From the days when U Street was hailed as "Black Broadway" to the current revitalization and gentrification of the new millennium, Ben's Chili Bowl survived it all. On August 22, 1958, West Indian immigrant Mahaboob Ben Ali and his fiancée, Virginia Rollins, saw their dream realized as they opened a hot dog and chili shop on U Street. They never imagined that Ben's would become world renowned or such a beloved restaurant in the nation's capital. Today visitors to U Street will find a diverse and eclectic mix of residents, music venues, trendy shops, and, of course, "the

Bowl." The images in this book provide a look back over the 50-year history of Ben's Chili Bowl, U Street, the Ali family, and the patrons who have helped define Ben's as a vibrant cultural landmark." This valiant story of how young George Washington was drawn into his country's struggle for independence gives readers a vivid perspective on a crucial era in American history--and on the life of a revolutionary hero. Boyett has written a book that will inspire you, lift your spirits, renew your faith in what progressives can accomplish, and show you a way forward. Getting Things Done in Washington tells the exciting stories of six great

moments of progressive legislative history and the people who made them happen: James Madison and the founding fathers struggle to expand the power of the federal government, The Ladies of Beekman Hill, George Wiley and the struggle for pure food and drugs, Wilbur Mills and the struggle for universal health insurance, Robert Wagner and the struggle for the right of labor to organize, John Sherman and the struggle to rein in and regulate big business, and Lyndon Johnson and the struggle for civil rights legislation. Boyett describes what it was like to live in America before progressives secured these historic pieces of

legislation and how these legislative achievements changed the lives of every American. He introduces you to the fascinating men and women who led the efforts to pass this legislation and shows us how to defeat conservatives and once again get progressive things done in Washington. Getting Things Done in Washington is vivid and exciting history. It will inspire you to work even harder for progressive causes. Most importantly, it will give you the tools to begin getting things done in Washington. Washington himself desired the new city planned somewhat like Philadelphia, a plain checkerboard, but

L'Enfant, while making the checkerboard style the basis, diversified, beautified, and complicated the whole by a system of avenues radiating from the Capitol as the centre and starting-point of the whole system. The streets running east and west are designated by letters. They are divided into two classes or sets—those north of the Capitol and those south of it. Thus, the first street north of the Capitol is A Street North, and the first street south of it is A Street South, the next is B Street, North or South, as the case may be, and so on. These distinctions of North, South, East, and West are most important, as forgetfulness of them is apt to

lead to very great inconvenience. The streets are laid off at regular distances from each other, but for convenience other thoroughfares not laid down in the original plan have been cut through some of the blocks. These are called "half streets," as they occur between, and are parallel with, the numbered streets. Thus, Four-and-a-half Street is between Fourth and Fifth streets, and runs parallel with them. The avenues run diagonally across the city. New Jersey, Pennsylvania, Maryland, and Delaware avenues intersect at the Capitol, and Pennsylvania, New York, Vermont, and Connecticut avenues intersect

at the President's house. Pennsylvania Avenue is the main thoroughfare. It is one hundred and sixty feet wide, and extends the entire length of the city, from the Eastern Branch to Rock Creek, which latter stream separates Washington from Georgetown. It was originally a swampy thicket. The bushes were cut away to the desired width soon after the city was laid off, but few persons cared to settle in the swamp. Through the exertions of President Jefferson, it was planted with four rows of fine Lombardy poplars—one on each side and two in the middle—with the hope of making it equal to the famous Unter den Linden, in

Berlin. The poplars did not grow as well as was hoped, however, and when the avenue was graded and paved by order of Congress in 1832 and 1833 these trees were removed. Pennsylvania Avenue is handsomely built up, and contains some buildings that would do credit to any city. The distance from the Capitol to the President's house is one mile, and the view from either point along the avenue is very fine. Every circle, triangle, and square dedicated to monuments bears testimony to the taste of the original design. So little respect, however, was held for Major L'Enfant's plans that Daniel Carroll, one of the original owners of the land,

was in the act of building a handsome house right across New Jersey Avenue. L'Enfant ordered it torn down. This was done, much to the disgust of Carroll and to the indignation of the commissioners. The government rebuilt the house for Carroll, but was careful to place it in a more suitable location. The old Duddington House, on Capitol Hill, was long a landmark of the early Washington architecture. Celebrating The Olympic Hotel's 80th year of operation, this book traces the history of the hotel's site (the original campus of today's University of Washington), the public campaign to build a "community hotel," the

numerous events and celebrities it has hosted, and The Olympic's rebirth in the 1980s to the present. Life in The Olympic reflected events beyond its doors: the Roaring Twenties, the dark days of the Great Depression, patriotic rallies and bond drives during World War II, the promise and exhilaration of the 1962 World's Fair, Seattle's urban renaissance of the 1970s and 1980s, and protests and debates from the Vietnam War to WTO. This book contains 100 questions on Washington, D.C. the capital city of the United States. Washington, D.C. has a long and storied history and currently stands as one of the great cities of the world. Inside

this book are questions about the history of Washington, D.C. it's sports teams, it's inhabitants, the monuments to the Presidents that helped shape the United States into the global superpower it now is and many other subjects. So test your knowledge on the American capital. When Thomas Jefferson was young, Virginia was still a colony of England. Jefferson thought that many English laws and taxes were unfair, so he studied hard to become a lawyer and help make better laws. Soon he and others came to believe that the colonies should become a new country, and Jefferson was chosen to write the Declaration of Independence. As the third

president of the United States, he focused on exploring the country and making it grow. His fairness and love of learning made him one of the most beloved presidents of all time. St. Elizabeths has been a mental health hospital in Washington, D.C., since 1852, when it was established by the United States Congress as the Government Hospital for the Insane. St. Elizabeths, along with other hospitals,

experienced rapid expansion in its first century, hitting a peak of almost eight thousand patients by the 1960s. Deinstitutionalization in the second half of the twentieth century emptied out the historic buildings on campus. This well-illustrated book follows an exhibition at the National Building Museum, tracing the hospital's evolution over time, highlighting the ways that this specialized architecture and landscape served the mentally ill. It continues the story of St. Elizabeths, a National Historic Landmark, through its current redevelopment as a federal campus and mixed-use neighborhood. A biography of

Book jacket. Landmarks are the Touchstones of the Meandering Traveler From the sites where American democracy was born, to unique archive collections, art galleries, and architectural must-sees in the middle of this bustling city, Washington, DC is home to 75 National Historic Landmarks. Tour the Capital City and travel back in time to discover the unique stories of its history. Carefully curated by a local historian, *Historic Washington, DC: A Tour of the District's Top 50 National*

*Landmarks* is the essential guide to the most memorable historic sites in our nation's capital. Whether you are a history enthusiast, a local visitor, or a tourist, there is something for everyone in this guide to Washington, DC's past. Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the

top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations

that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of

Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be

vitaly important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine Meet ROBERT E. LEE is the story of a great American leader forced to make a terrible decision. Robert E. Lee the Virginian, son of a Revolutionary hero, served in the U.S. Army as America moved towards Civil War. Loving his country, he

hated to see the Union split, but he could not fight against the South. His agonizing decision, his brilliant military leadership, and the fine example he set when the battle was done, are all recounted in this thoroughly researched and richly illustrated book. Take a whirlwind tour of Washington, D.C., with this fun-filled book of puzzles. A children's guide to the landmark sights of Washington, D.C. Discover fun facts and little known secrets related to nine sights centered around the National Mall. Features full

page illustrations of each landmark. For children aged about 4-6 years. The Washington Monument is one of the most easily recognized structures in America, if not the world, yet the long and tortuous history of its construction is much less well known. Beginning with its sponsorship by the Washington National Monument Society and the grudging support of a largely indifferent Congress, the Monument's 1848 groundbreaking led only to a truncated obelisk, beset by attacks by the Know Nothing Party and lack of secured funding and, from the mid-1850s, to a twenty-year interregnum. It was only 1n

1876 that a Joint Commission of Congress revived the Monument and entrusted its completion to the U.S. Army Corps of Engineers. In "To the Immortal Name and Memory of George Washington": The United States Corps of Engineers and the Construction of the Washington Monument, historian Louis Torres tells the fascinating story of the Monument, with a particular focus on the efforts of Lieutenant Colonel Thomas Lincoln Casey, Captain George W. Davis, and civilian Corps employee Bernard Richardson Green and the details of how they completed the construction of this great American landmark. The book

also includes a discussion and images of the various designs, some of them incredibly elaborate compared to the austere simplicity of the original, and an account of Corps stewardship of the Monument up to its takeover by the National Park Service in 1933. First published in 1985. 148 pages, ill. Highlights the life of the first president of the United States, known as the father of his country, from his birth in Virginia to his death at Mount Vernon. On August 28, 1963, over a quarter-million people—about two-thirds black and one-third white—held the greatest civil rights demonstration ever. Martin Luther King, Jr. delivered his

iconic "I Have a Dream" oration. And just blocks away, President Kennedy and Congress skirmished over landmark civil rights legislation. As Charles Euchner reveals, the importance of the march is more profound and complex than standard treatments of the 1963 March on Washington allow. In this major reinterpretation of the Great Day—the peak of the movement—Euchner brings back the tension and promise of that day. Building on countless interviews, archives, FBI files, and private recordings, Euchner shows freedom fighters as complex, often conflicted, characters. He explores the lives of Philip

Randolph and Bayard Rustin, the march organizers who worked tirelessly to make mass demonstrations and nonviolence the cornerstone of the movement. He also reveals the many behind-the-scenes battles—the effort to get women speakers onto the platform, John Lewis’s damning speech about the federal government, Malcolm X’s biting criticisms and secret vows to help the movement, and the devastating undercurrents involving political powerhouses Kennedy and FBI director J. Edgar Hoover. For the first time, Euchner tells the story behind King’s “Dream” images. Euchner’s hour-by-hour

account offers intimate glimpses of the masses on the National Mall—ordinary people who bore the scars of physical violence and jailings for fighting for basic civil rights. The event took on the call-and-response drama of a Southern church service, as King, Lewis, Mahalia Jackson, Roy Wilkins, and others challenged the throng to destroy Jim Crow once and for all. Nobody Turn Me Around will challenge your understanding of the March on Washington, both in terms of what happened but also regarding what it ultimately set in motion. The result was a day that remains the apex of the civil rights movement—and the beginning of its decline. "The

Architect Builds Visible History." Vincent Scully Which architect designed the pedestal for the Statue of Liberty? Who put a Chippendale pediment atop a skyscraper and quickly created a landmark of contemporary architecture? Who was the only American architect to receive the Congressional Medal of Honor for bravery during the Civil War? Which architect designed a castle in California for William Randolph Hearst? Master Builders answers these and scores of other questions about more than 100 architects and builders who have left indelible marks on American architecture. This unique guide puts faces with America's most

well-known and loved buildings--from the U.S. Capitol and Washington Monument through the first skyscrapers and landmarks of the Post-Modern movement. "Why should you want to know more about these architects?" asks Roger K. Lewis in his introduction. "The reason is simple. You are undeniably connected to the built environment that you inhabit, use, see and respond to. You affect building design, and building design affects you." Can you pair these master builders with their works? Frank Lloyd Wright U.S. Capitol Skidmore, Owings and Merrill Central Park Adler and Sullivan University of Virginia

Against insurmountable odds, Coach Washington excelled on the court, triumphed as a coach and contributed to the enactment of the civil rights law dubbed Title IX. The greatest challenge of Title IX was not in the passage of the law, but in the implementation. *Way to Work* presents Coach Washington's plight to achieve equality for women in athletics illuminated against historical highlights to define the

enormity of her triumph in making Title IX a lifelong reality for all women in sport. 135 p.:ill.(some col.). Schoolchildren will be fascinated by this clear account of Columbus's voyages and his encounters with storms, Indians, and political intrigue. A map of the world in Columbus's time and a detailed drawing of the *Santa Maria* add depth to this exciting, real-life adventure tale. The Lincoln Memorial in Washington, DC, is a monument to the nation's 16th president, a commemoration of the country's post-Civil War reunification, and a setting for national events and quiet visits. Demands for a national

memorial to Abraham Lincoln began shortly after his 1865 assassination but produced nothing substantial until the early 20th century. Elevation of Lincoln to legendary status and an extended debate over location and design finally led Congress in 1913 to approve a memorial at the west end of the National Mall. Construction took another eight years. Since its dedication in 1922, the Lincoln Memorial has hosted civil rights demonstrations, presidential events, national celebrations, and day and night visits by millions of people who come to reflect upon one of the most consequential leaders in American history. Kevin S. Schindler is a historian at

Lowell Observatory in Flagstaff, Arizona, and has written six books about science and history. Brian Anderson is a Washington, DC, lawyer and Ford's Theatre Society trustee who previously wrote a book about the history of Ford's Theatre. Drawing upon Washington-area museums and research libraries, Schindler and Anderson have assembled a rich collection of historical images to tell the fascinating story of this American landmark. Profiles girls and women who participated in the American Revolution by refusing to buy British merchandise, collecting money, and even going to war as wives, nurses, spies, or

soldiers. "History of the Washington National Monument and of the Washington National Monument Society" by Frederick L. Harvey is a meticulously detailed account that delves into the rich history and significance of the Washington National Monument. Harvey's exhaustive research and comprehensive narrative provide a fascinating glimpse into the monument's creation, the challenges faced by the Washington National Monument Society, and the symbolic importance it holds as a national landmark. This book serves as an essential resource for anyone interested in the

monument's architectural and historical context, making it a valuable addition to the collection of scholars, history enthusiasts, and individuals passionate about American heritage. The Washington Post's must-read guide to the health care overhaul What now? Despite the rancorous, divisive, year-long debate in Washington, many Americans still don't understand what the historic overhaul of the health care system will—or won't—mean. In Landmark, the national reporting staff of The Washington Post pierces through the confusion, examining the new law's likely impact on us all: our families, doctors, hospitals, health care

providers, insurers, and other parts of a health care system that has grown to occupy one-sixth of the U.S. economy. Landmark's behind-the-scenes narrative reveals how just how close the law came to defeat, as well as the compromises and deals that President Obama and his Democratic majority in Congress made in achieving what has eluded their predecessors for the past seventy-five years: A legislative package that expands and transforms American health care coverage. Landmark is an invaluable resource for anyone eager to understand the changes coming our way.
