The Student Workbook contains detailed interactive exercises such as fill-in-the-blank and matching, designed to reinforce learning and increase student comprehension. Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019. patient explanations, superb exercises, focus on problem solving, and carefully graded problem sets that have made Stewart's texts best-sellers continue to provide a strong foundation for the Seventh Edition. Connected eBooks provide what you need most to be successful in your law school classes. Learn more about Connected eBooks Intended for use in an International Law survey course, International Law, Seventh Edition provides comprehensive coverage of foundational international law questions, including the nature and sources of international law, core doctrinal topics such as the subjects of international law (states and international organizations), and the jurisdictional powers and immunities of states. The book also addresses key substantive topics in international law, with reference to important contemporary foreign policy issues, such as (i) international human rights, (ii) the law of the sea, (iii) international environmental law, (iv) the use of force and the law of armed conflict, and (v) international criminal law. Key Features: New co-author Duncan Hollis of Temple Law School joins Stanford Law School 's Allen Weiner as the active authors of the book. New discussions of major international developments, including the law governing the use of force [e.g., cyber operations and the military campaign against the Islamic State (ISIS)], nonproliferation (e.g., the Iranian and North Korean nuclear crises), the law of the sea (e.g., disputed maritime claims in the South China Sea), and international environmental law (e.g., the conclusion of the Paris Agreement). New case study in Chapter 1 focused on the international response to the rise of ISIS. Inclusion of extended excerpts from a number of major recent Supreme Court decisions related to international law, including *Bond v. United States* (on fundamental principles of federalism and the treaty power under Article VI of the Constitution), *Zivotofsky v. Kerry* (on the separation of powers between Congress and the President in the field of foreign affairs), and *Kiobel v. Royal Dutch Petroleum Co.* (on the Alien Tort Statute). Adopts a modern, conceptual approach to the presentation of materials on statehood (including Palestinian claims to statehood), international organizations, and international dispute resolution. In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning

can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning.
