UN TÍTULO IMPRESCINDIBLE EN TU BIBLIOTECA Das Arbeitsbuch für die Programmierung automatischer Handelssysteme in MQL für MetaTrader 4 (Build 765)Der MetaTrader 4, kurz auch als "MT4" bezeichnet, gehört mit zu den am weitesten verbreiteten Trading-Plattformen für den

Forex- (Devisen) Handel. Der MetaTrader 4 wird von zahlreichen Forex-Brokern weltweit angeboten und auch in Deutschland erfreut sich diese Plattform immer größerer Beliebtheit. Die Plattform ist sehr benutzerfreundlich und liefert in der Standardvariante bereits zahlreiche Indikatoren und Chart-Optionen. Was die Handelsplattform interessant macht, ist der, in die Software integrierte, MetaEditor. Der MetaEditor bietet dem Anwender die Möglichkeit, eigene Indikatoren und automatische Handelssysteme in der Programmiersprache MQL zu programmieren. Die automatischen Handelssysteme werden Expert Advisor, kurz

EA, genannt. Expert Advisor können, abhängig von den programmierten Algorithmen, Ordern eröffnen, verändern und schließen. In diesem Buch lernt der Leser individuelle automatisierte oder teilautomatisierte Handelssysteme zu entwickeln und zu programmieren. Die Inhalte dieses Buches richten sich ebenso an Anfänger wie auch an Fortgeschrittene. With the exponential growth of program trading in the global financial industry, quantum finance and its underlying technologies have become one of the hottest topics in the fintech community. Numerous financial institutions and fund houses around the world

require computer professionals with a basic understanding of quantum finance to develop intelligent financial systems. This book presents a selection of the author's past 15 years' R&D work and practical implementation of the Quantum Finance Forecast System - which integrates quantum field theory and related AI technologies to design and develop intelligent global financial forecast and quantum trading systems. The book consists of two parts: Part I discusses the basic concepts and theories of quantum finance and related AI technologies, including quantum field theory, quantum price fields, quantum price

level modelling and quantum entanglement to predict major financial events. Part II then examines the current, ongoing R&D projects on the application of quantum finance technologies in intelligent real-time financial prediction and quantum trading systems. This book is both a textbook for undergraduate & masters level quantum finance, AI and fintech courses and a valuable resource for researchers and data scientists working in the field of quantum finance and intelligent financial systems. It is also of interest to professional traders/ quants & independent investors who would like to grasp the basic concepts and theory of

quantum finance, and more importantly how to adopt this fascinating technology to implement intelligent financial forecast and quantum trading systems. For system implementation, the interactive quantum finance programming labs listed on the Quantum Finance Forecast Centre official site (QFFC.org) enable readers to learn how to use quantum finance technologies presented in the book. This book constitutes the refereed proceedings of the International Central and European Conference on Multi-Agent Systems, CEEMAS 2003, held in Prague, Czech Republic in June 2003. The 58 revised full papers presented together with 3 invited contributions were carefully reviewed and selected from 109 submissions. The papers are organized in

topical sections on formal methods, social knowledge and meta-reasoning, negotiation, and policies, ontologies and languages, planning, coalitions, evolution and emergent behaviour, platforms, protocols, security, real-time and synchronization, industrial applications, e-business and virtual enterprises, and Web and mobile agents. This volume comprises papers from the following three workshops that were part of the complete program for the International Conference on Extending Database Technology (EDBT) held in Prague, Czech Republic, in March 2002: XML-Based Data Management (XMLDM) Second International

Workshop on Multimedia Data and Document Engineering (MDDE) Young Researchers Workshop (YRWS) Together, the three workshops featured 48 high-quality papers selected from approximately 130 submissions. It was, therefore, difficult to decide on the papers that were to be accepted for presentation. We believe that the accepted papers substantially contribute to their particular fields of research. The workshops were an excellent basis for intense and highly fruitful discussions. The quality and quantity of papers show that the areas of interest for the workshops are highly active. A large number of excellent researchers are

working in relevant fields producing research output that is not only of interest to other researchers but also for industry. The organizers and participants of the workshops were highly satisfied with the output. The high quality of the presenters and workshop participants contributed to the success of each workshop. The amazing environment of Prague and the location of the EDBT conference also contributed to the overall success. Last, but not least, our sincere thanks to the conference organizers - the organizing team was always willing to help and if there were things that did not work, assistance was quickly

available. Chcete dosáhnout úspěchu při obchodování na finančních trzích? Nevyznáte se v příliš odborných analýzách na finančních serverech? Splitting Pennies is a must read for those in investment banking, securities, fund management, accounting, banking & finance, and related fields. Splitting Pennies is perfect for: Students studying for Series 3 and Series 34 (as an addendum) University students studying international finance, portfolio management, investing Accountants & executives of public companies suffering from "Currency Headwinds" - and as an

example of compliance with internal financial controls A client gift to learn more about the markets Forex traders who want some perspective Forex brokers looking for objective, unbiased information about Forex for their clients Banks, financial services firms, financial advisers, CPAs AMAST's goal is to advance awareness of algebraic and logical methodology as part of the fundamental basis of software technology. Ten years and seven conferences after the start of the AMAST movement, I believe we are attaining this. The movement has propagated throughout the world, assembling many enthusiastic specialists who

have participated not only in the conferences, which are now annual, but also in the innumerable other activities that AMAST promotes and supports. We are now facing the Seventh International Conference on Algebraic Methodology and Software Technology (AMAST'98). The previous meetings were held in Iowa City, USA (1989 and

1991), in Enschede, The Netherlands (1993), in Montreal, Canada (1995), in Munich, Germany (1996), and in Sydney, Australia (1997). This time it is Brazil's turn, in a very special part of this colorful country - Amazonia. Thus, "if we have done more it is by standing on the shoulders of giants." The effort started by Teodor Rus, Arthur Fleck, and William A. Kirk at AMAST'89

was consolidated in AMAST'91 by Teodor Rus, Maurice Nivat, Charles Rattray, and Giuseppe Scollo. Then came modular construction of the building, wonderfully carried out by Giuseppe Scollo, Vangalur Alagar, Martin Wirsing, and Michael Johnson, as Program Chairs of the AMAST conferences held between 1993 and 1997.
