Enhancing the Postdoctoral Experience for Scientists and Engineers Sep 20 2020 The concept of postdoctoral training came to science and engineering about a century ago. Since the 1960s, the performance of research in the United States has increasingly relied on these recent PhDs who work on a full-time, but on a temporary basis, to gain additional research experience in preparation for a professional research career. Such experiences are increasingly seen as central to careers in research, but for many, the postdoctoral experience falls short of expectations. Some postdocs indicate that they have not received the recognition, standing or compensation that is commensurate with their experience and skills. Is this the case? If so, how can the postdoctoral experience be enhanced for the over 40,000 individuals who hold these positions at university, government, and industry laboratories? This new book offers its assessment of the postdoctoral experience and provides principles, action points, and recommendations for enhancing that experience.

Lab Dynamics Mar 27 2021 "Lab Dynamics is a book about the challenges to doing science and dealing with the individuals involved, including oneself. The authors, a scientist and a psychotherapist, draw on principles of group and behavioral

psychology but speak to scientists in their own language about their own experiences. They offer in-depth, practical advice, real-life examples, and exercises tailored to scientific and technical workplaces on topics as diverse as conflict resolution, negotiation, dealing with supervision, working with competing peers, and making the transition from academia to industry." "This is a uniquely valuable contribution to the scientific literature, on a subject of direct importance to lab heads, postdocs, and students. It is also required reading for senior staff concerned about improving efficiency and effectiveness in academic and industrial research."--BOOK JACKET

As in the previous editions, the coverage is given in capsule form to give the reader a basic understanding of the topic. References to more specific literature are also provided with each entry.

Why You Say It Jan 25 2021 Why You BY WEBB B. GARRISON Illustrated by Henry R. Martin ABINGDON PRESS NEW YORK NASHVILLE To BRUCE and BEATRICE BLACKMAR GOULD Connoisseurs of Words Foreword Words and phrases are like persons. Some are dull and stodgy, while others are very good company indeed. It is from the ranks of the latter group that the words in this volume have been selected. Interest is the standard which determined whether or not a particular word or phrase should be included. Dedicated though it is to the general reader, it may be used with confidence by persons with special interests. In general, word-histories are developed along lines of standard scholarship. There are a few exceptions accounts based upon tradition. These stories, included because of their interest, are clearly indicated as based upon popular accounts. Much of the material included in this collection was originally published in the popular magazines which are listed on the acknowledgments page. Final research was done in the Joint University Library,

Nashville, Tennessee. Many courtesies were extended by Dr. A. F. Kuhlman, director, and Mrs. Paul L. Wayman, circulation librarian. A Ladies Home Journal reader first suggested that this material should be published in book form. Coming as it did from a reader in the Transvaal, Africa, the suggestion carried much weight though it was not acted upon for some months. Unfortunately, that readers letter has been lost, so it is impossible to give due credit by name. WEBB B. GARJEUSON 7 Acknowledgments

Much of the material in this volume was originally published as short features in general and specialized magazines. Special thanks are due editors and publishers of these magazines, both forencouragement in research and for permission to reprint numerous items. Publishers involved, and magazines in which the material was originally published, are listed below

A New Hasidism: Roots Jul 19 2020 Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.
