Paula Lillard, director of a Montessori school ranging in age from 18 months to fifteen years, provides a clear

and cogent introduction to the Montessori program for the elementary and later years. In detailed accounts, Lillard shows how children acquire the skills to answer their own questions, learn to manage freedom with responsibility, and maintain a high level of intellectual stimulation by using the Montessori method. This is an essential handbook for parents and teachers who have chosen the Montessori alternative for the older child. As soon as early humans began to scratch images on cave walls, they began to create maps. And while these first drawings were used to find hunting grounds or avoid danger, they later developed into far more complex navigational tools. *Charting the World* tells the fascinating history of maps and mapmaking, navigators and explorers, and the ways that technology has enhanced our ability to understand the world around us. Richly illustrated with full-color maps and diagrams, it gives children an in-depth appreciation of geographical concepts and principles and shows them how to unlock the wealth of information maps contain. It also features 21 hands-on activities for readers to put their new skills to the test. Children will: build a three-dimensional island model using a contour map, engrave a simple map on an aluminum & "printing plate," determine the elevation of hills in their neighborhood, draw a treasure map and have a friend search for the hidden stash, create a nautical chart of a small puddle, survey their backyard or local park, navigate a course using a compass, and much more. Now more than ever, the study of geography is crucial to understanding our ever-changing planet, from political change and warfare to environmental conservation and population growth. *Learning Music? Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Desert nomads tested their vision by distinguishing a pair of stars. But we have since created more disquieting ways to test the strength of the eyes. Reading the eye chart is an exercise in failure, since it only gets interesting when you cannot read any further. It is the opposite of interpretative reading, like one does with literature. When you have finished reading an eye chart, what exactly have you even read? From a Spanish cleric's Renaissance guide to testing vision, to a Dutch ophthalmologist's innovation in optical tech, to the witty subversion of the eye chart in advertising and popular culture, William Germano's Eye Chart lets people see the eye chart at last. Object Lessons is published in partnership with an essay series in The Atlantic. Learning Music? Guitar, Violin, Piano, Voice or More... A stirring, dramatic story of a slave who mails himself to freedom by a Jane Addams Peace Award-winning author and a Coretta Scott King Award-winning artist. Henry Brown doesn't know how old he is. Nobody keeps records of slaves' birthdays. All the time he dreams about freedom, but that dream seems farther away than ever when he is torn from his family and put to work in a warehouse. Henry grows up and marries, but he is again devastated when his family is sold at the slave market. Then

one day, as he lifts a crate at the warehouse, he knows exactly what he must do: He will mail himself to the North. After an arduous journey in the crate, Henry finally has a birthday -- his first day of freedom.

Charting Your Course is the story of 2003 Malcolm Baldrige National Quality Award winner Community Consolidated School District 15 of Palatine, Illinois. The book shares the story of the school district's journey toward continuous improvement as they followed the Baldrige Award Criteria. The authors share both the good and the bad results encountered along the way, allowing the reader to learn from his experiences. The book will help other schools answer the many questions that will inevitably come up as they begin to follow the Baldrige criteria, and will help them avoid making some of the same mistakes. PRAISE FOR CHARTING YOUR COURSE "A case study of the only school district in the state of Illinois to earn the top quality award from the Lincoln Foundation for Business Excellence. Charting Your Course is must reading for superintendents and principals who are serious about achieving organizational excellence. In this straightforward account of a school district seriously embracing the Malcolm Baldrige criteria, the authors detail what worked and what went awry, and offer concrete suggestions on avoiding some of their mistakes."- Dr. Paul D. Houston, Executive Director American Association of School Administrators

Certain aspects of the system are in themselves striking and significant: it adapts to the education of normal children methods and apparatus originally used for deficient; it is based on a radical conception of liberty for the pupil; it entails a highly formal training of separate sensory, motor, and mental capacities; and it leads to rapid, easy, and substantial mastery of the elements of reading, writing, and arithmetic. - Introduction. Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting. "If I could give only two books to a new Christian, one would be the Bible and the other would be this book." --Dr. Ed Hindson, President of World Prophetic Ministry and pastor on the The King is Coming telecast Features more than 200 reproducible Bible charts, maps, and timelines, including: Foldout Posters: Bible Time Line and Jesus' Genealogy Overviews on Popular Old Testament Topics, including the Tabernacle, Ark of the Covenant, Names of God, Feasts & Holidays of the Bible, and much more Overviews on Popular New Testament Topics, including the 12 Disciples, Armor of God, Fruit of the Spirit, and much more Overviews of Jesus' Life and Teachings Bible Overview: Books of the Bible and Key Bible Stories Christian History, including "How We Got the Bible" and a Christian History Time Line Charts Comparing Christianity to Islam and 20 Other World Religions Overviews on Bible Prophecy, Revelation, and the End Times Bible Maps Bible Illustrations and Diagrams "It is awesome! Rose Publishing has produced one of the finest books I have ever seen. Every aspect of the charts, maps and time lines leaps off the page with spectacular color, incredible accuracy and intricate detail. . . . A must for every pastor and teacher who wants to clearly present the truths of the Bible." --Dr. Jerry Falwell, Founder of Liberty University "A compendium of charts, time lines, lists and illustrations to accompany study of the Bible. This visually appealing resource provides a wide array of illustrative and textually concise references, beginning with three sets of charts covering the Bible as a whole, the Old Testament and the New Testament. These charts cover such topics as biblical weights and measures, feasts and holidays and the 12 disciples. Most of the charts use a variety of illustrative techniques to

convey lessons and provide visual interest. A worthwhile example is 'How We Got the Bible, ' which provides a time line of translation history, comparisons of canons among faiths and portraits of important figures in biblical translation, such as Jerome and John Wycliffe. The book then presents a section of maps, followed by diagrams to conceptualize such structures as Noah's Ark and Solomon's Temple. Finally, a section on Christianity, cults and other religions describes key aspects of history and doctrine for certain Christian sects and other faith traditions. Overall, the authors take a traditionalist, conservative approach. For instance, they list Moses as the author of the Pentateuch (the first five books of the Hebrew Bible) without making mention of claims to the contrary. When comparing various Christian sects and world religions, the emphasis is on doctrine and orthodox theology. Some chapters, however, may not completely align with the needs of Catholic and Orthodox churches. But the author's leanings are muted enough and do not detract from the work's usefulness. As a resource, it's well organized, inviting and visually stimulating. Even the most seasoned reader will learn something while browsing. Worthwhile reference stuffed with facts and illustrations." --Kirkus Reviews Learning Music? Guitar, Violin, Piano, Voice or More... Ann Hulbert's in-depth exploration of the lives of sixteen extraordinary children over the course of the past century casts new light on America's current obsession with early achievement. The figures she profiles include math genius Norbert Wiener, founder of cybernetics; two girls whose fiction and poetry stirred debate in the 1920s; the movie superstar Shirley Temple; the African-American pianist and composer Philippa Schuyler; the chess champion Bobby Fischer; computer pioneers and "prodigious savants" with autism; and musical prodigies, present and past. Hulbert probes the changing roles of parents and teachers as well as of psychologists and a curious press. Above all, she delves into the feelings of the prodigies themselves, whose stories so intriguingly raise hopes about untapped human potential and questions about how best to nurture it. Designed to exercise a particular thinking skill, each of these adorable learning tools will help students learn to think, write, and plan. Teach cause and effect with the Spider and the Caterpillar, ignite creative thinking with the Turtle, and much more. Sample lessons reveal how to use graphic organizers in language arts, science, social studies, and math. Presents an exploration of child genius through the stories of fifteen exceptionally gifted young people, from cybernetics founder Norbert Wiener and chess master Bobby Fischer to movie icon Shirley Temple and African-American musician Philippa Schuyler.
