Morgantina Studies, Volume III Jun 08 2022 The kilns at Morgantina, site of the well-known excavations in central Sicily, are an outstanding example of multiple potters' workshops in use during the late Hellenistic period. In fully documenting these ten kilns, excavated between 1955 and 1963, Ninina Cuomo di Caprio offers both a representative cross-section of the physical setting of ceramic production in this ancient Greek city and evidence for its daily industrial activity. She includes detailed plans and section drawings of each kiln and formulates hypotheses on its operation in light of modern thermodynamics. The text, which is in Italian, is preceded by an English-language summary. Cuomo di Caprio's archaeological study of the kiln structures and their ceramic products is supplemented by such diagnostic tools as thermoluminescence analysis, neutron activation analysis, X-ray diffraction, and optical examination by polarizing microscope. Opening an entirely new window into the everyday working practices of the Morgantina potters, this study demonstrates that they operated at a very sophisticated level: selecting and purifying specific clays, and adding certain materials to manipulate their working and firing characteristics. Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Gesture-Based Human-Computer Interaction and Simulation Feb 16 2023 This book constitutes the thoroughly refereed post-proceedings of the 7th International Workshop on Gesture-Based Human-Computer Interaction and Simulation, GW 2007, held in Lisbon, Portugal, in May 2007. The 31 revised papers presented were carefully

selected from 53 submissions. The papers are organized in topical sections on analysis and synthesis of gesture; theoretical aspects of gestural communication and interaction; vision-based gesture recognition; sign language processing; gesturing with tangible interfaces and in virtual and augmented reality; gesture for music and performing arts; gesture for therapy and rehabilitation; and gesture in Mobile computing and usability studies.

Female Cultural Production in Modern Italy Aug 22 2023 This book is the first critical interdisciplinary examination in English of Italian women's contributions to intellectual, artistic, and cultural production in modern Italy. Examining commonalities and diversities from the country's Unification to today, the volume provides insight into the challenges that Italian women engaged in cultural production have faced, and the strategies they have deployed in order to achieve their objectives. The essays address a range of issues, from women's self-identification and public ownership of their professional roles as laborers in the intellectual and cultural realm, to questions about motherhood and financial remuneration, to the role of creative foreign women in Italy. Through critical analysis and direct testimony from new and typically marginalized voices, including an Arab-Italian writer, an Italian-Dominican filmmaker, and a transgender activist, new forms of ongoing struggle emerge that redefine the culturally diverse landscape of female intellectual and creative production in Italy today. The volume rethinks a solely national "Made in Italy" reading of the subject of female intellectual labor, demonstrating instead the wide network of influences and relationships that have existed for Italian women in their professional aspirations.

Giotto the Painter. Volume 1-3 May 07 2022 Vol. 1: Life Giotto (1334) is the first European artist about whom it is possible to write following the schema of "life and work". The situation of the sources, however, is complicated: On Giotto's life, there are – on the one hand – biographical accounts from the mid-fourteenth century onwards that responded to various ideological requirements (patriotism, humanism, Renaissance ideology, cult of the artist); on the other, there is extensive documentary material from Giotto's lifetime, which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder. The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre-modern artist. Vol. 2: Works The paintings examined and contextualised in this volume are those secured for Giotto through early written sources. These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300: while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans, his artistic path began in Rome in the shadow of the Curia. The breakthrough to his own artistic concept came immediately before and during his work in Padua. In addition to prominent churchmen, ecclesiastical institutions, and the King of Naples, his clients were predominantly members of Italy's urban and financial elites. The adoption and further development of his inventions by other – especially Siennese – painters pressured him in his later years to try new approaches again. Vol. 3: Survival Giotto is considered by many to be the founder of modern painting. This thesis is discussed and modified in the present volume on an empirical basis. What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature. Rather, his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences. The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological, narrative and allegorical content of great complexity outside the media of language and text, which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies.

Gesture in Embodied Communication and Human Computer Interaction Jul 29 2021 The International Gesture Workshops (GW) are interdisciplinary events for those researching gesture-based communication across the disciplines. The focus of these events is a shared interest in understanding gestures and sign language in their many facets, and using them for advancing human-machine interaction. Since 1996, International Gesture Workshops have been held roughly every second year, with fully reviewed proceedings published by Springer. The International Gesture Workshop GW 2009 was hosted by Bielefeld University's Center for Interdisciplinary Research (ZiF – Zentrum für interdisziplinäre Forschung) during February 25–27, 2009. Like its predecessors, GW 2009 aimed to provide a platform for participants to share, discuss, and criticize recent and novel research with a multidisciplinary audience. More than 70 computer scientists, linguistics, psychologists, neuroscientists as well as dance and music scientists from 16 countries met to present and exchange their newest results under the umbrella theme "Gesture in Embodied Communication and Human-Computer Interaction." Consistent with the steady growth of research activity in this area, a large number of high-quality submissions were received, which made GW 2009 an exciting and important event for anyone interested in gesture-related technological research relevant to human-computer interaction. In line with the practice of previous gesture workshops, presenters were invited to submit their papers for publication in a subsequent peer-reviewed publication of high quality. The present book is the outcome of this

effort. Representing the research work from eight countries, it contains a selection of 28 thoroughly reviewed articles.

The Military Orders Volume VII Sep 30 2021 The Military Orders essay collections arising from the quadrennial conferences held at Clerkenwell in London have come to represent an international point of reference for scholars. This present volume brings together twenty-nine papers given at the seventh iteration of this event. The studies offered here cover regions as disparate as Prussia, Iberia and the Eastern Mediterranean and chronologically span topics from the Twelfth to the Twentieth century. They draw attention to little used textual and non-textual sources, advance challenging new methodologies, and help to place these military-religious institutions in a broader context.

Judicial Independence in Transition Dec 14 2022 Strengthening the rule of law has become a key factor for the transition to democracy and the protection of human rights. Though its significance has materialized in international standard setting, the question of implementation is largely unexplored. This book describes judicial independence as a central aspect of the rule of law in different stages of transition to democracy. The collection of state-specific studies explores the legal situation of judiciaries in twenty states from North America, over Western, Central and South-Eastern Europe to post-Soviet states and engages in a comparative legal analysis. Through a detailed account of the current situation it takes stocks, considers advances in and shortcomings of judicial reform and offers advice for future strategies. The book shows that the implementation of judicial independence requires continuous efforts, not only in countries in transition but also in established democracies which are confronted with ever new challenges.

Extruded Cables for High-Voltage Direct-Current Transmission Feb 21 2021 The only book on the market that provides current, necessary, and comprehensive technical knowledge of extruded cables and high-voltage direct-current transmission This is the first book to fully address the technical aspects of high-voltage direct-current (HVDC) link projects with extruded cables. It covers design and engineering techniques for cable lines, insulation materials, and accessories, as well as cable performance and life span and reliability issues. Beginning with a discussion on the fundamentals of HVDC cable transmission theory, *Extruded Cables for High-Voltage Direct-Current Transmission: Advances in Research and Development* covers: Both the cable and the accessories (joints and terminations), each of which affects cable line performance The basic designs of HVDC cables—including a comparison of mass insulated non-draining cables with extruded HVDC cables The theoretical elements on which the design of HVDC cables is based—highlighting the differences between HVAC and HVDC cables Space charge-related problems that have a critical impact on extruded insulation for HVDC application Recent advances in extruded compounds for HVDC cables such as additives and nano-fillers The improved design of extruded HVDC cable systems—with emphasis on design aspects relevant to accessories Cable line reliability problems and the impact on cable system design Including more than 200 illustrations, *Extruded Cables for High-Voltage Direct-Current Transmission* fills a gap in the field, providing power cable engineers with complete, up-to-date guidance on HVDC cable lines with extruded insulation.

The complete works of Gabrio Piola: Volume I Jul 21 2023 Gabrio Piola works had an enormous impact on the development of applied mathematics and continuum mechanics. An excellent scientific committee who took it upon themselves to translate his complete works. In a second step, they commented Piola's work and compared it to modern theories in mechanics in order to stress Piola's impact on modern science and proofs that he has set milestones in applied mathematics. This book presents Piola's original Italian text together with its translations and their comments. It shows impressively that Gabrio Piola's work must still be regarded as a modern theory.

Methods and Applications of Statistics in Clinical Trials, Volume 1 Feb 04 2022 A complete guide to the key statistical concepts essential for the design and construction of clinical trials As the newest major resource in the field of medical research, *Methods and Applications of Statistics in Clinical Trials, Volume 1: Concepts, Principles, Trials, and Designs* presents a timely and authoritative review of the central statistical concepts used to build clinical trials that obtain the best results. The reference unveils modern approaches vital to understanding, creating, and evaluating data obtained throughout the various stages of clinical trial design and analysis. Accessible and comprehensive, the first volume in a two-part set includes newly-written articles as well as established literature from the Wiley Encyclopedia of Clinical Trials. Illustrating a variety of statistical concepts and principles such as longitudinal data, missing data, covariates, biased-coin randomization, repeated measurements, and simple randomization, the book also provides in-depth coverage of the various trial designs found within phase I-IV trials.

Methods and Applications of Statistics in Clinical Trials, Volume 1: Concepts, Principles, Trials, and Designs also features: Detailed chapters on the type of trial designs, such as adaptive, crossover, group-randomized, multicenter, non-inferiority, non-randomized, open-labeled, preference, prevention, and superiority trials Over 100 contributions from leading academics, researchers, and practitioners An exploration of ongoing, cutting-edge clinical trials on early cancer and heart disease, mother-to-child human immunodeficiency virus transmission trials, and the AIDS Clinical Trials Group Methods and Applications of Statistics in Clinical Trials, Volume 1: Concepts, Principles, Trials, and Designs is an excellent reference for researchers, practitioners, and students in the fields of clinical trials, pharmaceuticals, biostatistics, medical research design, biology, biomedicine, epidemiology, and public health.

Cell Biology and Translational Medicine, Volume 17 Sep 11 2022 Much research has focused on the basic cellular and molecular biological aspects of stem cells. Much of this research has been fueled by their potential for use in regenerative medicine applications, which has in turn spurred growing numbers of translational and clinical studies. However, more work is needed if the potential is to be realized for improvement of the lives and well-being of patients with numerous diseases and conditions. This book series 'Cell Biology and Translational Medicine (CBTMD)' as part of Springer Nature's longstanding and very successful Advances in Experimental Medicine and Biology book series, has the goal to accelerate advances by timely information exchange. Emerging areas of regenerative medicine and translational aspects of stem cells are covered in each volume. Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas. This current book is the 17th volume of a continuing series.

MLN Jun 20 2023 MLN pioneered the introduction of contemporary continental criticism into American scholarship. Critical studies in the modern languages--Italian, Hispanic, German, French--and recent work in comparative literature are the basis for articles and notes in MLN. Four single-language issues and one comparative literature issue are published each year.

Oxidative Stress Jan 03 2022 Since the discovery of free radicals in biological systems researchers have been highly interested in their interaction with biological molecules. Denoted in 1980, and due to fruitful results and ideas, oxidative stress is now appreciated by both basic and applied scientists as an enhanced steady state level of reactive oxygen species with wide range of biological effects. This book covers a wide range of aspects and issues related to the field of oxidative stress. The association between generation and elimination of reactive species and effects of oxidative stress are also addressed, as well as summaries of recent works on the signaling role of reactive species in eukaryotic organisms. The readers will gain an overview of our current understanding of homeostasis of reactive species and cellular processes they are involved in, as well as useful resources for further reading.

International Tables for Crystallography, Volume C May 27 2021 International Tables for Crystallography are no longer available for purchase from Springer. For further information please contact Wiley Inc. (follow the link on the right hand side of this page). The purpose of Volume C is to provide the mathematical, physical and chemical

information needed for experimental studies in structural crystallography. The volume covers all aspects of experimental techniques, using all three principal radiation types, from the selection and mounting of crystals and production of radiation, through data collection and analysis, to interpretation of results. As such, it is an essential source of information for all workers using crystallographic techniques in physics, chemistry, metallurgy, earth sciences and molecular biology.

The Complete Works of Gabrio Piola: Volume II Aug 10 2022 This book presents the second volume of Piola's original Italian text together with the English-language translation and comments, showing convincingly that Gabrio Piola's work must still be regarded as a modern theory. Gabrio Piola's work has had an enormous impact on the development of applied mathematics and continuum mechanics. As such, a committee of scientific experts took it upon themselves to translate his complete works. In a second step, they commented on Piola's work and compared it to modern theories in mechanics in order to stress Piola's impact on modern science and prove and confirm that he achieved significant milestones in applied mathematics.

History of Technology Apr 25 2021 This volume provides an overview of current research in the history of Italian technology in the long run, from the early Middle Ages to the 20th century. The contributors focus on different aspects of Italian creativity in a local, transnational and global dimension, tracing the trajectory from primacy to relative decline. The themes range from the creation and establishment of new technologies in laboratories or enterprises, the processes of learning, diffusion, and copying and the institutions involved in the generation of a national technological capability and innovation system. Comparative studies are included in order to illustrate special features of the Italian case. The industries covered in this volume range from silk, iron and steel production, to electricity generation and telecommunications. Special Issue: Italian Technology from the Renaissance to the 20th Century Edited by Anna Guagnini and Luca Mola Included in this volume: Inventors, Patents and the Market for Innovations in Renaissance Italy The Microcosm: Technological Innovation and the Transfer of Mechanical Knowledge in the Habsburg Empire of the Sixteenth century Diamonds in Early Modern Venice: Technology, Products and International Competition A Global Supremacy. The Worldwide Hegemony of the Piedmontese Reeling Technologies, 1720s-1830s Raw Materials, Transmission of Know-How and Ceramic Techniques in Early Modern Italy: a Mediterranean perspective Anabaptist Migration and the Diffusion of the Maiolica from Faenza to Central Europe A Bold Leap into Electric Light. The Creation of the Società Italiana Edison, 1880-1886 Keeping Abreast with the Technology of Science. Plants as Alternative Hosts for Human and Animal Pathogens, Volume 2 Nov 13 2022 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.
