What if you could challenge your eleventh graders to come up with a design solution for developing, managing, and utilizing mineral resources? With this volume in the STEM Road Map Curriculum Series, you can! Mineral Resources outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated STEM disciplines. Like the other volumes in the series, this book is designed to meet the growing need to infuse real-world learning into K-12 classrooms. This interdisciplinary, three-lesson module uses project- and problem-based learning to help students develop an in-depth understanding of mineral resources by researching the utility and impact of particular mineral resources on society. Working in teams, students will locate quantitative and qualitative data on mineral resources and discern the reliability of the information, then use their data to write an opinion article and develop a website to convince readers of the effectiveness of a particular design solution for developing, managing, and utilizing mineral resources. To support this goal, students will do the following: Explain how mineral resources are located and used in various ways in society. Explain why mineral resources are important to society. Critically evaluate quantitative and qualitative data about mineral resources. Write an opinion article demonstrating their knowledge about competing design solutions for extracting mineral resources. The STEM Road Map Curriculum Series is anchored in the Next Generation Science Standards, the Common Core State Standards, and the Framework for 21st Century Learning. In-depth and flexible, Mineral Resources can be used as a whole unit or in part to meet the needs of districts, schools, and teachers who are charting a course toward an integrated STEM approach. SPECIAL QUESTIONS (FOR GRADE 11, THE AGE OF DEEPENING) The book series is all about education in human sexuality, based on the nourishment and cultivation of the natural gift of a person's character. The series is based on the premise that SEXUALITY EDUCATION is, basically, CHARACTER EDUCATION, which in turn is founded on human dignity and encompasses formation in moral standards and human conduct; hence, covering the key elements of "life and love, and everything in between". Comprising an introductory volume for parents and teachers; a volume for classroom use of teachers; a volume for parents; and eight volumes for Grades 5 to 12, respectively, this current volume is specifically addressed to Grade 6 pupils, about 17 to 18 year olds in their late adolescence. It talks about SPECIAL QUESTIONS: on issues concerning life; sex; marriage; and human identity. Since men and women have been gifted with intellect and will, one becomes highly capable of using well or abusing these powers for the good or damage of self and fellowmen. It is thus extremely important that students at this age have a deep appreciation of the issues confronting the modern world, especially in the realm of sexuality and the channels of its development. The book series is characterized by sound, perennial concepts and by teaching and learning tools geared towards the age group being addressed. In response to a congressional request, GAO provided information on the justification for the Office of Personnel Management (OPM) and Office of Management and Budget program to reduce the number of grade 11 thru 15 positions in the General Schedule and General Merit pay systems based on the findings of the Private Sector Survey on Cost Control (Grace Commission) and the Bureau of Labor Statistics. GAO found that the goals of the program are to: (1) reduce approximately 40,000 of these positions over a 4-year period beginning in fiscal year 1985; (2) save about \$1.7 billion; and (3) improve position management in the federal government. Based on the Grace Commission findings, OPM concluded that the federal government has 50 percent more of its work force at higher grades than does the private sector. However, GAO found that the data used by the Commission may not be representative of the private sector as a whole and failed to include information on the basis of its studies. OPM maintained that no more than 60 percent of the grade increases could be attributed to greater demand caused by increasingly technical and complex work. However, the Congressional Budget Office has reported that about two-thirds of the average grade increases seemed to relate to the changing character of government work. GAO has found that increased grade levels have been caused by: (1) hiring restrictions which have encouraged agencies to hire employees with specialized skills; (2) reductions in force; (3) contracting out for lower grade work; and (4) mission and program changes. Finally, GAO questioned OPM position accuracy surveys as indications that the federal government has a continuing overgrading problem and the use of Bureau of Labor Statistics data to show the occupational distribution of private sector employment. Therefore, while GAO agreed with the program's objective, it questioned the basis of the surveys used.
