon and protect her while she develops into a mage. When her interpretation of a Dark Earth death vision goes awry, Meghan gets both more and less than she bargained for. When a small-time conman is abducted and whisked across the galaxy, he finds himself hurled into a frantic battle to save an alien civilization and its god from extinction. A fast-paced comedy space adventure from the author the Independent newspaper calls "the new Terry Pratchett." Start series with the first book, *Date Night on Union Station*. Kelly heads to Earth for the first ever Conference of EarthCent Ambassadors, but while the cat's away, the mice will play. Modern Statistical Methods for Astronomy: With R Applications. An astronomer and author of the best-selling *What If the Moon Didn't Exist* explores ten examples of what Earth would be like if conditions in the universe were slightly altered, in a fascinating journey into scientific scenarios. "Good SciFi comedy is as rare as hen's teeth. This was a fun read." Kelly Frank is EarthCent's top diplomat on Union Station, but her job description has always been a bit vague. The pay is horrible and she's in hock up to her ears for her furniture, which is likely to end up in a corridor because she's behind on rent for her room. But as her dates go from bad to worse, she can only hope that the supposedly omniscient AI is planning a happy ending. Sequel to *Date Night on Union Station* - read that book first! Five years after the events of *Date Night on Union Station*, Kelly has settled into married life and her job as the EarthCent ambassador. The only fly in the ointment is that most of the aliens on Union Station refuse to talk to her. But a mysterious new game is sweeping the galaxy, changing the balance of power between species and bringing game-savvy humans front-and-center. As the invitations to diplomatic functions pour in, Kelly finds herself struggling to understand exactly what's going on, not to mention finding babysitters on short notice. Fortunately, diplomats and alcohol go together like, well, diplomats and alcohol, and Joe has started micro-brewery business in Mac's Bones. The only thing left that could go wrong is a visit from her mother. Start series with the first book, *Date Night on Union Station* Two years after the events of *Alien Night on Union Station*, Kelly faces new challenges as the EarthCent Ambassador. The growing acceptance of humans by their alien neighbors plus a measure of her own personal fame (or infamy) is resulting in too much work for an embassy with only two full-time staffers. Friends and family must wonder

if the stress is finally getting to Kelly when she starts acting even more peculiar than usual. Just leave it to the Stryx to throw a monkey wrench in the works by offering her a vital new assignment that can't be refused. The book is based on an international workshop on High Precision Navigation. The reader will find a wealth of information on - satellite navigation systems and their geodetic applications, especially using GPS - laser and radar techniques - image processing and image sequence analysis - autonomous vehicle guidance systems - inertial navigation systems - integration of different sensor systems. Libby suggests spending some time exploring the station as an alternative, and Kelly cautiously goes along with it. Back at the embassy, while the cat's away, the mice will play. Fundamental Astronomy is a well-balanced, comprehensive introduction to classical and modern astronomy. While emphasizing both the astronomical concepts and the underlying physical principles, the text provides a sound basis for more profound studies in the astronomical sciences. This is the fifth edition of the successful undergraduate textbook and reference work. It has been extensively modernized and extended in the parts dealing with extragalactic astronomy and cosmology. You will also find augmented sections on the solar system and extrasolar planets as well as a new chapter on astrobiology. Long considered a standard text for physical science majors, Fundamental Astronomy is also an excellent reference work for dedicated amateur astronomers. Two years after the events of Alien Night on Union Station, Kelly faces new challenges as the EarthCent Ambassador. The growing acceptance of humans by their alien neighbors plus a measure of her own personal fame (or infamy) is resulting in too much work for an embassy with only two full-time staffers. Friends and family must wonder if the stress is finally getting to Kelly when she starts acting even more peculiar than usual. Just leave it to the Stryx to throw a monkey wrench in the works by offering her a vital new assignment that can't be refused. Book #16 of the EarthCent Ambassador series. Dorothy returns to SBJ Fashions from maternity leave and immediately starts spending money while giving Baa an excuse to engage in magic. Samuel and Vivian, along with some old friends, decide to participate in the Open University's cooperative education program with confusing results. For the first time, Appetite for Self-Destruction recounts the epic story of the precipitous rise and fall of the recording industry over the past three decades, when the incredible success of the CD turned the music business into one of the most glamorous, high-profile industries in the world -- and the advent of file sharing brought it to its knees. In a comprehensive, fast-paced account full of larger-than-life personalities, Rolling Stone contributing editor Steve Knopper shows that, after the incredible wealth and excess of the '80s and '90s, Sony, Warner, and the other big players brought about their own downfall through years of denial and bad decisions in the face of dramatic advances in technology. Big Music has been asleep at the wheel ever since Napster revolutionized the way music was distributed in the 1990s. Now, because powerful people like Doug Morris and Tommy Mottola failed to recognize the incredible potential of file-sharing technology, the labels are in danger of becoming completely obsolete. Knopper, who has been writing about the industry for more than ten years, has unparalleled access to those intimately involved in the music world's highs and lows. Based on interviews with more than two hundred music industry sources -- from Warner Music chairman Edgar Bronfman Jr. to renegade Napster creator Shawn Fanning -- Knopper is the first to offer such a detailed and sweeping contemporary history of the industry's wild ride through the past three decades. From the birth of the compact disc, through the explosion of CD sales in the '80s and '90s, the emergence of Napster, and the secret talks that led to iTunes, to the current collapse of the industry as CD sales plummet, Knopper takes us inside the boardrooms, recording studios, private estates, garage computer labs, company jets, corporate infighting, and secret deals of the big names and behind-the-scenes players who made it all happen. With unforgettable portraits of the music world's mighty and formerly mighty; detailed accounts of both brilliant and stupid ideas brought to fruition or left on the cutting-room floor; the

dish on backroom schemes, negotiations, and brawls; and several previously unreported stories, Appetite for Self-Destruction is a riveting, informative, and highly entertaining read. It offers a broad perspective on the current state of Big Music, how it got into these dire straits, and where it's going from here -- and a cautionary tale for the digital age. Imagine a world populated by human refugees removed from Earth. Now imagine they're producing handicrafts for the galactic luxury market. Mark Ai and his expanded team are deep undercover on Reservation, a world the Ferrymen populated with humans transported from Earth between the Bronze Age and early Iron Age. The mission is to discover if the Ferrymen are violating the Sky God rules of the League of Sentient Aliens Regulating Space, but it soon becomes clear that everything is not what it seems, and the observers are themselves under observation. Book Three of AI Diaries - Start series with Turing Test. Imagine AI needs a biological form to do magic. Now imagine the greatest magic trick of all. Start series with first book, Date Night on Union Station On the other side of the galaxy, the Cayl Empire has decided to wind down operations and the Stryx are planning to pick up the pieces. Kelly is tapped to host an open house event on Union Station to tempt the aliens into joining up, but does anybody other than the Stryx actually want the merger to take place?
