One of the most significant challenges facing the international community today is how to stabilize and rebuild societies emerging from civil wars, and this book, which includes both theoretical discussions and empirical applications, considers the various factors of peacebuilding. As it addresses several pertinent academic debates—relating to international interventions and local ownership, international and local conceptions of gender equality, and the legal aspects of peace implementation—this

account demonstrates how some postwar countries have made significant strides towards peace and democracy while others have experienced a return to war. A policy-relevant topic, *Building Peace, Creating Conflict?* will appeal to students and scholars of international relations and peace studies, as well as to practitioners involved in peacebuilding efforts in war-affected countries. Offering a series of case studies of recent media controversies, this collection draws on new perspectives in cultural studies to consider a wide variety of images. The book suggest how we might achieve a more subtle understanding of controversial images and negotiate the difficult terrain of the new media landscape. The *Mental Health-Substance Use* series provides clear guidance for professionals on this complex and increasingly recognised field. It concentrates on the concerns, dilemmas and concepts that impact on the life and well-being of affected individuals and those close to them, as well as the future direction of practice, education, research, services, intervention, and treatment. This final book in the series provides the basis of best practice for offering effective interventions to affected individuals and their families, exploring the effects of various substances, both controlled and proscribed, and the impact of substance use in schizophrenia. Therapeutic interventions such as Eye Movement Desensitisation and Reprocessing (EMDR) and dialectical behaviour therapy are discussed, as are relapse prevention and the specific needs of groups such as older people and young adults. Associated topics such as individuals within the criminal justice system, and brain injury (the symptoms of which often mimic mental health-substance use) complete this highly comprehensive guide. The volumes in this series are designed to challenge concepts and stimulate debate, exploring all aspects of the development in treatment, intervention and care response, and the adoption of research-led best practice. They are essential reading for mental health and substance use professionals, students and educators. This quarterly newsletter provides timely news and information about the plans and progress of the Energy Development in Island Nations U.S. Virgin Islands pilot project, including significant events and milestones, work undertaken by each of the five working groups, and EDIN-sponsored renewable energy and energy efficiency projects. *Draft Immigration and Nationality (Fees) (No. 2) Regulations [2010]* : Monday 1 November 2010 This book investigates the phenomenon of permanent campaigning in Greece over the last decade.

It explores the political communication strategies of three recent successive Greek prime ministers from 2012 until the early months of 2022 to deal with economic, migration and pandemic crises, from a permanent campaigning perspective. Moreover, it evaluates and measures, for the first time, their permanent campaign strategies using the proposed framework of Lilleker and Joathan (2020) and the three following indicators: capacity building and strategy, paid and owned media and earned media. The need for presidents to communicate with public opinion and their dependence on public support is anything but new. The difference in the case of the permanent campaign is that the campaign tools, methods, techniques and personnel follow the elected leader in office in order to back his constant efforts to retain or even increase public approval as well as advance their re-election prospects. This book aims to extend the research on the permanent campaigning in European parliamentary systems and will be of interest to political communication and campaigning students and researchers. "The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation, growing pressure on resources and the need for energy and national security become acute, and the resolution of special delimitation disputes seems likely to become a vital question in the 21st century. This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space, but will also look at related issues pertaining to the Seas and Antarctica. As well as considering the matters in public international law the book will also explore aspects of private international law that are central to the understanding of sovereignty and jurisdiction over territories. The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute. These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space - the province of all mankind begins, and contribute to the jurisprudence of territorial sovereignty and jurisdiction"-- Web Standards: Mastering HTML5, CSS3, and XML provides solutions to the most common web design problems, and gives you a deep understanding of web standards and how they can be implemented to improve your web sites. You will learn how to develop fully standards-compliant, mobile-friendly, and search engine-optimized web sites that are robust, fast, and easy to

update while providing excellent user experience and interoperability. The book covers all major web standards for markup, style sheets, web typography, web syndication, semantic annotations, and accessibility. This edition has been fully updated with the latest in web standards, including the finalized HTML5 vocabulary and the full list of CSS3 properties. *Web Standards: Mastering HTML5, CSS3, and XML* is also a comprehensive guide to current and future standards for the World Wide Web, demonstrating the implementation of new technologies to address the constantly growing user expectations. *Web Standards: Mastering HTML5, CSS3, and XML* presents step-by-step guides based on solid design principles and best practices, and shows the most common web development tools and web design frameworks. You will master HTML5 and its XML serialization, XHTML5, the new structuring and multimedia elements, the most important HTML5 APIs, and understand the standardization process of HTML 5.1, HTML 5.2, and future HTML5 versions. As a defining characteristic of what it means to be human, the use of language plays a central role in almost all human activity. Language functions as a cornerstone in the construction of our identity and in the relationships we build. It takes a central role in facilitating every enterprise we undertake, creates the thread which forms our own biographies, and enables us to play a part in the transmission and maintenance of our culture. This pervasive nature of language means that it may form the starting point for an investigation into virtually any aspect of social life. In recent years, this has led to a stretching of the boundaries of language studies, prompted by an intense cross-fertilisation of ideas with a wide range of disciplines. It is this cross-fertilisation which forms the focus of the present collection. Taken together, the thirteen papers it contains provide an absorbing, rich array of subjects touched by the centrality of language. Encompassing themes from social psychology, translation theory, computer science, forensics, educational policy, language change, archaeology, and literature, the collection demonstrates that the study of language offers limitless possibilities to aid an understanding of the world in which we live. International in scope, the collection includes contributions from scholars well-established in their fields, at work in Europe, the USA, the Middle East and Asia. As such, the collection offers a stimulating perspective for readers in a wide range of contexts, whether they themselves are principally concerned with

language or are simply eager to see how the study of language may be relevant to their own discipline. The world's first independent black republic, Haiti was forged in the fire of history's only successful slave revolution. Yet more than two hundred years later, the full promise of that revolution – a free country and a free people – remains unfulfilled. Home for more than a decade to one of the world's largest UN peacekeeping forces, Haiti's tumultuous political culture – buffeted by coups and armed political partisans – combined with economic inequality and environmental degradation to create immense difficulties even before the devastating 2010 earthquake killed tens of thousands of people. This grim tale, however, is not the whole story. In this moving and detailed history, Michael Deibert, who has spent two decades reporting on Haiti, chronicles the heroic struggles of Haitians to build their longed-for country in the face of overwhelming odds. Based on hundreds of interviews with Haitian political leaders, international diplomats, peasant advocates and gang leaders, as well as ordinary Haitians, Deibert's book provides a vivid, complex and challenging analysis of Haiti's recent history. This 8-hour free course demonstrated how to use visual representation to interpret the daily bombardment of information to which we're all subjected. This volume examines dynamics of legal pluralism and explores the varied ways in which constellations of legal pluralism play out in social life. It aims to bridge the social and theoretical space between small-scale case studies and abstract generalisation. The introduction provides an overview of developments in the field of legal pluralism and offers an analytical perspective on the dynamics of the maintenance of and change in constellations of legal pluralism. Contributions examine situations in which the state is seen as remote from local settings and others in which local populations are actively engaged in widening the scope and validity of state law. By focusing on historical developments and the fault-lines of rapid political change in both post-socialist and post-authoritarian states, the volume shows that legal legacies of the past continue to have an impact. Authors look at the social significance of the various, and sometimes competing, types of law which religious and secular transnational actors introduce into local settings. Concerns over vanishing destinations such as the Great Barrier Reef, Antarctica, and the ice cap on Mt. Kilimanjaro have prompted some travel operators and tour agencies to recommend these destinations to consumers before they disappear.

This travel trend has been reported as: 'disappearing tourism,' 'doom tourism,' and most commonly 'last chance tourism' where tourists explicitly seek vanishing landscapes or seascapes, and/or disappearing natural and/or social heritage. However, despite this increasing form of travel there has been little examination in the academic literature of last chance tourism phenomenon. This is the first book to empirically examine and evaluate this contemporary tourism development providing a new angle on the effects of global change and pressures of visitation on tourism destinations. It aims to develop the conceptual definition of last chance tourism, examine the ethics surrounding this type of travel, and provide case studies highlighting this form of tourism in different regions, and in different contexts. In particular it critically reviews the advantages of publicizing vulnerable destinations to raise awareness and promote conservation efforts. Conversely, the book draws attention to the issue of attracting more tourists seeking to undergo such experiences before they are gone forever, accelerating the negative impacts. It further examines current trends, discusses escalating challenges, provides management strategies, and highlights future research opportunities. Last Chance Tourism is a timely and multi-disciplinary volume featuring contributions from leading scholars in the fields of leisure, tourism, anthropology, geography, and sociology. It draws on a range of international case studies and will be of interest to students, researchers and academics interested in Tourism, Environmental Studies and Development Studies. A comprehensive overview of the theory, principles and practice of whole-child education traces its origins and development in Europe while discussing its practice and potential in a variety of settings. Original. A Monetary Hope for Europe. This book studies the euro in a global perspective and opens a new series edited by the Jean Monnet European Centre of Excellence of the University of Florence, Verso l'unificazione europea. Most of the chapters have been written by economists who met and discussed their diverse views at a multi-disciplinary conference organized by the Centre in May 2013 under the title The euro and the struggle for the creation of a new global currency: Problems and perspectives in the building of the political, financial and economic foundations of the European federal government. The list of contributors also includes historians as well as European and international law academics. Their essays have been revised on the basis and against the

backdrop of an ongoing crisis of both the euro and the whole European project in the last years and months. The volume aims to provide useful data and interpretations to improve knowledge on the euro and the European Union in their economic, historical, juridical and political perspectives. -- In recent decades, the taking of hostages has proven to be a particularly effective tactic for Islamic terrorist organizations worldwide, including al Qaeda. The global jihad movement regards citizens of foreign (mainly western) countries as prime targets for abduction, although in fact local residents have constituted the majority of kidnapping victims. This book analyzes Islamic terror abductions over the last 30 years in the Middle East (Lebanon, Syria, Iraq, Iran, Yemen, and Saudi Arabia), Asia (Afghanistan, Pakistan, India, and the Philippines), Africa (the Maghreb, the Sahel regions, and Somalia), and in Russia as a part of the Russian-Chechen conflict. Discussion also focuses on the abduction by Hizballah of Israeli soldiers, the Second Lebanon War of 2006, the Mumbai terror attack (2008), the Chechen hostage crisis in Moscow and Beslan (2002 and 2004), the kidnapping of employees of the Algerian In Amenas gas facility by al Qaeda of the Maghreb' in January 2013 and the Nairobi "Westgate Mall" hostage crisis in September 2013. The role of Iran as a state sponsor of terrorism, and its patronage of terror organizations that utilize the tactic of abduction to promote Iranian interests in Lebanon and Iraq, is highlighted throughout. Discussion focuses on the challenges faced by countries whose citizens have been abducted by Islamic terror organizations and their reactions to these challenges, and provides theoretical classifications of the phenomenon of terrorism in general and terror abduction in particular. The April 2021 edition of the Fiscal Monitor focuses on tailoring fiscal responses to the COVID-19 pandemic and adopting policies to reduce inequality and gaps. Though often associated with foreigners and refugees, many Somalis have lived in Kenya for generations, in many cases since long before the founding of the country. Despite their long residency, foreign and state officials and Kenyan citizens often perceive the Somali population to be a dangerous and alien presence in the country, and charges of civil and human rights abuses have mounted against them in recent years. In *We Do Not Have Borders*, Keren Weitzberg examines the historical factors that led to this state of affairs. In the process, she challenges many of the most fundamental analytical categories, such as "tribe," "race," and

“nation,” that have traditionally shaped African historiography. Her interest in the ways in which Somali representations of the past and the present inform one another places her research at the intersection of the disciplines of history, political science, and anthropology. Given tragic events in Kenya and the controversy surrounding al-Shabaab, We Do Not Have Borders has enormous historical and contemporary significance, and provides unique inroads into debates over globalization, African sovereignty, the resurgence of religion, and the multiple meanings of being African. Chapter 1 argues that fiscal policies are at the forefront of responding to the COVID-19 pandemic. Fiscal measures can save lives, protect the most-affected people and firms from the economic impact of the pandemic, and prevent the health crisis from turning into a deep long-lasting slump. A key priority is to fully accommodate spending on health and emergency services. Global coordination is for a universally low-cost vaccine and to support countries with limited health capacity. Large, temporary and targeted support is urgently needed for affected workers and firms until the emergency abates. As the shutdowns end, broad-based, coordinated fiscal stimulus—where financing conditions permit—will become more effective in fostering the recovery. Chapter 2 argues that fiscal policies are at the forefront of facilitating an economic recovery from the COVID-19 pandemic once the Great Lockdown ends. Policymakers can achieve this objective with IDEAS: Invest for the future—in health systems, infrastructure, low carbon technologies, education, and research; adopt well-planned Discretionary policies that can be deployed quickly; and Enhance Automatic Stabilizers, which are built-in budgetary tax and spending measures that automatically stabilize incomes and consumption. Importantly, improving unemployment benefit systems and social safety nets can protect household incomes from adverse shocks and strengthen resilience against future epidemics. Over the past decade, state-owned enterprises (SOEs) have doubled in importance among the world’s largest corporations. They often deliver basic services such as water, electricity, and loans for families and small businesses. At their best, they can help promote higher economic growth and achieve development goals. However, many are a burden to taxpayers and the economy. Chapter 3 discusses what governments can do to get the most out of SOEs. This includes ensuring the firm’s managers have the right incentives and there is effective oversight. It

also requires a high degree of transparency of their activities. This unique book investigates the complex transformation of Turkey's foreign policy, focusing on changing threat perceptions and the reformulation of its Western identity. This transformation cannot be explained solely in terms of strategic choices or agency driven policies but encompasses power shifts and systemic transformations. Is Turkey shifting its axis? Will this affect its traditional Western-oriented foreign policy? The book begins by discussing the relationship between security and globalization, using examples of Turkey's regional positioning. It then focuses on to what extent the 'traditional' discourse on security in Turkish politics, which prevailed during the Cold War era and beyond, has undergone a change in the new era. This timely book is a much needed account of how pragmatism rather than ideology is the main determinant in Turkey's current foreign policy and should be read by all looking for a fresh and stimulating take on Turkey's response to globalization and the internationalization of security in the 21st Century. This book explores the politics of conservative Christian churches and social movements in Russia and the United States, focusing on their similar concerns but very different modes of political engagement. Whilst secularisation continues to chip away at religious adherence and practice in Europe, religion is often, quite rightly, seen as an influential force in the politics of the United States, and, more questionably, as a significant influence in contemporary Russia. This book looks at the broad social movement making up the US Christian Right and the profoundly hierarchical leadership of the Russian Orthodox Church as socially conservative actors, and some of the ways they have engaged in contemporary politics. Both are seeking to halt the perceived drift towards a more secular political order; both face significant challenges in handling the consequences of secularism, pluralism and liberal individualism; and both believe that their nations can only be great if they remain true to their religious heritage. In exploring their experience, the book focuses on shared and different elements in their diagnosis of what is wrong with their societies and how this affects their policy intervention over issues such as religious and ethnic belonging, sexual orientation and education. Drawing on political, sociological and religious studies, this work will be a useful reference for students and scholars of religion and politics, Russian politics and American politics. International Commercial Arbitration is an

authoritative 4,250 page treatise, in three volumes, providing the most comprehensive commentary and analysis, on all aspects of the international commercial arbitration process that is available. Shinners, dissos, and dissenters is a long-term analysis of the development of Irish republican media activism since 1998 and the tumultuous years that followed the end of the Troubles. It is the first in-depth analysis of the newspapers, magazines and online spaces in which strands of Irish republicanism developed and were articulated in a period in which schism and dissent underscored a return to violence for dissidents. Based on an analysis of Irish republican media outlets as well as interviews with the key activists that produced them, this book provides a compelling snapshot of a political ideology in transition as it is moulded by the forces of the Peace Process and often violent internal ideological schism that threatened a return to the 'bad old days' of the Troubles. The 1960s is one of the most heavily mythologised decades of the twentieth century. More than 50 years on, the era continues to capture the public's imagination. *The 1960s in Australia: People, Power and Politics* recognises the complexity of social and cultural change by presenting a broad range of contributions that acknowledge an often overlooked fact - that not everyone experienced the 1960s in the same way. The diversity of the time is confirmed by contributions from a number of expert Australian historians who each provide an insight into Australia in the 1960s, offering an understanding of the social realities of this period as well as the ebbs and flows of transnational influence. This collection includes a featured contribution by prominent Australian historian, Raymond Evans, who provides a personal insight into the 1960s. Other contributors also place 'the lived experience' at the centre of their analysis by considering the growth of modern flats, the impact of cosmopolitanism, and sex and sexuality in the 'Sixties'. The book also highlights the way power was deployed and deconstructed during this era by considering the psychiatric profession, the agenda of the counter-culture, and the role that women's magazines played in reinforcing dominant gender paradigms. The

complex politics of the era are also explored through the transnational impact of figures such as Anthony Crosland, the impact of the Vietnam War, and the multiplicity of motivations behind the anti-war protest and the Aboriginal rights movement of the era. *The 1960s in Australia: Power, People and Politics* is a fresh focus on a significant time in Australia's history. It brings together a collection of innovative and engaging explorations into the Australian 'Sixties', which underline the complexity of the time. This book presents the views of accounting educators, accounting education policy-makers, and accounting practitioners from across the world on the challenging topic of liberalising the accounting curriculum within university education. Accounting is a relatively new subject within universities and has been absorbed into a high level of education without any real attempt to do so within the traditional ethos of a liberal arts education. In this book, the logic of teaching using the liberal arts is described and contrasted with the practical vocational training approach of teaching which has formed the foundation of accountancy courses for many years. A proposal to change this established practice, by integrating the liberal arts into the university accounting curriculum, is followed by a series of short chapters which address the relevance, validity and worthiness of the proposed approach. Comments and counter-arguments are then discussed before further chapters illustrate how the proposed change may be achieved in a variety of different contexts - ranging from that of the global financial crisis (which began in 2008) to the inclusion of ethics and sustainability within the accounting curriculum. This book will aid those teaching accounting in universities to improve the design of their accounting degree programmes by moving away from an excessive emphasis on technical skills towards a broader consideration of a liberal contextualisation of the accounting curriculum. This book was originally published as a special issue of *Accounting Education: an international journal*. This book presents a selection of recent research on the events and developments of 1989 in Eastern Europe. It offers a mix of detailed examinations of the events of 1989 in Eastern Europe, thoughtful and considered appraisals of developments, and 'middle-range' theoretical discussions of patterns of cause and effect. The authors range in their approaches from detailed examinations of government and ruling-party papers from the archives, some of it originally labelled top secret, to personal observations and oral history based on interviews with

participants, to analysis of survey data and official statistics. In their chosen focus the essays range from explorations of the emerging crisis in the communist regimes that led to the events of 1989, reflections and insights into the events and changing mood during 1989 itself, and examinations of some of the consequences and legacies of 1989. This book was published as a special issue of *Europe-Asia Studies*. The passing of the *The Waitākere Ranges Heritage Act* in 2008 represents a milestone in the life of the *Waitākere Ranges Protection Society*. Wayne Thompson documents the story behind the legislation coming into force. Read about the people, the politics and the passion! This book comprises of a range of case studies of military strategy, based on UN documents, observing and concluding the effectiveness of each individual case. Edstrom and Gyllensporre analyse the UN's military strategy, its consequences and its potential to fulfil political ambitions. In this concise and fascinating book, Fawaz A. Gerges argues that Al-Qaeda has degenerated into a fractured, marginal body kept alive largely by the self-serving anti-terrorist bureaucracy it helped to spawn. In *The Rise and Fall of Al-Qaeda*, Gerges, a public intellectual known widely for his expertise on radical ideologies, including jihadism, argues that the Western powers have become mired in a "terrorism narrative," stemming from the mistaken belief that America is in danger of a devastating attack by a crippled al-Qaeda. To explain why al-Qaeda is no longer a threat, he provides a briskly written history of the organization, showing its emergence from the disintegrating local jihadist movements of the mid-1990s—not just the Afghan resistance of the 1980s, as many believe—in "a desperate effort to rescue a sinking ship by altering its course." During this period, Gerges interviewed many jihadis, gaining a first-hand view of the movement that bin Laden tried to reshape by internationalizing it. Gerges reveals that transnational jihad has attracted but a small minority within the Arab world and possesses no viable social and popular base. Furthermore, he shows that the attacks of September 11, 2001, were a major miscalculation—no "river" of fighters flooded from Arab countries to defend al-Qaeda in Afghanistan, as bin Laden expected. The democratic revolutions that swept the Middle East in early 2011 show that al-Qaeda today is a non-entity which exercises no influence over Arabs' political life. Gerges shows that there is a link between the new phenomenon of homegrown extremism in Western societies and the war on terror, particularly in Afghanistan-Pakistan, and

that homegrown terror exposes the structural weakness, not strength, of bin Laden's al-Qaeda. Gerges concludes that the movement has splintered into feuding factions, neutralizing itself more effectively than any Predator drone. Forceful, incisive, and written with extensive inside knowledge, this book will alter the debate on global terrorism.
