Summary: Cracking the Value Code Oct 29 2020 The must-read summary of Richard E. S. Boulton, Barry D. Libert and Steve M. Samek's book: "Cracking The Value Code: How Successful Business Are Creating Wealth in the New Economy". This complete summary of the ideas from Richard E. S. Boulton, Barry D. Libert and Steve M. Samek's book "Cracking The Value Code" shows that successful organisations are creating value in completely new and original ways today which take advantage of the opportunities of the New Economy. This summary presents four ways of creating value in the New Economy: 1. Design your business model (tangible & intangible assets); 2. Master risk (learn to use it productively); 3. Manage your asset portfolio (with new tools & systems); and 4. Measure and report all assets (information transparency). In short, companies today are racing to find the right combination of tangible and intangible assets that will create the greatest amount of value in the New Economy. Managers that succeed in cracking the creation of value code for their own businesses have a great opportunity to create significant value. Added-value of this summary: • Save time • Understand the key concepts • Increase your business knowledge To learn more, read "Cracking the Value Code" and discover a brilliant guide which offers you the keys to succeed in the years ahead.

Barack, Inc. Aug 20 2022 Barack Obama's campaign didn't just make history: it teaches lessons that every business can profit

from. The Obama campaign was brilliantly planned, strategized, and executed, and built to drive home a powerful, consistent core value proposition: the proposition of change. Moreover, it had an extraordinary understanding of innovation, manifested by its extraordinary use of technology to achieve specific, quantifiable goals. In *Barack, Inc.*, Barry Libert and Rick Faulk present the Obama campaign as a business, identifying lessons any business leader can use to maximize performance. Libert and Faulk cover issues ranging from marketing to leadership, strategy to execution. They reveal how Obama's team identified and honed a powerful core message, and applied it flexibly in response to changing circumstances without ever compromising core brand values. You'll discover how Obama built a focused, "no-drama" organization that empowered local decision-makers without sacrificing nationwide consistency or discipline. Finally, the authors, executives at the world's leading provider of business social networking services, show how Obama leveraged social networking at a scale unprecedented in the history of either politics or business. From start to finish, *Barack, Inc.* is actionable: packed with ready-to-use strategies and tactics that can help you succeed with any goal, in any marketplace.

The Environmental Heritage of Soviet Agriculture Jan 30 2021

The environmental problems, such as pollution and land degradation, of post-Soviet agriculture are indeed serious and represent a major obstacle to the expansion of food production in the new political and economic arena. This book provides a thorough review of these problems and also responds to several reports claiming that the situation is irremediable. Although environmental problems are severe, the author shows that they are not necessarily the key limiting factor in agricultural production in the short-term. Drawing on a range of personal interviews and statistics and on the social, economic and political literature, as well as information on crop production, soil and water use, and the environment, it is shown how a more

sustainable future might be attained.

The Network Imperative Sep 01 2023 Digital networks are changing all the rules of business. New, scalable, digitally networked business models, like those of Amazon, Google, Uber, and Airbnb, are affecting growth, scale, and profit potential for companies in every industry. But this seismic shift isn't unique to digital start-ups and tech superstars. Digital transformation is affecting every business sector, and as investor capital, top talent, and customers shift toward network-centric organizations, the performance gap between early and late adopters is widening. So the question isn't whether your organization needs to change, but when and how much. The Network Imperative is a call to action for managers and executives to embrace network-based business models. The benefits are indisputable: companies that leverage digital platforms to co-create and share value with networks of employees, customers, and suppliers are fast outpacing the market. These companies, or network orchestrators, grow faster, scale with lower marginal cost, and generate the highest revenue multipliers. Supported by research that covers fifteen hundred companies, authors Barry Libert, Megan Beck, and Jerry Wind guide leaders and investors through the ten principles that all organizations can use to grow and profit regardless of their industry. They also share a five-step process for pivoting an organization toward a more scalable and profitable business model. The Network Imperative, brimming with compelling case studies and actionable advice, provides managers with what they really need: new tools and frameworks to generate unprecedented value in a rapidly changing age.

Le Griffon and the Huron Islands - 1679 Mar 15 2022 In 1679, the French ship *Le Griffon* mysteriously vanished. Was it lost in a violent storm or robbed of its valuable cargo of furs and set ablaze? No one knows, but historians are quite certain the ship found its final resting place on the bottom of the Great

Lakes. Now after centuries of mystery and misinformation, Steve and Kathie Libert reveal that Le Griffon likely met her final fate among the Huron Islands in Lake Michigan, northeast of Green Bay, Wisconsin. Their research placed her final moments near these islands, precisely where the Liberts discovered a colonial-age shipwreck. Could this be La Salle's Le Griffon? Le Griffon's disappearance became an unsolved mystery for French explorer Robert La Salle, who searched for her whereabouts to no avail. Ironically, if the ship-cursed by local Indian tribes proves to be Le Griffon, she lays under tribal waters, adding to the mystique of her story. Using primary source documents, the Liberts detail their historical journey of exploration and discovery in solving the first Great Lakes maritime mystery. Many history enthusiasts have patiently waited for this mythical creature to magically raise her eagle head and lioness body from the depths to continue on with her voyage. After nearly 340 years of unanswered questions and more than a dozen unsubstantiated claims of her discovery, Le Griffon can begin to ply the waters - at least in our imaginations.

Wanderers 40 Dec 12 2021 As they travel, explore, sample and observe, wanderers are bound to become walking libraries of the processes behind the human mind. Emotions, logic, and belief systems of a variegated human race become somehow more comprehensible, though the path to such understanding can be emotionally polarizing. "Wanderers 40" is, in part, the result of its author taking such a path. More than a book of poetry, this work reflects the cathartic and occasionally agonizing effort required to reconcile the beauty, viciousness and diversity that is mankind - and in doing so, exploring the mechanisms under the surface of physical reality.

Boy Crazy Nov 30 2020 Boy Crazy explores Elizabeth Libert Clark's relationship to her painful sexual experiences as a young woman and that of being a mother of two boys who are beautiful

creatures but because of her trauma with men she worries they might become monsters one day. The work confronts her past experiences in an attempt to raise conscientious sons and break the chain of generational trauma. Consisting of three parts, the middle section contains photographs of her boys in their idealized beauty and innocence, the first and last sections are a collection of diaristic texts, interviews, and snippets of a conversation where the artist confronts her abuser. Elizabeth received her MFA from School of Visual Arts and is a lover of indie movies.

We Are Smarter Than Me May 17 2022 Wikinomics and The Wisdom of Crowds identified the phenomena of emerging social networks, but they do not confront how businesses can profit

from the wisdom of crowds. **WE ARE SMARTER THAN ME** by Barry Libert and Jon Spector, Foreword by Wikinomics author Don Tapscott, is the first book to show anyone in business how to profit from the wisdom of crowds. Drawing on their own research and the insights from an enormous community of more than 4,000 people, Barry Libert and Jon Spector have written a book that reveals what works, and what doesn't, when you are building community into your decision making and business processes. In *We Are Smarter Than Me*, you will discover exactly how to use social networking and community in your business, driving better decision-making and greater profitability. The book shares powerful insights and new case studies from product development, manufacturing, marketing, customer service, finance, management, and beyond. You'll learn which business functions can best be accomplished or supported by communities; how to provide effective moderation, balance structure with independence, manage risk, define success, implement effective metrics, and much more. From tools and processes to culture and leadership, *We Are Smarter than Me* will help you transform the promise of social networking into a profitable reality.

Remembrance 40 Jul 19 2022 Remembrance 40's introduction could perhaps best be worded by the same introduction from its sister book, *Wanderers 40*, which was Bartholomew Libert's first commercially published work... "As they travel, explore, sample and observe, wanderers are bound to become walking libraries of the processes behind the human mind. Emotions, logic, and belief systems of a variegated human race become somehow more comprehensible, though the path to such understanding can be emotionally polarizing." Unique to this journey has been the author's observations and communications with so-called extraterrestrials, experiences which, however quietly, yielded

inevitable alterations to his perceptions, perspectives, and worldview. Over a decade from the beginning of his own self-awakening, Remembrance 40 is Bartholomew Libert's own form of disclosure-instead of describing in detail his life experiences and interactions in the realm of the loosely termed "paranormal," he instead selected to reveal the life lessons learned as he explored, and continues to explore, what it is to experience Creation as a human being. Organized into forty easy to read, single page entries, readers will find Bartholomew's second book to contain key, and equally deep, life reminders for navigating the highs, lows, and in-betweens that form the cathartic experience that is human existence on Earth-reminders shaped not just by personal, everyday experiences and deep study, but by a guiding, often invisible hand from sources he hopes one day will be more than just the shadowy possibilities they are to so many.

Social Nation Jul 31 2023 It's time to join Social Nation and prosper! This book will show you, as an employee, customer or partner, how to use new social technologies, make yourself heard, and produce better products and services. As a leader and manager, you'll find out how to use these tools to harness social interactions to improve your business and to create your own social nation. The book provides a social assessment for leaders, managers and employees to scientifically evaluate your individual social skills and competencies. This book relies on well-known case studies about businesses that illustrate how social principles and strategies can help organizations to: Integrate social skills into existing managerial and leadership practices Overcome some of the common risks and objections that are often cited as obstacles to becoming a successful social enterprise Adopt new forms of social leadership across the entire organization Attain social intelligence by listening, understanding, and measuring outcomes of your investment in relationships with customers, employees and partners Realize tangible economic benefits and ROI from new product and service offerings Social Nation

provides readers with an opportunity to join the Social Nation community and share experiences with other leaders and social individuals.

The Best Ball of All Mar 03 2021 This is the story of the Kingdom of Marmikel, the people who lived there, their king, and a very special contest. Not long ago, living in Marmikel wasn't very much different from living the way we do today, except of course it wasn't modern. In other words, there were no radios, no bowling alleys, no movie theatres, no shopping malls, no TV, no cell phones, no MP3 players, no Twitter, and no Facebook! So instead, the people of Marmikel gave balls. They gave birthday balls, Monday balls, winter balls, anniversary balls, and fall balls, just to name a few.
