Today, globalization, migration and political polarization complicate the individual ' s search for a cohesive identity, making identity formation and transformation key issues in everyday life. This collection of essays highlights a number of the dimensions of identity, including cultural hybridity, religion, ethnicity, profession, gender, sexuality, and childhood, and explores how they are thematized in different narratives. The stories discussed are set in Australia, Austria, Azerbaijan, France, Germany, Great Britain, Haiti, India, Israel, Japan, Polynesia, Norway, Romania, Spain and South Africa, emphasizing today ' s international focus on identity. The majority of the contributions here focus on literary texts, while others investigate identity formations in interviews, language corpora, student reading logs, film, theatre and pathographies. This book presents a critical account of how citizenship unfolds among socially marginalised groups in democratic welfare states. Legal, political and sociological perspectives are applied to offer an assessment of the extent and depth of citizenship for marginalised groups in countries which are expected to offer their members a highly inclusive form of citizenship. The book studies the legal and political status of members of a nation-state, and analyses how this is followed up in practice, by examining the subjective feelings of membership, belonging or identity, as well as opportunities to participate actively and be included in different areas of society. Showing how the welfare state and society treat citizens at risk of social exclusion and offering new insights into the conceptual interconnection

between citizenship, social exclusion, and the democratic welfare state, the book will be of interest to all scholars, students and academics of social policy, social work and public policy. This volume presents results from a corpus-based investigation into the metaphorical production of foreign language learners, comparing texts written by Norwegian (L2) learners of English with those written by British (L1) students. Three types of questions are addressed. The first has empirically measured answers: For example, do L2 English writers produce more metaphors than L1 novice writers? How frequent are novel metaphors in an L2, as compared with an L1? The second type has more subjective answers: How creatively do L2 English learners employ metaphor? Are they even expected to be able to produce metaphor at all? The third type combines theoretical and methodological perspectives: How is metaphorical creativity identified? What is the potential role of metaphoric competence? Most importantly, how are metaphors identified? To this end, the newly-developed ' Metaphor Identification Procedure ' is tested and critiqued. This book is intended for metaphor researchers, corpus linguists, applied linguists and language educators. This book provides an expert examination and comparison of housing segregation in major population centers in the United States and Western Europe and analyzes successes and failures of government policies and desegregation programs in the United States, the United Kingdom, the Netherlands, Sweden, France, and West Germany. The collection begins with a review of the historical development of housing segregation in these countries, describing current housing conditions, concentration of housing in each country's leading cities, minority populations and the housing they occupy--specifically public, nonprofit, and owner-occupied dwellings. When focusing on the United States, the contributors assess housing segregation, antisegregation measures, and institutional racism toward blacks in the Midwest and South, and toward Mexican-Americans throughout American cities. Chapters dealing with Western Europe include housing segregation of South Asian and West Indian immigrants in Britain, immigrants in Sweden, Turkish, and Yugoslav "guest workers" in West Germany, and Algerian and other Arab groups in France. The book concludes with discussions of public housing policies; suburban desegregation, resegregation, and integration maintenance programs; specific integration stabilization programs; and desegregation efforts in one specific place. Norwegian: An Essential Grammar is a reference guide to the most important aspects of contemporary Norwegian as used by native speakers. The Grammar presents a fresh and accessible description of the language. Explanations are clear, free from jargon and often accompanied by exercises. The book gives a simple, step-by-step presentation of the grammatical systems of Norwegian and demonstrates and explains usages which have proved difficult for those learning the language in the past. It is clearly laid-out for easy reference making it accessible for those at a beginner/intermediate level. This is the ideal reference source for all learners, whether studying independently or in a class. This book draws on historical and cross-disciplinary studies to critically examine penal practices in Scandinavia. The Nordic countries are often hailed by international observers as ' model societies ', with egalitarian welfare policies, low rates of poverty, humane social policies and human rights oriented internal agendas. This book, however, paints a much more nuanced picture of the welfare policies, ideologies and social control in strong centralistic states. Based on extensive new empirical data, leading Nordic and

international scholars discuss the relationship between prison conditions in Scandinavia and Scandinavian social policy more generally, and argue that it is not always liberating and constructive to be embraced by a powerful welfare state. This book is essential reading for researchers of state punishment in Scandinavia, and it is highly relevant for anyone interested in the 'Nordic Model' of social policy. Addressing basic writing not only as a practical problem and humane responsibility, but also as a challenging area for research and theorizing, this book reviews, interprets, and applies the growing body of work in second language acquisition. Chapter 1 presents 6 hypotheses constituting an attempt to develop a cohesive theory of writing acquisition that incorporates the redundancy of language and facilitates the process of language acquisition. The following chapters explore this theory in detail to serve as a basis for experimental confirmation. Chapters 2 and 3, on spoken and written language and redundancy, provide the theoretical basis for the argument that academic discourse is a separate linguistic system characterized by particular psycholinguistic features. Chapters 4 and 5 present a detailed analysis of the behavior of basic writers with respect to written form, reviewing both pertinent second language theory about learners' errors and a case study of one writer. Chapters 6 and 7 discuss the relevant affective factors analyzed in second language acquisition theory and detail Stephen Krashen's recent proposals for a comprehensive theory of second language acquisition. The final chapter reviews the entire theory, summarizes the evidence, and outlines the agenda for further research. (JD)

This Learner's Guide was designed to accompany the text for Norsk for utlendinger 1, a Norwegian language learning course. Norsk for utlendinger provides an incisive and lively basic introduction to contemporary Norwegian through the use of everyday expressions, practical vocabulary and stress on social/cultural situations. While the text is in Norwegian, the Learner's Guide is in English and contains notes to the learner, answer keys, Norwegian script, and key vocabulary and alphabetical word lists translated into English. This volume deals with the basic human rights of aliens from the perspective of international and comparative law. It examines the rules regarding treatment of aliens and the extent to which these rules have been adopted in the domestic legislation of more than 40 different states. It aims to achieve two basic goals: 1) to define the status of aliens under international law, that is, which rights are granted to every person by international instruments; and 2) to establish whether this set of rules has been adopted by the domestic legislation of the states under review. The author classifies the basic human rights of aliens into seven different categories, namely: 1) fundamental rights; 2) private rights; 3) social and cultural rights; 4) economic rights; 5) political rights; 6) public rights; and 7) procedural rights. For each of these categories she reviews opinions of international legal commentators, decisions of international and regional tribunals, as well as national legislation, domestic court decisions, and opinions of local authorities. This volume presents the results of part of the ESF project 'Second language acquisition by adult immigrants'. The present study deals specifically with structure of utterances in learner varieties. The authors have attempted to find general principles which determine the form of utterances from the very beginning to relatively advanced stages. Chapter 1 and 2 provide the framework for the study and here the guiding hypotheses are sketched on the basis of a pilot analysis. The empirical part of the study is contained in Chapters 3-6, in which data are given for the acquisition of, respectively, English (by Punjabi and Italian learners), German (Italian and Turkish learners), Dutch (Turkish and Moroccan learners) and French (Moroccan and Spanish learners), thus allowing for crosslinguistic comparisons in various ways. For each data-set the learner's linguistic repertoire is established, and then the utterance patterns recurrent in his/her

production and the constraints these patterns are subject to. In Chapter 7 the general and theoretical implications are discussed. This introduction to Norwegian helps students acquire the basic units of vocabulary and structure and use that knowledge to learn about Norway and Norwegian culture. Once students acquire the basic units of vocabulary and structure, they will use their knowledge of the language to learn about Norway. Students will learn about the cities of Oslo and Bergen, how to converse when eating in a Norwegian home or restaurant, and about Norwegian schools. Emphasis is also given to travel and communications, as well as the seasons of the year and Norwegian holidays. The present edition of the text features a short grammar summary, a reference for review to assist in drawing together aspects of the grammar that are presented throughout the text. To aid in developing good pronunciation and intonation habits, as well as to internalize certain items of vocabulary and structure, most chapters contain a practice dialogue for students to practice repeatedly while studying the chapter. Beginning with 1953, entries for Motion pictures and filmstrips, Music and phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955. Norwegian: An Essential Grammar is a reference guide to the most important aspects of contemporary Norwegian as used by native speakers. This is the ideal reference source for all learners. Suitable for self-study or class use.
