An "infuriating, fast-paced" (The Washington Post) account of the Navy SEALs of Alpha platoon, the startling accusations against their chief, Eddie Gallagher, and the courtroom battle that exposed the dark underbelly of America's special forces—from a Pulitzer Prize–winning reporter WINNER OF THE COLORADO BOOK AWARD • “Nearly impossible to put down.”—Jon Krakauer, New York Times bestselling author of Where Men Win Glory and Into the Wild In this “brilliantly written” (The New York Times Book Review) and startling account, Pulitzer Prize–winning New York Times correspondent David Philipps reveals a powerful moral crucible, one that would define the American military during the years of combat that became known as “the forever war.” When the Navy SEALs of Alpha platoon returned from their 2017 deployment to Iraq, a group of them reported their chief, Eddie Gallagher, for war crimes, alleging that he'd stabbed a prisoner in cold blood and taken lethal sniper shots at unarmed civilians. The story of Alpha's war, both in Iraq and in the shocking trial that followed the men's accusations, would complicate the SEALs' post-9/11 hero narrative, turning brothers-in-arms against one another and bringing into stark relief the choice that elite soldiers face between loyalty to their unit and to their country. One of the great stories written about American special forces, Alpha is by turns a battlefield drama, a courtroom thriller, and a compelling examination of how soldiers define themselves and live with the decisions in the heat of combat. Notes with hints and suggestions Photocopiable activities for every unit Stop and Check sections Progress Tests Thirty years ago Bill McKibben offered one of the earliest warnings about climate change. Now he broadens the warning: the entire human game, he suggests, has begun to play itself out. Bill McKibben's groundbreaking book The End of Nature -- issued in dozens of languages and long regarded as a classic -- was the first book to alert us to global warming. But the danger is broader than that: even as climate change shrinks the space where our civilization can exist, new technologies like artificial intelligence and robotics threaten to bleach away the variety of human experience. Falter tells the story of these converging trends and of the ideological fervor that keeps us from bringing them under control. And then, drawing on McKibben's experience in building 350.org, the first truly global citizens movement to combat climate change, it offers some possible ways out of the trap. We're at a bleak moment in human history -- and we'll either confront that bleakness or watch the civilization our forebears built slip away. Falter is a powerful and sobering call to arms, to save not only our planet but also our humanity. The long-awaited, totally new edition of the Advanced level, providing a real challenge and stimulus for Advanced learners. Winner of the Francis Parkman Prize, Society of American Historians “A tour de force. . . . No one has ever written a book on the Declaration quite like this one.”—Gordon Wood, New York Review of Books Featured on the front page of the New York Times, Our Declaration is already regarded as a seminal work that reinterprets the promise of American democracy through our founding text. Combining a personal account of teaching the Declaration with a vivid evocation of the colonial world between 1774 and 1777, Allen, a political philosopher renowned for her work on justice and citizenship reveals our nation's founding text to be an animating force that not only changed the world more than two-hundred years ago, but also still can. Challenging conventional wisdom, she boldly makes the case that the Declaration is a document as much about political equality as about individual liberty. Beautifully illustrated throughout, Our Declaration is an “uncommonly elegant, incisive, and often poetic primer on America's cardinal text” (David M. Kennedy). A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When The Meritocracy Trap reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people. NEW YORK TIMES BESTSELLER • The “exquisitely researched and deeply engrossing” (The New York Times) true survival story of an early polar expedition that went terribly awry—with the ship frozen in ice and the crew trapped inside for the entire sunless, Antarctic winter “The energy of the narrative never flags. . . . Sancton has produced a thriller.”—The Wall Street Journal In August 1897, the young Belgian commandant Adrien de Gerlache set sail for a three-year expedition aboard the good ship Belgica with dreams of glory. His destination was the uncharted end of the earth: the icy continent of Antarctica. But de Gerlache's plans to be first to the magnetic South Pole would swiftly go awry. After a series of costly setbacks, the commandant faced two bad options: turn back in defeat and spare his men the devastating Antarctic winter, or recklessly chase fame by sailing deeper into the freezing waters. De Gerlache sailed on, and soon the Belgica was stuck fast in the icy hold of the Bellingshausen Sea. When the sun set on the magnificent polar landscape one last time, the ship's occupants were condemned to months of endless night. In the darkness, plagued by a mysterious illness and besieged by monotony, they descended into madness. In Madhouse at the End of the Earth, Julian Sancton unfolds an epic story of adventure and horror for the ages. As the Belgica's men teetered on the brink, de Gerlache relied increasingly on two young officers whose friendship had blossomed in captivity: the expedition's lone American, Dr. Frederick Cook—half genius, half con man—whose later infamy would overshadow his brilliance on the Belgica; and the ship's first mate, soon-to-be legendary Roald Amundsen, even in his youth the storybook picture of a sailor. Together, they would plan a last-ditch, nearly certain-to-fail escape from the ice—one that would either etch their names in history or doom them to a terrible fate at the ocean's bottom. Drawing on the diaries and journals of the Belgica's crew and with exclusive access to the ship's logbook, Sancton brings novelistic flair to a story of human extremes, one so remarkable that even today NASA studies it for research on isolation for future missions to Mars. Equal parts maritime thriller and gothic horror, Madhouse at the End of the Earth is an unforgettable journey into the deep.
