Based on three years of study in the Serengeti National Park, George B. Schaller's *The Serengeti Lion* describes the vast impact of the lion and other predators on the vast herds of wildebeest, zebra, and which the area is famous. The most comprehensive book available on the lion, this classic work includes author's findings on all aspects of lion behavior, including its social system, population dynamics, hunting behavior, and predation patterns. "If you have only enough time to read one book about field biology, this is the one I recommend."—Edward O. Wilson, *Science* "This book conveys not only the fascination of its particular study of lion behavior but the drama and wonder and beauty of the intimate interdependence of living things."—*Saturday Review* "This is an important book, not just for its valuable information on lions but for its broad, open, and intelligent approach to problems that cut across the fields of behavior, population ecology, wildlife management, evolution, anthropology, and comparative biology."—Richard G. Many centuries ago in the wilds of Africa, a startling and mystical friendship developed between a lion and a saint. St. Gerasim served the lion by removing a thorn from its paw, and in turn the lion served Gerasim and his monastery for the rest of his life. This small gem of a story shows us this extraordinary friendship through the eyes of the lion, and of a baboon he befriends along the way, allowing us to participate in the lion's transformation-through contact with holiness—from an undifferentiated dumb beast to a powerful lion with his own name and destiny. *The Lion and the Saint* may be enjoyed by good readers from preteen to adult. Although the lion is not the largest, fastest or most lethal animal, its position as king of beasts has rarely been challenged. Since Palaeolithic times, lions have fascinated people, and due to their gallant mane, knowing eyes, and distinctive roar, the animal continues to beguile us today. In *Lion, Dei*, Jackson paints a fresh portrait of this regal beast, drawing on folktales, the latest scientific research,

lion-tamers' memoirs, as well as other little-known sources to tell the story of lions famous and anonymous, familiar and surprising. Majestic, noble, brave—the lion is an animal that has occupied a great place in human imagination, inspiring countless myths, lore and legends. As well, this creative relationship has abounded in visual culture—painted on wood and canvas, chiseled in stone, hammered in metal, and tucked between the pages of medieval manuscripts, lions have often represented divinity, dignity, and danger. Jackson summarizes the latest findings of field biologists and offers in-depth analyses of works of art, literature, oral traditions, plays, and films. She is a peerless guide on a memorable visual and cultural safari. Lion follows internationally collected artist Mark Adlington's three-year mission to find lions in six very different habitats across East and Southern Africa. The resulting body of stunning paintings, drawings and sketchbooks represent the countless months of patient waiting, observation and interaction which has given the artist a unique insight into this most beautiful of big cats. With written contributions from front-line conservationists, without whose help and support the project would have been impossible, this is a book that will delight and inform art and nature lovers alike. Since the appearance of the Hohlenstein-Stadel Lion, the first ever human artwork, some 40,000 years ago, lions in art have surrounded us as symbols of power, evangelists, constellations and even the sun. Where lions are increasingly not, is living on this earth, the wild. While it may seem ambitious to take on such iconic subject matter, Adlington wanted to go to the source and create work that reflected the reality of the charismatic duality of this rapidly disappearing predator. This book develops the idea that difficult people (the lions) are opportunities, not obstacles to personal growth. The crew of a French reconnaissance plane during WW1 consisted of just two men: a pilot and an observer. Two such men are Jean Herbillion and Claude Maury. Herbillion's dreams of glory as an ace have been dashed after only a few months at the front; Maury suffers from a broken heart--his obsession that his exploits as a pilot will win back his lost love. Together the two form one of the best crews in the world fighting in the first aerial conflict in history--one in which a combatant can count his life expectancy in minutes. The pressure of war forges a strong bond between the two flyers, but can it survive the discovery that both are both in love with the same woman? Joseph Kessel's autobiographical novel is a staggering tale of courage, brotherhood and loss. A young boy who is afraid of the operation that can help him get well learns to overcome his fear with the help of a caring nurse. The 1980s in South Africa were marked by protest, violence, confrontation, and international sanctions. Internally, the country saw a bewildering growth of grassroots organizations--including trade unions, civic associations in the black townships, student and other youth organizations, church-based groups, and women's movements--many of which operated under the umbrella of the United Democratic Front (UDF). "Beyond Our Wildest Dreams" explores the often conflicted relationship between the UDF's large-scale resistance to apartheid and its everyday struggles at the local level. In the end, the UDF can be seen as a transitional front, preparing the ground for leaders of the liberation movement to return from exile or prison and take over power. But the founding fathers of the UDF initially had far more modest ambitions. Interviews with Cachalia and other leading personalities in the UDF examine the organization's workings at the national level, while stories of ordinary people, collected by the author, illuminate the grassroots activism so important to the UDF's success. Even in South Africa, writes Inelise Kessel, who covered the anti-apartheid movement as a journalist, resistance was not the obvious option for ordinary citizens. Van Kessel shows how these people were mobilized into forming a radical social movement that developed a highly flexible and innovative form of resistance that ultimately ended apartheid. --From the publisher's description. Felix Kersten, physician to the high-demon of the Third Reich, Heinrich Himmler, could alleviate Himmler's severe stomach pains with his hands using massage and manipulation. In return, Kersten bargained with Himmler to order the release of innocent prisoners condemned to die. It is an

story of the good-natured little fat man who looked like a "cross between a Flemish burgomaster and of the West," studied the higher curative powers of massage under a lama-doctor Ko, and applied them to Himmler whose excruciating stomach aches were only relieved by Kersten's therapy. During the five years that come, Kersten attended Himmler but was an alien by birth and sympathies among his entourage, with the exception of Himmler's private secretary who collaborated with him in drawing up the lists of doomed men—Jehovah's Witnesses, Jews, concentration camp victims of all nationalities. At the close, Kersten is jockeying with Himmler (and when persuasion failed, withholding treatment) to try and secure mass surrenders and liberation of victims first through Sweden, then Switzerland.... Kersten is fascinating to follow—through a circumspect, ambivalent career—even though there may be points in question at its close.—KIRKUS Reviews

Adventure story about a 10-year-old girl who lives on a Kenya game preserve, and her strange rapport with a majestic lion. The author draws on interviews to tell the story of the bitter and protracted struggles for survival in the formidable Pedi Kingdom by the shifting policies and practices of conservation, segregation and apartheid. At the heart of the book are the two revolts of 1958 and 1986. Also charted is the changing relationship of the Communist Party and the ANC to the rural areas, and the importance of migrant workers and the political cross-fertilization which contributed both to the revolt in 1958 and the formation of the African National Congress in We Sizwe in 1961. There is also an analysis of the run-up to the 1994 election in the Northern Transvaal, in which the ANC achieved its most decisive regional victory. North America: Heinemann

Almost from the beginning of art, humans have portrayed cats. The animal originally domesticated for the humble purpose of catching mice was already a goddess in ancient Egypt and a beloved household pet in ancient Rome. Throughout history, cats have been a beautiful vessel for symbolic meanings, ranging from dark unruly sensuality to perfect domestic tranquillity. In this book, cats inhabit 170 art masterpieces. Sometimes they are the stars of the work and sometimes they are working their magic from the corners of rooms (in which both the whole work and a detail showing the cat are both illustrated). Here are paintings by Van Eyck, Raphael, Leonardo, Bruegel, Rembrandt, Chardin, Gainsborough, Manet, Renoir, Bonnard, Gauguin, Matisse, Balthus, Picasso, Warhol and many other famous artists. Stefano Zuffi's charming text tells us about cats in all means. The cats, meanwhile, are beautiful, seductive and mysterious.

A brawny, brilliant debut novel about the epic struggles of an immigrant son in a darkening world. Johannesburg, South Africa. The Great Depression. In this harsh new country, young Isaac Helger burns with fiery determination—to break out of the inner city, to buy his scarred mother the home she longs for, to find a way to realize her dream of reunification with a family torn apart. But there are terrible, unspoken secrets of the past that will haunt him as he makes his way through a society brutalized by racism, as he loses his heart to an unattainable girl from the city's wealthy heights and his every exit route from poverty dead-ends. When the threat of the Second World War intrudes itself with brutal force into Isaac's reality, he will face the most important choice of his life . . . and will learn to live with the consequences. In this extraordinarily powerful novel, Kenneth Bonert brings alive the world of South African Jewry in all its raw energy and ribald vernacular. Comedic, searing, lyrical and with a snap-perfect ear for dialogue, *The Lion Seeker* is a profoundly moral exploration of how wider social forces can shape us and shatter us, echoing through history with lessons that are no less relevant today than in the crucible of its time. The author of the critically acclaimed, award-winning debut novel, *Lamb* returns with a story of haunted histories and broken promises" (O, The Oprah Magazine, Must-Read Book of the Summer)

Set on the Colorado high plains, the town of Lions is nearly deserted. Built to be a glorious city, it was abandoned for farming, mining, trading, or any of the industries its pioneers imagined. The Walkers have been set on its barren terrain for generations—a simple family in a town still enthralled by promises of bigger, better, brighter. But when a stranger appears, his unsettling presence sets off a chain reaction that will chart the fates of everyone he encounters. When the patriarch John Walker dies, his son Gordon must choose between leaving for college with his girlfriend, Leigh, or staying with his family to look after their failing welding shop—and carry on a mysterious family legacy. While Leigh is desperate to make a better life in the world beyond Lions, Gordon is strangely hesitant to leave it behind. And as more families abandon the town, that listening to reason must come at the cost of betraying his own heart. "Nadzam weaves a strange, mesmerizing story" that explores ambition and an American obsession with self-improvement, the responsibilities we have to ourselves and each other, as well as the everyday illusions that pass for a
