**This Land Is Our Land Dec 21 2020 A 2019 NPR Staff Pick**  
“Written ‘in sorrow and anger,’ this is a brilliant and urgently necessary book, eloquently making the case against bigotry and for all of us migrants—what we are not, who we are, and why we deserve to be welcomed, not feared.” —Salman Rushdie

**A timely argument for why the United States and the West would benefit from accepting more immigrants**

**There are few subjects in American life that prompt more discussion and controversy than immigration. But do we really understand it? In This Land Is Our Land, the renowned author Suketu Mehta attacks the issue head-on. Drawing on his own experience as an Indian-born teenager growing up in New York City and on years of reporting around the world, Mehta subjects the worldwide anti-immigrant backlash to withering scrutiny. As he explains, the West is being destroyed not by immigrants but by the fear of immigrants. Mehta juxtaposes the phony narratives of populist ideologues with the ordinary heroism of laborers, nannies, and others, from Dubai to Queens, and explains why more people are on the move today than ever before. As civil strife and climate change reshape large parts of the planet, it is little surprise that borders have become so porous. But Mehta also stresses the destructive legacies of colonialism and global inequality on large swaths of the world: When today’s immigrants are asked, “Why are you here?” they can justly respond, “We are here because you were there.” And now that they are here, as Mehta demonstrates, immigrants bring great benefits, enabling countries and communities to flourish. Impassioned,**

rigorous, and richly stocked with memorable stories and characters, *This Land Is Our Land* is a timely and necessary intervention, and a literary polemic of the highest order.

Reengineering Management Dec 13 2022 The co-author of the monumental bestseller *Reengineering the Corporation* continues the reengineering revolution with another national bestseller that has already sold more than 165,000 copies in hardcover. *Reengineering Management* is a brilliant, practical and much needed book on the most powerful management idea of the decade. Reengineering—changing the traditional and outdated organization, processes and culture of a company—is corporate America's greatest challenge today. In *Reengineering Management*, Champy examines the far-reaching changes managers must make for themselves and their companies to succeed in an era of unprecedented competition. Through his extensive consulting and research work, he shows how reengineering succeeds only when managers reinvent their own jobs and managerial styles. Otherwise, the ultra-efficient and effective reengineered processes for acquiring and serving customers, filling orders, bringing new concepts to market and other key business activities eventually fall apart. Champy illustrates this new management agenda through first-hand experiences of managers of reengineered operations at Federal Express, Wisconsin Electric, CIGNA Health Care, Hewlett-Packard, AT&T Universal Card Services and other companies. Champy shows how they are mastering the managerial challenges of reengineering, and as a result are making their organizations exciting and competitive. As more and more organizations reengineer, the experiences of these managers will become an insiders' guide to managerial life in the company of the future. *Reengineering Management* picks up where *Reengineering the Corporation* left off—by exploring the managerial implications of the reengineered workplace. As

**reengineering becomes critical to all organizations, Reengineering Management will be the road map for managerial success in the future. It is, indeed, the manifesto for the next managerial revolution.**

**The Innovator's Manifesto Apr 12 2020 In this compelling new book, Michael E. Raynor, coauthor of the national bestseller *The Innovator's Solution*, shows that Disruption, Clayton M. Christensen's landmark theory that explains how fringe ideas come to redefine entire markets, not only explains why new businesses emerge and mature companies fall - it actually helps to predict the future success of new ventures more accurately. Raynor's groundbreaking research, and deeper understanding of the mechanisms and drivers of Disruption make this approach to innovation more powerful and more useful than ever. Despite the groaning shelves of books offering advice on innovation, most managers continue to struggle to create the profitable growth their companies need. The reason? The vast majority of management theories base their prescriptions on explanations of the past. When it comes to predicting successful innovation, a willingness to apply the empirical and theoretical rigor of the scientific method to prove what will work in the real world has been notable by its absence. Until now. In the *Innovator's Manifesto*, Michael E. Raynor, a director at Deloitte Consulting, LLP., coauthor of *The Innovator's Solution*, and author of *The Strategy Paradox*, shows how Disruption theory can help managers more accurately predict which businesses will survive - and which will die. In fact, Raynor argues that Disruption theory is the only theory which has been statistically proven to be an effective predictive tool. The book draws on the research of the New Business Initiatives (NBI) group at Intel, analyzing forty-eight new ventures that NBI researched, scrutinized, and ultimately funded. The group's success rate was comparable to venture capitalists**

throughout the industry - roughly 10 percent. However, when the principles of Disruption theory were applied to these forty-eight funded ventures in controlled experiments, the subjects' accuracy rates improved significantly - by almost 40 percent. Raynor replicated these experiments with over 300 MBA students at schools in the United States and Canada, including Harvard, with even more impressive results: systematic improvements in predictive accuracy of up to 50 percent. In other words, not only is disruption effective, it can be readily and successfully taught and applied. The Innovator's Manifesto is the most significant advance in our understanding of the mechanisms and implications of Disruption theory since Christensen's seminal 1997 work, *The Innovator's Dilemma*. For the first time disruption theory has been shown to give managers and investors effective tools they can use in their efforts to create the success they seek.

**Women & Power Sep 17 2020** An updated edition of the Sunday Times Bestseller Britain's best-known classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller SPQR: A History of Ancient Rome.

***The New Capitalist Manifesto* May 06 2022** In this manifesto-style book, radical economist and strategist Umair Haque calls for the end of the corrupt business ideals that exemplify business as usual. His passionate vision for "Capitalism 2.0," or "constructive capitalism," is one in which old paradigms of wasteful growth, inefficient competition, and self-destructive ideals are left far behind at this reset moment. According to Haque, the economic crisis was not a market failure or even a financial crisis, but an institutional one. Haque details a holistic five-step plan for both reducing the negative and exploitive nature of the current system and ensuring positive social and economic growth for the future. Haque calls for a reexamination of ideals, and urges business away from competition and rivalries and toward a globally-conscious and constructive model--and a constructive future. Haque argues that companies must learn to orient their business models

**around: - renewal in order to maximize efficiency - equity in order to maximize productivity - meaning in order to maximize effectiveness - democracy in order to maximize agility - peace in order to maximize evolvability These new business ideals focus on the human element - not profit exclusively - and are easily tailored for any size or type of business, as long as they are willing to make bold and sustained changes to the current system.**

**Manifesto for a Moral Revolution Sep 10 2022 "An instant classic." —Arianna Huffington "Will inspire people from across the political spectrum." —Jonathan Haidt Longlisted for the Porchlight Business Book of the Year Award, an essential shortlist of leadership ideas for everyone who wants to do good in this world, from Jacqueline Novogratz, author of the New York Times bestseller The Blue Sweater and founder and CEO of Acumen. In 2001, when Jacqueline Novogratz founded Acumen, a global community of socially and environmentally responsible partners dedicated to changing the way the world tackles poverty, few had heard of impact investing—Acumen’s practice of “doing well by doing good.” Nineteen years later, there’s been a seismic shift in how corporate boards and other stakeholders evaluate businesses: impact investment is not only morally defensible but now also economically advantageous, even necessary. Still, it isn’t easy to reach a success that includes profits as well as mutually favorable relationships with workers and the communities in which they live. So how can today’s leaders, who often kick off their enterprises with high hopes and short timetables, navigate the challenges of poverty and war, of egos and impatience, which have stymied generations of investors who came before? Drawing on inspiring stories from change-makers around the world and on memories of her own most difficult experiences, Jacqueline divulges the most common leadership mistakes and the mind-sets needed to rise above**

**The Checklist Manifesto Mar 04 2022 The New York Times bestselling author of Being Mortal and Complications reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, The Checklist Manifesto is essential reading for anyone working to get things right.**

Every clinician, hospital executive, and politician should read this book."--Bill Crouse, M.D., Senior Director, Worldwide Health, Microsoft Corporation**

***A Hacker Manifesto* Jun 14 2020 A double is haunting the world--the double of abstraction, the virtual reality of information, programming or poetry, math or music, curves or colorings upon which the fortunes of states and armies, companies and communities now depend. The bold aim of this book is to make manifest the origins, purpose, and interests of the emerging class responsible for making this new world--for producing the new concepts, new perceptions, and new sensations out of the stuff of raw data. "A Hacker Manifesto" deftly defines the fraught territory between the ever more strident demands by drug and media companies for protection of their patents and copyrights and the pervasive popular culture of file sharing and pirating. This vexed ground, the realm of so-called "intellectual property," gives rise to a whole new kind of class conflict, one that pits the creators of information--the hacker class of researchers and authors, artists and biologists, chemists and musicians, philosophers and programmers--against a possessing class who would monopolize what the hacker produces. Drawing in equal measure on Guy Debord and Gilles Deleuze, "A Hacker Manifesto" offers a systematic restatement of Marxist thought for the age of cyberspace and globalization. In the widespread revolt against commodified information, McKenzie Wark sees a utopian promise, beyond the property form, and a new progressive class, the hacker class, who voice**

a shared interest in a new information commons.

**The Manifesto for Teaching Online Jul 08 2022** An update to a provocative manifesto intended to serve as a platform for debate and as a resource and inspiration for those teaching in online environments. In 2011, a group of scholars associated with the Centre for Research in Digital Education at the University of Edinburgh released “The Manifesto for Teaching Online,” a series of provocative statements intended to articulate their pedagogical philosophy. In the original manifesto and a 2016 update, the authors counter both the “impoverished” vision of education being advanced by corporate and governmental edtech and higher education’s traditional view of online students and teachers as second-class citizens. The two versions of the manifesto were much discussed, shared, and debated. In this book, Siân Bayne, Peter Evans, Rory Ewins, Jeremy Knox, James Lamb, Hamish Macleod, Clara O’Shea, Jen Ross, Philippa Sheail and Christine Sinclair have expanded the text of the 2016 manifesto, revealing the sources and larger arguments behind the abbreviated provocations. The book groups the twenty-one statements (“Openness is neither neutral nor natural: it creates and depends on closures”; “Don’t succumb to campus envy: we are the campus”) into five thematic sections examining place and identity, politics and instrumentality, the primacy of text and the ethics of remixing, the way algorithms and analytics “recode” educational intent, and how surveillance culture can be resisted. Much like the original manifestos, this book is intended as a platform for debate, as a resource and inspiration for those teaching in online environments, and as a challenge to the techno-instrumentalism of current edtech approaches. In a teaching environment shaped by COVID-19, individuals and institutions will need to do some bold thinking in relation to resilience, access, teaching quality,

and inclusion.

This new edition of her award-winning book has a major new afterward in which the author reviews and analyzes how attitudes and practices within the corporate power structure have changed in the 1990s.

***The Care Manifesto* Apr 24 2021** We are in the midst of a global crisis of care. How do we get out of it? The Care Manifesto puts care at the heart of the debates of our current crisis: from intimate care--childcare, healthcare, elder

**care--to care for the natural world. We live in a world where carelessness reigns, but it does not have to be this way. The Care Manifesto puts forth a vision for a truly caring world. The authors want to reimagine the role of care in our everyday lives, making it the organising principle in every dimension and at every scale of life. We are all dependent on each other, and only by nurturing these interdependencies can we cultivate a world in which each and every one of us can not only live but thrive. The Care Manifesto demands that we must put care at the heart of the state and the economy. A caring government must promote collective joy, not the satisfaction of individual desire. This means the transformation of how we organise work through co-operatives, localism and nationalisation. It proposes the expansion of our understanding of kinship for a more 'promiscuous care'. It calls for caring places through the reclamation of public space, to make a more convivial city. It sets out an agenda for the environment, most urgent of all, putting care at the centre of our relationship to the natural world.**

*We: A Manifesto for Women Everywhere* May 26 2021 Explores how women can use psychological and spiritual tools to create a more fulfilling way of life and to attain happiness and freedom from the have-it-all superwoman culture.

*Lean In* Oct 19 2020 The #1 international best seller In *Lean In*, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of *Option B* with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,”

**seek challenges, take risks, and pursue their goals with gusto. Lean In continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can't do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, Lean In is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential.**

**Winning on Purpose Oct 31 2021 Great leaders embrace a higher purpose to win. The Net Promoter System shines as their guiding star. Few management ideas have spread so far and wide as the Net Promoter System (NPS). Since its conception almost two decades ago by customer loyalty guru Fred Reichheld, thousands of companies around the world have adopted it—from industrial titans such as Mercedes-Benz and Cummins to tech giants like Apple and Amazon to digital innovators such as Warby Parker and Peloton. Now, Reichheld has raised the bar yet again. In Winning on Purpose, he demonstrates that the primary purpose of a business should be to enrich the lives of its customers. Why? Because when customers feel this love, they come back for more and bring their friends—generating good profits. This is NPS 3.0 and it puts a new take on the age-old Golden Rule—treat customers the way you would want a loved one treated—at the heart of enduring business success. As the compelling examples in this book illustrate, companies with superior NPS consistently deliver higher returns to shareholders across a wide array of industries. But winning on purpose isn't easy. Reichheld also explains why many NPS**

practitioners achieve just a small fraction of the system's full potential, and he presents the newest thinking and best practices for doing NPS right. He unveils the Earned Growth Rate (EGR): the first reliable, complementary accounting measure that can truly leverage the power of NPS. With keen insight and moving personal stories, Reichheld advances the thinking and practice of NPS. *Winning on Purpose* is your indispensable guide for inspiring customer love within your own teams and using Net Promoter to achieve both personal and business success.

*SCUM Manifesto* Dec 01 2021 Classic radical feminist statement from the woman who shot Andy Warhol “Life in this society being, at best, an utter bore and no aspect of society being at all relevant to women, there remains to civic-minded, responsible, thrill-seeking females only to overthrow the government, eliminate the money system, institute complete automation and destroy the male sex.” Outrageous and violent, *SCUM Manifesto* was widely lambasted when it first appeared in 1968. Valerie Solanas, the woman who shot Andy Warhol, self-published the book just before she became a notorious household name and was confined to a mental institution. But for all its vitriol, it is impossible to dismiss as the mere rantings of a lesbian lunatic. In fact, the work has proved prescient, not only as a radical feminist analysis light years ahead of its time—predicting artificial insemination, ATMs, a feminist uprising against underrepresentation in the arts—but also as a stunning testament to the rage of an abused and destitute woman. In this edition, philosopher Avital Ronell’s introduction reconsiders the evocative exuberance of this infamous text.

**sacred cows and accepted practices. These are often based upon foundational premises that are no longer valid--if they ever were. Innovation, discovery, and creating disruption require blowing up conventional thinking and unleashing your entrepreneurial brilliance. Mad Genius is a fire hose of creative stimulation that will spark breakthrough ideas and show you how to nurture them. Get ready to think different.**

***Feminism for the 99%* Jan 22 2021 Named one of Vogue's "Most Anticipated Books of 2019" This is a manifesto for the 99 percent Unaffordable housing, poverty wages, inadequate healthcare, border policing, climate change—these are not what you ordinarily hear feminists talking about. But aren't they the biggest issues for the vast majority of women around the globe? Taking as its inspiration the new wave of feminist militancy that has erupted globally, this manifesto makes a simple but powerful case: feminism shouldn't start—or stop—with the drive to have women represented at the top of their professions. It must focus on those at the bottom, and fight for the world they deserve. And that means targeting capitalism. Feminism must be anticapitalist, eco-socialist and antiracist.**

***The Public Service Media and Public Service Internet Manifesto* Sep 29 2021 This book presents the collectively authored Public Service Media and Public Service Internet Manifesto and accompanying materials. The Internet and the media landscape are broken. The dominant commercial Internet platforms endanger democracy. They have created a communications landscape overwhelmed by surveillance, advertising, fake news, hate speech, conspiracy theories, and**

**algorithmic politics. Commercial Internet platforms have harmed citizens, users, everyday life, and society. Democracy and digital democracy require Public Service Media. A democracy-enhancing Internet requires Public Service Media becoming Public Service Internet platforms - an Internet of the public, by the public, and for the public; an Internet that advances instead of threatens democracy and the public sphere. The Public Service Internet is based on Internet platforms operated by a variety of Public Service Media, taking the public service remit into the digital age. The Public Service Internet provides opportunities for public debate, participation, and the advancement of social cohesion. Accompanying the Manifesto are materials that informed its creation: Christian Fuchs' report of the results of the Public Service Media/Internet Survey, the written version of Graham Murdock's online talk on public service media today, and a summary of an ecomitee.com discussion of the Manifesto's foundations.**

***The Geek Manifesto* Aug 17 2020 Whether we want to improve education or cut crime, to enhance public health or to generate clean energy, we need the experimental methods of science - the best tool humanity has yet developed for working out what works. Yet from the way we're governed to the news we're fed by the media we're let down by a lack of understanding and respect for its insights and evidence. In *The Geek Manifesto* Mark Henderson explains why and how we need to entrench scientific thinking more deeply into every aspect of our society. A new movement is gathering. Let's turn it into a force our leaders cannot ignore. This edition includes an appendix: 'A Geek Manifesto for America' by David Dobbs.**

***Stop Saving the Planet!: An Environmentalist Manifesto* Jul 28 2021 "Pithy, funny, exasperated, and informed...You cannot read a more important hundred pages than Stop**

**Saving the Planet!" —Richard White, author of The Republic for Which It Stands We've been "saving the planet" for decades!...And environmental crises just get worse. All this hybrid driving and LEED building and carbon trading seems to accomplish little to nothing—and low-income communities continue to suffer the worst consequences. Why aren't we cleaning up the toxic messes and rolling back climate change? And why do so many Americans hate environmentalists? Jenny Price says Enough already! with this short, fun, fierce manifesto for an environmentalism that is hugely more effective, a whole lot fairer, and infinitely less righteous. She challenges you, corporate sustainability officers, and the EPA to think and act completely anew—and to start right now—to ensure a truly habitable future.**

**Beyond Reengineering Nov 19 2020 Reengineering has captured the imagination of managers and shareholders alike, sending corporations on journeys of radical business redesign that have already begun to transfigure global industry. Yet aside from earning them improvements in their business performance, the shift into more-process-centered organizations is causing fundamental changes in the corporate world, changes that business leaders are only now beginning to understand. What will the revolutions final legacy be? Beyond Reengineering addresses this question, exploring reengineering's effects on such areas as: Jobs: What does process-centering do to the nature of jobs? What does a process-centered workplace feel like? Managers: What is the new role of the manager in a process-centered company? Education: What skills are vital in the process-centered working world, and how can young or inexperienced workers prepare? Society: What are the implications of process-centering for employment and the economy as a whole? Investment: What are the characteristics of a successful 21st-century corporation? An informed look at one of the most**

**profound changes to ever sweep the corporate world, Beyond Reengineering is the business manual for the 21st century.**

***Manifesto for a Post-Critical Pedagogy* May 14 2020** The belief in the transformative potential of education has long underpinned critical educational theory. But its concerns have also been largely political and economic, using education as the means to achieve a better - or ideal - future state: of equality and social justice. Our concern is not whether such a state can be realized. Rather, the belief in the transformative potential of education leads us to start from the assumption of equality and to attend to what is "educational" about education. In *Manifesto for a Post-Critical Pedagogy* we set out five principles that call not for an education as a means to achieve a future state, but rather that make manifest those educational practices that do exist today and that we wish to defend. The Manifesto also acts as a provocation, as the starting point of a conversation about what this means for research, pedagogy, and our relation to our children, each other, and the world. *Manifesto for a Post-Critical Pedagogy* invites a shift from a critical pedagogy premised on revealing what is wrong with the world and using education to solve it, to an affirmative stance that acknowledges what is educational in our existing practices. It is focused on what we do and what we can do, if we approach education with love for the world and acknowledge that education is based on hope in the present, rather than on optimism for an eternally deferred future.
