Academic and Occupational English Needs of Tourism and Hotel Management Students. Oral Communication Skills in Focus Jul 01 2021 Master's Thesis from the year 2017 in the subject Didactics for the subject English - Pedagogy, Literature Studies, grade: 3.97 on a 4.0 scale, Haramaya University (School of Foreign Languages and Journalism), course: Teaching English as a Foreign Language, language: English, abstract: The purpose of this study was to identify the oral communication skills that Tourism and Hotel Management students (THMS) at Haramaya University need for their academic and career purposes. Particularly, this study aimed to assess the value of specific oral communication skills within occupational contexts, identify oral communication problems of THMS and explore the communicative events that arise during oral interactions. To attain the objectives, this research employed cross-sectional survey design and explanatory method for data analysis. The practitioners' questionnaire was distributed to 110 tourism and hospitality guest-facing practitioners, and THMS (n=70) filled in THMS' questionnaire. A semi-structured interview was conducted with 3 subject area lecturers. The quantitative data were processed by using SPSS 20 while the qualitative ones were coded based on semantic affinity for analysis. The study revealed that listening skills such as comprehending colloquial and idiomatic expressions, understanding guests' multifarious English accents, recognizing meaning shift because of change in intonation and stress are worthwhile for THMS' prospective careers in tourism and hospitality sector. Effective communication with guests on the phone, clear and direct speech, interpretation without meaning distortion and appropriate responses to guests' requests and complaints were found to be equally important speaking skills. Similarly, eye-contact, facial expressions, gesture, tone and pitch volume were found to be the salient non-verbal communication behaviors that should comply with the communicative contexts during oral interactions. The research indicated that most THMS lacked spoken production skills, spoken interaction skills and nonverbal communication skills. It also showed that the communicative events that arise during oral communication in occupational and academic contexts require THMS to have good command of oral proficiency. Therefore, it can be concluded that THMS' current oral proficiency may adversely affect their academic performance and employability skills. Based on the findings, the researcher recommends oral communication trainings that can enhance THMS' academic involvements and employability skills, and the inclusion of oral communication courses in THM curriculum for prospective use.

The Report: Abu Dhabi 2016 Sep 15 2022 Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial

services, health care, aviation and renewable energy.

The Inconvenient Generation Aug 22 2020 After three decades of massive rural-to-urban migration in China, a burgeoning population of over 35 million second-generation migrants living in its cities poses a challenge to socialist modes of population management and urban governance. In *The Inconvenient Generation*, Minhua Ling offers the first longitudinal study of these migrant youth from middle school to the labor market in the years after the Shanghai municipal government partially opened its public school system to them. Drawing on multi-sited ethnographic data, Ling follows the trajectories of dozens of children coming of age at a time of competing economic and social imperatives, and its everyday ramifications on their sense of identity, educational outcomes, and citizenship claims. Under policies and practices of segmented inclusion, they are inevitably funneled through the school system toward a life of manual labor. Illuminating the aspirations and strategies of these young men and women, Ling captures their experiences against the backdrop of a reemergent global Shanghai.

The New Keynesian framework is the workhorse for the analysis of monetary policy and its implications for inflation, economic fluctuations, and welfare. A backbone of the new generation of medium-scale models under development at major central banks and international policy institutions, the framework provides the theoretical underpinnings for the price stability-oriented strategies adopted by most central banks in the industrialized world. Using a canonical version of the New Keynesian model as a reference, Jordi Galí explores various issues pertaining to monetary policy's design, including optimal monetary policy and the desirability of simple policy rules. He analyzes several extensions of the baseline model, allowing for cost-push shocks, nominal wage rigidities, and open economy factors. In each case, the effects on monetary policy are addressed, with emphasis on the desirability of inflation-targeting policies. New material includes the zero lower bound on nominal interest rates and an analysis of unemployment's significance for monetary policy. The most up-to-date introduction to the New Keynesian framework available A single benchmark model used throughout New materials and exercises included An ideal resource for graduate students, researchers, and market analysts

The Report: Oman 2016 Apr 29 2021 Oman's GDP grew 4.6% between 2013 and 2014 according to the Oman Central Bank, with hydrocarbons the main driver of the economy at almost 50% of GDP. Although the dip in oil prices has put pressure on government revenues, authorities are pressing ahead with spending plans for the sector, particularly in the downstream segment. The country's infrastructure expansion plans are also moving forward, particularly at the country's three ports as the country seeks to leverage its strategic position on the Strait of Hormuz and establish itself as a global transport and logistics hub. Feeding off this development drive are the sultanate's banks, with project finance regarded as one of the most promising areas for lending growth. In the longer term, Oman Vision 2020 seeks to boost private sector participation in the economy and fuel SME growth in key sectors, including construction, retail, tourism and transport.

Demystifying AI for the Enterprise Feb 08 2022 Artificial intelligence (AI) in its various forms -- machine learning, chatbots, robots, agents, etc. -- is increasingly being seen as a core component of enterprise business workflow and information management systems. The current promise and hype around AI are being driven by software vendors, academic research projects, and startups. However, we posit that the greatest promise and potential for AI lies in the enterprise with its applications touching all organizational facets. With increasing business process and workflow maturity, coupled with recent trends in cloud computing, datafication, IoT, cybersecurity, and advanced analytics, there is an understanding that the challenges of tomorrow cannot be solely addressed by today's people, processes, and products. There is still considerable mystery, hype, and fear about AI in today's world. A considerable amount of current discourse focuses on a dystopian future that could adversely affect humanity. Such opinions, with understandable fear of the unknown, don't consider the history of human innovation, the current state of business and technology, or the primarily augmentative nature of tomorrow's AI. This book demystifies AI for the enterprise. It takes readers from the basics (definitions, state-of-the-art, etc.) to a multi-industry journey, and concludes with expert advice on everything an organization must do to succeed. Along the way, we debunk myths, provide practical pointers, and include best practices with applicable vignettes. AI brings to enterprise the capabilities that promise new ways by which professionals can address both mundane and interesting challenges more efficiently, effectively, and collaboratively (with humans). The opportunity for tomorrow's enterprise is to augment existing teams and resources with the power of AI in order to gain competitive advantage, discover new business models, establish or optimize new revenues, and achieve better customer and user satisfaction.

Popular Music, Cultural Politics and Music Education in China Nov 17 2022 While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the

implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation, which feared 'spiritual pollution' by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and students, the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland.
