In this myth-shattering study Isaiah Friedman provides a new perspective on events in the Middle East during World War I and its aftermath. He shows that British officials in Cairo mistakenly assumed that the Arabs would rebel against Turkey and welcome the British as deliverers. Sharif (later king) Hussein did rebel, but not for nationalistic motives as is generally presented in historiography. Early in the war he simultaneously negotiated with the British and the Turks but, after discovering that the Turks intended to assassinate him, finally sided with the British. There was no Arab Revolt in the Fertile Crescent. It was mainly the soldiers of Britain, the Commonwealth, and India that overthrew the Ottoman rule, not the Arabs. Both T.E. Lawrence ("Lawrence of Arabia") and Sir Mark Sykes hoped to revive the Arab nation and build a new Middle East. They courted disappointment: the Arabs resented the encroachment of European Powers and longed for the return of the Turks. Emir Feisal too became an exponent of Pan-Arabism and a proponent of the "United Syria" scheme. It was supported by the British Military Administration who wished thereby to eliminate the French from Syria. British officers were antagonistic to Zionism as well and were responsible for the anti-Jewish riots in Jerusalem in April 1920. During the twenties, unlike the Hussein family and their allies, the peasants (fellaheen), who constituted the majority of the Arab population in Palestine, were not inimical towards the Zionists. They maintained that "progress and prosperity lie in the path of brotherhood" between Arabs and Jews and regarded Jewish immigration and settlement to be beneficial to the country. Friedman argues that, if properly handled, the Arab-Zionist conflict was not inevitable. The responsibility lay in the hands of the British administration of Palestine. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Analyzes the personality and achievements of Curzon, viceroy of India under Queen Victoria

and later the foreign secretary under King George V, discussing his childhood, friendships and affairs, and political career. When Missouri became the twenty-fourth state in the Union in 1821, it was already heir to a rich and varied historical legacy. From 1673 until the Louisiana Purchase, Europeans of different nationalities, assisted by the Africans they brought with them, competed alternately with Indians and among themselves for control of the land. But while land and resources were the target of the struggle, the region's cultural identity was being determined by the mingling and clashing of diverse cultures -- Indian, French, African, Spanish, and Anglo-American. The story of the blending of those diverse cultures in a land rich in resources and beauty is an extraordinary tale. Especially appealing to many readers will be the attention Foley gives to common Missourians, to the status of women and Blacks, and to Indian-White relations. In this account, the pioneer hunters, trappers, and traders who roamed the Ozark hills and the boatmen who traded on the Missouri and Mississippi rivers take their places beside the small coterie of prominent St. Louisans whose wealth and influence enabled them to dominate the region politically and economically. - Back cover. Financial regulation has entered into a new era, as many foundational economic theories and policies supporting the existing infrastructure have been and are being questioned following the financial crisis. Goodhart et al's seminal monograph "Financial Regulation: Why, How and Where Now?" (Routledge:1998) took stock of the extent of financial innovation and the maturity of the financial services industry at that time, and mapped out a new regulatory roadmap. This book offers a timely exploration of the "Why, How and Where Now" of financial regulation in the aftermath of the crisis in order to map out the future trajectory of financial regulation in an age where financial stability is being emphasised as a key regulatory objective. The book is split into four sections: the objectives and regulatory landscape of financial regulation; the regulatory regime for investor protection; the regulatory regime for financial institutional safety and soundness; and macro-prudential regulation. The discussion ranges from theoretical and policy perspectives to comprehensive and critical consideration of financial regulation in the specifics. The focus of the book is on the substantive regulation of the UK and the EU, as critical examination is made of the unravelling and the future of financial regulation with comparative insights offered where relevant especially from the US. Running throughout the book is consideration of the relationship between financial regulation, financial stability and the responsibility of various actors in governance. This book offers an important contribution to continuing reflections on the role of financial

regulation, market discipline and corporate responsibility in the financial sector, and upon the roles of regulatory authorities, markets and firms in ensuring the financial health and security of all in the future. Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Before most Americans ever saw an actual daguerreotype, they encountered this visual form through written descriptions, published and rapidly reprinted in newspapers throughout the land. In *The Camera and the Press*, Marcy J. Dinius examines how the first written and published responses to the daguerreotype set the terms for how we now understand the representational accuracy and objectivity associated with the photograph, as well as the democratization of portraiture that photography enabled. Dinius's archival research ranges from essays in popular nineteenth-century periodicals to daguerreotypes of Americans, Liberians, slaves, and even fictional characters. Examples of these portraits are among the dozens of illustrations featured in the book. *The Camera and the Press* presents new dimensions of Nathaniel Hawthorne's *The House of the Seven Gables*, Herman Melville's *Pierre*, Harriet Beecher Stowe's *Uncle Tom's Cabin*, and Frederick Douglass's *The Heroic Slave*. Dinius shows how these authors strategically incorporated aspects of daguerreian representation to advance their aesthetic, political, and social agendas. By recognizing print and visual culture as one, Dinius redefines such terms as art, objectivity, sympathy, representation, race, and nationalism and their interrelations in nineteenth-century America.
