This book extends what we know about the development of civil rights and the role of the NAACP in American politics. Through a sweeping archival analysis of the NAACP's battle against lynching and mob violence from 1909 to 1923, this book examines how the NAACP raised public awareness, won over American presidents, secured the support of Congress, and won a landmark criminal procedure case in front of the Supreme Court. Based on extensive research at eight universities - Harvard, Yale, Columbia, Johns Hopkins, Chicago, Stanford, Michigan, and California at Berkeley - Reuben examines the aims of university reformers in the context of nineteenth-century ideas about truth. She argues that these educators tried to apply new scientific standards to moral education, but that their modernization efforts ultimately failed. During the 1920s and 1930s, in cities from Beijing to Bombay, Tokyo to Berlin, Johannesburg to New York, the Modern Girl made her sometimes flashy, always fashionable appearance in city streets and cafes, in films, advertisements, and illustrated magazines. Modern Girls wore sexy clothes and high heels; they applied lipstick and other cosmetics. Dressed in provocative attire and in hot pursuit of romantic love, Modern Girls appeared on the surface to disregard the prescribed roles of dutiful daughter, wife, and mother. Contemporaries debated whether the Modern Girl was looking for sexual, economic, or political emancipation, or whether she was little more than an image, a hollow product of the emerging global commodity culture. The contributors to this collection track the Modern

Girl as she emerged as a global phenomenon in the interwar period. Scholars of history, women's studies, literature, and cultural studies follow the Modern Girl around the world, analyzing her manifestations in Germany, Australia, China, Japan, France, India, the United States, Russia, South Africa, and Zimbabwe. Along the way, they demonstrate how the economic structures and cultural flows that shaped a particular form of modern femininity crossed national and imperial boundaries. In so doing, they highlight the gendered dynamics of interwar processes of racial formation, showing how images and ideas of the Modern Girl were used to shore up or critique nationalist and imperial agendas. A mix of collaborative and individually authored chapters, the volume concludes with commentaries by Kathy Peiss, Miriam Silverberg, and Timothy Burke. Contributors: Davarian L. Baldwin, Tani E. Barlow, Timothy Burke, Liz Conor, Madeleine Yue Dong, Anne E. Gorsuch, Ruri Ito, Kathy Peiss, Uta G. Poiger, Priti Ramamurthy, Mary Louise Roberts, Barbara Sato, Miriam Silverberg, Lynn M. Thomas, Alys Eve Weinbaum Meskimmon asks why women artists were left out of the canon of German modernism, tracing the reasons to the construction of a unified (male) history of art that in effect denied women a voice. The book is an effort to reconceive the period's art history and the perspective of the Weimar woman artist. Epidemics and the Modern World uses biographies of epidemics such as plague, tuberculosis, and HIV/AIDS to explore the impact of diseases on society from the fourteenth century to the twenty-first century. A modern, all-encompassing exploration of what happens after death combines spirituality with philosophy, history, and science, all of which guide readers toward the timeless truth that human consciousness lives on after death. An insightful examination of a respected American publishing institution How much further should the affluent world push its material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in Making the Modern World: Materials and Dematerialization. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. Making the Modern World: Materials and Dematerialization considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production as well as their dominant

applications. The evolving productivities of material extraction, processing, synthesis, finishing and distribution, and the energy costs and environmental impact of rising material consumption are examined in detail. The book concludes with an outlook for the future, discussing the prospects for dematerialization and potential constraints on materials. This interdisciplinary text provides useful perspectives for readers with backgrounds including resource economics, environmental studies, energy analysis, mineral geology, industrial organization, manufacturing and material science. Modern culture is obsessed with identity. Since the landmark Obergefell v. Hodges Supreme Court decision in 2015, sexual identity has dominated both public discourse and cultural trends—and yet, no historical phenomenon is its own cause. From Augustine to Marx, various views and perspectives have contributed to the modern understanding of self. In *The Rise and Triumph of the Modern Self*, Carl Trueman carefully analyzes the roots and development of the sexual revolution as a symptom, rather than the cause, of the human search for identity. This timely exploration of the history of thought behind the sexual revolution teaches readers about the past, brings clarity to the present, and gives guidance for the future as Christians navigate the culture's ever-changing search for identity. The examples convey not only these major themes but also the painters' belief in the progress of civilization through science and industry. The book thus expands the scope of Impressionist celebrations of modernity to include what might be called Impressionism's "other landscape" and proposes that in the Impressionists' effort to forge a modern landscape art, those signs of modernity defined their vision most clearly."--BOOK JACKET. This "satisfying send-up of a design primer . . . presents lessons in hostile faucetry, blinding fluorescents and vicious exposed ductwork." —The New York Times True modernity requires much more than discipline, vision, and a willingness to live without upper kitchen cabinets. *It's Lonely in the Modern World* outlines exactly what's required to achieve sleek design and the requisite ennui. From the creators of the *Unhappy Hipsters* website, this essential guide is to hipsters what *The Official Preppy Handbook* was to prepsters. The authors advise on a number of topics. Readers will learn how to navigate the vast array of concrete finishes and plywood grades, accessorize with children and pets, and opine with authority on rooflines. Featuring detailed illustrations, beautifully staged photos, and helpful charts, this master manual is perfect for aspiring modernists, those who love them, and, of course, those who love to hate them. A fresh look at the greatest builder in the history of New York City and one of its most controversial figures. "We are rebuilding New York, not dispersing and abandoning it": Robert Moses saw himself on a rescue mission to save the city from obsolescence, decentralization, and

decline. His vast building program aimed to modernize urban infrastructure, expand the public realm with extensive recreational facilities, remove blight, and make the city more livable for the middle class. This book offers a fresh look at the physical transformation of New York during Moses's nearly forty-year reign over city building from 1934 to 1968. It is hard to imagine that anyone will ever have the same impact on New York as did Robert Moses. In his various roles in city and state government, he reshaped the fabric of the city, and his legacy continues to touch the lives of all New Yorkers. Revered for most of his life, he is now one of the most controversial figures in the city's history. *Robert Moses and the Modern City* is the first major publication devoted to him since Robert Caro's damning 1974 biography, *The Power Broker: Robert Moses and the Fall of New York*. In these pages eight short essays by leading scholars of urban history provide a revised perspective; stunning new photographs offer the first visual record of Moses's far-reaching building program as it stands today; and a comprehensive catalog of his works is illustrated with a wealth of archival records: photographs of buildings, neighborhoods, and landscapes, of parks, pools, and playgrounds, of demolished neighborhoods and replacement housing and urban renewal projects, of bridges and highways; renderings of rejected designs and controversial projects that were defeated; and views of spectacular models that have not been seen since Moses made them for promotional purposes. *Robert Moses and the Modern City* captures research undertaken in the last three decades and will stimulate a new round of debate. An ethnography of a housing project in Cairo, which demonstrates how the modernizing efforts of the Egyptian government runs headlong into the traditional customs of the area's low-income residents. Brings new meaning to the phrase "global and local." Scholars have only recently discovered that the human body itself has a history. Not only has it been perceived, interpreted, and represented differently in different epochs, but it has also been lived differently, brought into being within widely dissimilar material cultures, subjected to various technologies and means of control, and incorporated into different rhythms of production and consumption, pleasure and pain. The eight articles in this volume support, supplement, and explore the significance of these insights. They belong to a new historical endeavor that derives partly from the crossing of historical with anthropological investigations, partly from social historians' deepening interest in culture, partly from the thematization of the body in modern philosophy (especially phenomenology), and partly from the emphasis on gender, sexuality, and women's history that large numbers of feminist scholars have brought to all disciplines. Today the Museum of Modern Art is widely recognized for establishing the canon of modern art; yet in its early years, the museum considered modern art part of a still unfolding experiment in contemporary visual production. By bracketing MoMA's early history from its later reputation, this book explores the ways the Museum acted as a laboratory to set an ambitious agenda for the exhibition of a multidisciplinary idea of modern art. Between its founding in 1929 and

its 20th anniversary in 1949, MoMA created the first museum departments of architecture and design, film, and photography in the country, marshaled modern art as a political tool, and brought consumer culture into a versatile yet institutional context. Encompassing 14 essays that investigate the diversity of modern art, this volume demonstrates how MoMA's programming shaped a version of modern art that was not elitist but fundamentally intertwined with all levels of cultural production. In the decade following World War I, nineteenth-century womanhood came under attack not only from feminists but also from innumerable "ordinary" young women determined to create "modern" lives for themselves. These young women cut their hair, wore short skirts, worked for wages, sought entertainment outside the home, and developed new attitudes toward domesticity, sexuality, and their bodies. Historians have generally located the origins of this shift in women's lives in the upheavals of World War I. Birgitte Søland's exquisite social and cultural history suggests, however, that they are to be found not in the war itself, but in much broader social and economic changes. Søland's engrossing chronicle draws on a rich variety of sources—including popular media and medical works as well as archival records and oral histories—to examine how notions of femininity and womanhood were reshaped in Denmark, a small, largely agrarian country that remained neutral during the war. It explores changes in the female body and personality, the forays of young women into the public sphere, the redefinition of female respectability, and new understandings of married life as evidenced in both cultural discourses and social practices. Though specific in its focus, the book raises broad comparative questions as it challenges common assumptions about the social and sexual upheavals that characterized the Western world in the postwar decade. In a remarkably engaging fashion, it shows why the end of World War I did not lead to the return of "normal" life in the 1920s. In this brilliant study, Thomas Pfau argues that the loss of foundational concepts in classical and medieval Aristotelian philosophy caused a fateful separation between reason and will in European thought. Pfau traces the evolution and eventual deterioration of key concepts of human agency—will, person, judgment, action—from antiquity through Scholasticism and on to eighteenth-century moral theory and its critical revision in the works of Samuel Taylor Coleridge. Featuring extended critical discussions of Aristotle, Gnosticism, Augustine, Aquinas, Ockham, Hobbes, Shaftesbury, Mandeville, Hutcheson, Hume, Adam Smith, and Coleridge, this study contends that the humanistic concepts these writers seek to elucidate acquire meaning and significance only inasmuch as we are prepared positively to engage (rather than historicize) their previous usages. Beginning with the rise of theological (and, eventually, secular) voluntarism, modern thought appears increasingly reluctant and, in time, unable to engage the deep history of its own underlying conceptions, thus leaving our understanding of the nature and function of humanistic inquiry increasingly frayed and incoherent. One consequence of this shift is to leave the moral self-expression of intellectual

elites and ordinary citizens alike stunted, which in turn has fueled the widespread notion that moral and ethical concerns are but a special branch of inquiry largely determined by opinion rather than dialogical reasoning, judgment, and practice. A clear sign of this regression is the present crisis in the study of the humanities, whose role is overwhelmingly conceived (and negatively appraised) in terms of scientific theories, methods, and objectives. The ultimate casualty of this reductionism has been the very idea of personhood and the disappearance of an adequate ethical language. Minding the Modern is not merely a chapter in the history of ideas; it is a thorough phenomenological and metaphysical study of the roots of today's predicaments. The essays in this volume, written in the main over the last five years, are concerned to map out the terms of discourse about the modern state and to offer an initial assessment of them. They examine, among other topics, the notion of the modern state, the efficacy of the concept of sovereignty, problems of power and legitimation, sources of political stability and crisis, and the future of democracy. In so doing, they provide an introduction to many of the central issues of modern politics and political thought. "A manifesto of sorts for anyone who makes art [and] cares for it." —Zadie Smith "The best book I know of for talented but unacknowledged creators. . . . A masterpiece." —Margaret Atwood "No one who is invested in any kind of art . . . can read *The Gift* and remain unchanged." —David Foster Wallace By now a modern classic, *The Gift* is a brilliantly orchestrated defense of the value of creativity and of its importance in a culture increasingly governed by money and overrun with commodities. This book is even more necessary today than when it first appeared. An illuminating and transformative book, and completely original in its view of the world, *The Gift* is cherished by artists, writers, musicians, and thinkers. It is in itself a gift to all who discover the classic wisdom found in its pages. *The Modern Eye* explores the origins and development of early 20th-century modernism in America through the lens of the major exhibitions that introduced this art to the general public. Author Kristina Wilson shows how modern artists and curators sought to relate high art to mass culture in order to make it accessible to more people, and successfully popularized modern painting and design during the interwar years. A major contribution to our understanding of the origins of modernism, this book captures the vibrant diversity that the term "modern art" meant at this time. The chapters examine exhibitions held in New York in the 1920s and 1930s, including those organized by Alfred Stieglitz, the Little Review, the Metropolitan Museum of Art, and the Museum of Modern Art. In examining the marketing of modernism, Wilson reveals how these exhibitions attempted to stage an intersection between art and everyday life, and how they taught viewers to look at, and care about, modern art. With a new epilogue on filibuster battles under the Biden administration THE CASE FOR ENDING THE FILIBUSTER "A truly excellent book... blistering and persuasive." —Ezra Klein, *New York Times* An insider's account of how politicians representing a radical white

minority of Americans have used “the world’s greatest deliberative body” to hijack our democracy. Our democracy is under assault from homegrown authoritarians, with most observers blaming Donald Trump and the Republican Party that submitted to him. Yet as Adam Jentleson shows, the problem not only goes back to the nineteenth century, but is less about the presidency than it is about our nation’s most venerated institution: the United States Senate. A revelatory history of minority rule in America as expressed through the Senate filibuster, *Kill Switch* shows that white conservatives have long relied on the filibuster—which is not featured in the Constitution, and which, as Jentleson demonstrates, the Framers would have opposed—to shut down attempts to create a multiracial democracy. Featuring a new epilogue on filibuster battles under the Biden administration, *Kill Switch* will remain an essential warning about the costs of empowering this nation’s right-wing minority. • “Jentleson understands the inner workings of the institution, down to the most granular details, showing precisely how arcane procedural rules can be leveraged to dramatic effect.” —Jennifer Szalai, *New York Times* • “Careful and thorough and exacting.” —Michael Tomasky, *New York Review of Books* • “[An] excellent, surprising new book.” —Benjamin Wallace-Wells, *The New Yorker* Selected and introduced by Richard Dawkins, *The Oxford Book of Modern Science Writing* is a celebration of the finest writing by scientists for a wider audience - revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science. “The Sheep Book offers a template for both the beginner and the old hand. Mixing theoretical, technical and practical, Parker offers a buffet of tips for any sheep producer.” --Joel Salatin, author of *You Can Farm* Starting with the premise that the work of art is a gift and not a commodity, this revolutionary book ranges across anthropology, literature, economics, and psychology to show how the 'commerce of the creative spirit' functions in the lives of artists and in culture as a whole. **NEW YORK TIMES BESTSELLER** • The startling true history of how one extraordinary man from a remote corner of the world created an empire that led the world into the modern age—by the author featured in *Echoes of the Empire: Beyond Genghis Khan*. The Mongol army led by Genghis Khan subjugated more lands and people in twenty-five years than the Romans did in four hundred. In nearly every country the Mongols conquered, they brought an unprecedented rise in cultural communication, expanded trade, and a blossoming of civilization. Vastly more progressive than his European or Asian counterparts, Genghis Khan abolished torture, granted universal religious freedom, and

smashed feudal systems of aristocratic privilege. From the story of his rise through the tribal culture to the explosion of civilization that the Mongol Empire unleashed, this brilliant work of revisionist history is nothing less than the epic story of how the modern world was made. Stories of 55 saints, beati, and holy people of the past 200 years, along with their pictures; most are actual photographs. Includes St. Gemma Galgani, St. Bernadette, St. Maria Goretti, St. John Neumann, Padre Pio, Edith Stein, St. Peter Julian Eymard, St. Frances Cabrini, St. Maximilian Kolbe, St. John Bosco, St. Dominic Savio, and many, many more. Will bring hours and hours of pleasure and entertainment to the entire family. This book uncovers how we make meaning of abstraction, both historically and in present times, and examines abstract images as a visual language. The contributors demonstrate that abstraction is not primarily an artistic phenomenon, but rather arises from human beings’ desire to imagine, understand and communicate complex, ineffable concepts in fields ranging from fine art and philosophy to technologies of data visualization, from cartography and medicine to astronomy. The book will be of interest to scholars working in image studies, visual studies, art history, philosophy and aesthetics. 'Saving the Modern Soul' explores the impact of therapeutic discourse on our lives & on our contemporary notions of identity. Eva Illouz examines how self-help culture has transformed emotional life & how therapy complicates individuals' lives even as it claims to dissect their emotional experiences. Cyrus Schayegh’s socio-spatial history traces how a Eurocentric world economy and European imperialism molded the Middle East from the mid-nineteenth to mid-twentieth century. Building on this case, he shows that the making of the modern world is best seen as the reciprocal transformation of cities, regions, states, and global networks. In the early modern herbal, Sarah Neville finds a captivating example of how Renaissance print culture shaped scientific authority. One of the Best Books of the Year: *The Christian Science Monitor* *NPR* *The Seattle Times* *St. Louis Post-Dispatch* *Chicago Tribune* *A New York Times* *Notable Book Finalist for the National Book Critics Circle Award in Biography* *The Arab Revolt against the Turks in World War I* was, in the words of T. E. Lawrence, “a sideshow of a sideshow.” As a result, the conflict was shaped to a remarkable degree by a small handful of adventurers and low-level officers far removed from the corridors of power. At the center of it all was Lawrence himself. In early 1914 he was an archaeologist excavating ruins in Syria; by 1917 he was riding into legend at the head of an Arab army as he fought a rearguard action against his own government and its imperial ambitions. Based on four years of intensive primary document research, Lawrence in Arabia definitively overturns received wisdom on how the modern Middle East was formed. *Against the Modern World* is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of

religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr. "Featuring 180 volumes from the collection ... an extensive overview of important artists of the modern period and the art they created by integrating image and text"--Foreword. Explores the far-reaching impact of the ancient Greek historian Thucydides on modern historiography, political theory and international relations. How did the fact become modernity's most favored unit of knowledge? How did description come to seem separable from theory in the precursors of economics and the social sciences? Mary Poovey explores these questions in *A History of the Modern Fact*, ranging across an astonishing array of texts and ideas from the publication of the first British manual on double-entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s. She shows how the production of systematic knowledge from descriptions of observed particulars influenced government, how numerical representation became the privileged vehicle for generating useful facts, and how belief—whether figured as credit, credibility, or credulity—remained essential to the production of knowledge. Illuminating the epistemological conditions that have made modern social and economic knowledge possible, *A History of the Modern Fact* provides important contributions to the history of political thought, economics, science, and philosophy, as well as to literary and cultural criticism. 11 Flaubert and the Aesthetics of the Antiburgeois -- 12 The Apocalyptic Imagination: Nietzsche, Sorel, Schmitt -- 13 The Tragic Liberalism of Isaiah Berlin -- 14 Leo Strauss on Philosophy as a Way of Life -- 15 The Political Teaching of Lampedusa's *The Leopard* -- 16 Mr. Sammler's Redemption -- Part Four: Conclusion -- 17 Modernity and Its Doubles -- Notes -- Index -- A -- B -- C -- D -- E -- F -- G -- H -- I -- J -- K -- L -- M -- N -- O -- P -- Q -- R -- S -- T -- U -- V -- W -- X -- Y -- Z The magic of witchcraft never dies. Harness the power of nature-based magick, including herbal charms and remedies, cleansing rituals, crystal healing, astrology, and more with this new guide in the popular *Modern Witchcraft* series—perfect for
