Assessment in Geographical Education: An International

Perspective Jan 14 2023 In recent years there has been increased

attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing.

Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is

that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

Teaching Learners with Visual Impairment May 06 2022 This book, *Teaching Learners with Visual Impairment*, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Empowering IT and CAT Teachers Jun 26 2021 This book was written by lecturers in Computers Science Education from three different universities in South Africa. It is a methodological guide to effective teaching of the school subjects IT and CAT. It is an easily understandable, practical guide aimed at student teachers in IT and CAT, but will also assist IT and CAT teachers in their strive to improve their teaching. Activities and assignments are included to assist students in the acquisition of skills and to guide facilitators in the assessment of the outcomes.

Information and Communications Technology in STEM Education

Sep 17 2020 This timely book presents the latest scholarly research on the integration of Information Communications Technology (ICT) for enhanced STEM education in African schools and universities. Featuring critical discussion and illustration of key data-led arguments, this volume gives a comprehensive picture of the breadth, complexity, and diversity of issues present in different African countries. It highlights a diverse range of topics such as approaches to ICT integration, the use of digital technologies to support inquiry-based learning, teacher development, and contextual issues in ICT integration for STEM education. Chapters feature contributions and shared experiences from prominent science educators and researchers from across African regions, and demonstrate findings and reflections on emerging trends, pedagogical innovations, and research-informed practices on ICT integration in STEM education. Offering cutting-edge research on STEM and digital education in Africa, the book will appeal to researchers, postgraduate students, and scholars in the fields of STEM education, ICT education, digital education, and pedagogy.
