Teacher education is experiencing a period of dramatic and arguably irrevocable change within a wider context of turbulence in the

English education system. With contributions from a range of teacher educators and academics in the field, *Teacher Education in Challenging Times* presents sustainable, robust, and informed responses to the challenges posed by the current unrest in the education sector. This book considers the nature of teacher professionalism, the nurturing of truly collaborative partnerships between universities, schools and other agencies, and developments in practice with tangible impact for children and young people. Drawing on important research and illustrations of policy and practice from England and other countries, chapters present a series of counter-cultural ideas, principles and practices that respond to pressing challenges facing educators in a range of contexts. Positive and forward-looking, this book offers a robust defence of the present need for high-quality teacher education in challenging times. This book is a timely contribution to an international debate about the future of teacher educators and should be of key interest to academics, researchers and postgraduate students in the fields of teacher education, philosophy and sociology of education, policy and politics of education, and pedagogy. It will also appeal to a range of practitioners, including trainers, local authority officers, professional groups, educational service providers, and educational and school improvement consultants.

*School Science Practical Work in Africa* presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching

and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.
