Safeguarding and Mental Health Support in Contemporary Childhood Jul 30 2021 Approaches regarding safeguarding and mental health in childhood have been in constant flux. Framed within a critical realist ontology, this book provides insight into causal factors (individual, material, institutional) and social structures that impact on the continued legacy of the 'deserving/undeserving' paradigm. Drawing on historical data from children taken into care by the Waifs and Strays Society (1881-1918) and contemporary data from interviews with young care leavers and safeguarding practitioners/professionals, this book shows how at present and in the past, certain children and families miss(ed) out on support and interventions due to complex needs, financial cuts and ever-changing thresholds. It is the group of children referred to as 'victims', a term used for the most disadvantaged children who have spent time in care, have complex mental health needs and have had the most damaging pre-care family experiences, who are the focus of this book. This book shows that in an attempt to provide services where there are ever increasing thresholds for access and cuts to resources, a resurgence of the 'deserving/undeserving' paradigm reflects a contemporary justification regarding who is 'entitled' to help and who is not. This

book will be of interest to all scholars and students of social work, social policy, childhood studies, sociology and education policy.

Student Study Guide to The Asian World, 600-1500 Aug 23 2023 The Christian doctrine of heaven has been a moral source of enormous power in western culture. It has provided a striking account of the ultimate good in life and has for two millennia animated the hope that our lives can be fully meaningful. Recently, however, the doctrine of heaven has lost much of its grip on the western imagination and has become a vague and largely ignored part of the Christian creed. Not only have our hopes been redefined as a result, but our very identity as human beings has been altered. In this book, Jerry L. Walls argues that the doctrine of heaven is ripe for serious reconsideration. He contends not only that the orthodox view of heaven can be defended from objections commonly raised against it, but also that heaven is a powerful resource for addressing persistent philosophical problems, not the least of which concern the ground of morality and the meaning of life. Walls shows how heaven is integrally related to central Christian doctrines, particularly those concerning salvation, and tackles the difficult problem of why faith in Christ is necessary to save us from our sins. In addition, heaven is

shown to illumine thorny problems of personal identity and to be an essential component of a satisfactory theodicy. Walls goes on to examine data from near-death experiences from the standpoint of some important recent work in epistemology and argues that they offer positive evidence for heaven. He concludes that we profoundly need to recover the hope of heaven in order to recover our very humanity.
