Strategic Organization Development Aug 22 2020 This second volume in the  
Contemporary Trends in Organization Development and Change Series addresses one  
of the most complex and important issues for management and organization  
development today -- how to plan for and create an organization capable of not only  
competing but excelling in an almost impossibly turbulent and uncertain environment.  
The book brings together a series of articles by practitioner-scholars. Those authors  
who have the responsibility for helping their organization create the future, and who  
also have the responsibility of helping us conceptually understand the process of  
strategic OD. In this book, you can sense the value of both of these voices – the  
practitioner and the scholar. These authors include organization development  
executives from global Fortune 500 organizations, major community service  
organizations, major academic contributors to the field, and OD practitioners from  
major consulting firms. Each author makes a unique contribution by providing  
strategies for planning the future, implementing change, and creating organizational  
capabilities for sustained success. New and current models for strategic organization  
development and candid discussions of issues, difficulties, and ways of coping with  
unanticipated events are provided. This book is dedicated to contributing to a better  
understanding and sharing of how major corporations, community service

organizations, and OD consultants are experiencing and working with one of the most important organizational problems of today – how to manage change for success.

Leading Organizational Development and Change Apr 22 2023 This textbook covers the fundamentals of organizational development and change (ODC) theory while offering a comprehensive, structured, and systematic approach to guide change management strategies at the organization level. It provides an in-depth understanding of and the tools necessary for designing, diagnosing, implementing and evaluating organizational change interventions. Students will be exposed to case studies in ODC from selected international and Caribbean/Latin American organizations, demonstrating ODC in practice across a broad geographical context. This textbook, the first to offer a macro-level perspective of ODC, provides students with the tools needed to be successful in implementing change into today's organizations.

Change and Development Jul 13 2022 This book and the symposium on which it was based were designed to cross the boundaries of subdiscipline and theoretical orientation to address four critical issues in understanding development: explanation of change and development; the nature and process of change; forms of variability in performance; and the promotion of change through application. The chapters suggest that change and development in target systems from cells to selves, may not be explainable, assessable, or promotable without careful reference to the context (social and otherwise) of the system, and that the process of change and development may involve variability of the system in addition to periods of stability. Together the chapters harken back to the spirit of the grand theory. Instead of proposing a grand theory, they provide an excellent foundation for considering the importance of an individual's (or particular group's) context and variability, and discussions to facilitate thinking about what still needs to be worked out.

Africa Dec 26 2020 This book focuses on the historical construction of African states, the modes of political control in the region, and the character of political elites. It examines the nature of political legitimacy and the avenues of participation or withdrawal pursued by various popular sectors.

Development and Social Change Jan 19 2023 In this new Sixth Edition of *Development and Social Change: A Global Perspective*, author Philip McMichael describes a world undergoing profound social, political, and economic transformations, from the post-World War II era through the present. He tells a story of development in four parts—colonialism, developmentalism, globalization, and sustainability—that shows how the global development “project” has taken different forms from one historical period to the next. Throughout the text, the underlying conceptual framework is that development is a political construct, created by dominant actors (states, multilateral institutions, corporations and economic coalitions) and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people, and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful, and clear. *Development and Social Change: A Global Perspective* challenges us to see ourselves as global citizens even as we are global consumers.

Learning to Change Lives Jun 19 2020 The Strategies and Skills Learning and Development (SSLSD) system is an action-oriented model for enabling clients in social

work, health, mental health, and human services settings to address their needs and life goals. In *Learning to Change Lives*, author A. Ka Tat Tsang introduces SSLD's powerful framework and practice, which has been developed based on three decades of experience in psychotherapy, counselling, education, training, consultation, and community service. *Learning to Change Lives* provides detailed, step-by-step guidelines for SSLD intervention – starting with engagement with the client, assessment, translating problems into intervention plans, systematic learning and development of appropriate strategies and skills. Key practice procedures are described clearly and illustrated by case examples, specific instructions, and sample worksheets. Aimed at clinical practitioners, mental health professionals, social workers, and other human service professionals, this book can be used as a manual by practitioners and as a textbook for courses and training programs.

*Institutional Change and Economic Development* May 11 2022 This wide-ranging volume demonstrates that there is no simple formula for successful institutional development. Through numerous examples, the book makes clear that development can only be achieved through deliberate imitation of successful foreign institutions combined with local innovations.

*Research in Organizational Change and Development* Nov 17 2022 This book brings new perspectives to classic issues in the field such as organizational complexity, change leadership, emotional intelligence and interorganizational change.

*Promise Of Development* Nov 24 2020 In recent years Latin Americanists have been among the most innovative and productive theorists of the uneven process of development. This collection of substantial selections from some of the most prominent theorists in the field represents a scholarly consolidation and reassessment of the controversies concerning the development of Latin America. Beginning with a historiographic overview, the editors emphasize the origins, evolution, and historical context of the development of each theoretical school (modernization, dependency and Marxism, corporatism, and bureaucratic authoritarianism) and then present key selections drawn from the writings of major theorists, organized by school. Each selection is prefaced with a short editorial introduction that highlights the central themes. A concluding section outlines the main debates surrounding each school and suggests new directions in theoretical development that might arise from criticism of the theories of authoritarianism and the search for democratic processes of development. The book's usefulness as a text is further enhanced by selected bibliographies that contain additional readings on each development theory. Here is a single source for Latin Americanists who hope to interest and instruct their students in the rich theoretical traditions and debates in Latin American studies. This book can also be a strong core volume for courses on other developing areas.

*Information Technology, Development, and Social Change* Nov 05 2021 The speed and cost effectiveness of new information technology has prompted many to view these innovations as a panacea for social and economic development. However, such a view flies in the face of continuing inequities in education, health, food, and infrastructure. This volume explores these issues – along with questions of access, privilege, literacy, training, and the environmental and health effects of information technologies in the developing world – arguing that a higher level of development does not always result from a higher level of technologization.

Organization Development and Change Jun 24 2023

Human Rights and Development in the new Millennium Apr 17 2020 In recent years human rights have assumed a central position in the discourse surrounding international development, while human rights agencies have begun to more systematically address economic and social rights. This edited volume brings together distinguished scholars to explore the merging of human rights and development agendas at local, national and international levels. They examine how this merging affects organisational change, operational change and the role of relevant actors in bringing about change. With a focus on practice and policy rather than pure theory, the volume also addresses broader questions such as what human rights and development can learn from one another, and whether the connections between the two fields are increasing or declining. The book is structured in three sections: Part I looks at approaches that combine human rights and development, including chapters on drivers of change; indicators; donor; and legal empowerment of the poor. Part II focuses on organisational contexts and includes chapters on the UN at the country level; EU development cooperation; PLAN's children's rights-based approach; and ActionAid's human rights-based approach. Part III examines country contexts, including chapters on the ILO in various settings; the Congo; Ethiopia; and South Africa. Human Rights and Development in the new Millennium: Towards a Theory of Change will be of strong interest to students and scholars of human rights, development studies, political science and economics.

Social Change and Development May 31 2021 During the past four decades, the field of development has been dominated by three schools of research. The 1950s saw the modernization school, the 1960s experienced the dependency school, the 1970s developed the new world-system school, and the 1980s is a convergence of all three schools. Alvin Y. So examines the dynamic nature of these schools of development--what each of them represents, their contributions, how they have criticized each other, how they have defended themselves, and how they were transformed. He reviews a variety of empirical studies, focusing on the "classical" and the "new" models, to show how each of the perspectives affects the study of development. In addition, this book features a unique emphasis on the research implications of the three perspectives, involving changes in orientation, agenda, methodology, and findings.

Resilience, Development and Global Change Aug 02 2021 Resilience is currently infusing policy debates and public discourses, widely promoted as a normative goal in fields as diverse as the economy, national security, personal development and well-being. Resilience thinking provides a framework for understanding dynamics of complex, inter-connected social, ecological and economic systems. The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where, how and why resilience might cause us to re-think global change and development, and how this new approach might be operationalized. The book shows how current policy discourses on resilience promote business-as-usual rather than radical responses to change. But it argues that resilience can help understand and respond to the challenges of the contemporary age. These challenges are characterized by high uncertainty; globalized and interconnected systems; increasing disparities and limited choices. Resilience thinking can overturn orthodox

approaches to international development dominated by modernization, aid dependency and a focus on economic growth and to global environmental change – characterized by technocratic approaches, market environmentalism and commoditization of ecosystem services. Resilience, Development and Global Change presents a sophisticated, theoretically informed synthesis of resilience thinking across disciplines. It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical, resilience-based approach to development might transform responses to climate change, to the dilemmas of managing forests and ecosystems, and to rural and urban poverty in the developing world. The book provides fresh perspectives for scholars of international development, environmental studies and geography and add new dimensions for those studying broader fields of ecology and society.

Practicing Organization Development May 19 2020 Completely revised, this new edition of the classic book offers contributions from experts in the field (Warner Burke, David Campbell, Chris Worley, David Jamieson, Kim Cameron, Michael Beer, Edgar Schein, Gibb Dyer, and Margaret Wheatley) and provides a road map through each episode of change facilitation. This updated edition features new chapters on positive change, leadership transformation, sustainability, and globalization. In addition, it includes exhibits, activities, instruments, and case studies, supplemental materials on accompanying Website. This resource is written for OD practitioners, consultants, and scholars.

The Learning & Development Book Dec 18 2022 Written for the experienced professional who lacks time and is juggling many responsibilities, but who yearns to be more effective with their professional development programmes, this provides simple ideas and concepts which illustrate best practices for improving learning and development teaching skills. It offers clear, concise advice based on real-world experience.

Development and Social Change Oct 24 2020 The Second Edition of this popular textbook has been conceptually reworked to take account of the instabilities underlying the project of global development. While the conceptual framework of viewing development as shifting from a national, to a global, project remains, new issues such as the active engagement in the development project by Third World elites and peoples are considered. The first four chapters cover the rise and fall of the "development project" around the world. The next three cover the period of globalization, from the mid 1980s onwards. The final two chapters rethink globalization and development for the 21st century. Throughout, extensive use is made of case studies.

Collaborative Inquiry for Organization Development and Change Feb 08 2022 This practical book explores collaborative inquiry as an approach to research and change in organizations where internal members and external researchers work together as partners to address organizational issues and create knowledge about changing organizations. Taking a research-based approach, Abraham B. (Rami) Shani and David Coghlan analyze the challenges that participants face in building a partnership between researchers and practitioners throughout the phases of collaboration. Chapters explore how collaborative partners assess the organization's current and future capabilities by expressing the present and future in creative imagery and by making relevant changes in the organization to create that future. The book examines the theoretical foundations

behind collaborative inquiry in addition to the methodologies of this approach to organization development and change. Mapping both the theory and practice of collaborative inquiry, this book will be a valuable resource for scholars and students of organization studies and research methods, particularly those with a focus on business and management. It will also be beneficial for practitioners interested in collaborative and action research modes.

Engendering Transformative Change in International Development Sep 15 2022 The Sustainable Development Goals were launched in 2015 with grand ambitions for ending poverty, protecting the planet, and ensuring prosperity for all, with 'no one left behind'. However, these goals will be impossible to achieve without addressing inequity, inequality, marginalisation, and exclusion related to gender, and to other intersecting social hierarchies linked to deeply emotional, culturally bound norms and judgements of worth. This book asks readers to consider issues of knowledge, power, and effectiveness, emphasising the limits of taking a categorical approach to gender and other social hierarchies, and the importance of process in what is known about generating transformative social change. Engendering Transformative Thinking and Practice in International Development draws on a range of real world examples which demonstrate both the limitations of the frameworks currently in use, and the very real possibilities for change when the intersecting social hierarchies that sustain and create inequity and inequality are challenged. This book brings together theoretical perspectives on social change, gender, intersectionality, and forms of knowledge, concluding with a set of proposals for revitalising a change agenda that recognises and engages with intersectionality and practical wisdom. Perfect for students and scholars of social change, gender, and development, this book will also be useful for practitioners looking for new ideas to help to generate social change.

Organizational Change and Development Apr 29 2021 The book focuses on change and development as organizational phenomena. The entire text is divided into 5 sections viz., Understanding Organizational Processes and Change, Management of Change, Nature of Organizational Development, OD Interventions and Strategies, and Contemporary Issues in OD, as the concluding part. With a strong conceptual foundation, the book takes the readers through the entire processes and stages of change as seen and experienced worldwide. The main strength of the book lies in its exhaustive treatment to a wide array of topics along with various exhibits on change management in Indian and global organizations. The role of leadership, organizational culture and technology as integral parts of any change initiative are dealt with in detail. Later part of the book covers various OD models and tools, change management strategies and contemporary issues such as diversity management. The language is simple and enhances learning for the reader with various snapshots of different stages/levels of change and OD at organizations worldwide. The book is aimed at MBA students who specialize in HR and Strategy areas. Industry practitioners and change consultants will also benefit greatly with the title.

Organization Development Mar 09 2022 Organization Development: The Process of Leading Organizational Change, Sixth Edition offers a comprehensive look at individual, team, and organizational change, covering classic and contemporary organization development techniques. Today's practitioners seek a solid foundation that is academically rigorous, but also relevant, timely, practical, and grounded in OD values

and ethics. In this bestselling text, author Donald L. Anderson provides students with the organization development tools they need to succeed in today's challenging environment of increased globalization, rapidly changing technologies, economic pressures, and evolving workforce expectations. The new Sixth Edition has been updated to reflect the latest research. New cases, chapter learning objectives, examples, sections on diversity, equity, and inclusion, and the impact of COVID-19 on the workplace provide readers with the latest information on OD best practices.

State Formation, Regime Change, and Economic Development Jan 27 2021 Failed or weak states, miscarried democratizations, and economic underdevelopment characterize a large part of the world we live in. Much work has been done on these subjects over the latest decades but most of this research ignores the deep historical processes that produced the modern state, modern democracy and the modern market economy in the first place. This book elucidates the roots of these developments. The book discusses why China was surpassed by Europeans in spite of its early development of advanced economic markets and a meritocratic state. It also hones in on the relationship between geopolitical pressure and state formation and on the European conditions that – from the Middle Ages onwards – facilitated the development of the modern state, modern democracy, and the modern market economy. Finally, the book discusses why some countries have been able to follow the European lead in the latest generations whereas other countries have not. State Formation, Regime Change and Economic Development will be of key interest to students and researchers within political science and history as well as to Comparative Politics, Political Economy and the Politics of Developing Areas.

Change and Development in Organisations May 23 2023 "Due to the increasing transformation and changes in the economy, society, technology, ecology or even human health, organizations and companies are or should be continuously changing in order to survive as they are open systems. This book illustrates both how organizations can transform or change and where the most cutting-edge and innovative organizations and companies are heading. Accordingly, the book is structured in two parts. The first part explores concepts associated with change and development such as innovation, organisational resilience and learning, and describes the latest trends and related research. The second part analyses the new organisation or company we are, it is to be hoped, heading for: a more conscious, compassionate, sustainable, innovative, trustful and humane organisation. The book reviews underlying ideas related to leadership, technology, trust and compassion and presents and analyses compassionate, sustainable and conscious organisations through an in-depth examination of their organisational and managerial characteristics, with particular emphasis on their human resource management practices and employee wellbeing. This volume is principally addressed to management and business students and researchers, as it offers a pedagogical review and analysis of the topics from the latest literature and research. At the same time, it provides highly topical and interesting ways forward for executives who want to transform their companies by introducing more conscious, humane and innovative approaches"--

The NTL Handbook of Organization Development and Change Oct 16 2022 The NTL Handbook of Organization Development and Change is an essential tool for both practitioners and students who want to know how to effectively bring about meaningful

and sustainable change in organizations. Featuring contributions from leading practitioners, academics, and scholars in the field, each chapter comprehensively explores a key aspect of organization development including core theories and methods, OD in the international and world setting, practical applications, the future of OD, and many others. Co-published with the NTL Institute, a long-time leader and champion for the field, The NTL Handbook of Organization Development and Change boasts an extensive range of knowledge, experience, and methods integrated by a philosophical system that underscores the vital mission of OD as well as provides expert guidance in the art and science of making organizational development and change work.

Organization Development and Transformation Jul 21 2020 [This] is a ... collection of 48 readings designed to help individuals, teams and organizations function better in today's environment of rapid- and often random-change. [The book] involves a critical leadership and management methodology. The concepts of [organization development] have become a part of the effective manager's repertoire, in addition to business knowledge and technical competencies.-Back cover.

Change for the better global change and economic development Feb 20 2023  
Displacement, Development, and Climate Change Dec 06 2021 This book focuses on one critical challenge: climate change. Climate change is predicted to lead to an increased intensity and frequency of natural disasters. An increase in extreme weather events, global temperatures and higher sea levels may lead to displacement and migration, and will affect many dimensions of the economy and society. Although scholars are examining the complexity and fragmentation of the climate change regime, they have not examined how our existing international development, migration and humanitarian organizations are dealing with climate change. Focusing on three institutions: the United Nations High Commissioner for Refugees, the International Organization for Migration and the United Nations Development Programme, the book asks: how have these inter-governmental organizations responded to climate change? And are they moving beyond their original mandates, given none were established with a mandate for climate change? It traces their responses to climate change in their rhetoric, policy, structure, operations and overall mandate change. Hall argues that international bureaucrats can play an important role in mandate expansion, often deciding whether and how to expand into a new issue-area and then lobbying states to endorse this expansion. They make changes in rhetoric, policy, structure and operations on the ground, and therefore forge, frame and internalize new issue-linkages. This book helps us to understand how institutions established in the 20th century are adapting to a 21st century world. It will be of great interest to scholars and students of International Relations, Development Studies, Environmental Politics, International Organizations and Global Governance, as well as international officials.

Managing Change Through Training and Development Mar 29 2021 Learning to cope with and manage change is the most important challenge facing the organizations in which we work. Fully revised and now in paperback, the purpose of this book is to demonstrate how training interventions can be used to help manage change. It is a practical and integrated overview of many different approaches and methods, and includes new material on the learning organization. The text draws of a wide rage of sources to cover change on three overlapping levels: the organization, the team and the

individual. This practical text is supplemented by self-analysis instruments, organization-related tasks, case studies of practice and examples of development activities. It will be important reading for all trainers, managers, HRM practitioners and HRD professionals.

Media, Development, and Institutional Change Feb 25 2021 Media, Development, and Institutional Change investigates mass media's profound ability to affect institutional change and economic development. The authors use the tools of economics to illuminate the media's role in enabling and inhibiting political economic reforms that promote development. The book explores how media can constrain government, how governments manipulate media to entrench their power, and how private and public media ownership affects a country's ability to prosper. The authors identify specific media-related policies governments of underdeveloped countries should adopt if they want to grow. They illustrate why media freedom is a critical ingredient in the recipe of economic development and why even the best-intentioned state involvement in media is more likely to slow prosperity than to enhance it. Scholars and students of economics, political science and sociology; policy-makers, analysts and others in the development community; and academics in media studies will find this book insightful and provocative.

Alternative Development Jul 01 2021 This book brings together a collection of essays that discuss alternative development and its relevance for local/global processes of marginalization and change in the Global South. Alternative development questions who the producers of development knowledges and practices are, and aims at decentring development and geographical knowledge from the Anglo-American centre and the Global North. It involves resistance to dominant political-economic processes in order to further the possibilities for non-exploitative and just forms of development. By discussing how to unravel marginalization and voice change through alternative methods, actors and concepts, the book provides useful guidance on understanding the relationship between theory and practice. The main strength of the book is that it calls for a central role for alternative development in the current development discourse, most notably related to justice, rights, globalization, forced migration, conflict and climate change. The book provides new ways of engaging with alternative development thinking and making development alternatives relevant.

Theory Of Organization Development And Change Apr 10 2022

Constancy and Change in Human Development Aug 14 2022 How malleable is human nature? Can an individual really change in meaningful ways? Or, are there immutable limits on the possibilities of human growth set in place by genes and early childhood experiences? These questions touch our deepest political and personal concerns, and have long been a matter of fierce debate in the behavioral sciences.

Leadership and Change in Sustainable Regional Development Sep 22 2020 This book shows, first of all, that leadership plays a crucial role in reinventing regions and branching out from an old path to something new in order to create more balanced and sustainable regional development. Second, it maintains that leadership is not a solo but a multi-agent and -level activity and that it needs to be discussed and studied as such. Third, as the book argues, leadership is shaped differently in various institutional and cultural contexts and on different scales. This book explores the ways leadership plays out in regional development context contributing to economically, socially and

ecologically balanced sustainable future.

Organisation Development and Change Jun 12 2022 This text focuses on the use of organisation development, which is a process that applies behavioural science knowledge and practices to help organisations achieve greater effectiveness. Other paradigms, including organisation transformation, are also discussed in order to give a balanced perspective on the challenges of being an agent.

Organization Development and Change Aug 26 2023 Market-leading ORGANIZATION DEVELOPMENT AND CHANGE, 10th Edition blends rigor and relevance in a comprehensive and clear presentation. The authors work from a strong theoretical foundation to describe, in practical terms, how behavioral science knowledge can be used to develop organizational strategies, structures, and processes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Change and Development in the Twentieth Century Jan 07 2022 Most studies of 20th-century social theory still view historical development through the lens of the Cold War. This important study challenges the prevailing ahistorical Cold War paradigm by looking at theoretical traditions formulated by Marx, Durkheim and Weber that have shaped discussions about change and development for nearly a century. The author explores how these perspectives were formed, how later ideas were incorporated, and the relevance of these theories to national and international structures of power. In providing a new window through which to analyze social change, this accessible book tackles a wide range of subjects, including: · the rise of industrial capitalist society · imperialism · regimes and territories on the edges of states · the resurgence of the idea of progress and cultural revolution in the US · decolonization and modernization theory · social revolution · rituals of rebellion · postcolonial discourse · the collapse of the socialist block and the resurgence of nationalism. This stimulating book will be of interest to anyone studying social and cultural change, development, the history of anthropological theory, or the history of social thought.

Change, Transformation and Development Jul 25 2023 This volume contains a collection of papers all concerned with the exploration of economic and social dynamics in relation to the innovation process and its outcomes. This theme is firmly rooted in the Schumpeterian tradition in which an economic perspective is mutually embedded in a wider awareness of the role of other disciplines. Indeed since Schumpeter's time, the degree of specialisation within the social sciences has risen many fold, new sub disciplines continue to emerge, highly specialised theoretical tools and empirical methods continue to be developed, and new fields for the study of management and business overlap with the more traditional social sciences. There is, consequently, a need for connecting principles to offset the dangers of intellectual fragmentation. Evolutionary economics and evolutionary analysis more generally, certainly provide some of these connecting principles. The various contributions to this volume reflect upon this research programme in a number of ways.

Embracing Organisational Development and Change Mar 21 2023 This book focuses on human behavioural processes and describes them from an interdisciplinary perspective. It introduces readers to the main theories and approaches in the field of organisational development and change (ODC), and discusses their relevance and purpose with a clear focus on improving how readers perceive and handle change. The

book is tailor-made for business students without any background in the humanities, helping them to conceptualise organisational development and change, and to practically organise interventions to increase organisational effectiveness. The book's goal is to help future managers and consultants recognise and handle the 'full situation', which includes purposes, people and relationships. Furthermore, it elaborates on those theories and instruments that can deliver real benefits to real people working in real fuzzy and complex circumstances, and includes several practical cases focusing on the role of the interventionist.

Cases and Exercises in Organization Development & Change Sep 03 2021 Cases and Exercises in Organization Development & Change, Second Edition encourages students to practice organization development (OD) skills in unison with learning about theories of organizational change and human behavior. The book includes a comprehensive collection of cases about the OD process and organization-wide, team, and individual interventions, including global OD, dialogic OD, and OD in virtual organizations. In addition to real-world cases, author Donald L. Anderson gives students practical and experiential exercises that make the course material come alive through realistic scenarios that managers and organizational change practitioners regularly experience.

Representing Development Oct 04 2021 Representing Development presents the different social representations that have formed the idea of development in Western thinking over the past three centuries. Offering an acute perspective on the current state of developmental science and providing constructive insights into future pathways, the book draws together twelve contributors with a variety of multidisciplinary and international perspectives to focus upon development in fields including biology, psychology and sociology. Chapters and commentaries in this volume present a variety of perspectives surrounding social representation and development, addressing their contemporary enactments and reflecting on future theoretical and empirical directions. The first section of the book provides an historical account of early representations of development that, having come from life science, has shaped the way in which developmental science has approached development. Section two focuses upon the contemporary issues of developmental psychology, neuroscience and developmental science at large. The final section offers a series of commentaries pointing to the questions opened by the previous chapters, looking to outline the future lines of developmental thinking. This book will be of particular interest to child psychologists, educational psychologists and sociologists or historians of science, as well as academics and students interested in developmental and life sciences.
