An original novel set in the universe of Star Trek: Enterprise! A new nation has arisen from the ashes of the Romulan War: the United Federation of Planets, an unprecedented union of diverse species cooperating for the good of all. Admiral Jonathan Archer—the former captain of the Earth starship Enterprise, whose efforts made this union possible—envisions a vibrant Federation promoting galactic peace and a multispecies Starfleet dedicated to exploring strange new worlds. Archer's former crewmates, including Captain T'Pol of the U.S.S. Endeavour and Captain Malcolm Reed of the U.S.S. Pioneer, work with him to secure that bright future. Yet others within the Federation see its purpose as chiefly military, a united defense against a dangerous galaxy, while some of its neighbors view that military might with suspicion and fear. And getting the member nations, their space fleets, and even their technologies to work

together as a unified whole is an ongoing challenge. When a new threat emerges from a force so alien and hostile that negotiation seems impossible, a group of unaligned worlds asks Starfleet to come to its defense, and the Federation's leaders seize the opportunity to build their reputation as an interstellar power. But Archer fears the conflict is building toward an unnecessary war, potentially taking the young nation down a path it was never meant to follow. Archer and his allies strive to find a better solution...but old foes are working secretly to sabotage their efforts and ensure that the great experiment called the Federation comes to a quick and bloody end. ™, ®, & © 2013 CBS Studios, Inc. STAR TREK and related marks are trademarks of CBS Studios, Inc. All Rights Reserved. Excite your students with The Science of Superheroes e-Book! This action-packed nonfiction reader explores superhero stories, including scientists that have gone bad, supervillains, mighty mutants, and real-life superhero qualities and capabilities found in nature! This e-Book engages middle school students with purposefully leveled content to increase comprehension for different types of learners. The Science of Superheroes e-Book features complex and rigorous content appropriate for the 6th grade classroom. Aligned with Common Core State Standards, this text

connects with McREL, WIDA/TESOL standards and prepares students for college and career readiness. The Wheel of Time ® is a PBS Great American Read Selection! Now in development for TV! Since its debut in 1990, The Wheel of Time® by Robert Jordan has captivated millions of readers around the globe with its scope, originality, and compelling characters. In Towers of Midnight, the Last Battle has started. The seals on the Dark One's prison are crumbling. The Pattern itself is unraveling, and the armies of the Shadow have begun to boil out of the Blight. The sun has begun to set upon the Third Age. Perrin Aybara is now hunted by specters from his past: Whitecloaks, a slayer of wolves, and the responsibilities of leadership. All the while, an unseen foe is slowly pulling a noose tight around his neck. To prevail, he must seek answers in Tel'aran'rhiod and find a way--at long last--to master the wolf within him or lose himself to it forever. Meanwhile, Matrim Cauthon prepares for the most difficult challenge of his life. The creatures beyond the stone gateways--the Aelfinn and the Eelfinn--have confused him, taunted him, and left him hanged, his memory stuffed with bits and pieces of other men's lives. He had hoped that his last confrontation with them would be the end of it, but the Wheel weaves as the Wheel wills. The time is coming when he will again have to dance

with the Snakes and the Foxes, playing a game that cannot be won. The Tower of Ghenjei awaits, and its secrets will reveal the fate of a friend long lost. Dovie'andi se tovyu sagain. It's time to toss the dice. TV series update: "Sony will produce along with Red Eagle Entertainment and Radar Pictures. Rafe Judkins is attached to write and executive produce. Judkins previously worked on shows such as ABC's "Agents of SHIELD," the Netflix series "Hemlock Grove," and the NBC series "Chuck." Red Eagle partners Rick Salvage and Larry Mondragon will executive produce along with Radar's Ted Field and Mike Weber. Darren Lemke will also executive produce, with Jordan's widow Harriet McDougal serving as consulting producer." —Variety

There has been continued global growth in tall building construction over recent years. The variation in the use of such buildings is remarkable, from lavish hotels and apartments to socially affordable units. As the world struggles to cope with growing numbers of people, dwindling resources and movements from rural to urban habitats it is unavoidable that population densities will increase, and more efficient use of scarce land will be needed. Taller buildings are the inevitable consequence. Tall buildings can use several different types of material to form their framework and envelope. Those materials are mixed to provide an optimum building solution to suit client requirements such as structure, occupancy, vision, affordability, timing, sustainability and quality. Precast concrete is one of those materials, and has been used from whole frameworks to facades, and elements mixed with structural steelwork and cast in place concrete. This state of the art report shows how precast concrete can be effectively integrated into tall buildings using modern materials and techniques, drawing on the experience and expertise that is currently available in the global precast concrete industry.

The report is aimed at not only building professionals and students, but also at contractors, investors, owners, public bodies and any other parties interested in the possibilities for use of precast concrete in tall building construction. Extensive case studies at the end of the Bulletin illustrate the benefits and applications discussed in the earlier chapters. The book deals with the geotechnical analysis and design of foundation systems for high-rise buildings and other complex structures with a distinctive soil-structure interaction. The basics of the analysis of stability and serviceability, necessary soil investigations, important technical regulations and quality and safety assurance are explained and possibilities for optimised foundation systems are given. Additionally, special aspects of foundation systems such as geothermal activated foundation systems and the reuse of existing foundations are described and illustrated by examples from engineering practice. A group of urbex explorers breaking into the world's tallest skyscraper in Moscow grapple with dangers from all sides in this pulse-pounding cinematic thriller for readers of Gregg Hurwitz and Patrick Hoffman. Michael Foster, Cam Buckley and Maddie Acosta - all former activists in the infamous urbex crew Les Furies. Together they scaled buildings, broke into the spaces no-one else could, and chased a rush that

still haunts them. Now though, Michael is stuck recovering from an injury, coding in a dead-end start-up, But Les Furies cannot hide forever. A journalist has uncovered Michael's identity and he is being sent anonymous videos of his time in the crew. When he discovers that Cam and Maddie are planning on reuniting the crew one last time, to scale the Korova Tower in Moscow, he is sceptical. But the tower has never been scaled before. Breaking into the world's tallest building on Russia Day is too good an opportunity to pass him by. But Michael is about to discover that the vertical city has another purpose, one far more sinister than he could have imagined, and this one final ride for Les Furies might well be the last thing any of them ever do.

An all-new Star Trek e-novella featuring the Department of Temporal Investigations! The dedicated agents of the Federation Department of Temporal Investigations have their work cut out for them protecting the course of history from the dangers of time travel. But the galaxy is littered with artifacts that, in the wrong hands, could threaten reality. One of the DTI's most crucial jobs is to track down these objects and lock them safely away in the Federation's most secret and secure facility. When Agents Lucsly and Dulmur bring home an alien obelisk of incredible power, they are challenged by a 31st-century temporal agent who insists they

surrender the mysterious artifact to her. But before they know it, the three agents are pulled into a corrupted future torn apart by a violent temporal war. While their DTI colleagues attempt to track them down, Lucsly and Dulmur must restore temporal peace by setting off on an epic journey through the ages, with the future of the galaxy hanging in the balance... The “fifth season” saga of the Star Trek: Enterprise TV series continues with this action-packed original novel! Admiral Jonathan Archer has barely settled in as Starfleet Chief of Staff when new crises demand his attention. The Starfleet task force commanded by Captain Malcolm Reed continues its fight against the deadly Ware technology, but one of the task force ships is captured, its Andorian crew imprisoned by an interstellar Partnership that depends on the Ware for its prosperity. Worse, the Partnership has allied with a renegade Klingon faction, providing it with Ware drone fleets to mount an insurrection against the Klingon Empire. Archer sends Captain T’Pol and Endeavour to assist Reed in his efforts to free the captured officers. But he must also keep his eye on the Klingon border, for factions within the Empire blame Starfleet for provoking the Ware threat and seek to take revenge. Even the skill and dedication of the captains under Archer’s command may not be enough to prevent the outbreak of the

Federation's first war! ™, ®, & © 2016 CBS Studios, Inc. STAR TREK and related marks are trademarks of CBS Studios, Inc. All Rights Reserved. When forces who oppose plans to bring the rich and powerful Rigel system into the fledgling Federation capture vital information and Starfleet personnel, captains Malcolm Reed and T'Pol and their crews work to rescue the captives. Continuing the milestone 50th anniversary celebration of Star Trek—a brand-new novel of The Original Series featuring James T. Kirk, Spock, and the crew of the USS Enterprise! Investigating a series of violent raids by a mysterious predatory species, Captain James T. Kirk discovers that these events share a startling connection with the First Federation, a friendly but secretive civilization contacted early in the USS Enterprise's five-year mission. Traveling to the First Federation in search of answers, the Enterprise suddenly comes under attack from these strange marauders. Seeking refuge, the starship finds its way to the true home of the First Federation, an astonishing collection of worlds hidden from the galaxy beyond. The inhabitants of this isolated realm are wary of outsiders, and some accuse Kirk and his crew for bringing the wrath of their ancient enemy down upon them. When an attempt to stave off disaster goes tragically wrong, Kirk is held fully accountable, and Commander Spock

learns there are even deeper forces that threaten this civilization. If Kirk and Spock cannot convince the First Federation's leaders to overcome their fears, the resulting catastrophe could doom them all! In a universe where history as we know it could be wiped out at any moment, only the most disciplined, obsessive, and unimaginative government employees have what it takes to face the existential uncertainty of it all: Lucsly and Dulmur with the Federation Department of Temporal Investigations. Original. The Europe Real Estate Yearbook 2005 places commercial property in a financial context. It seeks to bridge the gap between the world of real estate development and the world of indices. With the aim to create a more transparent market, it presents analyses of European property funds, round table discussions with investors and developers, interviews with industry leaders, Whos Who and a European Index. Europe Real Estate is published in co-operation with RICS, EPRA, IPD, GPR, INREV, AFIRE, ULI, CoreNet and GRI. A practical guide to how the university can serve as a model of environmental stewardship.
Universities can teach and demonstrate environmental principles and stewardship by taking action to understand and reduce the environmental impacts of their own activities.
Greening the Ivory Tower, a motivational and how-to guide for staff, faculty, and students, offers detailed "greening" strategies for those who may have little experience with institutional change or with the latest environmentally friendly technologies. The author was project manager of Tufts CLEAN!, a program whose mission was to reduce Tufts University's environmental impact. After analyzing the campus's overall environmental impact (each year the main campus serves 5 million meals; makes 14 million photocopies; uses 65 tons of paper towels, 110 million gallons of water, and 23 million kWh of electricity; and generates over

2,000 tons of solid waste), the team decided to focus on food waste, transportation, energy efficiency, and procurement practices. An essential discovery was that to change practices requires the personal commitment and direct involvement of those who have the responsibility for operating the institution on a daily basis. Although the Tufts experience forms the basis for many of the proposals in the book, the story goes well beyond Tufts; the author includes examples of successful practices from many other institutions. A gruesome ritual murder has stained the Oxfordshire countryside. It's just the first incident in a chain of events awakening Detective Inspector Joel Solomon to his worst nightmare-and a dreadful omen of things to come. Because Joel has a secret: he believes in vampires. Alex Bishop is an agent of the Vampire Intelligence Agency. She's tasked with enforcing the laws of the global Vampire Federation, and hunting rogue members of her race. A tough job made tougher when the Federation comes under attack by traditionalist vampires. They have a stake in old-school terror-and in an uprising as violent as it is widespread. Now it's plunging Alex and Joel into a deadly war between the living and the unloving-and against a horrifying tradition given new life by the blood of the innocent. Have you ever wondered why it is that you hear people call your name and turn to reply, but there's no

one there? Or why it is that you leave a room and if you had left that room just a moment earlier, or later you wouldn't have bumped into the person you did? Welcome to the mind of Leo Cathery, we follow his story as he seeks to find the answers to these questions. Welcome to Vala. Sergei Tchoban is one of Europe's most influential architects, his most famous projects include the Federation Tower in Moscow, the DomAquaree in Berlin, and the master plan for the European Embankment project in St Petersburg. An examination of the work and vision of world-renowned architect Sergei Tchoban, Architekt BDA. With offices in Berlin and Moscow, Sergei Tchoban designs, plans, and builds internationally. His most famous projects include the Federation Tower in Moscow, the DomAquaree in Berlin, and the master plan for the European Embankment project in St Petersburg. Despite vigorous activities in new development, Sergei Tchoban is strongly influenced by his origins, and his fondness for historical construction and traditional European cities. SELLING POINTS: - Examines the work and vision of world-renowned architect Sergei Tchoban - Breathtaking photography highlights the architect's powerful designs and unique vision 300 col. The first of a thrilling Star Trek® saga—plus a special bonus 32-page look behind the scenes of the hit TV series! Before Janeway

and Sisko, before Picard and Kirk... It Is the twenty-second century...and the dawn of mankind's boldest adventure. Thanks to the amazing breakthroughs in warp technology, an era of true Interstellar exploration is about to begin, and a whole new universe, full of astounding wonders and unparalleled dangers, has just opened up for humanity. Someone has to lead the way, and that someone is Capt. Jonathan Archer of the first Starship Enterprise™, NX-01. Archer and his crew, including Vulcan SubCommander T'Pol and the enigmatic Dr. Phlox, will face challenges previously unimagined as they truly go where no man has gone before™. But they must also survive first contact with a fearsome extraterrestrial race known only as the Klingons. Federation Tower is one of the largest construction projects in Moscow, Russia, but it has had a troubled history. The project team initially planned a 62-story west tower and a 93-story east tower, with a 506-meter spire in between. In 2008, the west tower was completed, but work on the partially built east tower was suspended due to lack of funding. Construction resumed in 2011, but the halt had caused technical issues that had to be fixed. The next year, a fire delayed the project again. Then a main contractor was replaced. In 2014, stakeholders decided to demolish the partially erected spire, change the design and increase the

number of floors to 95. The plan is now to complete the tower this year. Project managers viewing this troubled project might wonder: Could improved risk management have prevented any of this delay and rework? Fortunately, modern risk analysis techniques allow us to create an accurate project forecast with ranges that account for risks and uncertainties. By accurately estimating the probability and impact of risk drivers, we can create a risk-adjusted project schedule. Analyzing this schedule provides us with answers to very important questions: What happens to the schedule if certain risks occur, and what is the chance that the project or a certain milestone will be completed on time and on budget? The saga of the Star Trek: Enterprise TV series continues with this thrilling original novel! The time has come to act. Following the destructive consequences of the Ware crisis, Admiral Jonathan Archer and Section 31 agent Trip Tucker both attempt to change their institutions to prevent further such tragedies. Archer pushes for a Starfleet directive of non-interference, but he faces opposition from allies within the fleet and unwelcome support from adversaries who wish to drive the Federation into complete isolationism. Meanwhile, Tucker plays a dangerous game against the corrupt leaders of Section 31, hoping to bring down their

conspiracy once and for all. But is he willing to jeopardize Archer's efforts—and perhaps the fate of an entire world—in order to win? ™, ®, & © 2016 CBS Studios, Inc. Star Trek and related marks are trademarks of CBS Studios, Inc. All Rights Reserved. It is all about the world's leading Façade Access System experts coming up with exceptional façade access solutions to 62 iconic architectures around the world designed by the world's leading architects. This is intended for: - Architects - Builders - Consultants - Contractors - Façade Engineers and - Facility Managers This book provides the necessary information on how the façade access challenges have been solved around the world. It also gives a valuable reference on how the current and future challenges in façade access can be solved on more and more challenging architectural designs that we are coming across now and are expected to come up in the foreseeable future. The Starship Enterprise NX-01 is Earth's flagship - the first vessel to embark on a systematic exploration of what lies beyond the fringes of known space. Led by Captain Jonathan Archer, eighty of Starfleet's best and brightest set forth to pave humanity's way to the stars. Tempered by a year of interstellar exploration, the crew has become a disciplined, cohesive, unit. And now, for the first time, they have lost one of their number. Bad enough that Ensign Alana Hart is

dead. Worse, she died while attempting to sabotage the ship, killed by her nominal superior, armory officer Lieutenant Malcolm Reed. Even as they deal with the circumstances of her death, Archer, Reed and the rest of the crew find themselves caught squarely in the middle of another tense situation - a brutal war between two alien civilizations. But in the Alpha System nothing is what it seems. And before he can discover the secret behind what happened to Ensign Hart, Reed is forced once more to confront the reality of death.

In this brilliant, very original survey of the politics and meanings of urban landscapes, leading sociologist Gran Therborn offers a tour of the world's major capital cities, and the forces that have shaped them. Through a global, historical lens, and with a thematic range extending from the mutations of modernist architecture to the contemporary return of urban revolutions, Therborn questions received assumptions about the source, manifestations and reach of urban power, combining perspectives on politics, sociology, urban planning, architecture, and urban iconography. With its unique systematic overview, from Washington DC and revolutionary Paris to the flamboyant twenty-first century capital of Kazakhstan, its wealth of urban observations from all the populated continents, and its sharp and multi-faceted analyses, *Cities*

of Power forces us to rethink our urban future, as well as our historically shaped present. The *Ebony Tower*, comprising a novella, three stories, and a translation of a medieval French tale, echoes themes from John Fowles's internationally celebrated novels as it probes the fitful relations between love and hate, pleasure and pain, fantasy and reality. There's likely no more of a thankless job in the Federation than temporal investigation. While starship explorers get to live the human adventure of traveling to other times and realities, it's up to the dedicated agents of the Federation Department of Temporal Investigations to deal with the consequences to the timestream that the rest of the Galaxy has to live with day by day. But when history as we know it could be wiped out at any moment by time warriors from the future, misused relics of ancient races, or accident-prone starships, only the most disciplined, obsessive, and unimaginative government employees have what it takes to face the existential uncertainty of it all on a daily basis . . . and still stay sane enough to complete their assignments. That's where Agents Lucsly and Dulmur come in—stalwart and unflappable, these men are the Federation's unsung anchors in a chaotic universe. Together with their colleagues in the DTI—and with the help and sometimes hindrance of Starfleet's finest—they do what they can to keep the

timestream, or at least the paperwork, as neat and orderly as they are. But when a series of escalating temporal incursions threatens to open a new front of the history-spanning Temporal Cold War in the twenty-fourth century, Agents Lucsly and Dulmur will need all their investigative skill and unbending determination to stop those who wish to rewrite the past for their own advantage, and to keep the present and the future from devolving into the kind of chaos they really, really hate. "Council on Tall Buildings and Urban Habitat." Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 25. Chapters: City of Capitals, Eurasia (building), Federation Tower, Hotel Leningradskaya, House on Mosfilmovskaya, Imperia Tower, Ivan the Great Bell Tower, Kotelnicheskaya Embankment, Menshikov Tower, Mercury City Tower, Moscow Octod Tower, Moscow State University, Naberezhnaya Tower, Ostankino Tower, Radisson Royal Hotel, Moscow, Russia Tower, Seven Sisters (Moscow), Shukhov Tower, Sukharev Tower, Triumph Palace. Excerpt: Lomonosov Moscow State University (Russian: , Moskovskiy gosudarstvennyy universitet imeni M. V. Lomonosova), previously known as Lomonosov University or MSU (Russian: , Universitet Lomonosova; Russian: , MGU), is the oldest and largest university in

Russia. Founded in 1755, the university was renamed in honor of its founder, Mikhail Lomonosov, in 1940. It also claims to have the tallest educational building in the world. Its current rector is Viktor Sadovnichiy. Currently the university employs more than 4,000 academics and 15,000 support staff. Approximately 5,000 scholars work at the university's research institutes and related facilities. More than 40,000 undergraduates and 7,000 advanced degree candidates are enrolled. More than 5,000 specialists participate in refresher courses for career enhancement. Annually, the university hosts approximately 2,000 students, graduate students, and researchers from around the world. Since 1953, most of the university's departments have been situated on Sparrow Hills, in the southwest of Moscow, five miles from the city center. Located on Moscow's outskirts at the time of its construction, the location of the main building is now about half-way between the center of Moscow at the Kremlin and the city's current limits. The Journalism Department now occupies the university's original location in downtown Moscow across from the Manezh, steps from the Kremlin and... A United Nations insider exposes the ugly truth about the UN—including how UN organizations have been funding terrorist groups! In the New York Times bestseller Tower

of Babble, former United Nations ambassador Dore Gold blows the lid off the UN's shocking failures to keep international peace, its corruption, its rampant anti-Americanism, and its emboldening of terrorist organizations. Citing previously unpublished documents, a brand-new chapter exclusive to this paperback edition provides the untold story of the infamous oil-for-food scandal—including the real scandal, that the UN let oil-for-food money go to fund terrorist organizations. Over centuries and across cultures people have defied gravity in a quest to build the tallest, grandest structures imaginable.

Skyscrapers: Investigate Feats of Engineering with 25 Projects invites children ages 9 and up to explore the innovation and physical science behind these towering structures. Trivia and fun facts illustrate engineering ingenuity and achievements from the ancient pyramids to the Empire State Building. Readers will develop an understanding of how our modern, sophisticated building techniques and materials evolved over time. Activities and projects encourage children to explore the engineering design process. They will engage in hands-on explorations of wind, test Newton's laws of motion, and experiment with the strength of different shapes. In the process they will learn about gravity, inertia, oscillation, and static electricity. Using various materials and engaging in trial and error, readers will

construct their own towers and skyscrapers. Skyscrapers meets common core state standards in language arts for reading informational text and literary nonfiction and is aligned with Next Generation Science Standards. Guided Reading Levels and Lexile measurements indicate grade level and text complexity. Complete reference book, beautifully illustrated, of the world's tall buildings. An original novel set in the universe of Star Trek: Enterprise! The United Federation of Planets has weathered its first major crisis, but its growing pains are just beginning. Admiral Jonathan Archer hopes to bring the diverse inhabitants of the powerful and prosperous Rigel system into the Federation, jump-starting the young nation's growth and stabilizing a key sector of space. Archer and the Federation's top diplomats journey to the planetoid Babel to debate Rigel's admission . . . but a looming presidential race heats up the ideological divide within the young nation, jeopardizing the talks and threatening to undo the fragile unity Archer has worked so hard to preserve. Meanwhile, the sinister Orion Syndicate recruits new allies of its own, seeking to beat the Federation at its own game. Determined to keep Rigel out of the union, they help a hostile Rigelian faction capture sensitive state secrets along with Starfleet hostages, including a young officer with a vital destiny. Captain Malcolm Reed, Captain T'Pol,

and their courageous crews must now brave the wonders and dangers of Rigel's many worlds to track down the captives before the system is plunged into all-out war. An original novel continuing the saga of the TV series Star Trek: Enterprise—featuring Captain Jonathan Archer and the crew of the Enterprise! Years ago, Jonathan Archer and T'Pol helped unearth the true writings of Vulcan's great philosopher Surak, bringing forth a new era of peaceful reform on Vulcan. But when their discovery is seemingly proven to be a fraud, the scandal threatens to undo a decade of progress and return power to the old, warlike regime. Admiral Archer, Captain T'Pol, and the crew of the U.S.S. Endeavour investigate with help from their Vulcan allies, but none of them suspect the identity of the real mastermind behind the conspiracy to reconquer Vulcan—or the price they will have to pay to discover the truth. Meanwhile, when a long-forgotten technological threat re-emerges beyond the Federation's borders, Captain Malcolm Reed of the U.S.S. Pioneer attempts to track down its origins with help from his old friend "Trip" Tucker. But they discover that other civilizations are eager to exploit this dangerous power for their own benefit, even if the Federation must pay the price!™, ®, & © 2015 CBS Studios, Inc. Chapters: City Hall and City Duma, City of Capitals, Edelweiss (skyscraper), Eighth Sister (Moscow), Eurasia (building), Evolution Tower, Federation Tower, Hotel Leningradskaya, House on Mosfilmovskaya, Imperia Tower, Kotelnicheskaya Embankment, List of tallest buildings in Moscow, Mercury City Tower, Ministry of Construction of Heavy Industry, Moscow International Business Center, Moscow Octod Tower, Moscow State University, Naberezhnaya Tower, Nordstar Tower, Radisson Royal Hotel, Moscow, Russia Tower, Seven Sisters (Moscow), Sparrow Hills (building), Swissotel Krasnye Holmy Moscow, Triumph Palace. Excerpt: Moscow International Business Center (Russian: Moskovskiy Mezhdunarodniy Delovoy Tsentr; MMDTs), also referred to as Moscow-City (Russian:) is a commercial district in central Moscow, Russia. Located near the Third Ring Road in Presnensky District of western Moscow, the Moscow-City area is currently under development. The Moscow IBC is expected to become the first zone in Russia to combine business activity, living space and entertainment in one single development. The Moscow government first conceived the project

in 1992. An estimated 250,000 - 300,000 people will be working, living, or visiting the complex at any given time. In order to manage the project a public company CITY was created in 1992 which is responsible for overseeing the initial creation and development of Moscow City as well as its subsequent exploitation. CITY is also a general contractor and both landlord and lessor. Overall responsibility for the architectural planning and design of Moscow City belongs to the architectural studio No. 6, which is a part of the large Moscow practice Mosproject-2 named after Mikhail Vasilyevich Posokhin. This group, headed by... This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective. The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social, environmental, and engineering sciences. Together they document and illustrate with case studies, maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical, contemporary and postmodern perspectives. This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local, regional, and global scales and from disciplinary and trans-

disciplinary perspectives. This book contains the materials of the Conference "Construction and Development: Life Cycle-2020" (CDLC-2020), held at Chuvash State University, Russia. The content of this volume is devoted to improving methods for calculating building structures, strengthening them and assessing their suitability for use, monitoring buildings, improving building technologies, geotechnics, energy efficiency of building envelopes and energy systems, introducing new structures and materials, and economic assessment of construction. It also consists of test data for load-bearing building structures. This volume will prove to be a valuable resource for those in academia and industry.
