Environmental Decisions in the Face of Uncertainty Apr 17 2023 The U.S. Environmental Protection Agency (EPA) is one of several federal agencies responsible for protecting Americans against significant risks to human health and the environment. As part of that mission, EPA estimates the nature, magnitude, and likelihood of risks to human health and the environment; identifies the potential regulatory actions that will mitigate those risks and protect public health¹ and the environment; and uses that information to decide on appropriate regulatory action. Uncertainties, both qualitative and quantitative, in the data and analyses on which these decisions are based enter into the process at each step. As a result, the informed identification and use of the uncertainties inherent in the process is an essential feature of environmental decision making. EPA requested that the Institute of Medicine (IOM) convene a committee to provide guidance to its decision makers and their partners in states and localities on approaches to managing risk in different contexts when uncertainty is present. It also sought guidance on how information on uncertainty should be presented to help risk managers make sound decisions and to increase transparency in its communications with the public about those decisions. Given that its charge is not limited to human health risk assessment and includes broad questions about managing risks and decision making, in this report the committee examines the analysis of uncertainty in those other areas in addition to human health risks. Environmental Decisions in the Face of Uncertainty explains the statement of task and summarizes the findings of the committee.

Ethical and Scientific Issues in Studying the Safety of Approved Drugs Mar 16 2023 An estimated 48 percent of the population takes at least one prescription drug in a given month. Drugs provide great benefits to society by saving or improving lives. Many drugs are also associated with side effects or adverse events, some serious and some discovered only after the drug is on the market. The discovery of new adverse events in the postmarketing setting is part of the normal natural history of approved drugs, and timely identification and warning about drug risks are central to the mission of the Food and Drug Administration (FDA). Not all risks associated with a drug are known at the time of approval, because safety data are collected from studies that involve a relatively small number of human subjects during a relatively short period. Written in response to a request by the FDA, Ethical and Scientific Issues in Studying the Safety of Approved Drugs discusses ethical and informed consent issues in conducting studies in the postmarketing setting. It evaluates the strengths and weaknesses of various approaches to generate evidence about safety questions, and makes recommendations for appropriate followup studies and randomized clinical trials. The book provides

guidance to the FDA on how it should factor in different kinds of evidence in its regulatory decisions. Ethical and Scientific Issues in Studying the Safety of Approved Drugs will be of interest to the pharmaceutical industry, patient advocates, researchers, and consumer groups.

The Oxford Handbook of Assessment Policy and Practice in Music Education Apr 24 2021 In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.

The Survival Kit for the Elementary School Principal Oct 31 2021 For the new and veteran elementary school principal, here is a unique "survival kit" packed with tested advice, practical guidelines, and ready-to-use materials for all aspects of your job. From the perspective of an author with twenty-five years experience, this book offers techniques such as creating a school vision, building and sustaining morale, utilizing technology, and long-term, strategic school planning. The included companion CD-ROM serves as the perfect enhancement to this book. This time saving device contains all of the book's forms, checklists and letters for easy print out and use.

Failed Promises Dec 13 2022 A systematic evaluation of the implementation of the federal government's environmental justice policies. In the 1970s and 1980s, the U.S. Congress passed a series of laws that were milestones in environmental protection, including the Clean Air Act and the Clean Water Act. But by the 1990s, it was clear that environmental benefits were not evenly distributed and that poor and minority communities bore disproportionate environmental burdens. The Clinton administration put these concerns on the environmental policy agenda, most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate. This volume offers the first systematic, empirically based evaluation of the effectiveness of the federal government's environmental justice

policies. The contributors consider three overlapping aspects of environmental justice: distributive justice, or the equitable distribution of environmental burdens and benefits; procedural justice, or the fairness of the decision-making process itself; and corrective justice, or the fairness of punishment and compensation. Focusing on the central role of the Environmental Protection Agency, they discuss such topics as facility permitting, rulemaking, participatory processes, bias in enforcement, and the role of the courts in redressing environmental injustices. Taken together, the contributions suggest that—despite recent environmental justice initiatives from the Obama administration—the federal government has largely failed to deliver on its promises of environmental justice. Contributors Dorothy M. Daley, Eileen Gauna, Elizabeth Gross, David M. Konisky, Douglas S. Noonan, Tony G. Reames, Christopher Reenock, Ronald J. Shadbegian, Paul Stretesky, Ann Wolverton

Online interactive resources for asynchronous modality in teaching grade 12 General Biology Oct 19 2020 Master's Thesis from the year 2021 in the subject Didactics - Biology, grade: 12, , language: English, abstract: This research assessed the status of online interactive resources for asynchronous modality in teaching grade 12 General Biology 1 at the University of Cebu – METC Campus, Cebu City during School Year 2020 – 2021 as the basis for an enhanced learning module. This study utilized a quasi-experimental method of research employing the use of a non-equivalent control group pretest-posttest design. Two sections of Grade 12 STEM with a total of 47 students participated as research respondents, in both the experimental and the control groups. The students answered a 40-item multiple-choice questionnaire as a research instrument. The control group was treated with only pure-text modules and PowerPoint presentation. In contrast, students from the experimental group utilized online interactive resources containing some hyperlinked lectures, video lectures, interactive games, animations, and some simulated demonstrations that were adopted and utilized for Grade 12 STEM learners in General Biology 1.

The Financial Crisis Inquiry Report Oct 11 2022 From the Publisher: In the wake of the most significant financial crisis since the Great Depression, the President signed into law on May 20, 2009, the Fraud Enforcement and Recovery Act of 2009, creating the Financial Crisis Inquiry Commission. The Commission was established to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." The 10 members of the bi-partisan Commission, prominent private citizens with significant experience in banking, market regulation, taxation, finance, economics, housing, and consumer protection, were appointed by Congress on July 15, 2009. The Chair, Phil Angelides, and Vice Chair, Bill Thomas, were selected jointly by the House and Senate Majority and Minority Leadership. The FCIC is charged with conducting a comprehensive examination of 22 specific and substantive areas of inquiry related to the financial crisis. These include: fraud and abuse in the financial sector, including fraud and abuse towards consumers in the mortgage sector; Federal and State financial regulators, including the extent to which they enforced, or failed to enforce statutory, regulatory, or supervisory requirements; the global imbalance of savings,

international capital flows, and fiscal imbalances of various governments; monetary policy and the availability and terms of credit; accounting practices, including, mark-to-market and fair value rules, and treatment of off-balance sheet vehicles; tax treatment of financial products and investments; capital requirements and regulations on leverage and liquidity, including the capital structures of regulated and non-regulated financial entities; credit rating agencies in the financial system, including, reliance on credit ratings by financial institutions and Federal financial regulators, the use of credit ratings in financial regulation, and the use of credit ratings in the securitization markets; lending practices and securitization, including the originate-to-distribute model for extending credit and transferring risk; affiliations between insured depository institutions and securities, insurance, and other types of nonbanking companies; the concept that certain institutions are 'too-big-to-fail' and its impact on market expectations; corporate governance, including the impact of company conversions from partnerships to corporations; compensation structures; changes in compensation for employees of financial companies, as compared to compensation for others with similar skill sets in the labor market; the legal and regulatory structure of the United States housing market; derivatives and unregulated financial products and practices, including credit default swaps; short-selling; financial institution reliance on numerical models, including risk models and credit ratings; the legal and regulatory structure governing financial institutions, including the extent to which the structure creates the opportunity for financial institutions to engage in regulatory arbitrage; the legal and regulatory structure governing investor and mortgagor protection; financial institutions and government-sponsored enterprises; and the quality of due diligence undertaken by financial institutions. The Commission is called upon to examine the causes of major financial institutions which failed, or were likely to have failed, had they not received exceptional government assistance. In its work, the Commission is authorized to hold hearings; issue subpoenas either for witness testimony or documents; and refer to the Attorney General or the appropriate state Attorney General any person who may have violated U.S. law in relation to the financial crisis.

Teach Feb 20 2021 Teach is a concise introduction to education that challenges students' preconceived notions of teaching in order to transform them into reflective practitioners. Empathizing with the difficulties students face as they move from the college classroom to their own classrooms, revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession, making the philosophy of teaching and learning accessible and relevant. The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field, while also including the Interstate Teacher Assessment and Support Consortium (InTASC) standards correlating with each chapter's content. With the guidance of this supportive text, students will gain vital exposure by engaging with professional standards from the very start of their career.

India-United States Cooperation on Global Security Jan 22 2021 The U.S. government has made safeguarding of weapons-grade plutonium and highly enriched uranium an international policy priority, and convened The 2010 Nuclear Security Summit in Washington, D.C., on April 12 and 13, 2010. Forty six governments sent delegations to the summit and twenty nine of them made national commitments to support nuclear security. During the Summit, India announced its commitment to establish a Global Centre for Nuclear Energy Partnership. The Centre is to be open to international participation through academic exchanges, training, and research and development efforts. India-United States Cooperation on Global Security is the summary of a workshop held by the U.S. National Academy of Sciences (NAS) together with its partner of more than 15 years, the National Institute for Advanced Studies (NIAS) in Bangalore, India. The workshop identified and examined potential areas for substantive scientific and technical cooperation between the two countries on issues related to nuclear material security. Technical experts from India and the United States focused on topics of nuclear material security and promising opportunities for India and the United States to learn from each other and cooperate. This report discusses nuclear materials management issues such as nuclear materials accounting, cyber security, physical security, and nuclear forensics.

The Budget of the United States Government Feb 15 2023

Mercury in the Environment Jan 02 2022 Mercury pollution and contamination are widespread, well documented, and continue to pose a public health concern in both developed and developing countries. In response to a growing need for understanding the cycling of this ubiquitous pollutant, the science of mercury has grown rapidly to include the fields of biogeochemistry, economics, sociology, public health, decision sciences, physics, global change, and mathematics. Only recently have scientists begun to establish a holistic approach to studying mercury pollution that integrates chemistry, biology, and human health sciences. Mercury in the Environment follows the process of mercury cycling through the atmosphere, through terrestrial and aquatic food webs, and through human populations to develop a comprehensive perspective on this important environmental problem. This timely reference also provides recommendations on mercury remediation, risk communication, education, and monitoring.

Appendix, Budget of the United States Government, Fiscal Year 2012 Jun 26 2021

Contains detailed information on the various appropriations and funds that constitute the budget and is designed primarily for the use of the Appropriations Committee. The Appendix contains more detailed financial information on individual programs and

appropriation accounts than any of the other budget documents. It includes for each agency: the proposed text of appropriations language, budget schedules for each account, new legislative proposals, and explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or group of agencies. Information is also provided on certain activities whose outlays are not part of the budget totals.

Curriculum and Instruction Jun 07 2022 Written and signed by experts in the field, this volume in the point/counterpoint Debating Issues in American Education reference series tackles the topic of curriculum and instruction, providing an illustrated overview of the subject as well as resources for further study.

Department of Homeland Security Appropriations for 2014 Mar 04 2022

Class Action May 26 2021 In this inspiring history of a union, labour historian Andy Hanson delves deep into the Elementary Teachers' Federation of Ontario (ETFO) and how it evolved from two deeply divided unions to one of the province's most united and powerful voices for educators. Today's teacher is under constant pressure to raise students' test scores, while the rise of neoliberalism in Canada has systematically stripped our education system of funding and support. But educators have been fighting back with decades of fierce labour action, from a landmark province-wide strike in the 1970s, to record-breaking front-line organizing against the Harris government and the Common Sense Revolution, to present-day picket lines and bargaining tables. Hanson follows the making of elementary teachers in Ontario as a distinct class of white-collar, public-sector workers who awoke in the last quarter of the twentieth century to the power of their collective strength.

Business opportunities and development trends of emerging smart cities in China Jul 16 2020

Abstract

Due to the high population density in urban areas worldwide, China - with the world largest population - is facing the increased pressure with respect to resource management as well. In order to sustain its economic growth, China has begun seeking new opportunities and the smart city concept - boasting a potential market value worth trillions of RMB - seems to be an optimal solution to obtain more investment funds from international and Chinese ICT companies. This report profiles the definition of a smart city and provides insight into the government policies, current industry development strategies and new opportunities expected to create for cities undertaking the smart city initiative in China.

Minerals Yearbook, 2010, V. 3, Area Reports, International, Africa and the Middle East Jul 08 2022 The Minerals Yearbook is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on

economic and technical trends and development. The Minerals Yearbook includes chapters on approximately 90 commodities and over 175 countries. This volume of the Minerals Yearbook provides an annual review of mineral production and trade and of mineral-related government and industry developments in more than 175 foreign countries. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook.

A Teacher's Guide to Using the Common Core State Standards With Gifted and Advanced Learners in the English/Language Arts Apr 05 2022 A Teacher's Guide to Using the Common Core State Standards With Gifted and Advanced Learners in the English/Language Arts provides teachers and administrators a blueprint for differentiating the Common Core State Standards for English Language Arts for gifted and advanced students through the use of acceleration, depth, complexity, and creativity within and across grade levels. It illustrates the differences between learning experiences for typical and advanced students based on the same standard and provides an array of examples across five of the information text and literary text standards while integrating the other aspects of language arts teaching and learning. The book highlights implementation features, such as classroom management and assessment of student work, that allow teachers to make data-based decisions about instruction for particular students. It also offers guidance to teachers on reading selections for advanced learners at all grade levels.

Federal Register Feb 03 2022

North Korea, Iran and the Challenge to International Order Dec 01 2021 This book examines and compares the political situations in North Korea and Iran, and the contemporary security challenges posed by their illicit nuclear aspirations. While government officials, including a series of American presidents, strategic policy documents and outside analysts have repeatedly noted that North Korea and Iran occupy a similar challenge, the commonality has largely been left unexplored. This book argues that North Korea and Iran are uniquely common in the world today in their illicit nuclear aspirations in violation of their legal commitments made under the Non-Proliferation Treaty. The work evaluates alternative arguments, some of which sustain that the two states should be grouped together based on other metrics, such as nuclear powers that sponsor terrorist organizations or nuclear states that violate human rights, and find alternative explanations do not hold up to empirical scrutiny. Drawing on newly declassified documents and Iranian and North Korean sources, the book provides a comprehensive and comparative assessment of the two states' social, historical, economic, and domestic political structures and situation to make these determinations. Furthermore, it reviews the nuclear issue stemming from Iran and North Korea and the efforts to constrain these programs. The book concludes with specific policy recommendations that apply diplomatic lessons learned from dealing with Iran to North Korea and vice versa. This book will be of interest to students of nuclear proliferation, international security, foreign policy and International Relations.

Financial Crisis Inquiry Report Nov 12 2022 The Financial Crisis Inquiry Commission was created to "examine the causes of the current financial and economic crisis in the U.S." In this report, the Commission presents the results of its examination and its conclusions as to the causes of the crisis. More than two years after the worst of the financial crisis, our economy continues to experience the aftershocks. Millions of Americans have lost their jobs and their homes, and the economy is still struggling to rebound. This report is intended to provide a historical accounting of what brought our financial system and economy to a precipice and to help policy makers and the public better understand how this calamity came to be. Charts and tables. This is a print on demand report.

School Mathematics Curricula Aug 17 2020 This book sheds light on school mathematics curricula in Asian countries, including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience.

Community Engagement in Higher Education May 06 2022 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local, national, and international levels. But what is community engagement? Even if this interest is genuine and widespread, there are many different concepts of community service, outreach, and engagement. The wide range of activity encompassed by community engagement suggests that a precise definition of the "community mission" is difficult and organizing and coordinating such activities is a complex task. This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it. Contributors provide empirical research findings, including several case study examples that respond to the following higher education community engagement issues. What is "the community" and what does it need and expect from higher education institutions? Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities, technical universities, community colleges, or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally-competent researchers and professionals? How can a

university be global and at the same time locally relevant? Is it, or should it be, left to the institutions to determine the scope and mode of their community engagement, or is a state mandate preferable and feasible? If community engagement or "community service" are mandatory, what are the consequences of not complying with the mandate? How effective are policy mandates and university engagement for regional and local economic development? What are the principal features and relationships of regionally-engaged universities? Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it, or should it be, made mandatory for both faculty and students? How can community engagement be (better) integrated with the (other) two traditional missions of the university—research and teaching? Cover image: The Towering Four-fold Mission of Higher Education, by Natalie Jacob

FCC Record Sep 17 2020

Russian-European Relations in the Balkans and Black Sea Region Jul 28 2021 This book provides a detailed analysis of Russia's "great power identity" and the role of Europe in forming this identity. "Great power identity" implies an expansionist foreign policy, and yet this does not explain all the complexities of the Russian state. For instance, it cannot explain why Russia decided to take over Crimea, but provided only limited support to break-away regions in Eastern Ukraine. Moreover, if Russia is in geo-economic competition with Europe, why has no serious conflict erupted between Moscow and other post-Soviet states which developed closer ties with the EU? Finally, why does Putin maintain relationships with the European countries that imposed tough economic sanctions on Russia? Vsevolod Samokhvalov provides a more nuanced understanding of Russia's great power identity by drawing on his experience in regional diplomacy and research and applying a constructivist methodology. The book will appeal to students and scholars of international relations, in particular Russian-European relations, Russian foreign policy and Russian studies.

Fordham Institute and the Center for American Progress publication America's fragmented, decentralized, politicized, and bureaucratic system of education governance is a major impediment to school reform...

Evaluation of the Achievement Levels for Mathematics and Reading on the National Assessment of Educational Progress Jul 20 2023 Since 1969, the National Assessment of Educational Progress (NAEP) has been providing policymakers, educators, and the public with reports on academic performance and progress of the nation's students. The assessment is given periodically in a variety of subjects: mathematics, reading, writing, science, the arts, civics, economics, geography, U.S. history, and technology and engineering literacy. NAEP is given to representative samples of students across the U.S. to assess the educational progress of the nation as a whole. Since 1992, NAEP results have been reported in relation to three achievement levels: basic, proficient, and advanced. However, the use of achievement levels has provoked controversy and

disagreement, and evaluators have identified numerous concerns. This publication evaluates the NAEP student achievement levels in reading and mathematics in grades 4, 8, and 12 to determine whether the achievement levels are reasonable, reliable, valid, and informative to the public, and recommends ways that the setting and use of achievement levels can be improved.

Developments in Steelmaking Capacity of Non-OECD Economies 2010 Sep 29 2021
This publication is a two-yearly report on trends in the steelmaking capacity in economies that are not members of the OECD. This report examines the current steelmaking capacity of these economies and likely changes therein up to the year 2012.

Yale Law Journal: Volume 122, Number 3 - December 2012 Aug 29 2021
One of the world's leading law journals is available in quality ebook formats. This issue of The Yale Law Journal (the third of Volume 122, academic year 2012-2013) features new articles and essays on law and legal theory by internationally recognized scholars. Contents include: □ John H. Langbein, "The Disappearance of Civil Trial in the United States" □ Daniel E. Ho, "Fudging the Nudge: Information Disclosure and Restaurant Grading" □ Saul Levmore & Ariel Porat, "Asymmetries and Incentives in Plea Bargaining and Evidence Production" The issue also includes extensive student research on targeted killings of international outlaws, Confrontation Clause jurisprudence as implemented in lower courts, and the implied license doctrine of copyright law as applied to news aggregators. Ebook formatting includes linked footnotes and an active Table of Contents (including linked Tables of Contents for all individual articles and essays), as well as active URLs in notes and extensive tables, and properly presented figures and tables.

Global Brazil and U.S.-Brazil Relations Mar 24 2021 July 12, 2011-Over the course of a generation, Brazil has emerged as both a driver of growth in South America and as an active force in world politics. A new Council on Foreign Relations (CFR)-sponsored Independent Task Force report asserts "that it is in the interest of the United States to understand Brazil as a complex international actor whose influence on the defining global issues of the day is only likely to increase."Brazil currently ranks as the world's fifth-largest landmass, fifth-largest population, and expects to soon be ranked the fifth largest economy. The report, Global Brazil and U.S.-Brazil Relations, recommends that "U.S. policymakers recognize Brazil's standing as a global actor, treat its emergence as an opportunity for the United States, and work with Brazil to develop complementary policies."The Task Force is chaired by former secretary of energy Samuel W. Bodman and former president of the World Bank James D. Wolfensohn, and directed by CFR Senior Fellow and Director for Latin America Studies, and Director of the Global Brazil Initiative Julia E. Sweig.Recognizing Brazil's global role, the report recommends that the Obama administration now fully endorse the country's bid for a seat as a permanent member of the United Nations Security Council (UNSC). It argues that "a formal endorsement from the United States for Brazil would go far to overcome lingering suspicion within the Brazilian government that the U.S. commitment to a mature

relationship between equals is largely rhetorical." Domestically, Brazil's "inclusive growth has translated into a significant reduction of inequality, an expansion of the middle class, and a vibrant economy, all framed within a democratic context." Consequently, Brazil has been able to use its economic bona fides to leverage a stronger position in the international, commercial, and diplomatic arena. The report stresses the importance of regular communication between the presidents of both countries. "Cooperation between the United States and Brazil holds too much promise for miscommunication or inevitable disagreements to stand in the way of potential gains." A mature, working relationship means that "the United States and Brazil can help each other advance mutual interests even without wholesale policy agreements between the two," notes the report. The Task Force further recommends that- the U.S. Congress "include an elimination of the ethanol tariff in any bill regarding reform to the ethanol and biofuel tax credit regime."- the United States "take the first step to waive visa requirements for Brazilians by immediately reviewing Brazil's criteria for participation in the Visa Waiver Program."- the U.S. State Department create an Office for Brazilian Affairs and the National Security Council (NSC) centralize its efforts under a NSC director for Brazil in order to better coordinate the current decentralized U.S. policy. The bipartisan Task Force includes thirty distinguished experts on Brazil who represent a range of perspectives and backgrounds. The report includes a number of additional views by Task Force members, including one that notes, "We believe that a more gradual approach [regarding Brazil's inclusion as a full UNSC member] would likely have more success in navigating the diplomatic complexities presented by U.S. support for Brazil." Another view asserts, "If the United States supports, as the Obama administration has said it does, leadership structures in international institutions that are more reflective of international realities, it must support without qualifications Brazil's candidacy [for the UNSC]."
