Global Challenges and Policy of Freshwater Use will help you develop a clearer understanding of the world around you through engaging content. Organized into three units - historical context, current challenges, and potential solutions - Global Challenges and Policy of Freshwater Use introduces students to many of the real world challenges that both individuals and governments face in deciding how we should manage global freshwater

resources. The selected articles pull from current events throughout the world to illustrate a variety of freshwater policy problems, including examples of the effects of changing climates on precipitation patterns, how growing populations and competing industry interests are having to adapt in a world with these changing patterns, and the controversy over what inherent and legal rights nature and wildlife should have in our water policy decisions. Selected readings also confront issues associated with the consequences of large-scale water pollution and aquifer depletion, restoration potentials and dam removal, freshwater production and distribution technologies, and international relations that are significantly influenced by water usage and rights. Collectively, these articles create a reader that is designed to help students from a wide variety of disciplines get a more thorough appreciation for the challenges involved in global freshwater policy. Spatial thinking is an activity that we do throughout our lives and across many settings, to understand problems and seek solutions. The practice can be so automatic that it becomes deceptively obvious, but when it is not done carefully, it can lead to chaos and confusion. In this brief and accessible guide, we see how spatial concepts help us think across the geographies of our life spaces, physical and social spaces, and intellectual space. Spatial thinking may be particularly essential within the fields of science, technology, engineering, and math, but in reality it is an important part of everyone's living experience. Spatial thinking is a form of learning how to learn. This
