Theories of Human Communication Aug 21 2022 For almost four decades, *Theories of Human Communication* has offered readers an engaging and informative guide to the rich array of theories that influence our understanding of communication. The first edition broke new ground with its comprehensive discussion of theorizing by communication scholars. Since that time, the field has expanded tremendously from a small cluster of explanations and relatively unconnected theories to a huge body of work from numerous traditions or communities of scholarship. The tenth edition covers both classic and recent theories created by communication scholars and informed by scholars in other fields. Littlejohn and Foss organize communication theory around two intersecting elements—contexts and theoretical traditions—and emphasize the connections, trajectories, and relationships among the theories. They provide clear, accessible explanations that synthesize without oversimplifying. Their extensive use of examples presents theorizing as a natural process and invites readers to reflect on their own experiences and to become active participants in continuing the conversation. In addition to the authors' lucid explanations of theories, the text includes From the Source boxes in which the theorists share their perspectives on communication. The extensive bibliography (almost 1,200 entries) and chapter citations are invaluable resources for more in-depth study.

**Social Support and Health in the Digital Age** Jan 26 2023 Social Support and Health in the Digital Age discusses how the information age has revolutionized nearly every facet of human communication--from the ways in which people purchase products to how they meet and fall in love. These exciting new communication technologies can both unite and divide us. People who are separated by great distances can now communicate with each other in real time, whereas parents often find themselves competing with smartphones and tablets for their children's attention. This book explores the many ways that digital communication media, such as online forums, social networking sites, and mobile applications, enhance and constrain social support in health-related contexts. We already know a great deal about how the Internet has altered how people search for health information, but less about how people seek and receive social support in this new age of information, which is critical for maintaining our physical, mental, and emotional wellbeing.

The products' emphasis on value creation makes it appropriate not only for students pursuing a sales career, but also those who seek these skills for other roles in life and business. New to This Edition: • Brand new chapter opening profiles • Brand new From the Buyer's Seat boxed items • Brand new Building Partnerships boxed items • Brand new Sales Technology boxed items • Brand new End-Of-Chapter Role Play Cases - while we continue to use Gartner as the company, the customers have all changed throughout
