Weaving a Library Web Dec 26 2020 Eager to feed their curiosity with interactive information, children are becoming more responsive to technology, and many now use a mouse more effectively than a crayon. By embracing the possibilities of the Internet when programming for children, libraries can empower the young with great information while supplementing

traditional children's services. These award-winning children's web developers and librarians build their virtual library services starting from the four pillars of children's librarianship: readers' advisory, homework reference help, programming, and outreach. Presenting a wide assortment of possibilities, the authors offer guidance, inspiration, and practical direction - complete with sample screen shots - to: Create appropriate sites for different ages; Develop a project plan, including an Approach to Success document; Map out details with storyboards and flowcharts; Make user experiences easy and fun using mascots, navigation tools, and downloads; Authoritative and comprehensive, this guide provides sample documents and hands-on help on technical issues - usability testing, dealing with online privacy, monitoring, maintaining, promoting the site, testing for

The NexStar User's Guide Oct 16 2022 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this - one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners - there is a chapter on "Astronomy Basics" - and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes.

A User's Guide to Vacuum Technology Apr 22 2023 In the decade and a half since the publication of the Second Edition of A User's Guide to Vacuum Technology there have been many important advances in the field, including spinning rotor gauges, dry mechanical pumps, magnetically levitated turbo pumps, and ultraclean system designs. These, along with improved cleaning and assembly techniques have made contamination-free manufacturing a reality. Designed to bridge the gap in both knowledge and training between designers and end users of vacuum equipment, the Third Edition offers a practical perspective on today's vacuum technology. With a focus on the operation, understanding, and selection of equipment for industrial processes used in semiconductor, optics, packaging, and related coating technologies, A User's

Guide to Vacuum Technology, Third Edition provides a detailed treatment of this important field. While emphasizing the fundamentals and touching on significant topics not adequately covered elsewhere, the text avoids topics not relevant to the typical user.

Instrument Engineers' Handbook, Volume Two Jun 12 2022 The latest update to Bela Liptak's acclaimed "bible" of instrument engineering is now available. Retaining the format that made the previous editions bestsellers in their own right, the fourth edition of Process Control and Optimization continues the tradition of providing quick and easy access to highly practical information. The authors are practicing engineers, not theoretical people from academia, and their from-the-trenches advice has been repeatedly

tested in real-life applications. Expanded coverage includes descriptions of overseas manufacturer's products and concepts, model-based optimization in control theory, new major inventions and innovations in control valves, and a full chapter devoted to safety. With more than 2000 graphs, figures, and tables, this all-inclusive encyclopedic volume replaces an entire library with one authoritative reference. The fourth edition brings the content of the previous editions completely up to date, incorporates the developments of the last decade, and broadens the horizons of the work from an American to a global perspective. Béla G. Lipták speaks on Post-Oil Energy Technology on the AT&T Tech Channel.
