Energy, Grades 6-12 Biology: Life Processes

This program presents science concepts in areas of biology, earth science, chemistry, and physical science in a logical, easy-to-follow design that challenges without overwhelming. This flexible program consists of 12 student texts that can easily supplement an existing science curriculum or be used as a stand-alone course. Reading Level: 4-5 Interest Level: 6-12 Motivate students to read and think critically as they build science content knowledge This economical, high-interest series grabs students' attention with science content in a concise, approachable format. Reading Level: 5-7 Interest Level: 6-9 Workbook exercises and experiments guide the user to explore and understand the basic concepts of geology, oceanography and weather, the planets, and space. Science is the study of everything in the universe, from Earth's moon to the farthest galaxies, from the motion of atoms to the forces on a roller coaster. If America has a claim to exceptionalism, American Credo locates it in a little understood ability to engage in deep conflicts over political ideas, while at the same time reducing adversarial positions to legitimate derivatives of American history and development. This comprehensive full-year program introduces students to the basic concepts and principles of biology and builds the fundamental science skills students of all ability levels need to succeed. Pacemaker Biology

integrates technology, everyday applications, careers, and modern leaders into biology. Lexile Level 760 Reading Level 3-4 Interest Level 6-12
