"The ruminations of supposedly hush-hush hedge fund operators are richly illuminating." --New York Times REVISED PAPERBACK EDITION WITH NEW MATERIAL IN EVERY CHAPTER Jack D. Schwager has returned to the traders to ask them how they navigated the unprecedented markets of 2020–2022, including the pandemic bear market, an abrupt reversal to new highs, rising inflation, and the emergence of another bear market. All chapters updated with exclusive new interviews with the Unknown Market Wizards. The Market Wizards are back! Unknown Market Wizards continues in the three-decade tradition of the hugely popular Market Wizards series, interviewing exceptionally successful traders to learn how they achieved their extraordinary performance results. The twist in Unknown Market Wizards is that the featured traders are individuals trading their own accounts. They are unknown to the investment world. Despite their anonymity, these traders have achieved performance records that rival, if not surpass, the best professional managers. Some of the stories include: - A trader who turned an initial account of \$2,500 into \$50 million. - A trader who achieved an average annual return of 337% over a 13-year period. - A trader who made tens of millions using a unique approach that employed neither fundamental nor technical analysis. - A former advertising executive who used classical chart analysis to achieve a 58% average annual return over a 27-year trading span. - A promising junior tennis player in the UK who abandoned his quest for a professional sporting career for trading and generated a nine-year track record with an average annual return just under 300%. World-renowned author and trading expert Jack D. Schwager is our guide. His trademark knowledgeable and sensitive interview style encourages the Wizards to reveal the fascinating details of their training, experience, tactics, strategies, and their best and worst trades. There are dashes of humour and revelations about the human side of trading throughout. The result is an engrossing new collection of trading wisdom, brimming with insights that can help all traders improve their outcomes. Unfounded assumptions, erroneous theories, unrealistic models, cognitive biases, emotional foibles, and unsubstantiated beliefs all combine to lead investors astray—professionals as well as novices. In this engaging new book, Jack Schwager, bestselling author of Market Wizards and The New Market Wizards, takes aim at the most perniciously pervasive academic precepts, money management canards, market myths and investor errors. Like so many ducks in a shooting gallery, Schwager picks them off, one at a time, revealing the truth about many of the fallacious assumptions, theories, and beliefs at the core of investment theory and practice. A compilation of the most insidious, fundamental investment errors the author has observed over his long and distinguished career in the markets Brings to light the fallacies underlying many widely held academic precepts, professional money management methodologies, and investment behaviors A

sobering dose of real-world insight for investment professionals and a highly readable source of information and guidance for general readers interested in investment, trading, and finance. How top traders made huge profits during the most momentous market events of the past century. Financial and commodity markets are characterized by periodic crashes and upside explosions. In retrospect, the reasons behind these abrupt movements often seem very clear, but generally few people understand what's happening at the time. Top traders and investors like George Soros or Jesse Livermore have stood apart from the crowd and capitalized on their unique insights to capture huge profits. Engaging and informative, *The Greatest Trades of All Time* chronicles how a select few traders anticipated market eruptions—from the 1929 stock market crash to the 2008 subprime mortgage meltdown—and positioned themselves to excel while a majority of others failed. Along the way, author Vincent Veneziani describes the economic and financial forces that led to each market cataclysm and how these individuals perceived what was happening beforehand and why they decided to place big bets, often at great risk and in opposition to consensus opinion at the time. Traders discussed include George Soros, Jesse Livermore, Paul Tudor Jones, John Templeton, and John Paulson. Provide contemporary traders and investors with insights on how great traders make great trades. Offers insights on market forecasting, mass psychology, and the importance of personal conviction in trading.
