Used by government agencies and by private corporations to solicit proposals from contractors and vendors, the RFP document is the foundation for a successful project. A clearly written and properly organized RFP clarifies technical goals, communicates administrative and financial expectations, and sets the tone for good communication and a trusting and productive relationship between customer and contractor. This book is

a completely new edition of Fresh Seafood-The Commercial Buyer's Guide, which was first published in 1984. There have been many changes in both product and the seafood business in the intervening years. About 70 percent of the material in this book is new, a tribute to the rapid pace of change throughout the industry. The subject of this book is fresh seafood. "Fresh" is defined as product handled under refrigeration (mechanical or ice) from harvester to consumer. This excludes frozen product, canned product and other shelf-stable packaging. Frozen seafoods are covered in the companion volume, The New Frozen Seafood Handbook. Many products are, of course, handled in both refrigerated and frozen forms. There may be substantial differences, not just in how they are handled, but in how they are processed, graded and packed. Frozen seafoods are often treated and traded as commodities, with standard descriptions. Marketing and distributing fresh fish and shellfish, which has to be eaten within days of harvest, is necessarily more personal and direct. The contest between refrigerated and frozen seafoods has continued for many years and shows no signs of resolving. Despite massive improvements in the quality of much frozen product, consumers and their retail and restaurant suppliers still tend to believe that "fresh" is better, perhaps simply because the word "fresh" is naturally appealing. Stock Companies: A Work Designed for Experienced Book-Keepers The nature of Joint Stock Concerns in their organization is varied and often peculiar, owing to which the opening entries at the commencement of business must necessarily differ, and from this fact difficulties arise that are not met with in common commercial bookkeeping. Having been so frequently consulted upon the subject of opening and closing the books of Joint Stock Companies by intelligent book-keepers, I am led to imagine a few practical suggestions upon the matter may be of much value. To open the books for a simple partnership or a mercantile business, we only have to deal with positive values, whilst on opening the books for a compound partnership or a Joint Stock Company we are compelled to resort to values of another kind, namely, positive, nominal, and fictitious, and it is in the creation and disposition of these nominal and fictitious values that difficulties seem to arise: The knowledge I have acquired upon the matter of compound partnerships has been from observation and study, coupled with a varied practical experience covering the better portion of my life* and I feel confident the various entries I shall here illustrate will assist the intelligent book-keeper, and go far to aid him in the disposition of all transactions to be encountered in the formation of a Joint Stock Company, no matter how complicated its organization may be. I do not propose, even were I capable, to devote any of the pages of this little work to defining the law regulating Stock Concerns. That question I refer to some proper attorney, who should beyond question be consulted upon the first move looking toward any organization governed in the main by legal enactments. Nor shall I, like some authors, sacrifice golden hours, and exhaust the greater portion of my space in setting forth how articles of incorporation and other instruments of writing necessary to the formation of a Company should be executed. Neither shall its pages be encumbered with an exemplification of the minute book, or only a detail of the formula required to open the books for a Company that is to be blessed with a cash,

paid-up capital. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
