OECD Rural Policy Reviews, Italy 2009 Feb 14 2023 OECD's comprehensive review of rural policy in Italy.

I fondi europei nazionali e regionali per l'agricoltura e l'agroalimentare Jul 27 2021 L'opera fornisce un compendio sistematico delle agevolazioni previste, a livello europeo, nazionale e regionale, per il settore agricolo ed agroalimentare. Il lavoro è rivolto sia a coloro che già operano nel settore e vogliono approfondire strumenti e misure disponibili, sia a coloro che intendono intraprendere una nuova attività imprenditoriale. La prima parte del libro è dedicata all'approfondimento dei soggetti che operano nel settore primario e al contesto strategico europeo in cui si collocano la politica agricola comune, lo sviluppo rurale, i partenariati europei dell'innovazione e agli altri programmi preordinati dall'Unione Europea per la ricerca e l'innovazione tecnologica, in ambito agricolo ed agroalimentare. La seconda parte sintetizza i molteplici strumenti legislativi specifici esistenti a livello nazionale gestiti dal MIAPAAF e dall'Ismea, nonché gli altri strumenti agevolativi utilizzabili dalle imprese. La terza parte affronta l'attuazione dei piani di sviluppo rurale nelle singole regioni e province autonome, analizzando in maniera trasversale le principali misure specifiche per l'imprenditoria giovanile, l'agricoltura sociale, la ricerca e la sperimentazione.

Economic and Social History of the World War (Italian Series) May 17 2023

The Reasons for Underdevelopment Sep 09 2022 The history of Italian colonial affairs has recently attracted renewed interest from historians and economists. It is a complex and involved question. Over the last few years, though perhaps slightly later than the more mature historiography of other European countries, the work of some important scholars has opened up new fields of investigation and research. Recent studies have tried to analyse in greater depth the working mechanisms of the colonial system, broadening the field of investigation also to the perspective of African countries and the political-economic equilibriums of the second half of the 20th century. This study fits into this area of research and analyses crucial aspects of the decolonisation of Somalia, the history of the presence of Italian banking in Somaliland; relations between Italian and Somali institutions; Italian political-monetary policies during the reconstruction and the first economic boom.

Leading the Economic Risorgimento Jan 01 2022 Lombardy, with about 10 million inhabitants, is today the most populated and prosperous region of Italy, and Milan is a renowned capital of art, fashion and design. During the 19th century until WWI, the region gradually became the leader in Italy's economic development and distinguished itself in the European economic landscape for its long-standing industrial strength and diversified economy, which included one of the Europe's

most productive agricultural systems. It was the economic locomotive of contemporary Italy, contributing to the economic Risorgimento that complemented the country's political resurgence. The present volume gathers the contributions of some major experts on the subject, providing an in-depth analysis of Lombardy's pattern of development, consisting of an exceptionally symbiotic and balanced interplay of sectors (agriculture, industry, trade, and banking) in a gradual yet steady growth process, also supported by progress in the education system. During the century, there was a shift away from an economy based on agriculture and commerce to a progressively more industrial economy and this process accelerated from the 1880s. The secret of this dynamic balance was Lombardy's active relationship with the rest of Europe and with the international markets. Aimed at scholars, researchers and students in the fields of early modern and modern history, economic and social history, the book provides a clear explanation of Lombardy's economic development during the long 19th Century.

Schiavitù e servaggio nell'economia europea. Secc. XI-XVIII = Serfdom and Slavery in the European Economy Nov 18 2020 Il volume esamina i rapporti di lavoro non contrattuali (schiavitù e servaggio) che a lungo contraddistinsero l'economia europea, sia pure con andamenti assai diversi nelle differenti aree. I saggi in esso contenuti esaminano la evoluzione del servaggio (visto come il lato economico del regime signorile) e delle diverse forme di sottomissione personale, fino alla vera e propria tratta degli schiavi, di cui i mercanti europei furono protagonisti, mettendo in luce una situazione assai più complessa e articolata di quanto gli schemi interpretativi tradizionali lasciassero intuire.

I contadini e l'arte dell'agricoltura Jun 13 2020 I contadini e l'arte dell'agricoltura si concentra sulla struttura e le logiche di funzionamento delle aziende contadine, e sulle relazioni, storicamente variabili, che governano i processi lavorativi e produttivi delle stesse. Jan Douwe van der Ploeg sostiene che l'agricoltura contadina svolge un ruolo fondamentale a garanzia della produzione alimentare, attraverso sistemi sostenibili che risultano in equilibrio con la natura. Tuttavia, i contadini oggi, come in passato, sono materialmente abbandonati. Basato sul lavoro pionieristico dello studioso russo Aleksandr Vasil'evich Chayanov (1888-1937), questo libro affronta il tema di questo abbandono e mostra quanto siano invece importanti i contadini nelle lotte contemporanee per il cibo, la

sostenibilità ecologica e la sovranità alimentare.

Marine Coastal Eutrophication Sep 16 2020 Eutrophication in the transitional marine coastal waters has increased dramatically in many parts of the world, and this evolution has shifted attention to the anthropogenic factor. The problem has become the theme of many conferences and workshops, as well as being given priority in international organizations. This volume has been brought about by the desire to assess both our scientific understanding as well as the means and technologies available to combat the problem of marine coastal eutrophication. It discusses the results of research and surveillance programmes carried out in the last decades, confronting these results with experience gained elsewhere, and reviewing current proposals of what can be done about the problem. This volume will be invaluable to environmental scientists and marine ecologists, as well as to those who wish to resolve the many large-scale environmental problems, specifically marine eutrophication and marine pollution in general.

Minerals in the Economy of Montana Oct 30 2021

Non-Slave Labour in the Greco-Roman World Dec 20 2020 In Greco-Roman society the typical labourer was a peasant, not a slave. Yet, while specialized studies of ancient slavery abound, the subject of free labour, its incidence, status and economic significance, has received little attention. This volume of essays provides a summary of the available evidence for non-slave labour in antiquity and a bibliographical guide, but in addition advances novel interpretations concerning, for example, the composition of the 'labouring class', the relation between slave and peasant systems of production, and the importance of free dependent labour in the Western Roman provinces.

La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità.

Ediz. Italiana E Inglese Feb 02 2022 This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners,

in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.

The Custodians of Biodiversity Jun 25 2021 Agricultural biodiversity is a precious legacy which we have a moral duty to pass on intact to future generations. As farming systems modernise, these crucial resources risk being lost, unless effective conservation measures are put in place and sufficient recognition is given to the role of the farmer in food security and agricultural development. This publication contains a number of black and white photographs by Pablo Balbontán Arenas, which give an insight into the life and customs of small farmers who foster, maintain and use genetic diversity in traditional agricultural systems, deploying local techniques and knowledge accumulated over many centuries, focusing on four crops: wheat, rice, maize and potato. The accompanying text is written in English, Spanish and Italian.

Design, implementation and management of naturalistic Permanent Polycyclic Tree farms Mar 23 2021 Before this handbook there were only a few technical or scientific articles, made during the previous 10 years. This new book contains, in a single logical path, all the activities necessary to design the naturalistic Permanent Polycyclic Tree farms. Two chapters touch upon establishment and management of wood plantation, while three chapters outline the environmental and economic impacts of naturalistic Permanent Polycyclic Tree farms. The handbook, edited by

AALSEA and Compagnia delle Foreste within the project LIFE + InBioWood (LIFE12 ENV/IT/000153), is now available in a digital version for free download from the website www.inbiowood.eu. This book, called "Design, implementation and management of naturalistic Permanent Polycyclic Tree farms", describes a "new way" to produce wood outside forest, through some innovative naturalistic and agronomic criteria developed to overcome some of the main limitations of traditional tree farms.
