Bring Your Vision to Life with Pattern-Drafting Essentials What's the number one mistake that knitters make? They follow a pattern exactly! In this comprehensive guide to sweater construction, acclaimed knitting instructor Sally Melville reveals the secrets to creating or modifying a pattern so the finished project looks and fits exactly how you want it to. Pattern drafting has never been easier to understand as Sally breaks down each skill, including how to • calculate your personal measurements, ease, and stitch patterns • create a pattern for an existing garment that you love • shape a variety of necklines, shoulders, sides, sleeves, and hemlines • combine garment elements for an endless array of design possibilities • rescue a project when it doesn't turn out as expected • finish your projects with a professional look • knit 10 original projects that showcase the elements covered in the book With Sally's knitting expertise at your fingertips, you have all the tools you need to adjust patterns to fit you better than ever and create patterns that finally make your dream designs a reality. Accessories patterns include purses, stockings, and wrist, gauntlet, and opera gloves. Software -- Software Engineering. Empirically, the book covers two areas: the morphosyntax of verbs and categories syncretic with the declarative complementizer in Slavic, together with a comparative look at the similar categories in Latvian (Baltic) and Basaá (Bantu). In the domain of verbs, the book investigates a curious instance of analytic vs. fusional realization of grammatical categories that we find in a semelfactive-iterative alternation in Czech and Polish, where a semelfactive verb stem such as in the Czech kop-n-ou-t 'give a kick' alternates with an iterative verb stem as in kop-a-t 'kick repeatedly'. The iterative -aj stem is morphologically less complex than the semelfactive stem formed with the -n-ou sequence, which is paradoxical given an analysis of iteratives as categories whose syn-sem representation is more complex than semelfactives. In the domain of complementizers, the book focuses on cross-categorical paradigms that include an unexpected morphological containment (in Russian), a degree of morphological complexity (in Latvian), and an ABA pattern of syncretic alignment (in Basaá), which we do not expect to find if syncretism is restricted to adjacent cells in a paradigm (cf. Bobaljik 2012). Analytically, the book focuses on the way the syntactic representations of these categories become realized as morphemes. In the general sense, then, this contribution belongs to a growing body of work that investigates the relation between syntactic structure and morphological form, understood as the amount of morphemes and their placement – in particular the prefix vs. suffix opposition. More specifically, however, the approach to lexicalization taken up in this book is informed by the results of research on syntax in the last quarter of a century, which show that syntactic representations are maximally fine-grained, the picture sometimes described as the "one feature per one syntactic head" dictum. Such a scenario has led to the situation where syntactic representations can be submorphemic, in the sense that a lexical item corresponds to more than one syntactic head, a strand of research that has become known as Nanosyntax. This book investigates the state-of-art methodology of Nanosyntax in resolving the selected empirical problems in the domain of Slavic verbs and declarative complementizers, the problems that all appear to boil down to the way syntactic representations become realized as morphemes. The book features 28 mesmerizing projects, ranging from baby blankets and lace shawls to sweaters and stuffed toys, and also includes tutorials for the minimal skills required for center-out knitting, such as special cast-ons, increases, and decreases. Throughout the book are enlightening explanations of the underlying math and the architecture of the flat and dimensional shapes. Clear instructions and beautiful photography and illustrations assure that knitters of all levels and inclinations--whether they are technique junkies or not--will want to have this book. Praise for Knitting From the Center Out: "Though he delivers almost thirty projects in this premiere volume, Yuhas is just warming up. We'll be hearing more from him: Someday we'll look back and say, this is the book that launched a thousand cone hats." --Vogue Knitting "It's not often I find myself wanting to knit a whole bunch of projects from the same book, but there are plenty of things here that would be fun to explore in the knitting and that I'd enjoy wearing and using as well. I'd knit all the toys for my daughter." --About.com "Odd. Even geeky. Yet there's no question that Portland-based revolutionary knitter Yuhas is onto something. His premise is simple: start knitting at the middle/center of the item, which he categorizes into five shapes: tubes, cones, circles, domes, and ruffles. What's so odd? His mathematical sidebars (on Fibonacci, for instance) and a few titles in his recommended reading: Michael S. Schneider's A Beginner's Guide to Constructing the Universe (1994), for one." --Booklist Starred Review "His passion for the topic is apparent, and adventurous knitters will appreciate the opportunity to learn something new here." --Library Journal "Clear instructions and beautiful photography ensure that knitters of all levels and inclinations--technique junkies or not--will want this book." --Modern Day Moms "We love the sorting hat . . . You can be the Gryffindor of your dreams. . . . He has figured out the science . . . and we can all benefit from that." --Knitcircus podcast "So I commend Yuhas for writing a 'revolutionary,' original book with lots of good new ideas that will give new and experienced knitters alike lots of challenges and pleasure. The book retails for about \$28, which comes out to \$1 per pattern; well worth the price. This is a Melanie Falick Book from STC Craft. I have to say, Melanie picked another winner with this one." --MyCentralJersey.com "The best part about this book was the section 'Tutorials.' Hey, if you are like me and get stuck on a pattern for days, it is nice to have step by step instructions + pictures." --Sweetly Made (Just for You) "I would everyone to check it out. I like this guy [author Daniel Yuhas]. I like his voice. I felt a kinship." --Knit Knit Cafe "The patterns are killer, lovely and unusual all in one. The Half-Moon Mittens, Heel-Up Socks and Tree of Life Afghan are must knits for me. The Leaf-Yoke Sweater is so spectacular that I show the pattern to every knitter that comes to my house saying, 'Let's knit this!'" --Knitty.com "I was sent an advanced copy of the book Knitting from the Center Out by Daniel Yuhas and can I just say Holy Wowza! (Yeah, sometimes being a craft blogger has its perks!) This book is pretty awesome." --Smashed Peas and Carrots blog "This book should be required reading, just to expand your own knitting repertoire.
