LONG-TERM SUSPENSIONS: EFFECTIVE STRATEGIES TO KEEP STUDENTS ENGAGED IN SCHOOLING. Feb 21 2023 The purpose of the current study was to determine educational leaders' perceptions of effective strategies for keeping long-term suspended students engaged in learning. As school districts struggle with best practices to reduce dropouts and increase graduation rates, they look to ensure that suspended

students remain focused on education. A Q-Sort methodology was employed that allowed 40 participants, each a principal of a school district, to sort cards that contained a list of effective strategies. The study involved an investigation of the best practices to keep students engaged while serving a long-term suspension, practices that were developed from the literature as well as from practicing school educators. A set of working strategies was generated for further examination. Educators "sorted" these strategies for quantitative analysis, and a selection was interviewed for qualitative analysis. Finally, data was collected and analyzed from educators regarding their perceptions and experiences of the effective strategies. Findings revealed four emergent factors from the participants' understanding of the most effective strategies for keeping long-term suspended students engaged. Participants valued the importance of a strategy that places students in a separate physical site while serving their suspension, as well as programs that individually support each student to meet their unique needs (Factor One). Additionally, the principals in the study believed that placing an emphasis on building positive adult and peer relationships is an effective strategy to keep long-term suspended students engaged in school, including utilizing outside agencies, social workers, and counselors as needed (Factor Two). Strategies that allow the long-term suspended student to keep pace with their coursework were also believed by the participants to be effective (Factor Three) in allowing for on-time graduation. Finally, principals felt strongly about not giving up their efforts to redirect long-term suspended students' behavior and address individual needs, and were supportive of strategies that remove the long-term suspended student from their base school while maintaining consistent communication with the student, school, and family (Factor Four). Implications and recommendations for practice, policy, and research that emerged from the study are discussed.

The question is not "Do you understand?" but "Do you see?" -- William Duggan, Professor, Columbia University, author Strategic Intuition This book shows how to draw an organization's strategy so you see what's been considered, what's not been considered, and how things are related. Strategy building is presented as a fun and involving learning process. L.M. Dunbar, Emeritus Professor, Stern School of Business, New York University What a great idea! They layout is also really thoughtful; it makes you immediately want to get out a pencil and start doodling. --Adam Martin, Customer Solutions Director, The Brakes Group As a time pressed executive it was a delight to find a book that I can dip into to find the best strategic frameworks - those that have proved the test of time and academic scrutiny as being truly useful in the workplace. Even better for an inveterate scribbler: endorsement that a picture and 'permission to play' with ideas visually really does say a thousand words and more! --Sarah Mitson, Global Business Director, TNSGlobal This is an invaluable resource for any executive wanting to improve engagement in strategy development and communication. The accessible layout means that the book itself can play an active and inspiring role in strategy discussions. --Matt Thomas, Director, Braxton Associates, Strategy Consultants At last a book that grasps the implications of recent psychology: people think visually as well as verbally. Strategy Builder is landmark book is destined to make an important impact to the field of strategy, strategizing and strategic management. Executives across the board (and students of strategy) will find the core message of this book counterintuitive and compelling.
