The Lisbon System facilitates the international protection of appellations of origin through one single registration procedure. The Lisbon system does away with the need to file multiple registrations at different offices and covers over two dozen countries in Africa, Asia, Europe, and Latin America. These Records of the Locarno Conference for the Purpose of Setting Up an International Classification for Industrial Designs (1968) contain all the official documents relating to the Conference. This Guide is primarily intended for applicants and holders of international registrations of marks, as well as officials of the competent administrations of the Member States of the Madrid Union. It leads them through the various steps of the international registration procedure and explains the essential provisions of the Madrid Agreement, the Madrid Protocol and the Common Regulations. Comprehensive facts, figures and analysis of the international registration of marks. The Nice Classification consists of a classification of goods and services for the purposes of registering trademarks and service marks. The Nice Classification includes Class Headings accompanied by Explanatory Notes and an Alphabetical List of Goods and Services. The Class Headings describe in very broad terms the nature of the goods or services contained in each of the 34 classes of goods and 11 classes of services. They are accompanied, where appropriate, by Explanatory Notes which describe in

greater detail the type of goods or services included in the classes concerned. The Alphabetical List comprises around 10,100 indications of goods and 1,500 services. WIPO publishes the authentic paper versions of the Nice Classification in two parts. Part I lists, in alphabetical order, all the goods in one list and all the services in another list, with an indication of the number of the class to which each good or service belongs. Part II lists, in alphabetical order for each class, the goods or services belonging to that class. In order to keep the Nice Classification up to date, it is continuously revised and a new edition is published every five years. The tenth edition entered into force on January 1, 2012. An overview of intellectual property activity based on the latest available year of complete statistics. An overview of intellectual property activity based on the latest available year of complete statistics. This report introduces the work of the Academy, highlights the achievements in 2017 and shines a light on some of the Academy's achievements in the past 20 years. WIPO Re:Search aims to catalyze the development of medical products for neglected tropical diseases, malaria and tuberculosis through innovative research partnerships and knowledge sharing. This publication provides an introduction to geographical indications, explaining their basic features, use and protection as an intellectual property right. Written for non-experts, it is a starting point for readers seeking to learn more about the topic. This Portfolio serves as a catalogue of all the training opportunities to be offered by the WIPO Academy in 2020 and outlines the content of each course. It gives information to potential participants on eligibility criteria, application formalities, timelines, selection procedures, travel and other relevant necessary information. This Guide aims to assist users in searching for technology information using patent documents, a rich source of technical, legal and business information presented in a generally standardized format and often not reproduced anywhere else. Though the Guide focuses on patent information, many of the search techniques described here can also be applied in searching other non-patent sources of technology information. The Nice Classification consists of a classification of goods and services for the purposes of registering trademarks and service marks. The Nice Classification includes Class Headings accompanied by Explanatory Notes and an Alphabetical List of Goods and Services. The Class Headings describe in very broad terms the nature of the goods or services contained in each of the 34 classes of goods and 11 classes of services. They are accompanied, where appropriate, by Explanatory Notes which describe in greater detail the type of goods or services included in the classes concerned. The Alphabetical List comprises around 10,100 indications of goods and 1,500 services. WIPO publishes the authentic paper versions of the Nice Classification in two parts. Part I lists, in alphabetical order, all the goods in one list and all the services in another list, with an indication of the number of the class to which each good or service belongs. Part II lists, in alphabetical order for each class, the goods or services belonging to that class. In order to keep the Nice Classification up to date, it is continuously revised and a new edition is published every five years. The tenth edition entered into force on January 1, 2012. Publisher Description This report presents the Academy's achievements in 2018 and highlights the latest developments across programs, including new partnerships and course offerings. Comprehensive facts, figures and analysis of the international registration of marks. This guide is the first in a series of guides on "Intellectual Property for Business." It is devoted to trademarks, a central element in the marketing and branding strategy of any company. It seeks to explain trademarks from a business perspective. With this publication, WIPO and the author aim at making available for judges, lawyers and law enforcement officials a valuable tool for the handling of intellectual property cases. To that effect, the case book uses carefully selected court decisions drawn from various countries with either civil or common law traditions. The extracts from the decisions and accompanying comments illustrate the different areas of intellectual property law, with an emphasis on matters that typically arise in connection with the enforcement of intellectual property rights in civil as well as criminal proceedings. Earlier ed.: 3rd, published by Oxford University Press, 2006. An overview of intellectual property activity based on the latest available year of complete statistics. Intellectual property (IP) refers to creations of the mind – everything from works of art to inventions, computer programs to

trademarks and other commercial signs. This booklet introduces the main types of IP and explains how the law protects them. It also introduces the work of WIPO, the global forum for IP services, policy, information and cooperation. This book deals with IP issues from a business perspective, focuses in particular on Small and Medium sized Enterprises (SMEs). The topics covered in the 12 modules include the importance of IP for SMEs, trademarks and industrial designs, inventions and patents, trade secrets, copyright and related rights, patent information, technology licensing, IP in the digital economy, IP and international trade, IP audit, IP Valuation, and Trademark licensing. Technology and Innovation Support Centers (TISCs) are designed to provide innovators in developing countries with access to locally based, high quality technology information services and other related services. The Global Innovation Index ranks the innovation performance of 141 countries and economies around the world, based on 84 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation capacity, while others still struggle. This Guide is primarily intended for applicants and holders of international registrations of marks, as well as officials of the competent administrations of the Member States of the Madrid Union. It leads them through the various steps of the international registration procedure and explains the essential provisions of the Madrid Agreement, the Madrid Protocol and the Common Regulations. Under its Professional Development Program (PDP) the WIPO Academy offers every year a series of training courses on various aspects of industrial property and copyright and related rights for the benefit of government officials from developing countries, least-developed countries and countries with economies in transition. Whether you're a patent examiner, patent attorney, commercial patent searcher, patent liaison, IP librarian, law professor, or competitive intelligence analyst, you'll find Patent Searching: Tools and Techniques to be just the guide you have been waiting for, with a range of approaches to patent searching that will be useful to you regardless of your technical expertise or role in the intellectual property community. This brochure explains how the IPC Green Inventory can give direct access to the latest patent information about technologies in a number of fields including alternative energy production, energy conservation, transportation, waste management, and agriculture and forestry The Nice Classification (NCL), established by the Nice Agreement (1957), is an international classification of goods and services applied for the registration of marks. This authoritative report analyzes IP activity around the globe. Drawing on 2020 filing, registration and renewals statistics from national and regional IP offices and WIPO, it covers patents, utility models, trademarks, industrial designs, microorganisms, plant variety protection and geographical indications. The report also draws on survey data and industry sources to give a picture of activity in the publishing industry. Intellectual property is everywhere! This colorful little booklet introduces the main types of IP, with plenty of interesting facts and examples. It is designed to appeal in particular to adolescents and young people. This Portfolio serves as a catalogue of all the training opportunities to be offered by the WIPO Academy in 2023 and outlines the content of each course. It gives information to potential participants on eligibility criteria, application formalities, timelines, selection procedures, travel and other relevant necessary information. This Guide is primarily intended for applicants and holders of international registrations of marks, as well as officials of the competent administrations of the Member States of the Madrid Union. It leads them through the various steps of the international registration procedure and explains the essential provisions of the Madrid Agreement, the Madrid Protocol and the Common Regulations. The authors propose an 'Algorithmic Links with Probabilities' (ALP) approach to match Trademarks (TMs) data to economic data and enable these data to speak to each other. Specifically, they construct a NICE Class Level concordance that maps TM data into trade and industry categories forward and backward. This concordance allows researchers to analyze differences in TM usage across both economic and TM sectors. In this paper, the authors apply this ALP concordance for TMs to characterize patterns in TM applications across countries, industries, income levels and more. They also use the concordance

to investigate some of the key determinants of international technology transfer by comparing bilateral TM applications and bilateral patent applications. "Public health is a global challenge, and therefore international co-operation has a high priority. The World Health Organization (WHO) is the global authority for health. But a range of other issues are involved in achieving health objectives, requiring WHO to join forces with counterparts. Two of these are the World Intellectual Property Organization (WIPO) and World Trade Organization (WTO). This book is the first ever joint study by the three, part of their collaboration on health, intellectual property, and trade. The book's focus is on advancing medical and health technologies ("innovation") and ensuring they reach the people who need them ("accessibility"). A huge amount of analytical and factual material is available on access to medicines and other medical technologies, and on innovation. Here, it is brought together in one concise volume. The book is designed to support governments and others -- particularly in developing countries -- who face an increasing demand to act, when governments want to increase access to effective treatments while containing costs. The underlying theme is: policies on these issues have to be viewed together in order to make real progress."--Publisher's description. An overview of intellectual property activity based on the latest available year of complete statistics.
