[Core Science for Senior Secondary Schools](#) Mar 22 2023 The Ghana Association of Science Teachers covers all the syllabus and is fully in line with curriculum objectives. It distils the experience, methods and knowledge of some of the country's leading teachers, examiners and curriculum specialists, especially those responsible for the new syllabus. It follows a rational teaching plan throughout the three years, covering the syllabus in the sequence recommended and approved by the educational authorities and it provides all the teacher needs for theory, practice, project work, further study, exercises and examples.

[The Impact Of Study Habits On Academic Performance in Mathematics. The Case of Senior Secondary School Students](#) May 20 2020 Bachelor Thesis from the year 2019 in the subject Mathematics - Miscellaneous, grade: 4.02, University of Lagos, course: Mathematics and Education, language: English, abstract: The study examined study habits and academic performance of senior secondary school students in Mathematics. The main purpose of the study was to investigate the relationship between study habits and academic performance of senior secondary school students in Mathematics. To carry out this study, four research questions and one null hypothesis were raised to guide the study. The population of 1128 Senior Secondary School Two (SS2) students with a sample size of 200 respondents was selected from 5 public secondary schools for the study using simple random sampling technique. A structured questionnaire was used to gather data for the study, which consists of two sections (A and B), section A consist of 20 items while section B, consist of 30 achievement tests on mathematics. The reliability coefficient of 0.72 was obtained using Split Half Method. Data collected was analyzed using simple frequency counts, percentages and Pearson Product Moment Correlation Co-efficient (PPMC) and the hypothesis was tested at 0.05 level of significance using One-Way Analysis of Variance(ANOVA). However, the results revealed that there is significant relationship between study habits and academic performance of senior secondary school students in mathematics. Based on the result of the findings, it was recommended that group guidance should be organized in schools by professional counsellors in order to create awareness on how students can develop effective study habits which could lead to good academic performance in mathematics and a functional school library should be mounted in all the secondary schools.
