The verbal participation of learners in language classrooms offers a rich seam of data to the applied linguist. Overt and covert participation, when examined, can reveal both the structures of a classroom and elicit privileged information on participant's self-perceptions. It examines the verbal participation of learners in Japanese as a Foreign Language classrooms. Verbal interactions with teachers and classmates and 'private' speech acts are examined in relation to the classroom context and also sociocultural factors such as the learner's motivation and the teacher's belief in their own methods. The examination of corrective feedback episodes and learners' private speech uses recorded speech and stimulated recall interviews recorded over the period of a year. The main focus is on Corrective Feedback episodes, and explains not only the language used in class but also teacher's and learner's own perceptions. It will be of interest to researchers in applied linguistics and second language acquisition, especially those involved with Japanese as a second or other language. It is claimed in this book that expectations should not necessarily be treated as unobservable variables and that there is much to be learned from survey data. A unique data set is examined, the output of surveys conducted twice a year since 1952, among informed Italian businessmen and economic experts. The predictive accuracy, rationality and determinants of inflation expectations are investigated, following

an extensive analysis of measurement issues. The estimate of inflation expectations are evaluated for both wholesale and consumer price changes, comparing them with those held by respondents to other surveys for different countries and with the forecasts generated by alternative predictors of the inflation process. The expectations considered in the study are shown to be remarkably accurate, anticipating all major price changes, even if during the years of high and rising inflation which have followed the first oil crisis they appear to underestimate on a number of occasions the inflation rates actually experienced, as the alternative predictors also do. An accurate testing of the rational expectations hypothesis is conducted, rejecting it over the entire sample period but not for the period of mild, but variable inflation which preceded the first oil crises. It is shown that a mixed adaptive-regressive model, with both error-learning and return-to-normality components adapts very well to the data considered in this study and that inflation expectations are also influenced by an uncertainty component which affects the adaptive coefficient. Furthermore, regression towards normality is slowed down when industrial capacity is utilized above normal, and vice-versa. Many other issues such as the dispersion of individual answers, the problems of aggregation and measurement error are also considered and an extensive bibliography of other works where use is made of direct information on expectations, is included.

Bloomsbury Class 1 Semester 1 Teacher Resource Book (Academic Year 2023-24) Bloomsbury—An Activity-based Integrated Course for LKG, UKG and Classes 1 to 5 has been designed and formulated in accordance with the guidelines of National Education Policy (NEP) 2020. The series comprises a set of fourteen books, two for each class and one per semester. Semester books for LKG and UKG include English, Mathematics and Environmental Science. Semester books for Classes 1 and 2 include English, Mathematics, Environmental Science and General Knowledge. Semester books for Classes 3 to 5 include English, Mathematics, Science, Social Studies and General Knowledge. The series is strictly aligned with the basic tenets of NEP 2020. Thus, a lot of emphasis has been laid on promoting activity-based and experiential approach to learning. The series also seeks to develop the core twenty-first-century skills in learners, which lie at the heart of NEP 2020. Besides, great care has been taken to make learning a joyful experience for the learners. All this will together lay a strong foundation at the primary level and lead to the holistic development of the learners at each level. Some of the key features of the series are:

- Key concepts supported with visual activities, games and real-life examples
- Carefully-graded and comprehensive exercises to facilitate true evaluation

The content for English is a perfect blend of the best of both worlds—past and present. The selections are based on the learners' interests, and, therefore, will not only easily arrest their attention but also facilitate longer retention. The graded exercises lay appropriate emphasis on learning the four basic language skills of Listening, Speaking, Reading and Writing. Grammar Section in each book offers simple and clear conceptual understanding.

MATHEMATICS The Mathematical concepts have been dealt with in an interesting and comprehensive manner. This way even an average child will have no difficulty in grasping the fundamentals. The series follows a graded and spiral approach, keeping in mind the age and level of understanding of the learner. ENVIRONMENTAL STUDIES NEP 2020 lays emphasis on promoting the spirit of analysis and questioning because it has been increasingly felt that children learn more through talking, observing and discussing with others. This approach has been adopted in EVS content. SCIENCE The content in this section emphasises meaningful learning of science for the overall development of learners. It focuses on helping children understand their natural environment and correlate science with their everyday experiences in an interesting and comprehensive manner. SOCIAL STUDIES A totally new and innovative approach to teaching social studies has been adopted in this section. The lessons enhance the learners' life skills and equip them with a high civic sense and arm them with an ability to face the challenges in life with confidence, and as responsible citizens. GENERAL KNOWLEDGE The main objective of the General Knowledge section is to create a sense of wonder in the learners and arouse in them a desire to learn and find out more about the world around them. We look forward for feedback and constructive criticism from the students, teachers and parents, which will be given due consideration in the future reprints and editions of the books. ????? ?????? ?????????? ???? ?????????? Law students rarely have experience answering problem questions
before university, and lecturers concentrate on teaching content rather than the exam skills needed.
This book bridges the gap on how to transpose knowledge and research into structured and
coherent answers to problem questions while earning a law degree. Aimed at undergraduates,
international students, and foundation and SQE candidates, the book gives a step-by-step study
guide on how to navigate what a problem question is asking you to do. It deconstructs the process
using examples from a range of different fields of law, providing essential guidance from research
and critical thinking to style and tone. Including a range of examples to test yourself against, this is
an indispensable resource for any law student who wants to tackle problem questions with
confidence. Bloomsbury—An Activity-based Integrated Course for LKG, UKG and Classes 1 to 5 has
