Common Knowledge Jan 05 2022 First published in 1987, Common Knowledge offers a radical departure from the traditionally individualistic psychologies which have underpinned modern approaches to educational theory and practice. The authors present a study of education as the creation of 'common knowledge' or shared understanding between teacher and pupils. They show the presenting, receiving, sharing, controlling, negotiating, understanding and misunderstanding of knowledge in the classroom to be an intrinsically social communicative process which can be revealed only through close analysis of joint activity and classroom talk. Basing this analysis on a detailed examination of video-recorded school lessons with groups of 8 to 10-year-olds, they show how classroom communications take place against a background of implicit understanding, some of which is never made explicit to pupils, while there develops during the lessons a context of assumed common knowledge about what has been said, done, or understood. This wide-ranging study makes an important contribution to the current debate about both teaching methods and the structure of education. It is essential reading for educationalists and developmental psychologists and has a clear practical relevance to teachers and teacher trainers.

**Narrative Comprehension** Apr 27 2021 Despite the current explosion of interest in cognitive linguistics, there has so far been relatively little research by cognitive linguists on narrative comprehension. Emmott draws on insights from discourse analysis and artificial intelligence to present a detailed model of how readers build, maintain, and use mental representations of fictional contexts, and how they keep track of characters and contexts within a complex, changing fictional world. The work has implications for linguistic theory since it questions several long-held assumptions about anaphora, arguing for a 'levels of consciousness' model for the processing of referring expressions. The book begins with a summary of current issues in text-processing theory and a discussion of the methodological importance of recognizing the hierarchical structure of discourse. The core of the book explores the significance of contextual monitoring in narrative comprehension and looks particularly at the cognitive demands placed on readers by flashbacks. Later chapters examine the implications of contextual monitoring for reference theory and for a literary-linguistic model of narrative text types. The study focuses on anaphoric pronouns in narratives, assessing the accumulated knowledge required for readers to interpret these key grammatical items.
