"The eighth edition of Fundamentals of Human Health and Function continues to focus on providing a framework for acquiring knowledge and putting it to work by teaching students to prioritize information, work in a logical sequence, and process data calmly and efficiently. It strives to teach students how to think about each case in a meaningful, systematic way. This book breathes life into theoretical principles and puts students in the mindset of a successful nurse. The framework approach gives students the tools to tackle real-life challenges in a clinical setting. The Nursing Process is the foundation of this book. By learning to identify normal function, assess risk or dysfunction, envision potential outcomes, plan and provide for interventions and evaluate the effectiveness of a treatment, students will be equipped to stay on track while customizing care for each patient. Chapters open with a case study and include critical thinking questions, Apply Your Knowledge Boxes, and Ethical-Legal Boxes to build students' decision-making abilities and clinical judgment. Collaborating with the Healthcare Team Boxes and Patient Teaching Boxes demonstrate the importance of communication in these clinical scenarios. While all books list critical thinking exercises as a feature, most books like Potter and Koziar include these questions at the end of the chapter. Craven weaves critical thinking into most activities throughout the chapter so students are constantly being challenged to think like a professional nurse."--Provided by publisher. With illustrated, step-by-step guidelines, this book makes it easy to learn important skills and procedures. Care plans are presented within a nursing process framework, and case studies show how to apply concepts to nursing practice. From an expert author team led by Patricia Potter and Anne Griffin Perry, this bestselling nursing textbook helps you develop the understanding and clinical reasoning you need to provide excellent patient care. 51 skills demonstrations provide illustrated, step-by-step instructions for safe nursing care - and include rationales for each step. 29 procedural guidelines provide streamlined, step-by-step instructions for performing basic skills. UNIQUE! Critical Thinking Models in each clinical chapter show how to apply the nursing process and critical thinking to achieve successful clinical outcomes. Evidence-Based Practice chapter shows how nursing research helps in

determining best practices. UNIQUE! Caring for the Cancer Survivor chapter prepares nurses to care for cancer patients who may still face physical and emotional issues. Case studies include unique clinical application questions and exercises, allowing you to practice using care plans and concept maps. The 5-step nursing process provides a consistent framework for care, and is demonstrated in more than 20 care plans. 15 review questions in every chapter test your retention of key concepts, with answers available in the book and on the Evolve companion website. Practical study tools on Evolve include video clips of skills, skills checklists, printable key points, a fluid & electrolytes tutorial, a concept map creator, an audio glossary, and more. UNIQUE! Clear, streamlined writing style makes complex material more approachable. More than 20 concept maps show care planning for clients with multiple nursing diagnoses. Key points and key terms in each chapter summarize important content for more efficient review and study. Unexpected Outcomes and Related Interventions for each skill alert you to potential problems and appropriate nursing actions. Delegation coverage clarifies which tasks can and cannot be delegated. A glossary provides quick access to definitions for all key terms. UPDATED! Patient Safety and Quality chapter describes how quality and safety apply to the nurse, and includes a new skill on fall prevention in healthcare settings. NEW content addresses the Affordable Care Act, patients' perspectives on hospital care as measured by HCAHPS surveys, health disparities and vulnerable populations, compassion fatigue, pain assessment, patient education techniques like teach-back, new equipment, Healthy People 2020, and more. NEW! Additional alternate-item review questions include at least four alternate-item questions - multiple select, sequencing/priority, delegation, hot-spot images, and fill-in-the blank for medications - for every chapter. Expanded Building Competency boxes help you apply QSEN (Quality & Safety Education for Nurses) competencies to realistic clinical situations. UPDATED! Unique Evidence-Based Practice boxes in every chapter include a PICO question - the Problem, Intervention, Comparison, and Outcome - and summarize a research study along with its application to nursing practice. Over 100 NEW photos clarify procedures and familiarize you with the latest clinical equipment.
