This book presents ideas for executives and managers to embrace change. It imparts practical ideas to transform an

organization. Bernard Krigstein began his career as an unremarkable journeyman cartoonist during the 1940s and finished it as a respected fine artist and illustrator ?

but comics historians know him for his explosively creative 1950s, during which he applied all the craft, intelligence and ambition of a burgeoning "serious" artist to

his comics work, with results that remain stunning to this day. Krigstein's legend rests mostly on the 30 or so stories he

created for the EC Comics, but dozens of stories drawn for other, lesser publishers such as Rae Herman, Hillman, and Atlas

(which would become Marvel) showcase his skills and radical reinterpretation of the comics page, in particular his groundbreaking slicing and dicing of time lapses through a series of narrow, nearly animated panels. Greg Sadowski, who has previously written and designed a Harvey Award-winning biography of Krigstein, has assembled the very best of Krigstein's comics work, starting with his earliest creative rumblings, through his glory days at EC, to his final, even more brilliantly radical stories for Atlas Comics ? running through every genre popular at the time, be it horror, science fiction, war, western, or romance (but no super-heroes). The author of "Can of Worms" creates a wonderfully original universe in this inventive, accessible, and downright funny work of science fiction. For Madison Reed, life in Los Angeles wasn't anything spectacular. Recently out of high school, she found creating art out of junk was a way to pass time and get some extra cash to help her dad out. Things had been on a downhill slope for them ever since her mother died two years earlier. But when Madison finds an ancient brass bottle at a local junk yard, and takes it home to polish it up, everything changes-

and her life will never be the same! Madison Reed released Inas, a genie who had been trapped in a bottle for 2,000 years, and made her first wish. But that was the easy part. Now they must find Asmodeus, an evil genie out for revenge-determined to put Inas back in his bottle. But time is running out. Madison must still make her final two wishes before the bottle reclaims its prisoner and locks Inas away once again.

With Ifs, You Can Put Paris in a Bottle With *Ifs, You Can Put Paris in a Bottle* recounts the early and middle adulthood of author Edmonia Guerin. As a naïve freshman at a historically Black college, she is date-raped by a Black upperclassman at the height of the Black Power Movement. She conceals the attack and fails to get counseling. This leads to other poor choices as she tries to cope with diminished self-esteem and a changed view of the world. After failed relationships with Black men, she marries a gifted White French architect and embarks on a quest to make him famous. With hard work and the help of African Americans, he succeeds. Near the pinnacle of his career, Edmonia's husband must choose between his Black wife and the demands of a racist world. Guerin discovers the challenges facing all wives and mothers

and gains insight into the degradation, shame and helplessness experienced by her enslaved female ancestors. A memoir, *With Ifs, You Can Put Paris in a Bottle* calls attention to a host of topics, such as racism, misogyny, interracial and intercultural marriage, abortion, adultery, rape and resulting health problems. In this compendium of all things Moxie, Maine author Jim Baumer shows us why this soft drink has garnered such a loyal and vocal following. Through history, photos, festivals, and more, *Moxie: Maine in a Bottle* will make you feel like you have Moxie too! Representing old-fashioned values and a sense of community, Moxie is a heaping slice of Americana delivered Maine-style. When Gerald makes a miraculous recovery from being brain dead, his intellect has been exponentially increased, but all of his memories have been erased. Gerald is the subject of an experimental genetic procedure. Artificially generated brainwaves, used to revive him, spur his mind to a higher functioning. Gerald struggles with his increased abilities and reconciling lost relationships. His is a tale of coming of age, falling in love, and self discovery. (Book). In 1971, Jim Croce, a Pittsburgh native, wrote the haunting

melody and words for the classic "Time in a Bottle," a song for his son, Adrian James. Less than two years later, Jim Croce's life was tragically cut short by a plane crash. This photographic memoir by his wife, Ingrid, offers an intimate look at their lives through Jim Croce's lyrics, quotes, photographs, and memories. With the turning of every page, it reveals never before seen photographs and a timeline of Jim Croce's successful life.

A valiant mouse sets sail in her ship in a bottle to seek a better life in this gentle allegory about refugees and immigration. All Mouse wants to do is eat gingersnaps, lie in the sun, and enjoy her ship in a bottle. All Cat wants to do is eat Mouse. This is a problem. So one day, Mouse sets off in her ship in a bottle in search of a new home. But the great big world is a scary place for one small mouse. As she sails downriver, she faces grabby seagulls, selfish rabbits, and stormy waters before finally finding refuge in a park on the shores of an enormous city, where she is welcomed by friends of all shapes and sizes. Readers will cheer Mouse's quiet perseverance on her epic journey as she seeks a tiny spot to call her own. This is a story about a child's adventures with a

Genie she meets while walking in the forest. You are like a Genie in a bottle, infinite and powerful, creating anything through love and grace. With a body that is your tiny living space. The inside of you is a flawless, beautiful light. Sometimes you will forget the special light that is You. When this happens it is important to take a moment and pause feeling into the light within. When you connect in and remember, your life will again feel happy and peaceful. By spending time with Genie in the magical forest place, the child remembers and starts to realize that her the body is only the outer covering that houses her. Made in the image of God You are an infinite light of love. Because God is everywhere and in all things God lives in you as you. This means you are a part of all you see, and all you see is part of you too. This book empowers the reader encouraging them to realize that the true source of knowledge, love and healing lies within. Following a suicide bomb attack on her local Jerusalem café, in which she and her friends could so easily have been its victims, a seventeen-year-old Israeli schoolgirl decides to send a message in a bottle to Gaza. An act of hope and desperation, Tal believes that by

making contact with a Palestinian she will be able to begin a dialogue through which experiences can be shared, and, just possibly, some kind of mutual understanding achieved. Her message is found by a young man who calls himself Gazaman, and a remarkable email correspondence begins

A mesmerising account of a turbulent relationship conducted between two people whose dialogue is in itself an act of revolution against the situations in which they both feel themselves to be trapped. Becky Taylor, a young woman burdened by great expectations, is lying on a cold recovery table in an abortion clinic when she hears a man's voice, then gunshots. She holds her breath and lies perfectly still behind the curtain. When the gunman is finished, Becky is the only one left alive in the clinic. This act brings together two strangers who both seek answers to life's most wrenching questions, mainly: Are God's love and mercy big enough for every sin? The answer transforms multiple lives. Children ask, "Why is the sky blue?" but the question also puzzled Plato, Leonardo, and even Newton, who unlocked so many other secrets. The search for an answer continued for centuries; in 1862 Sir John Herschel

listed the color and polarization of sky light as "the two great standing enigmas of meteorology." In *Sky in a Bottle*, Peter Pesic takes us on a quest to the heart of this mystery, tracing the various attempts of science, history, and art to solve it. He begins with the scholars of the ancient world and continues through the natural philosophers of the Enlightenment, the empiricists of the scientific revolution, and beyond. The cast of characters includes Aristotle, Leonardo da Vinci, Kepler, Descartes, Euler, Saussure, Goethe, Rayleigh, and Einstein; but the protagonist is the question itself, and the story tells how we have tried to answer it. Pesic's odyssey introduces us to central ideas of chemistry, optics, and atomic physics. He describes the polarization of light, Rayleigh scattering, and connections between the appearance of the sky and Avogadro's number. He discusses changing representations of the sky in art, from new styles of painting to new pigments that created new colors for paint. He considers what the sky's nighttime brightness might tell us about the size and density of the universe. And Pesic asks another, daring, question: Can we put the sky in a bottle?

Can we recreate and understand its blueness here on earth? This puzzle, he says, opens larger perspectives; questions of the color and brightness of the sky touch on secrets of matter and light, the scope of the universe in space and time, the destiny of the earth, and deep human feelings. "You will never look at 'new ideas' the same way again." -H. Wayne Huizenga, founder and former chairman and CEO of Blockbuster Inc. "I would strongly suggest that all marketers read this book before they decide to launch a new product, line extension or enter a new line of business." -Mark R. Goldston, chairman and CEO, United Online, Inc., which includes NetZero, Juno, Classmates and MyPoints.com brands David Minter and Michael Reid know innovation. For more than 25 years, they have contributed to the growth of such companies as Blockbuster, Dole, Viacom, Sony and Einstein Bagels. *Lightning in a Bottle* presents Minter and Reid's simple seven-step system for creating ideas that work—one that improves new-product success rates from the standard one in 10 to one in two or better. *Lightning in a Bottle* also explains the top 10 reasons ideas fail, plus the dirty secrets of the research world, such as: -Why focus groups don't work for new products

-How market segmentation is often a sham
-Why brainstorming is not effective in creating great new products

In the tradition of *Execution and Good to Great*, *Lightning in a Bottle* is the new must-have guide for business leaders. Arnie Esterer, the father of vinifera in Ohio and Tim Hubbard were taking a big gamble back in 1968 when they started their vineyard and winery. With guidance from Dr. Konstantin Frank, Arnie and Tim built a winery that has led the way for the next generation of European-style vinifera growers and winemakers in Ohio. Markko Vineyard did not happen overnight. It was years of trials and errors, successes and failures and much collaboration and learning. This is the story of one remarkable man, Arnie Esterer, and his passion to produce only the best vinifera wines in the Conneaut Creek region of the Lake Erie appellation where the critics said it could not be done. Clifford Annis captures the untold story of Arnie Esterer, the "father of vinifera in Ohio" and Markko Vineyard in Arnie's own words. *The Genie in the Bottle* makes science downright fun. Approved by the FDA in 2005 as the first drug with a race-specific indication on its label, BiDil was touted as a pathbreaking therapy to treat heart failure in black patients. Kahn reveals that, at the most basic level, BiDil became racial through legal maneuvering and commercial pressure as much as through medical understandings of how the drug worked. He examines the legal and calls for a more reasoned approach to using race in biomedical research and practice. to the letter, as well. The fascinating story behind the company that revolutionized the financial world *Catching Lightning in a Bottle* traces the complete history of Merrill Lynch and the company's substantial impact on the world of finance, from the birth of the once-mighty company to its inauspicious end. Throughout its ninety-four year history, Merrill Lynch revolutionized finance by bringing Wall Street to Main Street, operating under a series of guidelines known as the Principles. These values allowed the company to gain the trust of small investors by putting the clients' interests first, driving a business trajectory that expanded capital markets and fueled the growth of the American post-war economy. Written by the son of Merrill Lynch co-founder Winthrop H. Smith, this book describes the creation and evolution of the company from Charlie Merrill's one-man shop in 1914 to its acquisition by Bank of America in 2008. Author Winthrop H. Smith Jr. spent twenty-eight years at the company his father co-founded, bringing a unique perspective to bear in telling the story of the company that democratized the stock market and eventually fell from its lofty perch. Learn why the industry initially

scoffed at Charles Merrill's "radical" investment ideas Discover the origin of the Principles, and how they drove operations for nearly a century Find out why the author left a successful Wall Street career, and why it was such a smart move Examine the culture and values that built Merrill Lynch into one of the world's most successful and respected companies Revolutionary vision is rare, and enduring success is even more so. When a single organization demonstrates both of those characteristics, it is felt throughout the world. Discover the fascinating story behind Merrill Lynch and the men who built it from an insider's perspective in *Catching Lightning in a Bottle*. This book gives an accessible overview of the 70-year history of nuclear fusion research and the vain attempts to construct an energy-generating nuclear fusion reactor. It shows that even in the most optimistic scenario nuclear fusion, despite the claims of its proponents and the billions being spent on research, will not be able to make a sizable contribution to the energy mix in this century. The important consequence is that nuclear fusion will not be a factor in combating climate change, since the race for carbon-free

energy will have been won or lost long before the first nuclear fusion power station comes on line. Be careful what you wish for... Praise for Whatever After: "An uproariously funny read. The swift pace of the tale and non-stop action . . . will enchant readers from the first page." -- Kirkus Reviews "Hilarious . . . with unexpected plot twists and plenty of girl power." -- Booklist "Giddy, fizzy, hilarious fun!" -- Lauren Myracle, author of Luv Ya Bunches "Tons of fractured fairy tale fun!" -- Meg Cabot, author of Allie Finkle's Rules for Girls and The Princess Diaries "The feminist in me adored it, and the mother in me loved how my daughter would long to cuddle in close as we read together." --

Danielle Herzog, blogging for The Washington Post In an incredibly fun and accessible two-color graphic-book format, the cofounders of Honest Tea tell the engaging story of how they created and built a mission-driven business, offering a wealth of insights and advice to entrepreneurs, would-be entrepreneurs, and millions of Honest Tea drinkers about the challenges and hurdles of creating a successful business--and the importance of perseverance and creative problem-solving. The brand has flourished as American consumers move toward healthier and greener lifestyles. Now revised, updated, and with new recipes, *A Bottle of Rum* tells the raucously entertaining story of this most American of liquors From the grog sailors drank on the high seas in the 1700s to the mojitos of Havana bar hoppers, spirits and cocktail columnist Wayne Curtis offers a history of

rum and the Americas alike, revealing that the homely spirit once distilled from the industrial waste of the booming sugar trade has managed to infiltrate every stratum of New World society. Curtis takes us from the taverns of the American colonies, where rum delivered both a cheap wallop and cash for the Revolution; to the plundering pirate ships off the coast of Central America; to the watering holes of pre-Castro Cuba; and to the kitsch-laden tiki bars of 1950s America. Here are sugar barons and their armies conquering the Caribbean, Paul Revere stopping for a nip during his famous ride, Prohibitionists marching against "demon rum," Hemingway fattening his liver with Havana daiquiris, and today's bartenders reviving old favorites like Planter's Punch. In an age of microbrewed beer and single-malt whiskeys, rum--once the swill of the common man--has found its way into the tasting rooms of the most discriminating drinkers. Complete with cocktail recipes for would-be epicurean time-travelers, this is history at its most intoxicating. In a moment of desolation on a windswept beach, Garrett bottles his words of undying love for a lost woman, and throws them to the sea. My dearest Catherine, I miss you my

darling, as I always do, but today is particularly hard because the ocean has been singing to me, and the song is that of our life together . . . But the bottle is picked up by Theresa, a mother with a shattered past, who feels unaccountably drawn to this lonely man. Who are this couple? What is their story? Beginning a search that will take her to a sunlit coastal town and an unexpected confrontation, it is a tale that resonates with everlasting love and the enduring promise of redemption. Cheever looks back with clear-eyed candor on a way of life that brought her perilously close to the edge in a book about recovery that is both wrenching and ultimately inspiring.
