"A charming, moving, funny, and ultimately very surprising story." --Wendy Mass, New York Times bestselling author of *11 Birthdays* What if your pencil had all the answers? Would you ace every test? Would you know what your teachers were thinking? When Ava Anderson finds a scratched up pencil, she doodles like she would with any other pencil. But when she writes a question in the margin of her math quiz, she hears a clear answer in a voice no one else seems to hear. With the help of her friend Sophie, Ava figures out that the pencil will answer factual questions only--those with definite right or wrong answers--but won't predict the future. Ava and Sophie discover all kinds of uses for the pencil, and Ava's confidence grows with each answer. But it's getting shorter with every sharpening, and when the pencil reveals a scary truth about Ava's family, she realizes that sometimes the bravest people are the ones who live without all the answers . . . Instead of always looking for answers in the Bible, Trevor Hudson suggests that we start thinking more carefully about the questions that God asks. God desires a conversational relationship with us, and He shows this desire by asking questions. God also gives greater dignity to us by allowing us to wrestle with the questions rather than if we are simply given answers. *Questions God Asks Us* presents ten questions – five from the Old and five from the New Testament – which God had asked and is still asking us as well. They include: Where Are You? Where Is Your Brother? What Are You Doing Here? Who Do You Say I Am? Do You Want to Get Well? Why Are You Crying? There is a much greater power to transform us in a question than there is in a straightforward answer – each chapter includes a section with practical suggestions to answer God's question and discover this for yourself. It also includes discussion questions for study groups. *Questions God Asks Us* is bound in a handy gift format with beautiful full-colour images printed on gloss art paper. Ham explores 21 exciting and faith-affirming topics including the fall of Lucifer and the origin of evil, when life begins and why that matters, early biblical figures, evolution, and more. The Los Angeles Times has praised his "bold positions on foreign policy and national security" and wondered, "What's not to like?" In *America: Our Next Chapter*, Nebraska-born Hagel offers a hard-hitting examination of the current state of our nation and provides substantial, meaningful proposals that can guide America back onto the right path. In *America: Our Next Chapter*, Hagel speaks the truth as he sees it—in a direct and refreshingly unvarnished manner. Basing his suggestions on thorough research and careful thought, as well as on personal insight from his years as a political insider, successful businessman, and decorated war hero, he discusses domestic issues—including the health care crisis, immigration, and Social Security and Medicare reform—and global climate change. He confronts foreign policy problems that the current administration has bungled or ignored, including China's growing economy; control of U.S. debt; India's and Pakistan's nuclear capabilities; and Iran's aggressive political, ideological, and nuclear stances. He decries the pervasive disease of third world poverty, arguing

convincingly that this is where the real fight against terrorism must begin. Always true to the beliefs instilled in his childhood on the prairie, he speaks passionately about service—to one's country and to one's fellow citizens—as the path toward a renewed America. And, of course, he gives a candid examination of the debacle that is the Iraq War. A staunch Republican yet a "hero to liberals" (Time), Hagel asks the tough questions and delivers straight answers to America's most pressing problems. *America: Our Next Chapter* is a serious, honest, and, ultimately, optimistic look at our nation's future, from an American original. Presents answers to twelve of the most frequently asked questions on Genesis and the creation/evolution issue, discussing what happened to the dinosaurs, whether there were really Ice Ages, how different races came into being, and other topics.
