Everything Worthy of Observation Dec 08 2021 Offers a firsthand account into early-nineteenth-century New York State and Lower Canada during a time of enormous growth and change. In the pre-dawn of August 2, 1826, Alexander Stewart Scott stepped aboard the steamboat Chambly in Quebec City, Canada. He was beginning a journey that not only took him across New York State but also ultimately changed his view of America and her people. A keen observer, the twenty-one-year-old meticulously recorded his travel experiences, observations about the people he encountered, impressions of things he saw, and reactions to events he witnessed. This firsthand account immerses the reader in the world of early-nineteenth-century life in both New York and Lower Canada. Whether enduring the choking dust raised by a stagecoach, the frustration and delays caused by bad roads, or the wonders and occasional dangers of packet boat travel on the newly completed Erie Canal, all are vividly brought to life by Scott's pen. This journal also offers a unique blend of travel and domestic insights. With close family members living in both St. John's, Quebec, Canada, and Palmyra, New York, his travels were supplemented by long stays in these communities, offering readers comparative glimpses into the daily lives and activities in both countries. Gregarious, funny, and inquisitive, Scott missed nothing of what he thought worthy of observation. "Everything Worthy of Observation charts the lively trip of Alexander Stewart Scott across New York State in 1826. From drinking the waters at Saratoga Springs to getting completely drenched by the spray at Niagara Falls. Scott's fascinating diary is contextualized and expertly explained by Paul G. Schneider Jr. making the reader want to visit these places in order to compare Scott's observations." — Jennifer A. Lemak, coauthor of *An Irrepressible Conflict: The Empire State in the Civil War* "Everything

Worthy of Observation is a delight to read. Not only does one see State landmarks such as Niagara Falls through fresh eyes (a neatly foiled snake attack at the Falls is recounted) but one almost feels the dust of stage coach travel. The hazards of canal travel are made clear—the large number of low bridges on the Erie Canal required that canal boat passengers ‘lie down flat on the Deck ... or get down below’ to avoid receiving severe blows and getting knocked down. No doubt the pleasure of reading this book is greatly enhanced by the scholarship of Paul G. Schneider Jr. His extensive research is evident in the wonderful notes he provides that furnish context for the reader. I highly recommend this book.” — Margaret Lynch-Brennan, author of *The Irish Bridget: Irish Immigrant Women in Domestic Service in America, 1840–1930* “Carefully transcribed and meticulously edited, the travel journal of Canadian Alexander Stewart Scott provides a close-up view of life in upstate New York in 1826. A cultivated devotee of the theater and of books and reading, Scott records many details during his canal and lake voyage. He describes meeting many interesting people during his travel, which included transportation not only on canal boats but also by stagecoach and steamboat. Scott has left us with a fascinating depiction of New York State during a significant period in its history.” — Paul R. Huey, Retired Senior Scientist (Archaeology), New York State Office of Parks, Recreation & Historic Preservation

Nature Observation Journal for Kids Jul 27 2023 How awesome would it be for children to have some fun away from television, electronic games and tablets, and to learn to appreciate moments of calm in contact with nature? With this "draw and write journal" we invite you to spend family time in contact with nature, even if you live in a city. You do not need lots of materials, or to go to a forest to offer your child a positive experience with nature. You just need pen or pencil and a few minutes playing in the grass, hunting insects, watching the growth of plants or the routine of animals.. very simple things can provide your children with a super positive experience. The Nature Observation Journal along with an adult's guidance can: - make your child value and appreciate the land, air, sun and water, - help children learn about the life cycle, - develop a sense of responsibility, patience and reflection, - and help our emotional balance, since the human being has in essence the need for contact with nature, which is often limited by our lifestyle. We live in a world that can no longer ignore the importance of taking care of the environment, and when we learn to appreciate nature from a young age, we can develop a beautiful relationship with the world around us. With this journal you will record your child's nature observations (which could be as short as 1-2 lines) and will encourage him/her to draw what he/she saw, or represent how he/she felt while in contact with nature. Your written entries and the child drawings can be quite simple, and yet children will learn through them and further develop their fine motor skills. So, how about finding some time to go out with your kids connect with nature, and de-stress a little? Your passport for "calm activities" and wonderful memories exploring the nature is right here!

Notebook May 21 2020 College Ruled Color Paperback. Size: 6 inches x 9 inches. 55 sheets (110 pages for writing). Observation Of Changes In The Universe. 157508799834

This is your perfect choice for documenting notes, deep ideas, organizing thoughts or even creating new perspectives.

Astronomy Observation Log Book Nov 26 2020 A star-filled sky is as mysterious as it is sublime. What are we looking at? How far away and from when?! How do I tell the Little Dipper from the Big Dipper? Is that Cassiopeia or Orion? Is the moon waxing or waning? Whether you're an occasional backyard stargazer or would-be astrophysicist, you'll find pages of useful information in the Observer's Notebook: Astronomy. Features: · Measures 8.5x11 inches A4 size, (21.6 cm x 27.9 cm) · Notebook with proper guided Paper , 100 pages · Paperback. Soft cover design. Matte · White interior pages

Pumpkin Jack Sep 24 2020 The first pumpkin Tim ever carved was fierce and funny, and he named it Jack. When Halloween was over and the pumpkin was beginning to rot, Tim set it out in the garden and throughout the weeks he watched it change. By spring, a plant began to grow! Will Hubbell's gentle story and beautifully detailed illustrations give an intimate look at the cycle of life.

School-Based Observation Jan 29 2021 Widely used to assess social-emotional and behavioral referral concerns in grades PreK-12, systematic direct observation is an essential skill for school psychologists and other educators. This accessible book helps practitioners conduct reliable, accurate observations using the best available tools. Chapters present effective coding systems for assessing student classroom behavior, the classroom environment, behavior in non-classroom settings, and behavior in a functional assessment context; also provided are guidelines for developing new codes when an appropriate one does not already exist. Procedures for summarizing, graphing, and interpreting data for different assessment purposes are detailed. In a large-size format with lay-flat binding for easy photocopying, the book includes 13 reproducible coding forms. Purchasers get access to a Web page where they can download and print the reproducible materials. This book is in The Guilford Practical Intervention in the Schools Series, edited by T. Chris Riley-Tillman.

Participant Observation Aug 24 2020 While providing an introduction to basic principles and strategies, Participant Observation also explores the philosophy and methodology underlying the actual practice of participant observation. Taking a thoroughly practical approach to the methods of participant observation, Danny L. Jorgensen illustrates these methods with both classic and current research studies. By using the materials in this book, the reader can begin conducting participant observation research on their own.
