Perkins Activity and Resource Guide - Chapter 4: Functional Academics Mar 03 2021 This chapter is designed to address the needs of individuals with visual and multiple disabilities who may not be able to follow all parts of a traditional academic curriculum. As educators, our primary goal should be to provide students with skills that will be of use throughout their lives. Skill acquisition often takes longer for students with multiple disabilities, and they are not always able to generalize them into other settings. For this reason it is important to identify skills that will help prepare students to lead the most independent lives possible and to provide many opportunities to practice them.

Rethink (Chapter 4) Nov 10 2021 This is the eBook version of the printed book. Read the following excerpt from Rethink, Chapter 4: Know What You Are (and Aren't) Good At. Michael Jordan is one of the best basketball players in the history of the game. No argument. But back in 1994, he made a serious mistake. He assumed he could be one of the best at another sport as well. Jordan was a natural athlete who could roll a bowling strike backward from between his legs, score well in pro-amateur golf tournaments, and smash batting-practice baseballs out of the park. When he announced that he was going to try his hand at professional baseball, few skeptics were bold enough to suggest that this career turn would be anything but another Jordanesque dazzler.

Jordan had led the National Basketball Association (NBA) in scoring for seven consecutive years, sparked the U.S. Olympic team to a gold medal in 1992, and led the Chicago Bulls to three straight national championships before deciding he had enough and was ready to retire from basketball. He told sportswriters that his late father had actually wanted him to be a major league baseball player. In fact, Jordan said, his greatest accomplishment in sports was being named most valuable player on his boyhood Babe Ruth League team when it won the state championship: "I batted over .500, hit five home runs in seven games, and pitched a one-hitter to get us into the championship game." But that was then. Now, at 31, Jordan was no kid, and he faced a steep learning curve. After an underwhelming spring training season with the White Sox in 1994, he was sent to the minors. The Network Challenge (Chapter 4) Jun 05 2021 Global networks of firms are rapidly replacing top-down, hierarchical organizations. Such networks, thanks to information technology and global communications systems, can respond to changes in international demand faster and more flexibly than rigid corporate organizations of the past. But by drawing together diverse cultures and individuals, these networks present new challenges to leaders. Traditional styles of leadership are not enough for this emerging environment. The kind of leadership style that leads to efficient execution in these global networks is different from the "do it and do it now" approach that might work in hierarchical organizations. Based on the author's experience in the leading global accounting firm Touche Ross, serving as dean of the Wharton School,

and heading his own corporate investment firm, this chapter discusses leadership in a networked, global environment.

Chapter 4: Solar Radiation and Earth May 17 2022 Chapter 4: Solar Radiation and Earth of the eBook Understanding Physical Geography. This eBook was written for students taking introductory Physical Geography taught at a college or university. For the chapters currently available on Google Play presentation slides (Powerpoint and Keynote format) and multiple choice test banks are available for Professors using my eBook in the classroom. Please contact me via email at Michael.Pidwirny@ubc.ca if you would like to have access to these resources. The various chapters of the Google Play version of Understanding Physical Geography are FREE for individual use in a non-classroom environment. This has been done to support life long learning. However, the content of Understanding Physical Geography is NOT FREE for use in college and university courses in countries that have a per capita GDP over \$25,000 (US dollars) per year where more than three chapters are being used in the teaching of a course. More specifically, for university and college instructors using this work in such wealthier countries, in a credit-based course where a tuition fee is accessed, students should be instructed to purchase the paid version of this content on Google Play which is organized as one of six Parts (organized chapters). One exception to this request is a situation where a student is experiencing financial hardship. In this case, the student should use the individual chapters which are available from Google Play for free. The cost of these Parts works out to only \$0.99 per chapter in USA dollars, a very small fee for my work. When the entire textbook (30 chapters) is finished its cost will be only \$29.70 in USA dollars. This is far less expensive than similar textbooks from major academic publishing companies whose eBook are around \$50.00 to \$90.00. Further, revenue generated from the sale of this academic textbook will provide "the carrot" to entice me to continue working hard creating new and updated content. Thanks in advance to

instructors and students who abide by these conditions. IMPORTANT - This Google Play version is best viewed with a computer using Google Chrome, Firefox or Apple Safari browsers.
