This is the latest updated edition of the University of Cambridge's official statutes and Ordinances. This report completes the Law Commission's programme of work on the reform and modernisation of housing law and practice. Earlier reports were (1) "Renting homes" (Law Com. 297, Cm. 6781, ISBN 9780101678124) and (2) "Housing: proportionate dispute resolution (Law Com. 309, Cm. 7377, ISBN 9780101737722). The focus of this report is the private rented sector, specifically the repair and maintenance of the property and harassment and unlawful eviction. It builds on the consultation paper on this topic (2007, Consultation paper 181, ISBN 9780117037816). Part 1 sets out the background, and part 2 considers the case for change. Part 3 reviews the history of regulation. The options for change outlined in the discussion paper are rehearsed in part 4 and part 5 sets out the conclusions drawn by the Commission from the responses to that paper (which are detailed in appendix B). Part 6 sets out the recommendations for reform. The review offers the prospect of a new regulatory approach that will be of significant social benefit. Implementation of the recommendations in "Renting homes" would contribute to the understanding of both landlords and occupiers of their mutual legal rights and responsibilities and encourage responsible renting. Smart regulation is proposed, involving much greater self-regulation by the sector, the establishment of housing standards monitors and codes of practice for housing management practice and letting agents. The recommendations set out a series of affordable and proportionate measures that, by enhancing self-regulation, will improve the management of the private rented sector. This is the latest updated edition of the University of Cambridge's official statutes and Ordinances. "This marvelous and uniquely comprehensive book sets a new, high standard of excellence in the study of Greek archaeology."--Ronald S. Stroud, University of California, Berkeley "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. This volume examines the applicability of landscape urbanism theory in contemporary landscape architecture practice by bringing together ecology and architecture in the built environment. Using participatory planning of green infrastructure and application of nature-based solutions to address urban challenges, landscape urbanism seeks to reintroduce critical connections between natural and urban systems. In light of ongoing developments in landscape architecture, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. Nine contributions examine a wide range of successful cases of designing livable and resilient cities in different geographical contexts, from the United States of America to Australia and Japan, and through several European cities in Italy, Portugal, Estonia, and Greece. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Efforts such as the use of ornamental helophyte plants in bioretention ponds to reduce and treat stormwater runoff, the recovery of a poorly constructed urban waterway or participatory approaches for optimizing the location of green stormwater infrastructure and examining the environmental justice issue of equitable availability and accessibility to public open spaces make these innovations explicit. Thus, this volume contributes to the sustainable cities goal of the United Nations. This is the latest updated edition of the University of Cambridge's official statutes and Ordinances. Information is a critical resource for personal, economic and social development. Libraries and archives are the primary access point to information for individuals and communities with much of the information protected by copyright or licence terms. In this complex legal environment, librarians and information professionals operate at the fulcrum of copyright's balance, ensuring understanding of and compliance with copyright legislation and enabling access to knowledge in the pursuit of research, education and innovation. This book, produced on behalf of the IFLA Copyright and other Legal Matters (CLM) Advisory Committee, provides basic and advanced information about copyright, outlines limitations and exceptions, discusses communicating with users and highlights emerging copyright issues. The chapters note the significance of the topic; describe salient points of the law and legal concepts; present selected comparisons of approaches around the world; highlight opportunities for reform and advocacy; and help libraries and librarians find their way through the copyright maze.
