Astronomy with a Budget Telescope, 2nd Edition is a complete introduction to buying and using a low-cost amateur astronomical telescope. It provides essential hints and tips about what to look for when buying on a budget - the best are now excellent value, but they all lack an astronomer's advice about setting them up and using them. Astronomy with a Budget Telescope was first published in 2003, since then technology has moved on substantially. The main factors are first the availability of fairly inexpensive computer-controlled "go-to" telescopes which after setting up can automatically locate any celestial objects with reasonable accuracy. Second, digital cameras have now almost completely displaced "wet" film cameras, and some of them are particularly well-suited to astronomical use. Third, prices are down and quality is up! This new edition is revised and extended to include using a low-cost "go-to" telescope - there are various pitfalls to be avoided - and how this class of instrument can make amateur astronomy more accessible to those with limited time at their disposal. It also discusses the new breed of mid-range digital cameras that include powerful on-board processing and image enhancement software that used to be available only to people with advanced astronomical CCD cameras. Finally, there are detailed reviews and test reports on some of the budget telescopes that are available on Main Street and by mail order. The Panasonic Lumix DMC-LX7 has earned a reputation as one of the top choices for photographers who want an advanced camera they can carry around to capture great images without the complication and weight of a DSLR or other large camera. With features such as a very fast lens with an aperture of f/1.4, excellent image quality, and a solid array of burst-shooting capabilities, the LX7 has attracted an enthusiastic following. However, the camera does not come with a detailed printed manual for reference, making it difficult for users to find answers to questions about the use of the camera's many controls, menus, and features. With the release of this guide book to the LX7, White Knight Press has provided users with a comprehensive guide to all operations of this sophisticated camera. Using a patient, tutorial-like approach, the book provides guidance to beginning and intermediate photographers about how to accomplish things with the LX7, as well as when and why to use the camera's many controls, menu options, and other features. The book does not assume specialized knowledge by the reader as it explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, exposure compensation, white balance, and ISO sensitivity. The book also provides details about the camera's numerous options for playback, setup, and customizing the operation of the various buttons and other controls. The book contains approximately 400 photographs, almost all in full color, illustrating the LX7's controls, shooting screens, and menus. The images also provide examples of the various types of photographs that can be taken using the many creative settings of the camera, including the Creative Control settings, which let the photographer alter the color processing and other aspects of images; the Scene shooting mode, with settings that are optimized for various subjects, including landscapes, portraits, and action shots; the Photo Style menu option, which provides the ability to customize the appearance of images; and the camera's strong array of features for continuous shooting and shooting in dim lighting. In addition, the book goes beyond the bounds of everyday photography, and introduces more advanced topics such as infrared photography, street photography, astrophotography, and High Dynamic Range (HDR) photography. The book also includes a full discussion of the video recording abilities of the LX7, which can shoot high-definition (HD) video with

stereo sound, and which offers manual control of exposure and focus during movie recording. In three appendices, the book provides information about accessories for the LX7, including cases, external flash units, and filter adapters, and includes a list of web sites and other resources for further information. The book includes a detailed appendix with helpful Quick Tips with insights into how to take advantage of the camera's features in the most efficient ways possible. Photographer's Guide to the Panasonic ZS200/TZ200 is a complete guide to the use of the Panasonic Lumix DMC-ZS200 camera, which is known as the TZ200 in areas outside the United States. The book shows beginning and intermediate photographers how to capture excellent images and video sequences with the ZS200. The book explains the use of autofocus, manual focus, aperture, shutter speed, exposure compensation, white balance, and ISO, and many other settings. The book discusses the camera's options for playback, setup, and customizing the operation of its controls. The book contains more than 480 color photographs showing the camera's controls, display screens, and menus. The book includes photographs taken using the many creative settings of the camera, including the Photo Style settings; the Creative Control mode picture effects, which provide the ability to customize the appearance of images in dramatic ways; and the camera's features for burst shooting and shooting in high-contrast lighting conditions. The book explains how to use the ZS200's innovative features such as Light Composition and Sequence Composition, which enable the creation of multiple exposures of scenes with bright flashes, such as fireworks, or motions such as sports events. The book includes a full discussion of the video recording abilities of the ZS200 camera, which offers manual control of exposure and focus during movie recording, and provides ultra-high definition 4K recording of motion pictures. The book also explains the camera's features for extracting still images from 4K video and using the Post Focus feature to select a sharply focused image after a shooting session. In three appendices, the book discusses accessories for the ZS200, including cases, power supply options, and other items, and includes a list of websites and other resources for further information. The book includes an appendix with helpful Quick Tips that explain how to take advantage of the camera's features in the most efficient ways possible. "Finis les manuels d'utilisation obscurs et incompréhensibles ! Avec ce Mode d'emploi complet, vous disposez enfin d'un guide clair, pratique et en couleurs pour exploiter toutes les fonctionnalités de votre Lumix Panasonic ! Au sommaire • Découvrez la gamme des Lumix • Choisissez le Lumix qui vous correspond • Découvrez les notions de base de la photo numérique • Apprenez à réussir simplement et rapidement de bonnes photos • Allez plus loin en évitant les automatismes • Optimisez au mieux votre appareil • Affrontez tout type de situations • Imprimez vos photos • Faites tirer vos photos dans un laboratoire • Réalisez des diaporamas • Retouchez et partagez vos photos ". Il volume 29 si apre con la pubblicazione degli Atti del Convegno "I dati archeologici. Accessibilità, proprietà, disseminazione" (Roma, CNR, 23 maggio 2017), a cura di Marco Arizza, Valeria Boi, Alessandra Caravale, Augusto Palombini e Alessandra Piergrossi. Gli Atti raccolgono 14 contributi di studiosi provenienti dal CNR, dall'Università e dal Ministero dei Beni Culturali, che hanno dato vita a un dibattito sul tema della documentazione e disseminazione dei risultati della ricerca archeologica. Seguono 11 articoli di studiosi italiani e stranieri che illustrano ricerche archeologiche interdisciplinari in cui l'uso delle tecnologie informatiche risulta determinante per l'acquisizione, l'elaborazione e l'interpretazione dei dati. Tecniche di analisi statistica, banche dati, GIS e analisi spaziali, tecniche di rilievo tridimensionale e ricostruzioni virtuali, sistemi multimediali, contribuiscono a documentare le testimonianze del passato e a diffondere i risultati della ricerca scientifica. Chiude il volume la sezione dedicata alle note e recensioni With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment. Fresh from the latest series of the critically acclaimed Black Books, co starring label mate Dylan Moran, Bill starts his new UK tour on May 3rd. It runs until the middle of July. Reflecting Bill's growing popularity, it is his biggest tour so far. He has now added a second date at the Hammersmith Apollo. That's the price you pay for being the funniest person on Never Mind The Buzzcocks! Part Troll was recorded at London's Wyndhams Theatre and is without question the work of a comedy genius. You have been warned! Walking to Hollywood is a dazzling triptych - obsessive, satirical, elegiac - in which Will Self burrows down through the intersections of time, place and psyche to explore some of our deepest fears and anxieties with characteristic fearlessness and jagged humour. 'Very Little' is ostensibly the account of a curative journey to Canada and the USA, but in fact the record of a nematode's progress, as the worm of obsession - with scale and packing and the 'stuff' of our lives - bores through a mind in extremis. 'Walking to Hollywood' is an extreme satire on celebrity, in which the narrator believes that everyone he meets is played by a famous actor, and that only he can

of each chapter list additional books, films, DVDs, groups, agencies, organisations, contact details, websites and other materials which will support your teaching even further. The Media Teacher's Handbook is an essential guide to the theory, pedagogy, and practice of media education that will enable you to teach your subject expertly and with confidence. What shapes the cultural, political and ideological values of young people living in Southeastern Europe? Which identities matter to them? How are their values changing, and how can they be changed? Who is changing them? Europe's periphery is the testing ground for the success of European values and identities. The future stability and political coherence of the Union will be determined in large measure by identity issues in this region. This book examines the ways in which ethnic and national values and identities have been surpassed as the overriding focus in the lives of the region's youth. Employing bottom-up, ethnographic, and interview-based approaches, it explores when and where ethnic and national identification processes become salient. Using intra-national and international comparisons of youth populations of Albania, Bosnia-Herzegovina, Croatia, Macedonia, Montenegro, and Serbia, contributors uncover the mechanisms by which ethnic identities are evoked, reproduced and challenged. In addition to exploring political, regional cultural generational and class identities, the contributors examine wider questions of European unity. This volume offers a corrective to previous thinking about youth ethnic identities and will prove useful to scholars in political science and sociology studying issues of ethnic and national identities and nationalism, as well as youth cultures and identities. Photographer's Guide to the Panasonic Lumix DC-ZS70/TZ90 is a complete guide to the use of the Panasonic Lumix DC-ZS70 camera, which is known as the TZ90 outside of North America. The book shows beginning and intermediate photographers how to capture excellent images and video sequences with the ZS70. The book explains the use of autofocus, manual focus, aperture, shutter speed, exposure compensation, white balance, and ISO, and many other settings. The book discusses the camera's options for playback, setup, and customizing the operation of its controls. The book contains more than 450 color photographs showing the camera's controls, display screens, and menus. The book includes photographs taken using the many creative settings of the camera, including the Photo Style settings; the Creative Control mode picture effects, which provide the ability to customize the appearance of images in dramatic ways; and the camera's features for burst shooting and shooting in high-contrast lighting conditions. The book includes a full discussion of the video recording abilities of the ZS70 camera, which offers manual control of exposure and focus during movie recording, and provides ultra-high definition 4K recording of motion pictures. The book also explains the camera's features for extracting still images from 4K video and using the Post Focus and Focus Stacking features to produce sharply focused images after a shooting session. In three appendices, the book discusses accessories for the ZS70, including cases, power supply options, and other items, and includes a list of websites and other resources for further information. The book includes an appendix with helpful Quick Tips that explain how to take advantage of the camera's features in the most efficient ways possible. A magical snowman teaches an unhappy girl about friendship and skating. Kreta ist Griechenlands Außenposten der Superlative, ein Kontinent für sich, fast zu groß, um in einem einzigen Menschenleben erlebt zu werden. Aufgrund seiner strategisch günstigen Lage im Mittelmeer - als Bindeglied zwischen Europa und Afrika - und seines reichhaltigen Wasservorkommens war Kreta immer erbittert umkämpft. Jahrhundertelange Besatzung und ständige Widerstandskämpfe haben den Charakter der Bewohner geprägt. So fühlen sich die Kreter zuallererst Kreta zugehörig und erst in zweiter Linie Griechenland. Sie sind sehr stolz auf ihre Insel, und dazu haben sie allen Grund. Man kommt aus dem Staunen, Sammeln wertvoller Eindrücke und Bewundern von Natur- und Kulturschönheiten überhaupt nicht heraus. Einige Beispiele: Kreta gilt als Wiege der frühesten Hochkultur Europas, denn vor etwa 4000 Jahren entstand hier die minoische Kultur. Die Stadt Chania im Norden der Insel ist eine der ältesten ununterbrochen bewohnten Siedlungsstätten Europas. Bis Ende Mai ist der 2456 m hohe Psiloritis mit Schnee bedeckt - eine herrliche, fast unwirkliche Aussicht, wenn man bei 28 °C in Heraklion auf dem Flughafen landet. Besonders faszinierend ist der größte zusammenhängende Kermeseichenwald Europas. Fährt man nur 15 Minuten mit dem Pkw und verlässt die touristischen Pfade, so trifft man auf das ursprüngliche Kreta, gelebte Gastfreundschaft und zugleich raue Menschen, die teilweise noch sehr historisch leben - das fantastische zweite Gesicht der Insel. Am besten kann man in diese Erlebniswelt auf den 30 Etappen des Wanderwegs E4 eintauchen. Dabei liegt der besondere Reiz in emotionalen Extrempositionen. Man erlebt eine Distanzierung von den Alltagsorgen und gewinnt Eindrücke, die sich tief in die Gefühls- und Gedankenwelt einprägen. Das Motto lautet: Ankommen im Hier und Jetzt. Wir wünschen Ihnen viel Spaß beim Erleben und Entdecken. Und Sie werden wiederkommen - auf eine wunderbare Insel Griechenlands - wie so viele andere schon. "Gott oder Teufel!" wir haben die Wahl! Im Namen von uns allen, ob weltlich oder jenseitig. Wie alles mit Allem zusammenhängt und die „geplante Verdummung“ der Menschheit im Dienste der Macht voranschreitet. Auch wenn Sie an gar nichts glauben können, so unterhält Sie dieses Buch, als spannendes „Märchen für Erwachsene“. Ethik zum Verstehen, in autobiographischen Erfahrungsberichten, von einer „einfachen Frau“, für Jedermann/Frau leicht verständlich zusammengefasst. „Hell“ und wach bleiben, nicht verzweifeln und denken lernen, dass ist unser tägliches Gebot. Über Gott, Engel, Ahnen, auch über das „Orb-Phänomen“ und diese Welt, jenseits jeder Art von Religion, "konsumabhängig" oder spirituell suchend, zu bedeuten menschliche Werte, gibt es sie überhaupt noch? This book explores the insights that Cultural

Astronomy provides into the classical Roman world by unveiling the ways in which the Romans made use of their knowledge concerning the heavens, and by shedding new light on the interactions between astronomy and heritage in ancient Roman culture. Leading experts in the field present fascinating information on how and why the Romans referred to the sky when deciding upon the orientation of particular monuments, temples, tombs and even urban layouts. Attention is also devoted to questions of broader interest, such as the contribution that religious interpretation of the sky made in the assimilation of conquered peoples. When one considers astronomy in the Roman world it is customary to think of the work and models of Ptolemy, and perhaps the Julian calendar or even the sighting of the Star of Bethlehem. However, like many other peoples in antiquity, the Romans interacted with the heavens in deeper ways that exerted a profound influence on their culture. This book highlights the need to take this complexity into account in various areas of research and will appeal to all those who wish to learn more about the application of astronomy in the lives and architecture of the Romans. The essential volume on the biology and behavior of these remarkable insects. "This transformative work will be an inspiration to students of entomology." —Choice The cockroach is truly an evolutionary wonder. This definitive volume provides a complete overview of suborder Blattaria, highlighting the diversity of these amazing insects in their natural environments. Beginning with a foreword by Edward O. Wilson, the book explores the fascinating natural history and behavior of cockroaches, describing their various colors, sizes, and shapes, as well as how they move on land, in water, and through the air. In addition to habitat use, diet, reproduction, and behavior, Cockroaches covers aspects of cockroach biology, such as the relationship between cockroaches and microbes, termites as social cockroaches, and the ecological impact of the suborder. With over 100 illustrations, an expanded glossary, and an invaluable set of references, this work is destined to become the classic book on the Blattaria. Students and research entomologists can mine each chapter for new ideas, new perspectives, and new directions for future study. "Well-written . . . visually attractive . . . This book is much needed to educate biologists about the fascinating biology and diversity of cockroaches." —Integrative and Comparative Biology "A must-have for any insect hobbyist." —Allpet Roaches Forum "This contribution is an important source of information on cockroach natural history and diversity." —The Quarterly Review of Biology "Suitable for researchers, students, and naturalists, chapters are topical, exploring the diversity of cockroaches." —Southeastern Naturalist Collaboratively Constructed Language Resources (CCLRs) such as Wikipedia, Wiktionary, Linked Open Data, and various resources developed using crowdsourcing techniques such as Games with a Purpose and Mechanical Turk have substantially contributed to the research in natural language processing (NLP). Various NLP tasks utilize such resources to substitute for or supplement conventional lexical semantic resources and linguistically annotated corpora. These resources also provide an extensive body of texts from which valuable knowledge is mined. There are an increasing number of community efforts to link and maintain multiple linguistic resources. This book aims offers comprehensive coverage of CCLR-related topics, including their construction, utilization in NLP tasks, and interlinkage and management. Various Bachelor/Master/Ph.D. programs in natural language processing, computational linguistics, and knowledge discovery can use this book both as the main text and as a supplementary reading. The book also provides a valuable reference guide for researchers and professionals for the above topics. Daywalks Around Melbourne contains 100 detailed walk descriptions, 65 colour topographic maps, 100 elevation profiles, colour photographs, location and access details, distance and walk times, 150+ walks and variations. you how to: Take creative control and go beyond automatic settings Learn the basic rules of composition Capture decisive moments, including fast-moving objects Discover ways to use a flash indoors and outdoors Learn about different lenses, and the best time to use them Understand the options for shooting RAW, and whether it's right for you Use the D90's ability to shoot high definition video The present work is the result of the First International Chariot Conference, jointly organised by the Netherlands-Flemish Institute in Cairo (NVIC) and the American University in Cairo (AUC) (30 November to 2 December 2012). The intention of the conference was to make a broad assessment of the current state of knowledge about chariots in Egypt and the Near East, and to provide a forum for discussion. A wide variety of papers are included, ranging from overviews to more detailed studies focusing on a specific topic. These include philology, iconography, archaeology, engineering, history, and conservation. The book is of interest to scholars as well as anyone with an interest in ancient technology, transportation, or warfare. In this collection, her first, Irina Dimitric ponders over her journey through life, from childhood in her wartime homeland to migrating to Australia in 1964. Her poems reveal her dreams and disappointments, joy and pain, the value of forgiveness and gratitude, her love of nature and her love of laughter without which, she maintains, life would be unbearable. Writing poetry and photography, her pastimes born at the time she cared for her aging mother, help her to make sense of the world and to go on loving life. She loves both free verse and form poetry, the latter learnt from her mentor Susan Budig at Mindful Poetry on Gather.com, who also baptised Irina's creation of a new form of tercet-tercetone, consisting of 3 lines: the first two lines rhyme; the third line contains a leonine or internal rhyme. See Holden Barina (p. 40) Encouraged by Susan to submit her poems for publication, this poem is among her poems published online and in print by Narrator Australia Volume Two. Another two tercetonines appear in this collection: Just an Ordinary Garden (p. 8) and Cloud Gazing (p. 32), the latter published by Narrator Australia Volume Three. Of all the forms set out as challenges by Susan Budig, chant royal was the most difficult one. Susan assured her students that if they succeeded in mastering it, they would positively glow. Irina says she still glows whenever she reads The Ploughing of Marko Kraljevich with a Twist (p. 36). Prince Marko and his horse Sarac (pronounced Shahratz, meaning piebald) were her favourite characters when as a child, sitting on her father's lap, she listened to him reading the poems about the Serbian battles against the Ottoman Turks. The title of the book is the title of the poem on page 28, written as a response to the challenge on Gather.com: write a poem about winter, but in warm Sydney she could only dream about winter. Her connection with her homeland and Europe is very strong in her memory and in her heart. The photographs which accompany some of the poems were all taken between 2011 and 2014 except for the following three photos: Irina with her mother on p. 18 sent to her father, who was in a POW camp in Germany; Irina's father on p. 19 during the Anzac March in Sydney in 1989; Irina with her friend Nada on p. 38, who also appears as Nelly with her brother Joe in the poem The Silver Stream (p. 29), remembering their happy childhood. She has found online an outlet for her creative expression and is grateful for the friendships she has formed in cyberspace and all the good things in this life on earth. The book ends aptly with Prayers of Gratitude. Irina's work can be seen on her blog Irina's Poetry Corner <http://irinadim.com> Facebook <https://www.facebook.com/irina.dimitricstojic> Twitter <https://twitter.com/kookadim> Situated just 45min west of the Melbourne CBD, these three remarkable state and national parks offer some of the best gorge walking in Victoria. With its unique user-friendly layout and incorporated GPS data (for free downloading), Melbourne's Western Gorges will become an essential reference guide for all walkers. This full-colour, 96 page walking guide is produced in a handy A5 format. "Behind Photographs began as the personal quest of photographer Tim Mantoani to document and preserve noted photographers together with their images. "We have come to a point in history where we are losing both photographic recording mediums photographic recording mediums and iconic photographers," Mantoani comments. "While many people are familiar with iconic photographs, the general public has no idea of who created them. This book became a means to do that, the photographer and their photograph in one image."--Publisher's website, <https://www.channelphotographics.com/behindphotographs.php>, viewed February 6, 2012. This is the proceedings of the International Conference On Computational Vision and Bio Inspired Computing (ICCVBIC 2017) held at RVS Technical Campus, September 21-22, 2017. It includes papers on state of the art innovations in bio-inspired computing applications, where new algorithms and results are produced and described. Additionally, this volume addresses evolutionary computation paradigms, artificial neural networks and biocomputing. It focuses mainly on research based on visual interference on the basis of biological images. Computation of data sources also plays a major role in routine day-to-day life for the purposes such as video transmission, wireless applications, fingerprint recognition and processing, big data intelligence, automation, human centric recognition systems. With the advantage of processing bio-inspired computations, a variety of computational paradigms can be processed. Finally, this book also treats the formation of neural networks by enabling local connectivity within it with the aid of vision sensing elements. The work also provides potential directions for future research.
