ADP 3-0, Operations, constitutes the Army's view of how to conduct prompt and sustained operations across multiple domains, and it sets the foundation for developing other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. It articulates the Army's operational doctrine for unified land operations. ADP 3-0 accounts for the uncertainty of operations and recognizes that a military operation is a human undertaking. Additionally, this publication is the foundation for training and Army education system curricula related to unified land operations. The principal audience for ADP 3-0 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force (JTF) or multinational headquarters should also refer to

applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will use this publication as well. Actual incidents provided the basis for this instruction manual on life-or-death close-quarters shootouts with the pistol. The emphasis is on training to fight with no notice, at very close ranges, in poor lighting and in unexpected environments.

The Handbook of Alternative Theories of Economic Development explores the theories and approaches which, over a prolonged period of time, have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters, written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which, in different historical contexts, have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed including nineteenth century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory and world systems theories of development. In addition, the Handbook has chapters on important events and institutions including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.

This book analyzes the Crimean War from the Ottoman perspective based mainly on Ottoman and Russian primary sources, and includes an assessment of the War's impact on the Ottoman state and Ottoman society.

Primerjalna analiza zakonske ureditve problematike strelnega orožja temelji na poročilih (anketnih odgovorih) 69 držav članic Združenih narodov in je v skladu s cilji resolucije (kriminalna prevencija in javna varnost), ki so jo

sprejeli na devetem kongresu Združenih narodov o preprečevanju kriminala in ravnanju s storilci (Kairo, od 29. 4 do 8. 5. - 1995). Kongres je v tej resoluciji izrazil zaskrbljenost zaradi visoke stopnje kriminala, nesreč in samomorov v povezavi s strelnim orožjem, ob tem ko njegova uporaba, posedovanje, hranjenje, urjenje itd. nimajo ustrezne zakonske podlage.

Throughout history, the Balkans have been a crossroads, a zone of endless military, cultural and economic mixing and clashing between Europe and Asia, Christianity and Islam, Catholicism and Orthodoxy. Subject to violent shifts of borders, rulers and belief systems at the hands of the world's great empires--from the Byzantine to the Habsburg and Ottoman--the Balkans are often called Europe's tinderbox and a seething cauldron of ethnic and religious resentments. Much has been made of the Balkans' deeply rooted enmities. The recent destruction of the former Yugoslavia was widely ascribed to millennial hatreds frozen by the Cold War and unleashed with the fall of communism. In this brilliant account, acclaimed historian Mark Mazower argues that such a view is a dangerously unbalanced fantasy. A landmark reassessment, *The Balkans* rescues the region's history from the various ideological camps that have held it hostage for their own ends, not least the need to justify nonintervention. The heart of the book deals with events from the emergence of the nation-state onward. With searing eloquence, Mazower demonstrates that of all the gifts bequeathed to the region by modernity, the most dubious has been the ideological weapon of romantic nationalism that has been used again and again by the power hungry as an acid to dissolve the bonds of centuries of peaceful coexistence. *The Balkans* is a magnificent depiction of a vitally important region, its history and its prospects. This novel follows the journey of a group of Greek refugees who were displaced from their homeland in Asia Minor and settled in the summer of 1923 in a desolate corner of the coast, near Athens. Told in the author's characteristic sparse, lyrical style and inspired by his own experience of migration, it details their hatred of war, their love for the nature surrounding them, the hostility of their new neighbours and their struggle to find meaning as they adapt to a new life. Though published in 1937, *Serenity* is a timely evocation of the eternal condition of the refugee, as seen by a writer with a deeply human eye. Ever since the First World War, socialists have considered imperialism a calamity: responsible for militarism, economic stagnation, and assaults on democracy in the metropolitan countries, an impediment to economic and

cultural development in the Third World. So widespread has this view become that it is shared, in its essentials, not only by Marxists but also by an entire school of liberal development economists. Bill Warren breaks with this traditional outlook, arguing that the theory of imperialism, one of Marxism's most influential concepts, is not only contradicted by the facts, but has diluted and distorted Marxism itself. In particular, Warren disputes the claim that "monopoly capitalism" represents the ultimate stage of senile capitalism and sets out to refute the notion that imperialism is a regressive force impeding or distorting economic development in the Third World. The book argues on the contrary that direct colonialism powerfully impelled social change in Asia and Africa, laying the foundation for a vibrant indigenous capitalism. Finally, it takes issue with the conventional view that postwar economic performance in the Third World has been disastrous, presenting a powerful empirical case that the gap between rich and poor countries is actually narrowing. Closely argued, clearly written, original and iconoclastic, *Imperialism: Pioneer of Capitalism* is a compelling challenge to one of the chief tenets of contemporary socialist politics. This book analyses the processes and factors that contributed to the emergence and eventual consolidation of the Greek Cypriot Right in the era of British colonialism. It seeks to understand political developments in Cyprus in the period extending from 1900 to 1955 with regard to their social, ideological and economic determinants. By examining changing forms of political life, a general reconstitution of the political sphere and a specific set of changes in the ideology and organisation of the Greek Cypriots, the author offers a framework for analysing Greek Cypriot right-wing party politics, identifying its sources of mobilisation and main actors such as the Church of Cyprus, and understanding its subsequent transformations.

In 1996 the shooting and killing of 16 young children in a Dunblane primary school provoked wide reaching parliamentary reform to British gun laws. Within months virtually all privately owned handguns had been outlawed. *Gun Culture or Gun Control?* presents the first substantial analysis of the social and political reactions to events in Dunblane and also examines many of the wider issues relating to gun control in the United Kingdom. Rigorously comparative throughout, Peter Squires provides a non-partisan exploration of the differences between attitudes to firearms and their control in Britain and in the United States. Amongst the topics the author considers are: * the social history of firearms on both sides of the atlantic * the differing policy

directions adopted in Britain and the USA * media coverage of the gun question * firearms and policing * the future of the gun in society. In examining various aspects of the provision of security, the Small Arms Survey 2011 considers the growth of the private security industry and its firearms holdings worldwide; the firearms holdings of private security personnel; the use of private security companies by multinational corporations; the use of emerging weapons technology among Western police forces; and legislative controls over the civilian possession of firearms in 42 jurisdictions around the world. Case studies provide original research on ongoing security challenges in Côte d'Ivoire, Haiti and Madagascar. This edition also presents the 2011 Small Arms Trade Transparency Barometer, an estimate of the annual authorized trade in light weapons, and a review of developments related to small arms control at the United Nations. Updating long-standing controversies such as the conflict between professionalism and bureaucracy, and addressing the question of social work autonomy within organizations, this book discusses how dwindling resources have forced social work practice to become more results-oriented in a limited time frame. Using an interdisciplinary approach, this book brings together work in the fields of history, literary studies, music, and architecture to examine the place of folklore and representations of 'the people' in the development of nations across Europe during the 19th century. TURKISH MIGRATION POLICY, edited by Ibrahim Sirkeci and Barbara Pusch, aims to shed light on changes in migration policy, determinants beneath these changes, and practical implications for movers and non-movers in Turkey. Nevertheless, one should note that Turkey has only recently faced mass immigration and the number of foreign born has more than doubled in less than five years. Such sudden change in population composition warrants policy adjustments and reviews. Policy shift from "exporting excess labour" in the 1960s and 1970s to immigrant integration today is a drastic but necessary one. Nevertheless, Turkish migration policy is still far from settled as several chapters in this book point out. Despite the exemplary humanitarian engagement in admitting Syrians, Turkey is still at the bottom of the league table of favourable integration policies with an overall score of 25 out of 100. Turkish migration policy is likely to be adjusted further in response to the continuing immigration.

Military spending and armaments . Non-proliferation, arms control and disarmament The SIPRI Yearbook contains extensive annexes on the implementation of arms control and disarmament agreements and a chronology of events during the year in the area of

security and arms control. " The financial crisis of 2008 has revived interest in economic scholarship from a historical perspective. The most in depth studies of the relationship between economics and history can be found in the work of the so-called German Historical School (GHS). The influence of the GHS in the USA and Britain has been well documented, but far less has been written on the rest of Europe. This volume studies the interconnection between economic thought and economic policy from the mid-nineteenth century to the interwar period. It examines how the School's ideas spread and was interpreted in different European countries between 1850 and 1930, analysing its legacies in these countries. In doing so, the book is able to trace the interconnection between economic thought and economic policy, adding new voices to the debate on the diffusion of ideas and flow of knowledge. This book identifies issues related to topics such as nationalism and cosmopolitanism in the history of ideas and clarifies themes in policy making that are still currently debated. These include monetary policy and benefits of free trade for all parties involved in international exchanges. This book will be of a great interest to those who study history of economic thought, economic theory and political economy. An introduction to the songs, singers, and performance of an important romance tradition

The United Nations Disarmament Yearbook, Volume 45 (Part I): 2020 is a compilation of the resolutions and decisions of the 75th session of the General Assembly, the voting patterns in the General Assembly and the First Committee, lead sponsors, sponsors and co-sponsors, references to First Committee report and dates of adoption. A discussion of historiography concerning the Ottoman Empire. It analyzes how the historiographies established in various national states have viewed the Empire and its legacy, and explores the links of 20th-century historiography with the rich historical tradition of the Ottoman Empire itself. This innovative study compares the history of economic ideas and ideologies in Romania and Brazil - and more broadly, those in East Central Europe and Latin America - in the late nineteenth and twentieth centuries. Whereas previous histories of the idea of economic development have focused on 'First World' theorists, this book considers theorists in two 'backward' countries who made important contributions to the field. Latin America is well known to economic historians as the region that gave rise to the Structuralist school and Dependency movement. Less well known is the fact that East Central Europe is important as the early training ground and the empirical concern

of the first generation of development economists. This comparative study examines the ways in which economists and other social scientists in Romania and Brazil confronted the issues of economic backwardness.
