The director of Princeton University's Outdoor Action Program offers a comprehensive guide to skills, equipment, and trip planning for backpackers of all levels, in a revised handbook that includes the latest information on GPS technology, ultra-light hiking equipment, first aid, trip planning, resources for professional outdoor leaders, and more. Original. 25,000 first printing. The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as Why are disaster stories often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? In *The News: A User's Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.) "Being a description of the Mammoth Hot Springs, the Geyser Basins, the cataracts, the cañons [that is, canyons], and other natural features of the new wonderland, with nineteen illustrations, a plan of the Upper Geyser Basin and route maps; also an Appendix, containing railroad rates, as well as other miscellaneous information."--Title page. Guide to identifying native (and some widely introduced) trees of U.S. and Canada east of the Rocky Mountains. Organized as a dichotomous key, the book leads the user through a series of simple

questions about the shape or appearance of different parts of a tree. Includes 161 species. Illustrated with line drawings. The small (6" by 4") format fits in pocket or pack to take along on a hike. Written by the International Federation of Mountain Guides Association (IFMGA) certified mountain guides Marc Chauvin and Rob Coppolillo, *The Mountain Guide Manual* is the go-to reference for novice and experienced mountain guides, as well as advanced recreationalists. Covering everything from rope systems and belaying to advice on group dynamics and rescuing, the manual combines practical how-to instruction with clear graphics, illustrations, and awe-inspiring alpine imagery. "If it is beyond your power to control, let it go." "Do not wish that all things will go well with you, but that you will go well with all things." "In this way, you will overcome life's challenges, rather than be overcome by them." Epictetus (c. AD 50-135) was a former Roman slave who became a great teacher, deeply influencing the future emperor Marcus Aurelius among many others. His philosophy, Stoicism, was practical, not theoretical--aimed at relieving human suffering here and now. Epictetus knew suffering--besides being enslaved, he was lame in one leg and walked with a crutch. *The Manual* is a collection of Epictetus' essential teachings and pithy sayings, compiled by one of his students. It is the most accessible and actionable guide to Stoic philosophy, as relevant today as it was in the Roman Empire. This new edition, published by Ancient Renewal, is rendered in contemporary English by Sam Torode. The author of the award-winning *Webs of Power* provides a guide and toolkit to understanding group dynamics, facilitating communication and dealing with difficult people so those in collaborative organizations can generate cooperation, be more efficient and attain success.
